Vermilion, Ohio—The Wakefield Brass Co. will receive bids for the construction of a one-story, 60x90-ft. factory. Devore & McGormley, Toledo, are the Engrs.

Youngstown, Ohio—The Distilled Water Ice Co. has had plans prepared for a new plant, to be erected on West Federal St. The estimated cost is $100,000. William Winsworth is the Mgr. Noted Mar. 12.

LaFayette, Ind.—The Fort Wayne & Northern Indiana Traction Co., Fort Wayne, Ind., is having plans prepared for a one- and two-story car barn and repair shop. The estimated cost is $20,000. Devore & McGormley, Toledo, are Engrs.

Bay City, Mich.—The North American Construction Co., makers of portable houses, has had plans prepared for the erection of a factory, which will have 100,000 sq.ft. of floor space.

+**Detroit, Mich.**—The Telfer Coffee Co. has awarded a contract to DeLISLE & COOKER, 37 Campan Bldg., Detroit, for the construction of a three-story, 30x150-ft. warehouse, at $40,000. Joseph E. Mills & Son, 510 Washington Arcade, have prepared the plans.

Carbondale, Ill.—The Carbondale Bottling & Ice Cream Co. has purchased a site on South East and Walnut St. where it plans to erect a new plant.

Chicago, Ill.—T. C. Dennely, furniture manufacturer, has had plans prepared for the erection of a brick furniture factory at 81 East Van Buren St. The estimated cost is $118,000. F. A. Perkins is the Arch.

Chicago, Ill.—Morris & Co., 1455 West 44th St., Chicago, meat packers, has had plans prepared and will erect a two-story brick factory to cost about $40,000. F. A. Fielder is the Arch.

Peoria, Ill.—The Kise Electric Co. plans the erection of a 50x200-ft. factory.

Madison, Wis.—The Heibel Bottling Co. is having plans prepared for a two-story, 54x100-ft. bottling works, to be constructed on North Fairchild St., at an estimated cost of $15,000. F. L. Kronenberg, Slichter Bldg., Madison, is the Arch.

Manitowoc, Wis.—The Aluminum Specialty Mfg. Co. plans to build a one-story, 60x200-ft. factory, with provision for additional stories. Emil Krug is the Pres.

Milwaukee, Wis.—The Chicago, Racine & Milwaukee R.R. will receive bids for the erection of a 112x130-ft. reinforced concrete warehouse at the foot of Erie St. The estimated cost is $100,000. Archs., Schnetzky & Son, have prepared the plans. Noted June 4.

Rockton, Wis.—The Great Northern Mfg. Co., manufacturers of [illegible] has acquired a site where it is planned to erect a new factory.

Des Moines, Iowa—[illegible] & Strathers, [illegible] Sixth Ave., are having plans prepared for the construction of a two-story, [illegible]-ft [illegible] factory to cost [illegible]. Proudfoot, Bird & Rawson, [illegible] Bldg., are the Archs.

Marshalltown, Iowa—The [illegible] Furnace Co. has had its plans [illegible] and will receive bids for the construction of a two-story [illegible]-ft factory. The estimated cost is [illegible]. W. S. [illegible] Co., [illegible] Euclid Bldg., Cleveland, Ohio, has prepared the plans. Noted July [illegible], 1913, Feb. 26.

Sioux Falls, S. D.—The Manchester Biscuit Co., Sioux Falls, plans to build a seven-story, [illegible]x120-ft factory. Joseph Schwarz, Sioux Falls, is the Arch.

Kansas City, Mo.—C. M. Beachy and associates, of Wichita, Kan., have organized the [illegible] Ice Co., and will build a plant with a daily capacity of [illegible] tons. The estimated cost is [illegible]. Plans by the McCandish Engineering Co., Kansas City.

St. Joseph, Mo.—The Chicago, Burlington & Quincy R.R. Co. plans to erect a grain elevator of [illegible] bu. capacity. The estimated cost is [illegible].

♦**St. Louis, Mo.**—The Interstate Printing Co., 39 Laclede Ave., has awarded the contract for the construction of a one-story printing plant to L. W. PETERS, St. Louis, at [illegible].

Earle, Ark.—The Planters [illegible] & Gin Co. plans to erect and equip a plant here, estimated to cost [illegible].

Rochester, Nev.—The Rochester Mines Co., Humboldt County, Nev., plans to erect an all-slime cyaniding plant, estimated to cost [illegible]. John F. Cowen is Pres.

Biggs, Calif.—The California Rice Milling Co. plans to enlarge its plant at an estimated cost of about $10,000. J. B. Hayes is in charge.

Chico, Calif.—The Associated Oil Co. has purchased a tract of land in Chico Vecino, bordering the Southern Pacific R.R., where it plans to erect a distributing station, to cost $12,[illegible].

Colton, Calif.—The California Portland Cement Co. plans to build [illegible] to its plant which will raise its capacity to [illegible] bbl.

Los Angeles, Calif.—The Harbor Commission plans to erect a seven-story, [illegible]x[illegible]-ft reinforced-concrete warehouse opposite [illegible] Island wharf. The estimated cost is $1[illegible].

Oakland, Calif.—The R. M. [illegible] Co., Los Angeles, Calif., plans to build a fiber-box plant estimated to cost about [illegible].

South Pasadena, Calif.—The [illegible] Co., [illegible] South San Pedro St., is having plans prepared for a group of new factory additions. [illegible] F. Marsh, Broadway Central Bldg., Los Angeles, is the Arch.

♦**Montreal, Que.**—The Canadian Pacific Ry. Co., Montreal, has awarded the contract for additions to its Angus shops to [illegible] CO., LTD. Sub-contract for furnishing the piles was let to the RAYMOND CONCRETE PILE CO., LTD., Montreal. Noted Sept. [illegible].

Fort William, Ont.—The M. M. Patterson Co. plans to erect a [illegible]-bu. capacity grain elevator.

♦**Hamilton, Ont.**—The National Steel Car Co. has awarded the contract for the construction of the addition to its passenger car plant to the HAMILTON BRIDGE CO.

Selkirk, Man.—The [illegible] Paper & Pulp Mills, Ltd., [illegible] St., plans the construction of a new mill to cost [illegible].

♦**Medicine Hat, Alta.**—The [illegible] Sanitary [illegible] Co. has awarded the general contract for the construction of its factory to [illegible], Spokane, Wash., at [illegible]. [illegible], is the Pres.

FEDERAL GOVERNMENT WORK

Steel and Wire—[illegible]

♦**Dredging**—Boston, Mass.—The Directors of the Port [illegible] Frank W. Hodgdon, Boston, is Ch. Engr.

Tunnel—Boston, Mass.—The Boston Transit Commission [illegible]

Barge Canal Work—Albany, N. Y.—Bids were received Aug. 11 by Duncan W. Peck, State Supt. Pub. Wks., Albany, for (a) Contract No. 1-A; (b) Contract No. 34; (c) for highways adjacent to the Hinckley Reservoir; (d) for bridge over the Erie Canal at Yorkville, Oneida County; (e) for highway change, Road N, adjacent to Contract No. 19; (f) for Hinmansville highway change; (g) for highway bridge over the canalized Mohawk River at Movable Dam 5. The lowest bids follow: (a) Holler & Shepard, Rochester, N. Y., $120,459; (b) Champlain Engineering and Construction Corporation, Saratoga Springs, N. Y., $16,843; (c) J. L. Richmond, Little Falls, N. Y., $93,981; (d) Scott Bros., Rome, N. Y., $94 582; (e) W. L. O'Day, 263 Norwood Ave., Buffalo, N. Y., $4455 (sole bidder); (f) I. M. Ludington Sons Co., Rochester, $2505; (g) Lupfer & Remick, Buffalo, $42,976.

★**Lavatories**—Albany, N. Y.—(Official)—Bids will be received until 2 p.m., Aug. 26, by the Trustees of Public Buildings, Executive Chamber, Capitol, Albany, for new lavatories for the state capitol. Lewis F. Pilcher, Albany, is State Arch.

Shipyard—Albany, N. Y.—The New York & Buffalo Barge Co. plans to construct a ship yard at Albany.

✚**Concrete Pile Foundations**—New York, N. Y.—(Official)—Contracts for the concrete pile foundations of the following structures have been awarded to the MacARTHUR CONCRETE PILE & FOUNDATION CO., 11 Pine St., New York: Grain bins and elevator, Stanard Tilton Milling Co., Alton, Ill.; bakery for Ward Baking Co., East Orange, N. J., Cramp & Co., general contractors, New York, C. B. Comstock, Arch., 110 West 40th St., New York; weave shed, Salt's Textile Mfg Co., Bridgeport, Conn.; Dowling & Bottomley, general contractors, Bridgeport.

Playground—New York, N. Y.—(Borough of Brooklyn)—(Official)—Bids will be received until 10:30 a.m., Aug. 28, by the Public Recreation Commission, Municipal Bldg., Borough of Manhattan, for constructing the Betsey Head memorial playground in Brownsville, Brooklyn.

Subway—New York, N. Y.—(Borough of Brooklyn)—(Official)—Bids will be received until 12:15 p.m., Sept. 11, by the Public Service Commission, 154 Nassau St., Borough of Manhattan, for constructing Route 29, a part of the Eastern Parkway rapid transit railroad.

Fire Apparatus—Jersey City, N. J.—Frank Hague, Dir. Pub. Safety, is considering the addition of the following equipment for the Fire Department: Two motor-driven pumping engines, estimated cost $20,000;. two new motor tractors for fire engines, estimated cost $8500; two aerial trucks ,estimated cost $22,000; and the installation of new fire alarm boxes to cost about $2500.

✚**Coal Conveyor**—Jersey City, N. J.—The Public Service Corporation has awarded contracts as follows, for constructing its proposed coal conveyor: Foundations, to STILLMAN-DELAHANTY-FERRIS CO., 16 Exchange Place, Jersey City; superstructure to R. D. COOMBS & CO. Estimated cost, $12,000.

★**Dock**—Newark, N. J.—(Official)—Bids will be received until 3:15 p.m., Aug. 27, by the Board of Street and Water Commissioners for the construction of a dock approximately 4500 ft. long along the northerly side of the city channel now being dredged near the mouth of Peddie St. Ditch in Newark Bay.

The work will be divided into two sections. Sect. No. 1, approximately 2500 ft. long, being that portion inshore from the present shore line westerly. Sect. No. 2, approximately 2000 ft. long, is that section from the present shore line out in the bay following the line of the channel now being dredged. Although the dock will be a continuous construction it will be divided into two sections in the contract as they differ somewhat in the form of construction and the contractor will be required to start his work at the easterly end of Sect. No. 1 and complete at least 1000 ft. of this section before Dec. 1, 1914. The completion of Sect. No. 2 will depend upon the completion of the bulkhead or cribbing in the bay which will form the northerly side of this section.

The estimated quantities of materials to be furnished under this contract and upon which unit prices are asked for in the bids are the following: 405,500 lin.ft. creosoted short leaf yellow pine piles; 78,850 lin.ft. untreated short leaf yellow pine piles; 90,000 lin.ft. white oak piles—fender and snubbing; 3,319 M. ft. B. M. sawed creosoted long leaf yellow pine lumber; 4,025 cu.yd. concrete; 143,900 lb. reinforcing steel concrete; 4500 lin.ft. of standard gage railroad track, 100 lb. rails; 4,500 lin.ft. 10-ft. gage derrick track, 150 lb. rails; 150 snubbing cleats, cast-iron, in place; 32,000 tons, riprap; (ton of 2000 lb.).

The plans and specifications for this work are on file in the office of Morris R. Sherrerd, Ch. Engr.

✚**Coal Breaker**—Highland, Penn.—C. B. Markle & Co. have awarded the contract to WHEELER & RILEY, Wilkes-Barre, Penn., for constructing a coal breaker at Highland, at $80,000.

✚**Stable**—Wilmington, Del.—The Hauber Baking Co. has awarded the contract to ELWOOD SHARP, Wilmington, for constructing a two-story stable, 40x100 ft.

Stadium—Cincinnati, Ohio—The University of Cincinnati will ask for bids soon for a stadium to seat 13,000.

☆**Excavation, Etc.**—Cleveland, Ohio—Bids were received Aug. 13, by A. R. Callow, Comr. Purchases and Supplies, for excavating, transporting and disposing of all material necessary to prepare the present site for the construction of the proposed South Side sewage treatment works. The lowest bid was submitted by Charles Fath & Co., Cleveland, at $86,078 for Division 1 and $94,288 for Division 2. The approximate quantities follow: Engineer's office, complete; 2900 lin.ft. of surface drain; furnishing and placing 3850 lin.ft. of 6- to 15-in. vitrified pipe; 316,000 cu.yd. of excavation; transportation and disposal of material; 1800 tons of stone riprap.

Levees—Dayton, Ohio—The earthwork contract calling for about 1,200,000 cu.yd. will be under way this fall. This is a river improvement, which will result in the reclamation of a large area of low ground within the city limits. G. C. Cummin is City Engr.

★**Creek Improvement**—Greenville, Ohio—(Official)—Bids will be received until 11 a.m., Aug. 22, by J. L. Morgan, County Audr., Greenville, for the Stillwater Creek Improvement. For details see advertisement under "Contracts to Be Let."

✚**Dock and Wall**—Detroit, Mich.—The Department of Public Works has awarded the contract to JOHN GINZEL, Buhl Block, Detroit, for constructing a concrete dock and retaining wall along the river front, at $13,823.

Drainage—Clintonville, Wis.—Farmers plan to drain 10,000 acres of land in the vicinity of Clintonville. E. R. Jones, Soil Expert, College of Agriculture, University of Wisconsin, Madison, Wis., is in charge.

✚**Mausoleum**—Marshfield, Wis.—W. D. Conroy plans to erect a mausoleum at Marshfield. The contract for the marble required has been awarded to the HARRISON GRANITE CO., New York, at $20,000.

Fire Apparatus—Milwaukee, Wis.—Bids will be received until 10:30 a.m., Aug 21, by the Department of Public Works for two automobile combination pumping engines and hose wagons.

Bath-house—Milwaukee, Wis.—The city plans to construct a bath-house at McKinley Park Beach. Estimated cost, $25,000. C. J. Pinney, Supt. Bridges and Bldgs., is in charge.

✚**Ditches**—Stevens Point, Wis.—The Daney Drainage District has awarded the contract to the ROOD CONSTRUCTION CO., Grand Rapids, Wis., for constructing about 16 miles of ditches, at about $30,000.

Ditches—Forest City, Iowa—C. K. Nelson, County Audr., has rejected all bids opened for ditch work in District 35. New bids will be received until Sept. 22.

Drains—Nevada, Iowa—Bids will be received until 1:30 p.m., Aug. 25, by C. A. Batman, County Audr., Nevada, for constructing drains in Indian Creek Township.

Barn—Sioux City, Iowa—The Sioux City Stockyards Co. will ask for bids soon for a barn to cost $22,000. It will be two stories, 200x200 ft. W. L. Steele, Sioux City, is Arch.

Wall—Waterloo, Iowa—C. A. Roby, City Engr., is preparing plans for a flood protection wall to be constructed along the east bank of the Cedar River and opposite the waterworks plant.

✚**Ditch**—Fairmount, Minn.—The County Supervisors, Aug. 4, awarded the contract to W. C. MARKLAND & CO., Fairmount, for constructing Ditch 39, at $39,990.

Ditch—Slayton, Minn.—W. A. Seeman, County Audr., Slayton, has rejected all bids for constructing Ditch No. 2.

★**Cement**—Kansas City, Mo.—(Official)—Bids will be received until 2 p.m., Sept. 11, by the City Purchasing Agent, for furnishing and delivering asphaltic cement for the use of the municipal asphalt plant for a period of one year. Estimated amount, 1500 tons. Specifications may be had of Clark R. Mandigo, Asst. City Engr.

Drainage—Davenport, Ark.—Davenport Drainage District has been organized to reclaim about 13,120 acres. Bonds for $75,000 will be issued.

Levees—Melana, Ark.—The property owners in the Bottom Belt Levee District, July 29, authorized a bond issue for $350,000 to complete proposed levees. John Quarles, Helena, Ark., is Ch. Engr.

✚**Drainage**—Judsonia, Ark. — Little Red River Drainage District has awarded the contract to McGREG & FOSTER, Cotton Plant, Ark., for drainage work calling for about 300,000 cu.yd., at 14.45c. per cu.yd. The first 100,000 cu.yd. has been sublet to JOHNSON & WAGGON, Judsonia.

✚**Drainage**—Judsonia, Ark.—Bids were opened, July 20, by the Commissioners of Overflow Drainage District of White County at Judsonia, for drainage work calling for 594,700 cu.yd. of excavation. Contracts have been awarded as follows: 18,000 cu.yd., F. O. WHITE, Bald Knob, Ark., at 16c. per cu.yd.; 576,700 cu.yd., to E. J. HAHN, Little Rock, Ark., at 9.4c. per cu.yd.

Levee Work—Caldwell, Tex.—Burleson county has voted to issue $136,000 in bonds to repair and enlarge the levee along the Brazos River, in the eastern part of the county.

Pier—Redondo Beach, Calif.—The city plans to construct a recreation pier to cost $121,000.

Cement—Seattle, Wash.—Bids will be received until Aug. 27 by the Port of Seattle Commissioners for 7500 bbl. of portland cement to be used in grain elevator construction.

Dam—Seattle, Wash.—The Board of Public Works will award the contract soon for constructing Cedar River Dam. Estimated cost, $150,000.

Dock—Seattle, Wash.—The Grand Trunk Pacific Ry. plans to construct a reinforced concrete dock to replace the structure recently destroyed by fire, with a loss of $350,000. S. P. Lucas, Harbor Engr. for the company, is in charge of the proposed work.

Dock Work—Portland, Ore.—The Port of Portland Commissioners has authorized the sale of $150,000 of bonds, part

of the [illegible] to be used to improve the docks in the east and west sections of the city.

Fire Hose—Portland, Ore.—Bids will be asked soon by the City Purchasing Agent for 14,650 ft. of fire hose.

Number Plates—Sacramento, Calif.—Bids will be received by F. A. McClure, State Engr., Sacramento, for 120,000 pairs of automobile number plates, etc.

Mausoleum—Riverside, Calif.—The California Mausoleum Co., [illegible], Calif., will construct a reinforced-concrete and marble mausoleum in Riverside, to cost about $80,000.

Levee Work—Sacramento, Calif.—Bids will be asked at once by the state for levee work to cost $300,000. J. C. Boyd, Sacramento, is Engr.

Ferry Slips—San Francisco, Calif.—The state has had plans prepared for two ferry slips to be constructed at the south end of [illegible] Ferry. Estimated cost, $125,000. W. F. McClure, Sacramento, Calif., is State Engr.

Seawall—Santa Barbara, Calif.—(Official) The city has awarded the contract to the MERCERAU BRIDGE & CONSTRUCTION CO., Los Angeles, Calif., for constructing the seawall on west boulevard, at $16,392, for Type "E" wall. Other bidders were: Mesmer & Rice, Los Angeles, $61,099; [illegible] & Munoz, Los Angeles, $58,812; Russell-Green Foell Co., Los Angeles, $64,300; Beatty Construction Co., Santa Barbara, $59,374; Ashton-Bridgeman Co., San Francisco, $59,4[illegible]; T. J. Shea, Berkeley, $63,323. Engineer's estimate, $65,[illegible]47. It will be 17.5 ft. high and 1876 ft. long. George Robinson is City Engr.

Bank Protection—Stockton, Calif.—The state plans to spend $3[illegible] and the State Engineering Board $20,000 for bank protection work at Stockton. W. F. McClure, Sacramento, Calif., is State Engr.

Harbor Improvements—Haileybury, Ont.—The Public Works Department, Ottawa, Ont., is preparing plans for harbor improvements at Haileybury to cost about $10,000.

Drydock—Owen Sound, Ont.—The city plans to construct a drydock. F. F. Pitts, Niagara Falls, Ont., is Engr.-in-Charge.

BUILDINGS

✚Lewiston, Maine—Jones & Barnabee, Boston, Mass., are preparing plans for the theater on Main and Middle Sts. The estimated cost is $75,000. The contract for the foundation has been awarded to GEORGE W. LANE, Lewiston.

✚Barre, Vt.—The contract for erecting a hotel at Barre has been awarded to the W. SHELTON SWALLOW CO., 10[illegible] West [illegible]th St., New York, N. Y. The building will be of brick and stone, six stories, 37x130 ft., and is estimated to cost $7[illegible]. George N. Bartlett, 103 Park Ave., New York, N. Y., is the Arch.

✚Barre, Vt.—The contract for building the addition to the high school was awarded to W. E. JACKSON, Montpelier, Vt. The building will be of brick, two stories, [illegible]x122 ft., and will cost $48,000. F. A. Walker, 43 State St., Montpelier, and Brainerd & Leeds, 8[illegible] Franklin St., Boston, Mass., are the Archs. Alfred S. Kellogg, [illegible]3 State St., Boston, is the Engr.

Boston, Mass.—The city contemplates the construction of an industrial school for boys, estimated to cost, including site, $[illegible]. Richard A. Lynch is Supt. of School Bldgs.

✚Boston, Mass.—The contract for constructing the six-story brick building at 29 Edinboro St., for Daniel C. Collins, has been awarded E. STODDARD & SONS CO., 85 Purchase St.

Fall River, Mass.—E. I. Marvell, 57 North Main St., is preparing plans for a school on Tucker St., to cost about $80,000. The building will be two stories, of brick.

✚Springfield, Mass.—The contract for constructing the six-story brick and reinforced concrete business building for [illegible], Pickard & Wheat, has been awarded to FREDERICK T. LEY & CO. B. Hammett Seabury is Arch.

✚**Eugene, Wash.**—The contract for erecting the high school has been awarded to A. C. APPLEWHITE at $58,984. Noted June 4.

✚**Lynden, Wash.**—The contract for building the high school has been awarded to JAMES TRAPMAN, Lynden, at about $54,000.

✚**Vancouver, B. C.**—The School Board has awarded the contract for constructing the school to McDONALD & WILSON, at $66,871.

CONTRACT PRICE

Bridge Substructure—Chicago, Ill.—Bids were received Aug. 5 by the Commissioner of Public Works for the construction of the substructure of a double- leaf trunnion bascule bridge over the North Branch of the Chicago River at Belmont Ave., Chicago, from (A) Great Lakes Dredge & Dock Co.; (B) Nash-Dowdle Co.; (C) Byrne Bros. Dredging & Engineering Co.; (D) FitzSimons & Connell Dredge & Dock Co.; (E) Standish & Allan. The item bids were as follows:

Engineering Work at Duluth, Minn.—There is considerable engineering work in progress at Duluth, Minn., this season. The city is doing a large amount of paving, and will construct two miles of concrete road to the new model town of Morgan Park, noted below.

A portland-cement plant is being built by the Universal Portland Cement Co., and adjacent to this the Minnesota Steel Co. is erecting a large steel plant, which probably will be completed next season. This latter company is also constructing a "model town" known as Morgan Park. This work includes building about 140 residences, a hospital, store building, school house, etc; also complete sewer and water supply systems and concrete paving for the principal streets. All of the above work is within the city limits of Duluth.

Not to Build a Non-Union Factory—J. D. Butts, superintendent of construction, for the Ford Motor Co., at Long Island City, denied there was any truth in the rumor that the Ford Co. had declared a policy against the employment of union labor on its new factory addition at Long Island City.

"The entire responsibility," he said, "lay with the contractor. When a contract is awarded the Ford Company is concerned only about its competition and does not attempt to dictate whether the work shall be done by union or non-union labor. However, in the last six months, all contracts which have been let have contained a clause which requires a contractor to keep his work going by the employment of non-union men if the union labor then employed call a strike."

The Terry Steam Turbine Co., Hartford, Conn., announces that it has appointed Fidanque Bros. & Sons, New York and Panama, with main offices at 15 Whitehall St., New York, its representative for the Republic of Panama and the Canal Zone. The Cleveland office of the Terry Turbine Co., in charge of L. G. Finlay, has been removed from 710 New England Bldg. to 503 Union Bldg.

At the Shipyards of the Polson Iron Works, Toronto, Ont., the launching took place recently of the third lighter built there for the Department of Railways and Canals of the Canadian Government. It is intended for service in the development of the Hudson Bay terminals. It is 120 ft. long, 21½ ft. beam and 11 ft. draft, and is of the single-screw type. Its power equipment includes a 250-hp. Clyde boiler. The lighter will be steam heated and electrically lighted. The deck equipment includes two 30-ton winches in addition to stem windlasses and capstan. The machinery and engines were placed in the hull previous to launching.

The Union Fiber Co., Winona, Minn., has opened a branch office at 711 Empire Bldg., Atlanta, Ga., in charge of A. J. McArthur, Southern representative. To facilitate deliveries and to give small buyers the benefit of carload freight rates, the company is keeping on hand in Atlanta a good stock of linofelts, fibrofelts, union corkboard, waterproof lith, pipe coverings and other cold-storage insulation products.

Intercepting Sewer—Newark, N. J.—Bids were received, July 14, by the Passaic Valley Sewerage Commissioners for constructing a part of Section 12 of the Main Intercepting Sewer, from (A) Oscar Daniels Co., Woolworth Bldg., New York; (B) Cauldwell-Wingate Co., New York; (C) Fusco Construction Co., Newark; (D) Merrill-Ruckgaber and Mason, Hilton & Co., New York; (E) James S. Frazer, New York; (F) J. F. Shanley Co., Newark. The item bids were as follows:

The Gade Excavating Co., Iowa Falls, Iowa, has designed an excavating machine of light construction which it states will do the wor kof the heavier type and eliminate the expense and trouble of transporting, etc. The excavator is described and illustrated in a catalog recently issued by the company, giving details of construction, operation, power and method of transportation. Views showing the excavator in actual operation are also shown. The Economy excavator is a 12-ton machine, 35 ft. wide and 24 ft. long, all steel, set on four large wheels. The power is furnished by a gasoline engine and is so arranged that the operator can sit in the middle of the machine and operate the shovel from any point.

INDUSTRIAL NOTES

The MacArthur Concrete Pile & Foundation Co., 11 Pine St., New York, N. Y., has been awarded a contract for the construction of the foundation of a gas holder for the Portland Gas Light Co., Portland, Maine. It will consist of 576 pedestal concrete piles and a 12-in. concrete mat. The Bartlett Hayward Co., Baltimore, Md., is the general contractor for the work.

Contracts to Be Let

Bids received until Aug. 29, 1914.

Construction of an Intake Crib, 36 Inch Cast Iron Intake Main and Concrete Shore Well

Proposals will be received at the office of the Village Clerk of Highland Park, Wayne County, Michigan, until 10 o'Clock A.M., Saturday, August 29th, 1914, for

(A) Furnishing and Placing a Steel Intake Crib.

(B) Furnishing, Trenching, Laying and Backfilling about 2800 feet of 36 inch cast iron water main, from a Steel Intake Crib located about 2500 feet off shore in 16 feet of water, to a well 200 feet in shore from Lake St. Clair, at the Water Works Pumping Station of the Village of Grosse Pointe Farms.

(C) Constructing an 18 ft. diameter Concrete Well, 39 ft. deep.

The right is especially reserved by the Village to reject any or all bids and to accept such proposal as will be to the best advantage of the Village.

Plans and Specifications may be seen after Wednesday, August 12, 1914, at the office of the Clerk of the Village of Highland Park, at the office of Gardner S. Williams, Consulting Engineer, Ann Arbor, Michigan, or will be forwarded upon request to the latter office upon the deposit of a certified check in the amount of $10.00, which sum will be refunded upon the return of the Plans and Specifications in good condition.

Bids received until Sept. 15, 1914.

Hanover Street Bridge

STATE OF MARYLAND STATE ROADS COMMISSION
NOTICE TO CONTRACTORS

SEALED PROPOSALS for building a bascule span section IV of Hanover Street Bridge as follows. Bascule bridge having a clear span between fenders of not less than 150 feet, a clear roadway of 50 feet, and two sidewalks with a width of 8 feet in clear of railings, will be received by the State Roads Commission, at its offices, 601 Garrett Building, Baltimore, Maryland, until 12 M. on the 15th day of September, 1914, at which time and place they will be publicly opened and read.

Bids must be made upon the blank form contained in the book of specifications. Specifications and plans will be furnished by the Commission upon application and cash payment of $1.00, as hereafter no charges will be permitted.

No bids will be received unless accompanied by a certified check for the sum of Twenty-five Hundred ($2500) Dollars, payable to the State Roads Commission.

The successful bidder will be required to give bond, and comply with the Acts of the General Assembly of Maryland, respecting contracts.

The Commission reserves the right to reject any and all bids.

BY ORDER of the State Roads Commission this 6th day of August, 1914.

WM. L. MARCY, Secretary. O. E. WELLER, Chairman.

Bids received until Sept. 8, 1914.

Boilers

NOTICE TO CONTRACTORS. Sealed proposals for two 125 H.P. boilers at the New York State Soldiers & Sailors Home, Bath, N. Y., will be received by Hon. Joseph A. Goulden, President of the Board of Trustees, New York State Soldiers & Sailors Home, Bath, N. Y., until September 8th, 1914, at 11:00 o'clock A.M., when they will be opened and read publicly. Proposals shall be accompanied by a certified check in the sum of five per cent. of the amount of bid, and the contractor to whom the award is made will be required to furnish surety company bond in the sum of fifty per cent. of the amount of contract within thirty days after official notice of award of contract and in accordance with the terms of specification No. 1731. The right is reserved to reject any or all bids. Drawings and specifications may be consulted and blank forms of proposal obtained at the New York State Soldiers & Sailors Home, Bath, N. Y., at the Department of Architecture, Capitol, Albany, N. Y., and at the New York office of the Department of Architecture, Room No. 1121, Woolworth Building, New York City, upon deposit of a certified check or cash in the sum of $[illegible], made payable to the State of New York, which check will be returned if plans and specifications are sent back in good order to the State Architect, Lewis F. Pilcher, Capitol, Albany, N. Y.

WILLIAM H. NICHOLS,
Secretary.

Bath, N. Y., August 14, 1914.

Bids received until Aug. 22, 1914.

Reservoir Improvements

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received by the Board of Water Commissioners of Waverly, N. Y., until 12 o'clock, noon on the 22nd day of August, 1914, for raising the embankment of their upper reservoir with all its accessories as shown on the plans, or called for in the specifications.

Plans can be seen and specifications obtained at the office of the Board.

The said Board hereby reserves the right to reject any and all bids, or accept any that in their judgment will be for the best interest of the Village.

A bond satisfactory to said Board in amount and sureties will be required of those to whom the contract may be awarded.

Cash or certified check, made payable to the order of the President of said Board to the amount of $[illegible].00 must be deposited by each bidder and accompany his bid as a guarantee that in case the contract is awarded him, he will, within seven (7) days thereafter, execute said contract.

Bids must be sealed and addressed to said Board of Water Commissioners, Waverly, N. Y., and marked on the outside of the envelope enclosing them, "Proposals for Reservoir Improvements."

ANDREW HILDEBRAND, President.

EDGAR D. [illegible], Clerk.

Bids will be received until Sept. 10, 1914.

Dredging

ENGINEER OFFICE OF THE PORT COMMISSIONERS OF JACKSONVILLE, FLA.

Room 218, Realty Building, Jacksonville, Florida.

Sealed proposals for dredging in the St. Johns River at [illegible] for Municipal Dock and Terminal purposes will be received at this office until noon, September 10th, 1914, and then publicly opened.

Information [illegible] with maps of the locality and a [illegible] of the [illegible] may be had at this office.

F. W. BRUCE, Engineer.

Bids will be received until Sept. 10, 1914.

Bulk-Heads

ENGINEER OFFICE OF THE PORT COMMISSIONERS OF JACKSONVILLE, FLA.

Room 218, Realty Building, Jacksonville, Florida.

Sealed proposals for the construction of interlocking steel sheet piling bulk-heads for Municipal Dock and Terminal purposes, will be received at this office until noon, September 10th, 1914, and then publicly opened.

Information may be had and plans of the proposed project may be seen, together with maps of the locality at this office.

F. W. BRUCE, Engineer.

Merriman asphalt paving plant, railroad type, and sundry accessories, including rollers, concrete mixers, graders, automobiles, tools, supplies, office furniture, etc., etc.

PARCEL NO. 7—Located in the State of Utah, U. S. A.

Certain claims and mining rights covering a deposit of practically pure bitumen (gilsonite) and bituminous limestone.

Possession: Immediate possession of parcels Nos. 1, 2, 3, 4, 5, and 7 can be given on completion of sale. Possession of parcel No. 6 cannot be given until certain paving at the City of Victoria, B. C., in which the Liquidator is at present engaged, is completed. If, before the completion of the sale, the purchaser requires possession of any parcel, of which possession can be given by the Liquidator, he may obtain same by giving security for the unmatured payments satisfactory to the Master in Ordinary of the Supreme Court of Ontario. Tenders must be made on the understanding that inability on the part of the Liquidator to deliver possession of, or transfer the title to any item shall operate as a cancellation of the sale in respect of such item only, and shall not operate as a cancellation of the sale as a whole. The amount of any allowance to be made in respect of any such item shall be determined by the Master-in-Ordinary of the Supreme Court of Ontario.

Tenders will be received for all parcels en bloc and for each parcel separately.

All rentals, taxes, insurance, water rates and similar items will be adjusted to the date of the acceptance of the tender.

Full information as to all parcels with inventories of parcels Nos. 1, 2, 3, 4, 5 and 6 and a schedule of the claims and mining rights included in parcel No. 7, and copies of the Lease referred to in Parcel No. 3 may be obtained from the Liquidator.

NATIONAL TRUST COMPANY, LIMITED, TORONTO, CANADA.

Terms of Payment: Ten per cent. of the amount tendered shall accompany each tender, 15% on the acceptance of the tender, and the remainder in 3 equal installments at 3, 6 and 9 months without interest. On receipt by the Liquidator of the final payment, the sale shall be completed. All tenders must be accompanied by an accepted cheque payable to the Liquidator for 10 per cent. of the amount of the whole tender, which cheque will be returned if the tender is not accepted, and forfeited if the tender is accepted, and purchase not completed by the tenderer.

The highest or any tender not necessarily accepted.

The purchaser shall, at his own expense, make whatever search of title he may deem necessary or expedient, and the Liquidator shall not be required to furnish any abstracts or produce any deeds, declarations, or other evidence of title except those in its possession. The purchaser shall have 15 days from the date of acceptance of tender within which to make any objections or requisitions in respect of the title and in case the purchaser shall, within such time make any objection or requisition which the Liquidator shall from any cause, be unable or unwilling to remove or answer, then the Liquidator may (notwithstanding any intermediate negotiations) rescind the sale, in which case the purchaser shall be entitled only to a return of the deposit money without interest, costs or compensation.

The other conditions will be the standing conditions of sale of the Supreme Court of Ontario, as far as applicable.

Tenders will be opened at the office of the Master-in-Ordinary, Osgoode Hall, Toronto, Can., at 2.30 p.m., on the 18th day of September, 1914, when all tenderers are requested to be present.

Dated at Toronto, this 10th day of July, 1914.

NATIONAL TRUST COMPANY, LIMITED,
Toronto, Ontario, Canada,
Liquidator.

Bids received until Sept. 1, 1914.

State Highway Improvements

NOTICE TO CONTRACTORS—State of New York—Office of the State Commission of Highways, Albany, N. Y.—Pursuant to the provisions of chapter 30, 1909 as amended by chapter 646, Laws of 1911 and chapter 83, Laws of 1913, sealed proposals will be received by the undersigned at their office, No. 55 Lancaster street, Albany, N. Y., at 1 o'clock p. m. on Tuesday, the 1st day of September, 1914, for the improvement of the following highways:

County	Road No.	Name	Approx. Length
Allegany	5312 B	Cuba - Friendship, Part 2	0.17 Mi
Erie	1087 A	Gowanda Village	0.30
Essex	5170 A	Schroon Lake - No. Hudson Part 1	6.77
Nassau	1201	Huntington Town Line - Farmingdale, Part 2	0.41
Ontario	5311	[illegible] - Holcomb	5.67
Rockland	5582	New Jersey State Line - Nyack, Part 1 and 2	3.73
Rockland	5590	Haverstraw - West Haverstraw	1.56
St. Lawrence	[illegible] A	Morristown - Hammond, Part 2	1.99
Wayne	5541	[illegible] - Lyons, Part 3	2.[illegible]
Wyoming	5[illegible] A	Warsaw - [illegible]	0.49
Wyoming	9[illegible]8	Java Village - Wales	3.[illegible]

REPAIRS

Rep. Cont. No.	Class of work	Rd. No.	County	Name	Town
600	H. C. T. Cold Appl. No guarantee	5341	Allegany	Friendship-Belmont	Friendship and Amity
608	L. C. T. Hot and Cold Appl. No guarantee	[illegible]	Oswego	Central Square-[illegible] Square, Part 1	Hastings
6[illegible]1	[illegible] guaranteed	77	Rensselaer	Albia - Wynantskill	Brunswick and North Greenbush

Maps, plans, specifications, estimates and proposal forms may be obtained at the office of the Commission in Albany, and also at the office of the Division Engineer in whose division the work is to be done. The specifications and proposal forms contain all the terms under which bids are received.

The right is reserved to reject any or all bids.

JOHN N. CARLISLE,
Commissioner.

R. K. FULLER,
Secretary.

Construction News

✚Denotes contract awarded. The names of bidders awarded contracts are set in CAPITALS.

CLEARING OF BUSINESS SKIES

Order is coming out of chaos and the financial storm, caused by the stupendous demand for gold from abroad, has abated. Conditions, although still highly sensitive, are improving. Exchange with Europe is obtained only at abnormal prices, but it is possible to do business. Domestic finance is in better condition. It will be many months before order, even in this country, is restored, but how usual values will be depreciated depends on the authorities. Certainly bankers are acting with far more skill and patriotism than they did seven years ago. Interest rates are extremely high. In New York, at least, trust companies refuse to make building loans.

The importation of foreign materials used by American consumers and manufacturers has been largely curtailed, but ocean traffic is gradually augmenting and trade with England, France, Italy and the far East will probably soon be restored. Some very severe competition is cut off for the present because Germany is unable to ship to this country.

Exports of food stuffs are resuming. It will not be long before other commodities also can be sent to foreign buyers. The cotton shipments, which in a large measure offset our unfavorable balance of trade each year are held up and must be caused by home bankers.

Domestic trade has slowed down appreciably. The cutting down of individual expenditures has had its effect in all lines. The buying of food stuffs in anticipation of higher prices has been a feature, and reducing lines of seasonable merchandise by drastic cuts is evident. Stocks, however, are not heavy in any line, neither has there been any marked expansion among disturbers.

The agricultural situation calls for closer observation now than it has in a number of years. The wheat crop is practically the largest on record, and the corn crop, while somewhat of a disappointment compared with that of 1911, is still well above the 10-year average. Those of other grains and hay are large. It must be remembered that grain raising has been abandoned in many localities for general farming, and while the output of corn in bushels may not be as great the food stuff raised for cattle is much larger than ever before and moreover it is evident that there are more cattle in the country now than a year ago. Wheat prices advanced rapidly the last two weeks of August, but since that time have eased off appreciably. It is possible that the highest prices will not be reached until next year.

Business Gains and Losses

New factories will come into being in many diversified lines. A leading importer of ball bearings is building a factory in Philadelphia to employ at least 1000 men to make ball bearings by automatic machinery; a Worcester, Mass., toy manufacturer has recently doubled the capacity of his plant; a Massachusetts engineering firm has taken an order for a coal-handling plant for Australia. American manufacturers of textiles are looking for some methed by which dyes can be produced in this country. Numerous additions to manufacturing plants must be made as a result of the European upheaval.

A few catalogs in English, some mimeograph letters in poor Spanish and a list of addresses from a New York mailing house will not bring trade from South America. The money and time that have been wasted in trying to make the people of South America step up and buy what American merchants want to sell is appalling. There is business there, but it's trade and not orders. To secure business of any kind it must be done the way the inhabitants in those countries are accustomed to doing it. Tools must be supplied for their units, not ours; their needs must be studied. It is a fertile field, rich in possibilities and will bring tremendous return to the few who are going to secure it but it is no bonanza and must be worked. It must be remembered that there are at least a dozen different firms, each with a capital of over $1,000,000 who have been trading in South America for a decade or more.

The railway rate decision was not what the railroads expected, or at least hoped. It, however, did grant them a grain of comfort. While three of the commissioners signed the report, two filed dissenting opinions. On the previous application of the railways for higher rates it was vetoed in toto by the entire commission.

Municipal work will be slow until there is more assurance about financing the bonds. The City of New York has decided to go ahead with the subway construction, or at least as much of it as will enable the parts under construction to be operated. There seems to be comparatively little difficulty in selling water-works bonds in the West to local banks or sinking fund commissions, but the number of highway bond applications turned down by bankers have been notable. The inclination of the investing public to buy municipal isues is one of the things which bears the most important watching.

Providing suitable laws are enacted, there is every renson to believe that a number of vessels now owned by American corporations will fly the American flag. The question of the government going into the ocean-carrying trade is one of great danger and to say the least it seems scarcely necessary for the Federal government to buy high speed palatial passenger vessels, designed for a lucrative traffic in the North Atlantic, when there is little possibility of much traffic of this character for several years to come. The mobility of shipping and the ability of one boat to carry more tons in a year due to the Panama Canal should not be lost sight of, but it is a notable fact in the history of this country that whenever better methods of transportation have been provided, the traffic has soon grown in proportion to the facilities.

Price Changes

Extreme fluctuation in tin has marked the course of that market during the month. Copper, early depressed in the failure of Europeans to buy recovered some of the loss. In spite of the shortage of ferro-manganese, there will be sufficient steel to meet the demand although prices are from $1 to $3 higher above the low level. No change was made in belting, but rubber is higher and all lines seem destined to go higher for the present.

CEMENT, LIME AND BRICK

Portland Cement—Prospects are brighter for a good winter business in cement than in many years. The Valparaiso docks will require half a million dollars worth of cement. Cable inquiries ar ecoming to American manufacturers, asking 'How soon can you ship 5000 bbl." Price is a secondary consideration. It is estimated that South America and the West Indies will require in the next year 15,000,000 bbl. of cement, which will take the surplus production of the Lehigh Valley District. Strenuous efforts are being made, not only to secure the business which is dropping into the laps of American manufacturers, but to put it on such a footing that it can be held for all time. Despite reports to the contrary, prices have not changed. In New York there is a falling off in the demand at present, with the feeling that trade during the winter will be exceptionally dull. This is scarcely true, however, for the subway work will go forward. Stocks on hand on July 1 were 10,000,000 bbl., compared with 11,200,000 at the end of December. This is larger than it should be, but not unusual. Production during the first half of the year, according to Government reports, showed a curtailment of 4,000,000 bbl. compared with the previous year, being 35,000,000 bbl. Practically half of the falling off was in the Lehigh Valley District, which produced in the first half of the year 11,000,000 bbl.

Quotations in the East are unchanged at $1.59 per bbl. for delivery within lighterage limits of New York. This is equivalent to $1.46 Jersey City, and 95c, per bbl. in bulk at the mill.

The quotations given below do not include the allowance of 40c. made for bags returned. These quotations are as follows, per bbl., f.o.b. the points named:

Boston, $1.32; Cleveland, $1.35; Duluth, $1.38; Minneapolis, $1.40; Pittsburgh, $1.15; Chicago, $1.17; Detroit, $1.24; Jersey City, 1.06; New York, 1.13; St. Paul, $1.40.

IRON AND STEEL

Pig Iron—New business in pig iron is not large, and cancellations of contracts or requests for deferred shipment are few. The cast-iron pipe interests bought up approximately 60,000 tons of Southern Foundry iron; prices have not changed, and trade is purely a waiting one. It is evident that there will be no strenuous foreign competition for some time, and on the other hand, there are likely to be some foreign inquiries. Production has not ben seriously curtailed. Business during August would undoubtedly have been small in any event, for July business was exceptionally large.

Quotations for lots of 100 tons and over are as follows at the points named: Cincinnati, Southern Foundry No. 2, $13.25 to 13.75; Northern Foundry No. 2, $14.25 to 14.75; Northern Foundry No. 3, $14.00 to 14.25. In New York, Northern Foundry No. 2X is $14.00 to 14.65, No. 2 plain, $14.25 to 14.50; and Southern Foundry No. 2 in New York market is $14.25 to 14.50. In Chicago, Northern Foundry No. 2 is $13.50 to 14.00. In Pittsburgh, bessemer is $14.90, and basic $13.90. These quotations include the 90c. freight rate from the valley to Pittsburgh. In Birmingham, Southern Foundry No. 2 is $10.00 to 10.25.

Steel Rails—Business has been extremely limited. None of the large railroads in this country have entered orders for any quantity of rails, and export business has been light. It is true that some orders have been taken for export but most of these were of light rails, and the tonnage involved is not large. Quotations for lots of 500 tons or over are given below. For smaller lots, somewhat higher prices are demanded.

Standard sections of bessemer rails, $28; open hearth rails, $30. These quotations are f.o.b. Pittsburgh. Girder rails in 30-ft. lengths are $36.40 per gross ton, and in 60-ft. lengths, $38.40, both f.o.b. New York. Standard open hearth rails are $1.34 per 100 lb., Pittsburgh; bessemer rails, $1.25; light rails, 25 to 45 lb. per yd. are $1.25, Pittsburgh or Chicago; 16 to 20 lb., $1.30; 12 lb, $1.35; 8 lb. $1.40. These quotations are f.o.b. both Pittsburgh and Chicago. Relaying rails are $23 to $24, Chicago, for standard section, and $21.50 to 22.50 for light section.

Track Supplies—Business has been extremely light, although some export inquiries have been received. The mills are running at less than 50% of capacity. Standard section angle bars in Pittsburgh and Chicago are 1.50; spikes in Pittsburgh are $1.40 to 1.45 for standard, and $1.50 to 1.60 for light, while in Chicago railroad spikes are at $1.50. Track bolts in Pittsburgh and Chicago are $2.00. All of these are per keg of 100 lb.

Structural Materials—[illegible] new business is practically [illegible]. The [illegible] have [illegible] and are not [illegible] except for strictly repair work. [illegible] in New York and other [illegible] have refused to make [illegible] there is no building work [illegible]. In the Middle West, business is slightly [illegible] a [illegible] of schools where small ton[illegible] are [illegible] orders have been [illegible] there has been some bridge work.

Quotations are higher, the base price being $1.30 to 1.35 [illegible] for [illegible] Channels 3 to 15-in. [illegible] and Z's [illegible] and over. For angles, $1.30 [illegible] for [illegible] over 15 in. H-beams over [illegible] and angles over 6 in. T's are $1.[illegible] to 1.[illegible]0. Channels [illegible] rail T's are $1.9[illegible] to 2.[illegible]0. Cutting [illegible] lengths is charged at the following rates. Under [illegible] ft. inclusive, [illegible] per 100 lb.; 3 ft. to 1 ft. inclusive, [illegible] cutting to lengths under 1 ft., $1.[illegible]. No charge is made for cutting to specified lengths over 3 ft.

Steel Shapes—Quotations from warehouse New York are as follows:

	Cents Per lb.
[illegible] iron	
1 to 1½ in. round and square	1.80
1½ to 4 in. x ⅜ to 1 in.	1.80
1½ to 4 in. x ¼ in. [illegible] in.	2.00
[illegible] bars	[illegible].20
[illegible] bar iron	2.1[illegible]
Soft steel	
¾ to 3 in. round and square	1.80
1 to 6 in. x ⅜ to 1 in.	1.80
1 to 6 in. x [illegible] and [illegible] in.	1.95
[illegible] ⅜ and [illegible] in.	1.90
[illegible]—1⅛ to [illegible] in. to No. 8	2.10
Beams and channels 3 to 15 in.	1.8[illegible]
Angles	
3 in. x ¼ in. and larger	1.8[illegible]
[illegible] in. x [illegible] in. and [illegible] in.	2.10
1½ to 2½ in. x [illegible] in. and thicker	1.95
1[illegible] to 2[illegible] in. x [illegible] in.	2.05
1 to 1¼ in. x [illegible] in.	2.0[illegible]
1 to 1¼ in. x [illegible] in.	2.10
1½ to 2½ x [illegible] in.	2.00
1[illegible] to 2[illegible] x [illegible] in.	2.10
3 in. and larger	1.90

REINFORCING MATERIALS

Bars, Concrete Reinforcing—Prices are higher, but there is very little new business. Quotations are as follows:

Size	Mill shipments Pittsburgh	Warehouse Pittsburgh	Delivered from warehouse New York
	Cents per pound		
[illegible] in. and larger	1.[illegible]0	1.70	2.30
[illegible]	1.[illegible]	1.[illegible]0	2.3[illegible]
[illegible]	1.[illegible]	2.0[illegible]	2.3[illegible]
[illegible]	1.[illegible]	2.10	2.50
[illegible]	1.[illegible]	2.35	2.[illegible]

Triangle Mesh—Quotations are without change as follows:

PRICE PER 1[illegible] SQ. FT.

Style No.	Cross-sec. area per ft. width	Plain material: Carload lots	Plain material: Less than car lots and over 1[illegible] sq. ft.	Galvanized: Carload lots	Galvanized: Less than car lots and over 15,000 sq. ft.
*4	[illegible]	$1.[illegible]	$1.22	$1.12	$1.24
5	[illegible]	[illegible]	[illegible]	0.89	1.[illegible]0
8	[illegible]	[illegible].81	[illegible]	0.71	0.[illegible]
*7	[illegible]	0.[illegible]	[illegible]	0.75	[illegible].66
*11	[illegible]	1.89	2.[illegible]5	1.[illegible]	2.[illegible]
[illegible]	[illegible]	1.[illegible]	1.[illegible]	1.83	1.92
[illegible]	[illegible]	1.2[illegible]	1.[illegible]	1.43	1.71
*[illegible]	[illegible]	1.[illegible]	1.12	1.[illegible]	1.55
*[illegible]	[illegible]	[illegible].96	1.1[illegible]	1.[illegible]7	1.24
[illegible]	[illegible]	[illegible]	[illegible].97	0.89	1.06
[illegible]	[illegible]	0.66	0.[illegible]	[illegible]	0.97
[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
*[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	1.66

*[illegible] lengths in rolls are [illegible]

METALS

Copper—[illegible] copper did not fall below 12c. for electrolytic and the market is now 12.275c. It must be admitted that the demand for metal is extremely light.

Pig Tin—Price changes in pig tin for the first 15 days of August resembled betting at a horse race more than anything else. Prior to the declaration of war, tin sold in New York at 31[illegible]. By Aug. 3 the price had advanced to [illegible], while on Aug. 6, 6[illegible] was paid. As high as 67c. was paid for 5-ton lots, prior to the middle of the month, but on the 17th prices [illegible] and business was done at 3[illegible]. From this level quotations rapidly jumped back to [illegible], which was re[illegible] on the 18th. Since that time the market has settled down and been more or less orderly at from 37 to 42[illegible].

Lead—Business has scarcely been affected by the disturbance in Europe. Prices are slightly higher and in 5[illegible]-ton lots lead sells at 3.90@3.95c. per lb. New York, and 3.7[illegible]@3.80c. St. Louis.

Spelter—Most of the spelter used in Great Britain has previously been imported from Germany. This source of supply being cut off it was necessary to draw on America. Prices advanced fully 1c. per pound and as high as 6.12½c. was paid. It is estimated that between 1[illegible]0 and 1[illegible]000 tons of spelter were sold for export. The supply of spelter will shortly be increased by the importation of Mexican ore.

Antimony—The first fear of the war has subsided. Antimony which sold at [illegible] in July and [illegible] in August is now 1[illegible]c.

Aluminum—The domestic supply seems to be ample for present and possibility of new domestic competition is keeping prices down. Aluminum in ingots is quoted at [illegible]0@21c. per lb.

Copper Sheets—The price is lower at 1[illegible]c. per lb.

Miscellaneous Metals—Prices are low, and it is sometimes possible to shade even the quotations given below, which are for small lots:

Bismuth	$2.25
Brass tubes, iron-pipe sizes	
½-in.	.17
¾- to 3-in.	.16
3½-in.	.16
4-in.	.17
Brass rods	.15¼
Brass sheets	.15½
Solder, half and half guaranteed	.22
Zinc sheets	.08¼
Manganese bronze rods	.22½
Copper sheets, base	.18
Pig tin (five-ton lots, cash)	.[illegible]

Old Metals—The following quotations are for small lots delivered at buyer's warehouse:

	Cents
Copper, heavy and crucible	12.00
Copper, heavy and wire	11.[illegible]5
Copper, light and bottoms	10.[illegible]5
Brass, heavy	[illegible].[illegible]5
Brass, light	[illegible].[illegible]5
Heavy machine composition	1[illegible].[illegible]0
Composition turnings	9.[illegible]0
Lead, heavy	3.[illegible]
Lead, tea	3.1[illegible]
Zinc scrap	3.[illegible]

CLAY PRODUCTS

Sewer Pipe—Business has been less active. Many manufacturers are threatening to close their mills down earlier in the season than usual. Prices are slightly lower than last month, the revised discounts being as follows: 24 in. [illegible]; 2[illegible] and 20 in. 79[illegible]; 33- and 36 in. [illegible]. At these discounts the net prices per ft. in New York are as follows:

Size		Size	
3-in.	$0.[illegible]	18-in.	[illegible]
4-in.	0.[illegible]	20-in.	[illegible]
5 in.	[illegible]	22-in.	[illegible]
6 in.	[illegible]	24-in.	[illegible]
[illegible]	[illegible].11	2[illegible]-in.	[illegible]
10 in.	[illegible].18	30-in.	1.[illegible]
12 in.	0.[illegible]	33-in.	2.[illegible]
1[illegible] in.	0.27	36-in.	2.45

Flue Lining—Another revision has been made in the price of flue lining, and the new discount is [illegible] from list. At this discount, the net prices per foot for New York delivery are as follows:

	Weight in lb.	Price per ft.		Weight in lb.	Price per ft.
4½ x 8½ in.	11	$0.[illegible]0	[illegible] x 1[illegible] in.	1[illegible]	$0.132
[illegible] x 13 in.	[illegible]	0.[illegible]6	1[illegible] x 1[illegible] in.	1[illegible]	0.1[illegible]
[illegible] x [illegible] in.	1[illegible]	0.[illegible]	13 x 1[illegible] in.	[illegible]	0.23
[illegible] x [illegible] in.	1[illegible]	0.[illegible]6	1[illegible] x 1[illegible] in.	[illegible]5	0.34
[illegible] x 13 in.	[illegible]	0.11			

Comparative Prices—Movements in the prices of staples are less violent. The following comparison illustrates the [illegible] trend:

Wholesale Prices	July 1	Aug. 1[illegible]	Sept. 1
Pig tin, per lb.	$0.31	$[illegible]	$[illegible]
[illegible], per lb.	[illegible]	[illegible]	0.[illegible]
Antimony, per lb.	[illegible]½	[illegible].16	0.1[illegible]
[illegible] per lb.	[illegible]	[illegible]	[illegible]
Quicksilver, per flask	[illegible]	[illegible]	[illegible]
[illegible]	[illegible]	[illegible]	[illegible]
Flour, per bbl.	[illegible]	[illegible]	[illegible]
[illegible]	[illegible]	[illegible].72	[illegible]
[illegible] (Chicago)	[illegible]	[illegible]	1.[illegible]

The Leadite Co., Inc., Philadelphia, Penn., has issued a [illegible] showing the [illegible] and cost of [illegible] joints with leadite and pig lead, based on the American Water Works Association standard bell and spigot cast iron pipe. [illegible] up to 18 in. the approximate quantity is [illegible] per joint [illegible]. For larger pipe the quantity of material used is [illegible] per inch of diameter.

RAILWAYS

+Pennsylvania—Pennsylvania R.R.—A. L. ANDERSON & BROS., INC., Altoona, Penn., has been awarded a contract by this company for constructing a 3½ mile extension of the Homer and Cherrytree branch of the Conemaugh division.

West Virginia—Charleston, Parkersburg & Northern Ry.—Preliminary arrangements are being made by this company to award contracts for the construction of a portion of its proposed railroad to connect Charleston, W. Va., and Parkersburg, about 75 miles. H. H. Archer is Pres. and K. B. Stephenson, Secy., both of Parkersburg, W. Va.

North Carolina—Southern Ry.—Bids are being received by this company for double-tracking its line from Craggy, N. C., to a point two miles east of Marshall, N. C., about 15 miles. W. H. Wells, Washington, D. C., is Ch. Engr. Const.

+North Carolina—Southern Ry.—A contract for constructing 30 miles of second track between Pelham and Greensboro, N. C., has been awarded by this company to the PARKER BROOKS CONSTRUCTION CO., Greenville, S. C., and to the MORROW CONTRACTING CO., Atlanta, Ga. Noted Aug. 20.

Central Carolina R.R.—According to press reports plans are being prepared by this company for the construction of a railroad from Lillington, N. C., to Swansboro, N. C., about 100 miles. W. J. Edwards, Sanford, N. C., and J. R. Baggett, Lillington, N. C., are interested.

South Carolina—Savannah Western Ry.—This company has been incorporated to construct a railroad from Estill, S. C., to St. Paul, S. C., about 90 miles. The incorporators are Virgil Walker and Adrian M. Rea, Newbern, N. C., and C. H. Milligan, Charleston, S. C.

South Carolina—According to press reports, C. D. Neal, Wilmington, N. C., is interested in the construction of a railroad from Hartsville, S. C., to Society Hill, S. C., about 18 miles.

Florida—Edge-Dowling Lumber Co.—The construction of a railroad from its lumber operations at Groveland, Fla., to Dade City, Fla.

Mississippi—Nashville, Shiloh & Corinth R.R.—See item under Tennessee.

Tennessee—Nashville, Shiloh & Corinth R.R.—The citizens of Davidson County will vote on the proposition to issue bonds for $1,000,000 for the purpose of assisting this company in constructing a railroad from Nashville, Tenn., to Corinth, Miss., about 165 miles. C. C. Thoms, Corinth, Miss., is interested. Noted July 16.

Indiana—Cincinnati, Indiana & Louisville R. R.—Surveys have been started by this company for the construction of a railroad to connect Aurora, Rising Sun, Patriot, Florence, Markland, Vevay and Lamb, Ind., where a connection with the Louisville & Beaver River R.R. will be made. L. S. Cook is Pres.

Kansas—Atchison, Topeka & Santa Fe Ry.—This company plans to spend $40,000 for the extension of its yards at Florence, Kan. R. A. Rutledge, Kan., is Ch. Engr. Eastern lines.

+Arkansas—Missouri, Arkansas & Southern R.R.—This company has awarded a contract for the construction of a railroad from Mena, Ark., to Hot Springs, Ark., about 80 miles, to the CENTURY CONSTRUCTION CO., Mena. George D. Thayer, Mena, is Ch. Engr. Noted Aug. 6.

Texas—Gulf, Freeport & Northern R.R.—Plans are being prepared by this company for the extension of its line from Freeport, Tex., to Rosenburg, Tex. C. L. Sharp, Freeport, is Gen. Mgr.

Idaho—Blackwell Lumber Co.—Plans are being prepared by this company for the construction of about five miles of logging road at Fernwood, Idaho.

Oregon—Teal Creek R. R.—This company has been incorporated to construct a logging railroad out of Fall City, Ore. The incorporators are F. J. Cobb, Zera Snow and Wallace McCamant.

California—Atchison, Topeka & Santa Fe Ry.—An expenditure of $300,00 is planned by this company for the improvement of the lines on its Los Angeles Division. F. M. Bisbee, Amarillo, Tex., is Ch. Engr. Western lines.

ELECTRIC RAILWAYS

Holyoke, Mass.—The Holyoke Street Ry. Co. plans to spend about $15,000 for laying new track from the Williamsett Bridge through Holyoke. Louis D. Pellissier, Holyoke, is Gen. Mgr. and Pur. Agt.

New Haven, Conn.—The Shore Line Electric Ry. Co. has been granted permission to extend its line from Backus Corner along Salem Turnpike. Samuel Anderson, Norwich, is Gen. Mgr.

Bayport, N. Y.—The Suffolk Traction Co. has applied to the Public Service Commission of the Second District for permission to construct an extension to its line from Bayport to Sayville. J. C. Brackenridge, 95 Liberty St., New York, N. Y., is Gen. Mgr. and Ch. Engr.

Jersey City, N. J.—(Official)—Bids will be received until 10.30 a.m., Sept. 9, by the Boulevard Commissioners of Hudson County for the construction of a concrete arch over the old Railroad Cut on the Hudson Boulevard East, Weehawken Township. J C Sweeney is Clk. of the Comrs.

Ellwood City, Penn.—Plans are being prepared by Thomas A Gilkey, Engr. of Lawrence County, for the construction of a reinforced-concrete bridge over the Connoquenessing River connecting Ellwood City with Hazeldell, which places have recently consolidated, taking the name of the former. The estimated cost of the bridge is $[illegible], and bids will probably be asked some time this fall.

Pittsburgh, Penn.—Bids will be received until 2 p.m., Sept. 4, by R J Cunningham, County Controller, for the construction of two reinforced concrete bridges over Pine Creek. J G. Chalfant, Room 3[illegible], Court House, is Engr. of Allegheny County.

Jacksonville, Fla.—The Board of Commissioners of Duval County has retained A F Harley, Consult. Engr., to prepare preliminary plans and estimates for the construction of a bridge over the St. Johns River. John H Patterson is Chn. of the Bd. of Comrs. Noted July 9 and Aug. 6.

Chattanooga, Tenn.—Final plans have been completed for the construction of the Market St. Bridge over the Tennessee River, connecting Chattanooga with Hill City. The total length will be 2470 ft., of which 21[illegible] ft. will be concrete construction and the remainder earth fill. There will be a steel lift span of 300 ft. It will cost about $[illegible]. Bids will probably be asked some time in September by the Tennessee River Bridge Committee, Theodore F King, Chn. B H Davis, 17 Battery Place, New York, N. Y., is Engr. in Charge. Noted Jan. [illegible], Mar. [illegible], and Apr. 16.

Canton, Ohio.—Bids will be received until 10 a.m., Sept. 11, by the Board of Commissioners of Stark County for the construction of a bridge in Perry Township, including 3[illegible] cu. yd. of concrete, [illegible] cu. yd. of excavation, and [illegible] lb. of steel. C L Stoner is Clk. of Comrs.

The County Commissioners will build a new concrete arch over Nimishillen Creek at Tuscarawas St. West, as soon as the widening and repaving of this thoroughfare, as planned by the City Council, is completed.

Cincinnati, Ohio.—(Official)—Bids will be received until noon, Sept. [illegible], by the Commissioners of Hamilton County for the construction of a concrete bridge over Eagle Creek on the Eagle Creek Road, [illegible] Township. Albert R[illegible] is Clk. of Comrs.

Cleveland, Ohio.—The question of building a third high-level bridge over the Cuyahoga River will be submitted to the voters of Cuyahoga County at the November election. The estimated cost of such a bridge, from plans already prepared by W. A. Stinchcomb, County Engr., is $[illegible]. Noted June 11.

Duncan Falls, Ohio.—Bids will be received until Sept. 14 by the Board of Commissioners of Muskingum County [illegible] for the construction of a reinforced concrete viaduct at the west end [illegible] of the Duncan Falls bridge [illegible]. It will be [illegible] ft. long with a 16-ft. roadway and a [illegible] ft. sidewalk. Fred C. Werner is Clk. of Comrs.

Petersburg, Ind.—(Official)—Bids will be received until [illegible] by the Board of Commissioners of Pike County for the construction of [illegible] steel bridges in various townships [illegible].

Winchester, Ind.—(Official)—Bids will be received until 11 a.m., Sept. [illegible], by the County Commissioners of Randolph and Wayne Counties for the construction of a [illegible] bridge over [illegible] Creek on the boundary line between the two counties. [illegible]

Escanaba, Mich.—(Official)—Bids will be received until [illegible] by the Board of County Road Commissioners of Delta County, [illegible], for the construction of an [illegible] bridge about [illegible] ft. long, with a [illegible] roadway, over the Escanaba River. R. P. Mason is County Engr.

Cairo, Ill.—Preliminary surveys have been begun for the construction of the bridge to be built over the Ohio River at

Cairo by the Mobile & Ohio R.R. W. H. Wells, Washington, D. C., Ch. Engr. of Const. of the Southern Ry., has charge of the work. Noted July 30.

Libertyville, Ill.—(Official)—Bids will be received until 2 p.m., Sept. 5, at the Town Hall, Libertyville, for the construction of the Oak Spring Bridge, Libertyville Township, Lake County. It will be of reinforced concrete, and is estimated to cost $4300. Charles E. Russell, Waukegan, is County Supt. of Highways.

Morris, Ill.—(Official)—All bids received Aug. 22 by the Commissioners of Grundy County for the construction of a bridge in Maine Township were rejected as too high, the lowest bid being $8287. New bids were received on Sept. 3. F. W. Stine is County Supt. of Highways. Noted July 23 and Aug. 20.

Quincy, Ill.—(Official)—Bids will be received until 2 p.m., Sept. 5, by Floyd V. Bell, County Supt. of Highways of Adams County, for the construction of the McCraney Creek Bridge, to be located between Payson and Richfield Townships, Adams County, and Barry and Kinderhook Townships, Pike County. Bids will be accepted for either a steel bridge, estimated cost, $5930, or for one of reinforced concrete, estimated cost, $6750.

✚**Milwaukee, Wis.**—(Official)—(A correction)—We are advised that the item in the issue of Aug. 20 stating that the Chicago & Northwestern Ry. had awarded the contract for the construction of a railway bridge at Milwaukee to Pellet & McMullen, Manitowoc, Wis., was an error, as the CLEARY-WHITE CONSTRUCTION CO., Chicago, Ill., has the contract for this bridge, and has sublet the pile-driving to the firm mentioned.

Carroll, Iowa—(Official)—Bids will be received until 2 p.m., Sept. 7, by the Board of Supervisors of Carroll County for the construction of 11 concrete culverts at an estimated cost of $9340, and for one steel bridge, estimated cost, $4000. George A. Poeppe is County Audr.

Keokuk, Iowa—(Official)—It is authoritatively stated that no contracts have been awarded, nor bids asked as yet for the reconstruction of the Keokuk and Hamilton Bridge across the Mississippi River between Keokuk and Hamilton, Ill. Ralph Modjeski, Orchestra Hall, Chicago, Engr. in Charge, is now at work upon the plans. Noted May 28, June 18 and Aug. 6.

Marshalltown, Iowa—The Supervisors of Marshall and Jasper Counties will build an inter-county bridge on the south line of Marshall County. It will be of reinforced concrete, about 50 ft. long and 16 ft. wide. The estimated cost is $4000.

Sioux City, Iowa—Press reports state that Sioux City has asked the State Highway Commission to prepare plans for the construction of a concrete bridge over the Big Sioux River, connecting Iowa and South Dakota. As planned, the bridge will be about 400 ft. long and 40 ft. wide. Sioux City will pay two-thirds of the cost, and Union County, South Dakota, the other third. Noted Dec. 4, 1913.

Concordia, Kan.—(Official)—Bids wil be received until noon, Sept. 24, by the Commissioners of Cloud County for the construction of six reinforced-concrete bridges, three in Colfax Township, one each in Nelson and Aurora Townships, and one between Nelson and Aurora Townships.

Erie, Kan.—(Official)—The Commissioners of Neosho County have rejected all bids received Aug. 17 for the construction of four bridges, two 20-, one 60- and one 75-ft. span. W. E. Neal is Clk. of the Comrs. Noted Aug. 13.

Manhattan, Kan.—Press reports state that bids will be received until Sept. 15 by the Board of Commissioners of Riley County for the construction of five concrete bridges. George H. Hungerford is County Clk.

Richland, Kan.—(Official)—Bids will be received until 1 p.m., Oct. 5, by the Commissioners of Morton County for the construction of a wood pile bridge, known as the Point of Rocks Bridge, over the Cimarron River near Elkhart. It will be 609 ft. long with a 16-ft. roadway.

Wichita, Kan.—(Official)—Bids will be received until noon, Sept. 21, by the Commissioners of Sedgwick and Sumner Counties for the construction of a reinforced-concrete bridge over Cowskin Creek on the county line. Edgar V. Moone, Wichita, is County Engr. of Sedgwick County. Noted Aug. 13.

Madison, S. D.—(Official)—Bids will be received until 10 a.m., Sept. 10, by the Commissioners of Lake County for the construction of two concrete bridges, one in Chester Township, and the other in Orland Township. M. D. McGillivray is County Audr.

✚**Deer Lodge, Mont.**—The Commissioners of Powell County received the following bids on Aug. 17 for the construction of two steel bridges: (a) 152-ft. bridge over the Big Blackfoot River; (b) 70-ft. bridge over the Little Blackfoot River. W. A. Adams & Co., (a) $8470, (b) $2980; Minneapolis Steel Co., (a) $9200, (b) $2900; J. F. HARRINGTON, (a) $6899 (awarded contract), (b) $1900; O. E. PEPPARD, (a) $6999, (b) $1900 (awarded contract); Security Bridge Co., (a) $8000, (b) $2800; Midland Bridge Co., (a) $7012, (b) $2620. Noted Aug. 6.

✚**Corpus Christi, Tex.**—The Commissioners of Nueces County have awarded Contracts Nos. 1 and 2 for the construction of the causeway across Nueces Bay to W. L. PEARSON & CO., Houston, at $88,290 and $47,000 respectively. List of bidders for Contract No. 1 noted Aug. 27.

Denison, Tex.—(Official)—Bids will be received until noon, Sept. 7, by the Mayor and City Council for the construction of a 6-ft. walkway bridge over the shops of the Missouri, Kansas & Texas Ry. Co., Denison. Alternate bids will be accepted for concrete slab- or wood plank flooring. T. McElvaney is Mayor. A. B. Clenny is City Engr.

Houston, Tex.—(Official)—Bids will be received until 2 p.m., Sept. 7, by the City Engineering Department for the construction of the Taylor St. Bridge. The estimated cost is $12,000. E. E. Sands is City Engr.

✚**Fort Collins, Colo.**—(Official)—The Commissioners of Larimer County have awarded the following contracts for bridge construction: To J. C. WHEDBEE, Fort Collins, at $3165 for five concrete bridges; to B. R. HOWE, Loveland, Colo., at $1372 for three concrete bridges; to the W. H. ROLLER CONSTRUCTION CO., Fort Collins, at $2565 for two steel bridges. James G. Edwards is County Engr. Noted July 30.

Aberdeen, Wash.—The Mayor and City Council are negotiating with the Oregon-Washington Ry. & Navigation Co. for widening the present walks of the railway bridge sufficiently to allow the passage of automobiles and other vehicles. The estimated cost of the work is $50,000, while an entire new bridge would cost about $150,000. Eugene France is Mayor.

Buckley, Wash.—The Commissioners of King County, Seattle, have rejected all bids for the construction of the piers for the Buckley Bridge as being above the estimate, and it is reported that the Comissioners of King and Pierce County plan to purchase the materials, and build the bridge by day labor. M. Roy Thompson is County Engr. of King County. Noted July 30 and Aug. 6.

Snoqualmie, Wash.—The lowest bid received by the Commissioners of King County, Seattle, for the construction of a bridge over Tokul Creek near Snoqualmie, was that of Charles G. Huber, Seattle, at $18,997. Noted Aug. 6.

Philomath, Ore.—The bridge of the Corvallis & Eastern R.R. over Mary's River, four miles east of Philomath, was entirely destroyed by fire recently. It was about 460 ft. long, and will be rebuilt at once. F. M. Siefer, Portland, Ore., is Ch. Engr.

✚**St. Helen, Ore.**—(Official)—The State Highway Commission, Salem, has awarded the contract for the construction of one 156-ft. bridge and three 125-ft. bridges on the Nehalem Highway, Columbia County, to the AMBROSE-BURDSAL CO., Portland, Ore., at $25,000. C. H. Purcell is State Bridge Engr. Noted Aug. 13.

Salem, Ore.—(Official)—No definite plans have been made yet by the Commissioners of Marion and Polk County for the construction of the proposed bridge between the two counties, but it is hoped to start the preliminary work during the winter. The present structure has been declared unsafe. Noted Aug. 6.

Vale, Ore.—Bids will be received until Sept. 7 by the Commissioners of Malheur County, for the construction of a 150-ft. steel bridge with two concrete abutments, over the Malheur River near Harper. John P. Houston is County Clk.

Chico, Calif.—(Official)—Bids will be received until 2 p.m., Sept. 10, by the Board of Supervisors of Butte County, Oroville, for the construction of a reinforced-concrete bridge, about 90 ft. long, over Chico Creek in Bidwell Park, near Chico. C. F. Belding is Clk. of the Bd.

✚**San Jose, Calif.**—(Official)—The Board of Supervisors of Santa Clara County has awarded the contract for the construction of a bridge over the Pajaro River between Santa Clara and San Benito Counties to the SECURITY CONSTRUCTION CO., Los Angeles, at $19,196. The bid of Mesmer & Rice was $19,635. Noted Aug. 13.

(Official)—Bids will be received until 11 a.m., Sept. 8, by the Board of Supervisors of Santa Clara County, for the construction of a reinforced-concrete bridge over Adobe Creek at Edith Ave., San Jose. Henry A. Pfister is Clk. of Supervisors.

✚**San Luis Obispo, Calif.**—The Board of Supervisors of San Luis Obispo County has awarded a contract for the construction of two reinforced concrete bridges to the MERCEREAU BRIDGE & CONTRACTING CO., Los Angeles, at $5909.

Portage, Penn.—Bids will be received by the School Board, until Sept. 7, for erecting the high school. J. E. Adams, Lincoln Bldg., Johnstown, is the Arch.

+Uniontown, Penn.—The contract for erecting the Craig School has been awarded to P. W. FINN & CO., Altoona, at $45,761.

Wilkes-Barre, Penn.—Sturdevant & Paggi, Wilkes-Barre, are preparing plans for the Wilkes-Barre Private Hospital, to cost about $160,000.

Williamsport, Penn.—The following bids were received, Aug. 21, for erecting the school, from plans of Woodnutt & Schmohl, 150 West Fourth St.: A. C. Everhart, $42,712; Saumee Larrivee, $43,450; W. H. C. Huffman's Sons, $42,170; J. V. Bermett & Co., $40,841

York, Penn.—Bids received for erecting the Jackson and Madison schools have been rejected. Plans are being revised by Stair & Leber, York.

Frederick, Md.—John B. Hamme, Wiest Bldg., York, Penn., is preparing plans for a three-story dormitory for Hood College, to cost about $75,000.

Ridgely, Md.—The McIver Construction Co., Law Bldg., Baltimore, has completed plans for three buildings for St. Gertrude's Academy, to cost about $100,000.

Richmond, Va.—Bids will be received by the city, until Oct 10, for preparing plans for the municipal building. The building is to be in three sections, containing library, auditorium and five courts. Alfred C. Blossom, 366 Fifth Ave., New York, N. Y., is Consult. Arch.

+Bridgeport, W. Va.—The contract for erecting the Kirkwood School has been awarded to A. B. IMHOFF, Wheeling, at $48,000.

Wheeling, W. Va.—The Pennsylvania R.R. Co. plans to build a new train shed and make extensive alterations to its station.

Jacksonville, Fla.—Bids will be received by the County Commissioners, until Sept. 16, for erecting the county jail, jailer's residence and courthouse. H. J. Klutho, St. James Bldg., Jacksonville, is Arch.

Tampa, Fla.—It is reported that bids will be received by the Board of Public Works, until Sept. 15, for erecting the Carnegie Library. The estimated cost is $50,000.

Baton Rouge, La.—Bids will be received by Favrot & Livaudais, Ltd., Perrin Bldg., New Orleans, until noon, Sept. 12, for the construction of two 2-story brick dormitories, for the Southern University at Scotland Station.

Canton, Ohio—Local press reports state that bids will be received until Sept. 10, for the erection of the superstructure of the Y. M. C. A. Bldg. The estimated cost is $150,000. Shattuck & Hussey, 19 South LaSalle St., Chicago, are the Archs.

Cincinnati, Ohio—The New Courthouse Building Commission has decided to postpone indefinitely opening bids for the construction of the proposed courthouse, which were to be opened Sept. 1. Noted July 23.

Cleveland, Ohio—Bids on the new city hall have been opened. The unofficial totals on general contract were as follows: G. A. Fuller Co., New York, N. Y., $1,097,987; J. B. Pierce Co., $1,099,500; James L. Stuart Co., $1,120,562; William Dall, $1,127,500; John Gill & Sons, $1,157,000; W. B. McCallister Co., $1,253,661.

Columbus, Ohio—The Board of Education will receive bids until Sept. 18, for the construction of a three-story school. The estimated cost is $175,000. D. Riebel & Sons are the Archs.

Toledo, Ohio—Bids will be received until Sept. 10, by Mills, Rhines, Bellman & Nordhoff, Archs., Toledo, for the construction of an addition to the public library. The estimated cost is about $40,000.

Franklin, Ind.—H. W. Foltz, Arch., is preparing plans for a State Masonic Home. The estimated cost is about $150,000.

Gary, Ind.—The Illinois Improvement & Ballast Co., is having plans prepared for a four-story, 75x125-ft. store and office building. The estimated cost is $80,000.

+Indianapolis, Ind.—The contract for the construction of the building at Palmer and South Meridian St., for the Sacred Heart School, has been awarded to GEORGE CLEMENTS, Indianapolis. The estimated cost is $60,000. Herman J. Gaul, Chicago, is the Arch.

Terre Haute, Ind.—Bids will be received by the State Normal School Trustees for erecting a three-story, reinforced-concrete vocational and educational building. Estimated cost, $160,000. George, McLusac & Fitton, Indianapolis, are the Archs. Noted Aug. 6.

Ypsilanti, Mich.—Local press reports state that bids will be received in October for the construction of the proposed high school. It will be three-stories and 132x190-ft. The estimated cost is $110,000. Robinson & Campau, Grand Rapids, are the Archs.

+Chicago, Ill.—The Board of Education has awarded the contract for the construction of the school at 633 West Sixth St. to [illegible] CARTER CO. The estimated cost is $1[illegible]. A. [illegible] is the Arch.

The Willys-Overland Co., 2426 South Michigan Ave., has had plans prepared for the construction of a three-story, 165x[illegible]-ft. service building and show rooms to be erected at Armour Ave. and 24th St. The estimated cost is $300,000. C. A. [illegible], 3 North La Salle St., Chicago, is the Arch.

+The Chicago Hebrew Institute has awarded the contract for the construction of a gymnasium and natatorium to J. L. [illegible], 1[illegible] North La Salle St., Chicago. The estimated cost is $[illegible]. Ottenheimer, Stern & Reichert, 1[illegible]3 West [illegible] St., are the Archs.

+Urbana, Ill.—The University of Illinois has awarded the contract for the construction of the chemistry building to [illegible] & BROOKS, Champaign. The estimated cost is $[illegible]. Noted July [illegible].

Milwaukee, Wis.—The Board of Education is having plans prepared for the construction of a school in the village of East Milwaukee. The estimated cost is $300,000. R. Messmer & Bro., Milwaukee, are the Archs.

Racine, Wis.—Wisconsin and Fourth St. has been chosen as the site for the $17[illegible] building for the Young Men's Christian Association.

Superior, Wis.—The Loyal Order of Moose has plans under consideration for the construction of a hospital to cost $[illegible].

+Ames, Iowa.—Sheldon & Munn have awarded the contract for the construction of their hotel to W. J. ZITTERELL, Fort Dodge, Iowa, at $46,[illegible]. Proudfoot, Bird & Rawson, Des Moines, are the Archs. Noted Aug. 13.

St. Paul, Minn.—Watson P. Davidson is reported to be planning to erect a building on the site of the old Minnesota Club, Cedar and Fourth St. The estimated cost is $[illegible].

+Leavenworth, Kan.—The contract for the erection of new buildings for the Mount St. Mary's Academy has been awarded to JAMES McGONIGLE, Leavenworth. The estimated cost is $[illegible].

Lincoln, Neb.—The Eagles Club is reported as ready to receive bids for the construction of a three-story club house. The estimated cost is about $70,000. Raymond Frye is the Secy.

+Anaconda, Mont.—The Board of Education has awarded the contract for the construction of an addition to the Central School to JOHNSON & LAW, Anaconda, at $52,546. Noted May 21.

Glendive, Mont.—The County Commissioners plan to erect a hospital costing $[illegible],000.

Kansas City, Mo.—The Clark Estate plans to build a hotel to cost about $2[illegible]. L. G. Middaugh, Kansas City, is the Arch.

Galveston, Tex.—The City of Galveston has had plans prepared for a city hall, to be erected on Avenue H and 2[illegible]th St., at an estimated cost of $[illegible]. C. D. Hill & Co., Dallas, have prepared the plans. Noted Sept. 18.

Houston, Tex.—Joseph St. Mary, Galveston, has had plans prepared for the construction of a hotel on the site of the present [illegible] Hotel. The estimated cost of the building is $[illegible].

+Weatherford, Tex.—The Knights of Pythias have awarded the contract for the construction of the new home to C. H. [illegible] & [illegible].

+Tulsa, Okla.—The contract for the erection of the Y. M. C. A. building has been awarded to the BRICKNER-LAWS CONSTRUCTION CO., Tulsa, at $52,[illegible]. Noted July 9.

The [illegible] Property Commission is having plans prepared for a twelve-room school to be erected at Greenwood and [illegible] St. Estimated to cost about $75,000.

+Denver, Colo.—The Denver Union Terminal Railway Co. has awarded the contract for alterations and additions to the Union Passenger Station to STOCKER & FRASER, Denver. The estimated cost of the improvements is $100,000. [illegible] & Welch are the Archs.

Denver, Colo.—The Colorado National Bank will receive bids for the construction of a three-story [illegible]x12[illegible]-ft. bank building. W. E. and A. A. Fisher, Denver, are the Archs.

Mimbres, N. M.—The Mimbres Hot Springs Co., which has been organized with a capital stock of $100,000, will erect a hotel. [illegible] of Deming, N. M., is interested.

Tacoma, Wash.—Plans for the Elk's Temple have been submitted by architects from all over the state and the committee will make its choice in a short time. The building will be erected at Seventh and C St., and will cost about $[illegible]. Noted July [illegible].

Astoria, Ore.—The local Masonic Lodge plans to erect a temple to cost about $[illegible].

Eugene, Ore.—Bids will be received by J. H. Johnson, Secy. of the [illegible], until [illegible] for the construction of an [illegible] building at the University of Oregon. W. C. Knighton, [illegible] Bldg., Salem, Ore., is the Arch.

Brawley, Calif.—[illegible] of the [illegible] Co., Los Angeles, plans to erect a hotel here to cost $[illegible].

+Los Angeles, Calif.—The contract for the construction of the [illegible] Bldg. has been awarded to the [illegible] CONSTRUCTION CO. The estimated cost is $[illegible]. [illegible] are the Archs.

San Francisco, Calif.—The [illegible] Club is having plans prepared for a clubhouse, which will cost about $[illegible]. [illegible] is the Arch.

Ardmore, N. S.—Plans are nearly completed and bids will be asked for in a short time for the construction of a hospital. The estimated cost is $[illegible]. L. H. Fales, Ardmore, N. S., is the Arch.

+Ottawa, Ont.—J. R. Booth has awarded the contract for the construction of a four-story, 98x200-ft. theatre to ALBERT EWART, Ottawa. The estimated cost is about $15[illegible],000. C. Howard Crane, Dime Bank Bldg., Detroit, Mich., is the Arch.

Toronto, Ont.—The Excelsior Life Association plans to erect an 11-story office building at Adelaide and Toronto St. The estimated cost is $[illegible],000. E. L. Lennox is the Arch.

Winnipeg, Man.—Genser Bros., Sargent and Beverly St., plan to erect a three-story apartment block, to cost about $1[illegible],000.

Edmonton, Alta.—[illegible] W. Morehouse, Arch., has prepared plans for an office building to be erected at Jasper Ave. and Sixth St. The estimated cost is about $100,000.

Finances for Public Improvements—Announcement was made on Aug. 21 by the Comptroller of the City of New York, to C. A. Crane, Secretary of the General Contractors' Association, that contractors on the subway work need have no fear of payments being held up, nor of accepting script for the work. The financial position, as far as city improvements are concerned, is by no means as unfavorable as many have been lead to believe, particularly by the New York financial papers.

The "Commercial & Financial Chronicle," New York, makes a practice of printing information relative to city, state and county bond sales, week by week. In the issue of Aug. 22, there were noted sales for 48 separate issues of bonds, where the bonds had been actually sold, aggregating $1,693,000. In the same issue, 19 bond issues were reported as not sold, the aggregate of the issues being $[illegible]. There were postponed 7 issues, aggregating $1,081,0[illegible]. It will thus be seen that bond sales have been far more general than either postponements or failures, and in addition to the amounts mentioned, announcement was made that nearly a million dollars worth of bonds had been sold at Sacramento, Calif., over the counter, but this sale has been in process for a long time, and could not properly be included in the total given. Moreover, an issue of $31[illegible] bonds of Long Beach, Calif., offered without success May 1, was floated, and this issue is not included in the total. By including the two issues mentioned, the total bond sales aggregate approximately $3,000,000. It must be granted that many of the sales have been more or less forced, that is, they were taken by sinking fund commissioners, or local banks made arrangements to pay out the money as needed. This was true in Milwaukee, where the banks took $[illegible] of bonds, which had been previously offered without success. The largest issue reported unsold was $610,[illegible] for an irrigation project in California, and such bonds are not easily sold, even in ordinary times. There were also a number of road bonds in Ohio and Indiana which found no purchasers.

By the same authority, in the issue of Aug. 29, it is found that the total bond sales for the week aggregate $2,691,[illegible], and the bonds reported as not sold amounted to $2,61[illegible]. Postponements were much smaller, amounting to only $1[illegible],000. There were 43 separate issues which were reported sold, 39 issues not sold and two where they were postponed. The record is really better than is shown by this comparison, for Portland, Ore., had $6[illegible],000 [illegible] bonds [illegible] scarcely expect to sell a 4½% issue at such a time. Another large postponement was half a million dollars for California highways, bearing [illegible] interest, and $1[illegible] 4½% Youngstown, Ohio, pumping station. The Sinking Fund Commission at Richmond, Va., took $[illegible] bonds at [illegible].

THE MARKET FOR MUNICIPAL BONDS

Week ending	Sold	Not sold	Postponed
Aug. 22	$1,693,000	$[illegible]	$1,081,[illegible]
Aug. 29	2,691,[illegible]	2,61[illegible]	1[illegible]

Increasing South American Trade—The United States Consular Report says: "An appropriation of $[illegible] for promoting commerce in Central and South America, which for the first time is now fortunately available to the Bureau of Foreign and Domestic Commerce for the current fiscal year, is especially opportune in the present commercial emergency. This fund will be used promptly to reinforce the existing service for the development of Latin American trade. Much work has already been done in this field and a series of valuable reports, covering many branches of commerce, has been published. Now a number of new phases of the trade can be studied intensively in the countries in question by the special agents of the department.

"A trained agent, detailed from the Forest Service, will study markets for lumber products. Another agent will investigate markets for hardware, a third those for clothing, hats and similar articles, a fourth the special markets of the countries on the Gulf of Mexico and the Caribbean Sea. Cotton textiles and fruit products will also receive special attention. These field investigations will be actively in progress as soon as these men can reach their several districts in Central and South America.

"Moreover, the appropriation for commercial attachés of the bureau is also available and the appointees of this new class of trade promotion agents of the Government for Rio de Janeiro, Buenos Aires, Santiago and Lima will be promptly dispatched to their posts as soon as they are selected as a result of a recent examination.

"A Latin American Section is now established in the office in Washington to care for the details of this special work. The South American Trade Directory and other bulletins can be examined at the branch offices of the Bureau or can be purchased from the Superintendent of Documents, Government Printing Office, Washington, D. C. Reports of several bulletins on special subjects connected with Latin American commerce are now in press."

The Terry Steam Turbine Co., Hartford, Conn., announces that it has appointed Fabiano Bros. & Sons, 15 Whitehall St., New York, its representatives in the Republic of Panama and the Canal Zone. The company also announces that its [illegible] office, in charge of I. O. Finley, will move Aug. 1 to [illegible] Bldg.

Cement—Exports to South America—Rumors were current last week that insistent requests for cement had been coming from South America. One firm received a cable which read, "When can you ship 5000 bbl.?" However, there seems to be little disposition on the part of domestic concerns to give much attention to the South American patronage, since the credit arrangements have always proven very unsatisfactory, even in time of peace. H. S. Dudley, of the Atlas Portland Cement Co., outlines the situation in the current issue of "Printers' Ink." He said in part: 'The war has considerably opened up the South American market for our product, but in order to accept such business, it is likely that we would have to extend credits to a point not deemed prudent by us, and it is highly unlikely that a very great increase will be shown in cement produced in this country going to South Americans, unless they are more ready to coincide with moderate terms instead of the extremely long credits to which the field is accustomed. This does not apply to the cement business exclusively. It applies, we believe, to many lines where the margin of net profits is small. Manufacturers will refuse to bid for, as well as sell to, South American trade under these conditions. Only where margins justify long terms will there be, in my opinion, any considerable expansion of our trade with South America. Owing to the difficulty which must for a short time at least surround the movement of gold, it must be apparent to the thoughtful that a considerable extension of credit by American sources must result to secure the trade which must naturally be diverted in a larger imeasure to us. It seems important that American producers and financial interests generally should appreciate the necessity of a very thorough study of this factor, while at the same time extending every credit facility justified by the desire to be of assistance to those countries which must now have our foodstuffs and merchandise."

Increasing Passenger Rates—Pennsylvania's decision to increase the rate on passenger mileage books on October 1 from two cents per mile to two and a quarter cents is believed by railroad men to be the first of many passenger rate increases that will be announced within the next few months. Railway men pointed out to-day that such action would carry out one of the many suggestions made by the Interstate Commerce Commission in the five per cent. freight rate decision recently handed down.

While refusing the request of the Eastern roads for a five per cent. increase in freight rates, the Interstate Commerce Commission expressed the belief that the lines in question needed more revenue and could increase their earnings in a number of ways, one by increasing passenger rates. In that connection the Commission said:

"The information available indicates that not only is the operating rate of the passenger-train service much greater than that of the freight-train service, but that the ratio of property investment to gross earnings is much greater in the passenger service. Hence the ratio of capital charges, and usually also the ratio of the taxes attributable to passenger service, is much greater than the ratios attributable to the frieght service. Thus, on the Pennsylvania R.R., the estimated property investment per dollar of freight earnings was \$4.48 in 1910, \$4.16 in 1910, \$4.29 in 1911, and for each dollar of passenger-train earnings was \$7.60 in 1909, \$7.15 in 1910, and \$10.66 in 1911. In 1911 the property devoted to the passenger-train service earned much less than one-half of one per cent., while that devoted to the freight-train service earned \$7.09."

A Scouting Trip—Wishing to enlarge the market for the products of their clients, W. L. Rickard, of Rickard & Sloan, Inc., 20 Vesey St., New York, N. Y., will make an extended trip through South America, leaving New York the latter part of September. He will visit the principal cities on both coasts and will make a thorough investigation of the markets and the best method of selling machinery and mechanical materials and devices. In connection with this trip, Mr. Rickard made the following statement: "For some time past, several of our clients have been considering the advisability of entering the export field, particularly in South America. They have felt that the Latin-American countries offered a large market for their products, and we have been conducting a preliminary investigation in this field to ascertain the best way to reach it. Naturally, with the countries which have had the lion's share of this business at war, and their industries practically at a standstill, the question has been brought to our attention more forcibly than ever. In order that we may determine just what a manufacturer has got to do to obtain some of this business, we decided that a personal investigation was the only thing, and for that purpose I will visit the largest cities and make a thorough investigation for those of our clients who can profitably enter this field. I expect to be away between four and five months."

TUNNEL, BOSTON, MASS.

✚Bids were received by the Boston Transit Commission, Aug. 12, for constructing Sect. D of the Dorchester Tunnel from (A) Michael Meehan, Boston; (B) William J. Sheils, Boston; (C) Rowe Contracting Co., Boston; (D) James J. Coughlan Co., Boston; (E) Coleman Bros., Boston; (F) P. McGovern & Co., Boston; (G) HUGH NAWN CONTRACTING CO., Roxbury (awarded contract). The item bids were as follows:

	A	B	C	D	E	F	G
55,000 cu.yd. earth excavation, open cut	\$6.00	\$5.50	\$4.50	\$5.00	\$4.90	\$4.20	\$5.00
15,000 cu.yd. earth excavation, tunnel	10.00	6.50	7.50	6.50	6.00	7.00	5.00
500 cu.yd. concrete masonry, removed	10.00	12.00	7.00	7.00	10.00	7.00	10.00
4000 cu.yd. concrete base removed	6.00	0.75	0.60	0.75	0.50	0.75	0.60
10,000 cu.yd. concrete, open cut	12.00	2.50	11.50	11.50	11.00	11.80	11.00
6000 cu.yd. concrete tunnel	16.00	13.50	14.00	12.50	14.75	15.00	15.00
100 cu.yd. cinder concrete	7.00	7.00	8.00	7.00	7.00	8.00	8.00
100 cu.yd. cement mortar for joints	15.00	15.00	12.00	15.00	15.00	15.00	15.00
1200 cu.yd. concrete, ⅜- to ¾-in. stone	20.00	13.00	16.00	11.50	18.00	15.00	12.00

[illegible] The total [illegible]

[illegible]

Among the Contracts [illegible] awarded to the Raymond Concrete Pile Co., 140 Cedar St., New York, N. Y. are the following: Concrete piles and foundations for steel towers [illegible] Pittsburgh, Penn., concrete piles for the foundation of factory at [illegible] Toledo, Ohio, foundations for the building of the J. T. Lewis Co., Philadelphia, Penn., concrete piles for the foundation of warehouse for Edward Wagner, Wheeling, W. Va., concrete piles for the foundation of the plant for the National Casket Co., Long Island City, N. Y., concrete piling and foundations for the English Evangelical Lutheran Church of the Reformation, Baltimore, Md.

HOW EUROPE PREPARED THE WAR CHEST

Charles Arthur Conant, the economist, in the Sunday New York Times, discusses how Europe prepared her war chest for the present conflict. He says in part:

In Germany, the story was familiarly told that the Kaiser, near the end of the year 1913, inquired of the governor of the Imperial Bank if the German banks were equipped for war. Being told that they were not ready, he is said to have replied, "When I ask that question again, I want a different answer."

By maintaining a discount rate of 6% at the Imperial Bank from January 1 to October 27, 1913, by active bidding at the London gold auctions for the gold which arrived weekly from South Africa, and by several changes in monetary legislation, the gold was steadily piled up which might enable the governor of the bank to answer "yes" when again asked whether German finance was equipped for war.

From a gold fund of $184,000,000 on December 31, 1912, the Imperial German Bank increased its reserve to $336,000,000 on June 30, 1914. In addition, it gathered up for the Imperial government a sum of about $30,000,000 to be added to the same amount stored in the vaults of the Juliusturm at Spandau. This sum of $60,000,000 is rendered productive to the government in a sense by the distribution of an equal amount of government paper money in small denominations in the circulation. The government is under no pledge, however, to hold the gold against the notes in case of war, and if taxes and loans fail, or are slow in reaching the treasury, the gold can be employed to obtain necessary war supplies even from the hard-hearted foreigner who will accept no other form of payment.

France piled up her gold holdings in eighteen months from $616,000,000 to $792,000,000, and Russia, with a reserve already approximately $800,000,000, materially increased the amount.

Austria-Hungary has not undertaken, under the monetary reform of 1892, to pay gold freely in the redemption of notes, and her gold fund of approximately $250,000,000 has remained comparatively unchanged in amount. It was not surprising that, under pressure like this, the New York market should have been called upon to export about $84,000,000 in gold before the war cloud burst, during the first six months of the present year, and that it should have lost another sum of about $46 000,000 when Europe decided to throw over American securities at any price in order to convert her assets into money.

The entire gold production of the world during the eighteen months ended on June 30, 1914, was approximately $705,000,000. Of this amount about $200,000,000 is required for the arts and $150,000,000 went to British India. This left about $355,000,000 to be applied to monetary uses, and the whole of this amount was absorbed by the four great central banks of Germany, France, Russia, and Austria-Hungary.

What course Germany should pursue in respect to her monetary system in case of European war was the subject of considerable discussion in the special commission which was appointed in 1908 to consider the revision of the charter of the Imperial Bank. It was generally agreed that two steps were advisable—to permit the utmost accumulation of gold in the Imperial Bank, and to protect that gold against abnormal demands.

These two steps were, first, the issue of notes for small amounts, with the object of substituting notes for the gold in circulation; and, second, making the notes of the Imperial Bank legal tender throughout the empire. In 1906 the bank had already departed from its original policy of keeping the circulation saturated with gold coin by authorizing the issue of notes for 50 marks ($11.96) and 20 marks $4.76). The effort was at first made to limit the issue of notes of these denominations to 300,000,000 marks ($72,000,000) but early in 1912 this limit was passed, and within the next two years the issue of these two denominations of small notes rose to 681,822,000 marks, and their ratio to the total note circulation to about 26%.

The government of Russia had already reversed its original policy of 1897, of saturating the circulation with gold coin, and adopted the policy of issuing small notes. The notes of the smallest denomination, 1 ruble (51½c.) were indeed retired; but notes for 3 rubles, 5 rubles, and 10 rubles ($5.15) were steadily pumped into the circulation until, as early as 1909, they constituted 46.5% of the total amount of paper outstanding. Within the next five years the gold in the State bank was increased by about $170,000,000, which nearly covered the increase of the outstanding note issue by $209,430,000.

Belgium had for several years issued notes of small denominations to take the place of her disappearing gold and silver coin; but France reserved the power to issue notes below 50 francs ($9.65) until the need for them should be developed by the emergency of war. This foresight did not restrict great additions to her gold reserve, and gave her an opportunity to add materially to the resources of the Bank of France, when, on the outbreak of war, notes were promptly authorized for 20 francs ($3.86) and even for 5 francs (96½c.)

With the general suspension of gold payments at the central banks of Europe, except at the Bank of England, the banks are in a position to resist raids upon their gold and to lend their resources, as far as sound banking policy permits, to the struggle of their governments to maintain national independence. In England, while the bank is still paying gold for notes, the policy of keeping gold in circulation has been abandoned, and the old limit of note issue, which was £5 ($24.40), has been lowered to 10 shillings ($2.44) and £1 ($4.88).

It is not the purpose of any of the European powers, to carry on the war by issues of paper money. The suspension of gold payments at the banks and the issue of notes for small denominations, which are legal tender in domestic transactions, is for the purpose of husbanding the gold stock against needless runs and keeping it as a guarantee fund of national solvency. It is the course which was adopted by France at the time of the Franco-German war in 1870, but so prudently were the affairs of the Bank of France conducted that the paper never fell more than 2½% below its value in gold.

A similar policy of reserve will probably be pursued by the banks of France, Germany and Russia in the present contest. The government of France has raised the maximum limit of the note circulation of the bank by nearly $1,000,000,000, but the increase will not be used except as additional currency may be required, owing to the restriction in other forms of credit and the special demand for notes in the districts where the armies are gathered.

A Yankee Merchant Marine—As steps in the development of the American Mercantile Marine the passing into law with the signing by President Wilson of the ship registry bill and the war risks insurance bill was welcomed yesterday by Philip A. S. Franklin, vice-president and general manager [illegible] of the International Mercantile Marine, according to the "Journal of Commerce," New York.

Mr. Franklin is a member of the special committee of the Chamber of Commerce appointed by President Seth Low on [illegible] of shipments during the European war. This committee urged the prompt passage of the American registry bill for such relief as it might bring and attended the conference held at the Treasury Department Aug. 14.

"The ship registry bill, in my opinion, goes a long way to help build up a mercantile marine by facilitating the transfer of ships from a foreign register to the American flag. Here is now the opportunity for American capital invested in shipping to place upon the national register the ships owned by it, and immediate relief should follow in increasing our tonnage to meet the lack of ships we suffered from at the outbreak of the war.

"As to the operation of the ships, the proclamation of the President, which he is authorized to make and which I understand he is likely to make at once, will place our ships in a better position to meet the competition of foreign-owned ships operated at less expense than our present laws permit us in carrying on the steamship business as a calling of its own.

"[illegible] of our ships may be transferred immediately under the new law.

"With regard to the war risks insurance bill, this is an emergency bill and its going immediately into effect on the President signing it will help the situation for this reason. There is not enough insurance available in the local market to cover the valuable cargo of a modern big ship. The Government assistance in this direction will practically release much cargo that is offered and has been held back by the high rates that have been exacted.

"There is the question of building ships for the American register. I have stated and repeat it that for the American Line the International Mercantile Marine is willing to build steamships to be always available for the Government's service as express mail carriers and for use as auxiliary cruisers when circumstances demand if the Government will bear a share of the cost, in the same way as that in which the "Mauretania" and "Lusitania" were built with the pecuniary assistance of the British Government."

A Cotton Warehouse at Pensacola—From a reliable source it has been learned that the Government has asked the Louisville & Nashville Ry. to make provision for the storage of 250,000 bales of cotton here this fall, and plans are under way to secure storage space in various other parts of the cotton belt. It is understood that this is one of the results of the movement inaugurated by the Government to aid in marketing the cotton crop as a result of the situation created by the European war. In addition to the storage facilities in the Louisville & Nashville warehouse it has already been announced that the Atlantic Compress Co. is prepared to store at least 150,000 bales of cotton this season.

AUGUST BUILDING RETURNS

No effect of the war can be seen in the building returns for the month of August collected by this paper. In 19 cities in the eastern part of the United States there was a gain of approximately 15% in the estimated cost of the buildings from plans filed during August of this year compared with August of last year. For the first eight months of the year there was likewise a slight gain. In seven cities in the South there was a falling off of a small amount, both for the month of August and for the year. In the Middle West which, except for July, has showed a steady gain, month by month, there was a sharp falling off, amounting to $1,900,000. This, however, cannot be traceable to the war and is wholly accounted for in the falling off at Cleveland, Ohio. This really was not a falling off, but there were some large operations which appeared in the August, 1913, figures.

Practically all of these buildings for which plans were filed, such as the Public Service Building in Newark, have been planned and financed months ago and the formality of filing the plans only took place in August of this year. There were doubtless many corporations whose resources are ample to permit them to go ahead and build at any time they will take advantage of prevailing low prices.

Mitchell, S. D.—The Commercial Club has decided to build a corn palace for next year. Plans are now under consideration. The estimated cost will be about $90,000. T. J. Morgan is the Secy.

+Sioux Falls, S. D.—The Security National Bank has awarded the contract for the construction of its building to the HOLCOMBE CONSTRUCTION CO., Oklahoma City, Okla., at $161,000.

+Rock Springs, Wyo.—The contract for the construction of the high school has been awarded to E. H. COWLEY, Denver, Colo. The estimated cost is $[illegible].

+Glasgow, Mont.—The contract for the erection of the high school has been awarded to LEIGHLAND KLEFFE & CO., Great Falls, at $1[illegible],000.

Great Falls, Mont.—The Knights of Columbus have purchased a site and will erect a home. The estimated cost is $[illegible].

Tentative plans have been prepared for an addition to the Deaconess' Hospital. The estimated cost is $[illegible].

+Helena, Mont.—The Helena Investment Co. has awarded the contract for the construction of the four-story office building, to JACOBY & SONS. The estimated cost is $[illegible].

Springfield, Mo.—It is reported that bids will be received until Sept. [illegible], by Opel & Torbitt, Archs., for the construction of a five-story, 86x1[illegible]0-ft. department store.

El Paso, Tex.—The Hendricks Sanatorium Co. has had plans prepared for a sanatorium which will cost about $[illegible].

Houston, Tex.—The Western Electric Co. is having plans prepared for the erection of a building at Commerce and Jackson St. Estimated cost about $70,000.

San Antonio, Tex.—(Official) A. Caswell Ellis of the School Board, San Antonio, announces that bids will be received by the School Board until noon, Sept. [illegible], for constructing the manual arts high school at an estimated cost of $[illegible]. L. M. J. [illegible], [illegible] East Commerce St., San Antonio, is the Arch.

Waco, Tex.—W. T. Watt plans to erect a six-story hotel and office building, to cost about $[illegible].

+Seattle, Wash.—The PUGET SOUND BRIDGE & DREDGING CO., general contractors for the King County Courthouse, have awarded the contract for roofing and exterior metal trim, to the SEATTLE CORNICE WORKS, at $[illegible]. Noted Apr. [illegible], May [illegible], June 18.

Tacoma, Wash.—F. F. Champney, Arch., Seattle, has been commissioned to prepare plans for a [illegible]-story building for the Elks Club. The estimated cost is $[illegible]. Noted July [illegible] and Sept. 3.

+Eugene, Ore.—The contract for the erection of the high school has been awarded to A. C. [illegible]. The estimated cost is $[illegible]. Noted June [illegible].

La Grande, Ore.—The plans for the Elks Club are nearing completion. The building will be three stories and will cost $[illegible]. [illegible] & [illegible], Henry Bldg., Portland, are the Archs. Noted July [illegible].

Portland, Ore.—[illegible] & [illegible], Archs., [illegible] Trade Bldg., are preparing plans for a [illegible] Catholic church and convent to be erected at [illegible] and [illegible] St. The estimated cost is about $[illegible].

The First National and Security Savings & Trust banks are having plans prepared for a building to cost $[illegible]. [illegible] & Coolidge, Boston, Mass., are the Archs. Noted July [illegible].

Fresno, Cal.—[illegible], Arch., Forsyth Bldg., is preparing plans for the Washington School, to be erected at a cost of $[illegible].

Los Angeles, Calif.—[illegible] & [illegible], Archs., have completed plans for a [illegible] building to be erected at [illegible] Ave. and Seventh St. The estimated cost is $1,000,000. J. W. [illegible] is the owner.

[illegible] H. McDougall, State Arch., is preparing plans for a State Hospital for the Insane. The estimated cost is $1[illegible],000.

+Roseville, Calif.—The Board of School Trustees has awarded the contract for the construction of the Roseville high school to H. A. KLYCE, San Francisco, Calif., at $41,900.

+Toronto, Ont.—The following contracts have been awarded for work on the Registry Office Building by C. S. Cobb, Arch.: Steel, TORONTO STRUCTURAL STEEL CO., at $42,600; carpentry, JAMES A. BERRIDGE, at $19,984.

+Toronto, Ont.—The Excelsior Life Association, Adelaide and Toronto Sts., has awarded the contract for the construction of its office building to the PETER LYALL CONSTRUCTION CO., Montreal. The estimated cost is $500,000.

Edmonton, Alta.—J. H. Garthy plans to build a seven-story brick and terra cotta office building on Jasper Ave. The estimated cost is $200,000. Van Siclen & Macomber, Alexander Bldg., are the Archs.

Southern California Notes—Business conditions are beginning to pick up here, especially in the building line, and a general increase in the cost of materials is predicted.

The Exposition buildings at San Diego are rapidly nearing completion and make a very good showing. The exhibit will be in the nature of a "back-to-land movement," and the arrangements already made insure an interesting visit to the fair.

The reclamation of about 60 acres of water front along San Diego harbor, together with the municipal docks, is progressing rapidly, and plans are now being considered for extending the area of reclamation for a considerable distance to the north of the present contract.

The Los Angeles harbor improvements show considerable activity and will soon be in a position to handle the trade that will come from the Panama Canal.

Engineering Work in British Columbia

In British Columbia, as elsewhere in Canada, business was suffering a depression prior to the declaration of war in Europe. The war so precipitated matters that work, other than that which is absolutely essential, is at a standstill.

Notwithstanding assurances from the British Government to the effect that practically all shipping on the high seas is now safe, confidence has not been restored, and will not be until more definite information is received.

Remote as this may seem from the business situation in British Columbia, it is nevertheless considered most important.

The present situation might be termed hesitation rather than depression, for there is much important construction in abeyance. Underlying the untoward conditions, there is a current of optimism which looks for and forecasts a speedy resumption of business and a return to the nearer normal just as soon as money becomes easier through confidence restored.

It should be remembered that for big works—railway development and the like—British Columbia depends to a large extent upon London capital, which is just now impossible to secure.

Municipal and building activities should not be greatly hindered, for the backbone of British Columbia industry—fishing, lumber, mining, etc.—is, generally speaking, in a flourishing condition. Well established industries did not suffer greatly from the financial depression and should be a great aid to rapid adjustment.

The Government of the Dominion of Canada has stated that public works will proceed according to schedule, but the Provincial Government here seems disposed to curtail expenses. The science building of the British Columbia University, a government institution, is the first large contract award to be postponed indefinitely by them on account of the war.

The city of Vancouver has similarly intimated that it will do no more than necessary work. The local press is, at the time of writing, carrying the city's advertisement cancelling the call for tenders for the construction of sidewalks, and permitting contractors to withdraw bids already made.

On the other hand, the Board of Trade of the city of Vancouver, an influential body of British Columbia business men, intends to at once bring pressure to bear upon municipal and provincial governments to the end that public works will be carried on as extensively as possible. It is thought that this may result in activities which will insure more of this work being done than in each of the last two winters.

At New Westminster, work is progressing on the harbor improvement scheme, and it is expected that the new wharf of the city on Front St. will be finished in about three weeks. The total cost of this work, including the cost of the construction plant, is estimated at $19,283. Work done last month cost $30,000, leaving the sum of $180,716 to be still expended out of the half million dollar bylaw.

The award of contracts for the proposed soap works to be established by the Royal Crown Soap Works, Ltd., of Vancouver, B. C. (closely identified with Lever Bros., Port Sunlight, England), on the south shore of Burrard Inlet, near the Second Narrows, has been deferred on account of the war situation. Bids were closed nearly two weeks ago. The enterprise was to have been financed in London and the plans called for the expenditure of $250,000.

It is affirmed that there will be no cessation of construction on the new $5,000,000 plant of the Dominion Shipbuilding and Drydock Co., Ltd., at North Vancouver, B. C.

The Burrard Inlet Tunnel & Bridge Co., Ltd., has had no meeting since the war broke out. Plans for its $2,000,000 bridge have been taken under advisement and are now being adjudicated upon by Ralph Modjeski, at Chicago, Ill. Contracts will probably be let later. In the "Engineering News" of July 16, 1914, it was stated in error that this contract had been let to the Foundation Co.

The British Columbia Steel Co., Ltd., has completed plans for the establishment of a $200,000 steel plant at Bridgeport, B. C., and the stock is now on the market. The company states that it will shortly commence building operations. The head office of the company is at Vancouver, B. C., nd many prominent business men of the city, including Francis Leighton, general manager of the Vancouver Engineering Works, Ltd., are named as provisional directors.

Construction on the Pacific Great Eastern Ry. has not slowed up in the least and satisfactory progress reports are being continually published.

At a special meeting of the South Vancouver, B. C., Council, a communication was read from the Voters' League protesting against the Council's action in letting the contract for Victoria Road pavement to the Columbia Bithulithic Co., claiming that the work could be done cheaper by day labor. The Reeve replied that the company's tender was a good deal lower than the engineers' estimate.

At Fort Moody, B. C., the street improvement work on John and Clark Sts. was ordered proceeded with at the last meeting of the Council. Work will cost $45,000 and will be done as a local improvement. A letter was also read from a Toledo, Ohio, firm of bond buyers confirming the recent order of 92 net for water loan debentures of $80,000. It is therefore expected that the water system from Noon's Creek will be started at an early date.

The latest information available from the lumber mills shows that they expect to have to reduce their output on account of the temporary stagnation of the market.

Building has practically ceased, but in Vancouver city alone, buildings are projected none of which will cost less than $40,000, and aggregating in value over $12,000,000. Building in outlying districts is similarly situated. It is therefore expected that as soon as confidence is restored, building will proceed on a big scale.

The Prince Rupert, B. C., hydroelectric plant has been held up, due to the purchase of penstocks in Germany and their consequent non-arrival on account of hostilities.

A Royal Commission recently began hearings on trade conditions in Canada in connection with trade commissions in other parts of the British Empire. Its activities will not be discontinued, but on account of the outbreak of war it will limit its hearings for the present to the Maritime Provinces, in accordance wtih instructions received from London.

The wearing off of the novelty of the war will result in a partial resumption of business activity.

Permanent Trade Exposition in South America—The proposition for permanent expositions of American manufacturers in South American capitals is growing in favor throughout the United States.

Word was received in New York this week that Baltimore merchants are arranging to open an exhibition of their own in some capital.

Pittsburgh according to reports, will spend a million dollars in showing the Southern republics what it can do in the way of providing iron and steel and other manufactures.

Exporters, associations and chambers of commerce are receiving letters from merchants and manufacturers all over the country, urging that everybody combine in the permanent expositions.

The following statement was authorized this week by the National City Bank:

"Permanent exhibitions of American manufactured articles maintained at South American centers would undoubtedly prove of large value in the development of foreign trade with South America. The Commercial Association of the city of Chicago has maintained an exhibit at Buenos Aires for the last three years with a representative in charge of the exhibit.

"It would seem that a coöperative effort on the part of New York and New England manufacturers along these lines would be very beneficial.

"An effective plan for establishing such an exhibition would be for the chambers of commerce of the cities interested in developing the South American markets to combine to provide competent representatives and publicity agents at joint expense, meeting the expense in proportion to the number of members of the respective associations interested in the South American field. The individual exhibitors should be charged not to exceed $100 a year, and for this amount would receive a certain number of square feet for their exhibit.

"The general cost to the Association of Commerce of the City of Chicago for the exhibit maintained at Buenos Aires was in the neighborhood of $50,000 for the three and a half years that the exhibit has been there, and the individual cost to the exhibitors has been $100 a year for approximately 30 sq.ft. of space. In New York and the New England States there ought to be at least five hundred firms which would be willing to maintain an exhibit. The expense for each chamber of commerce would by coöperative effort be reduced to what would not amount to more than an ordinary advertising appropriation.

"The exhibit would serve as a center for American activities, where purchasers would be invited to inspect the goods, competent salesmen would represent the various lines, and in the case of machinery, skilled mechanics and demonstrators could be employed to point out the talking points in favor of American machinery.

"Where a number of competing firms should become members of the exhibit, an arrangement could be made for pooling the sales and dividing the profits.

"The purpose of the exhibit would be to introduce American goods, to create a demand for them and to demonstrate their superiority.

"Particular lines of goods could be featured on certain exhibition days, which days could be announced with appropriate advertising and circulars, and every effort could be made to keep the lines of American goods filled and thoroughly up to date. An exhibit of this kind would be one of the most practical means of directing the attention of South Americans to American products."

John Barrett, director of the Pan-American Union, summed up the commercial possibilities of trade with South America recently. The 20 South American countries in 1913 conducted a foreign commerce valued at $2,870,188,575. The imports were valued at $1,304,261,763, and the exports took up the remainder. This gave the combined countries a trade balance with the world of $261,655,049.

The American Manufacturers Export Association has sent out a "Warning to Exporters." It tells them to proceed very carefully in going into South American trade. They should acquire first an accurate and complete knowledge of conditions and requirements essential to the successful conduct of foreign trade.

Contracts to Be Let

Bids received until Oct. 22, 1914.

Market Street Bridge

NOTICE TO BRIDGE CONTRACTORS

Chattanooga, Tennessee
August 31st, 1914

Sealed proposals directed to the undersigned, and endorsed on the outside of the envelope "MARKET STREET BRIDGE BID," will be received at the Office of the County Judge, County Court House, until 10.00 A.M., October 22nd, 1914, for the construction of a bridge at Market Street across the Tennessee River at Chattanooga, Tennessee. The bridge will be fifty (50) feet in width by approximately 2000 Ft. in length and will consist of

(a) Nine (9) reinforced concrete girder spans, forty (40) Ft. each.

(b) Two (2) reinforced concrete arches, each (16?) One hundred and sixty five ft. span.

(c) Four (4) reinforced concrete arches, each (180) one hundred and eighty ft. span.

(d) One (1) three hundred (300) ft. steel span of the SCHERZER ROLLING LIFT DOUBLE LEAF BASCULE TYPE.

Bids for the construction of the above bridge, will be asked for as follows:

(a) For the masonry and the concrete portion of the bridge complete.

(b) On the steel portion of the Scherzer Rolling Lift Double Leaf Bascule complete with machinery installed and ready for use.

(c) Same as (b), except the machinery omitted.

(d) On the masonry and reinforced concrete and steel portion of the bridge including the Scherzer Rolling Lift Double Leaf Bascule complete.

The Tennessee River Bridge Committee reserves the right to let the reinforced concrete portion and the steel portion separately or to let the entire work to the lowest responsible bidder on one bid for the construction of the bridge complete.

The bonds for the construction of the above mentioned bridge at Market Street, amounting to Five Hundred Thousand ($500,000.00) Dollars have been issued and sold at a premium. The entire proceeds of the bond sale have been deposited in local banks, and is available for expenditure on the construction of this bridge.

Blank forms for proposals, contract and bond, plans and specifications may be seen at the Office of the County Engineer, County Court House, Chattanooga, Tennessee, and will be furnished on application on or after September 25th, 1914, at the Office of Mr. H. H. Davis, Consulting Engineer, Whitehall Bldg., New York City, N. Y. Said application, however, shall be accompanied by a deposit of Fifty ($50.00) Dollars which will be required for each set of plans and specifications for the masonry or reinforced concrete portion of the bridge and Twenty Five ($25.00) Dollars which will also be required for each set of plans and specifications of the steel portion of the bridge, i.e. Scherzer Rolling Lift Double Leaf Bascule. The above deposits for plans and specifications will be returned to all contractors submitting a bid upon the return of the above mentioned plans and specifications. The successful contractor will be required to execute an approved Surety Company bond, for [illegible] per cent of the estimated value of the work as determined from the bids to assure the faithful performance of the contract, and the payment for all labor and material, which may be used therein. Monthly estimates will be made of the work done and of materials of construction delivered at [illegible] showing the [illegible] and ninety (90) % of [illegible] on the 15th of [illegible]

[illegible] at all times and abutments and [illegible] to examine the [illegible] to be excavated and to familiarize themselves with the site and local conditions before submitting their proposals.

The right is reserved to reject any and all bids.

TENNESSEE RIVER BRIDGE COMMITTEE
Theo. F. King, Chairman,
L. B. Bryan, Secretary,
J. B. Ragon,
W. Cummings,
H. F. Lawrence.

Bids received until Sept. 28, 1914.

Construction, Structural Steel, Heating, Plumbing, etc.

NOTICE TO CONTRACTORS. Sealed proposals for construction, structural steel, heating, plumbing and electric work for the Drill Hall, Cornell University, Ithaca, N. Y., will be received by the Hon. E. L. Williams, Cornell University, Ithaca, N. Y., until Monday, Sept. 28, 1914, 4 P.M., when they will be opened and read publicly. Bids will be received for each division of the work separately and no combination of bids will be considered. Proposals shall be accompanied by certified check in the sum of five per cent of the amount of bids, and the contractors to whom the awards are made will be required to furnish surety company bonds in the sum of fifty per centum of the amount of contract, within thirty days after official notice of award of contract, and in accordance with the terms of the specifications Nos. 1965, 1966, 1967 and 1968. The right is reserved to reject any or all bids. Drawings and specifications may be consulted and blank forms of proposals obtained at the office of the Treasurer, Cornell University, at the Department of Architecture, Capitol, Albany, N. Y., at the New York Office of the Department of Architecture, Room 1221 Woolworth Building, New York City. Plans and specifications will be ready Tuesday, Sept. 8, 1914. In applying for plans and specifications each bidder must state which part of the work, (such as construction, structural steel, heating, plumbing and electric work) he intends to bid on. Drawings and specifications may be obtained at the Department of Architecture, Capitol, Albany, N. Y., upon deposit of certified check in the sum of $15.00 for construction work or structural steel, and in the sum of $10.00 for each set of heating, plumbing or electric plans, which check will be returned if plans and specifications are sent back in good order to the State Architect, Lewis F. Pilcher, Capitol, Albany, N. Y.

Bids received until October 15, 1914.

Proposals for Steel Highway Bridge

Department of Public Works, Dominican Republic, Santo Domingo, Sept. 1, 1914.

Sealed proposals will be received at the office of the Director General of Public Works, Santo Domingo, R. D., until [illegible] o'clock a. m., October 15, 1914, for furnishing all labor and materials for the erection of a steel highway bridge across the Ozama River at Santo Domingo City, Dominican Republic, in strict accordance with the plans and specifications which may be examined at the office of the Director General of Public Works in Santo Domingo City or which may be had by making application in writing to the Strauss Bascule Bridge Co., Chicago, Ill., Consulting Engineers.

Bids received until Sept. 14, 1914.

Garbage Incinerator

NOTICE TO CONTRACTORS

Charlotte, N. C., Aug. 31, 1914.

Sealed bids are asked for and will be received until [illegible] P. M., Monday, 14th, September, 1914, by the City Clerk of Charlotte, N. C., for the construction of a Garbage Incinerator Building and 100 ft. [illegible] Brick Stack, each or all.

Copies of the Plans and Specifications, proposal forms, contract form, bond, etc., may be seen in the Office of the City Clerk, at the City Hall, Charlotte, N. C., or may be obtained from him by prospective bidders upon depositing $3.00, which sum will be refunded upon return of the Plans and Specifications in good condition. A certified check for at least 5% of the amount of the bid must accompany each bid.

A. H. WEARN,
City Clerk.

+Toronto, Ont.—The contract for the masonry on the Central High School has been awarded to R. ROBERTSON & CO., Toronto, at $92,682. Noted June 11.

Vancouver, B. C.—It is reported that the Vancouver Civic Center Commission will receive plans, until Nov. 30, for the construction of a Civic Center building. The estimated cost is $1,000,000.

FOREIGN TRADE OPPORTUNITIES

Where addresses are omitted they may be obtained from the Bureau of Foreign and Domestic Commerce, Department of Commerce, and its branch offices.

No. 13627. Railway Material—A company organized by merchants in one of the principal cities in Asia desires catalogs from American manufacturers of railway material, according to a letter received at the Bureau of Foreign and Domestic Commerce from one of the foreign legations at Washington. This company was organized with a view to purchasing American goods direct.

No. 13631.. Motor Trucks—An American consul telegraphs from one of the European countries stating that an American located in his district desires prices immediately from reliable manufacturers in the United States for all available 1 to 3 ton motor trucks, delivered. Prices should be cabled to the address given in the report.

No. 13632.. Scientific Instruments—The Bureau of Foreign and Domestic Commerce is in receipt of a letter from a foreign legation in Washington stating that a company organized by merchants in a city of one of the Asiatic countries desires catalogs and other information from American manufacturers of all kinds of scientific instruments. This company is organized to purchase several lines of goods direct from the United States.

War Rates for New York Funds

War Rates for New York Funds—Early in the year, the City of New York voted to foreign financial interests about $100,000,000 in short-time securities. These were payable in gold in London and Paris to raise funds for paying the loan a syndicate of New York bankers bought new warrants bearing 6% interest.

A condition of the loan was that improvements authorized by the city during 1915, which are not self-sustaining, are to be paid for 25% from taxes and 75% by the issue of 1- to 15-yr. corporate stock. Improvements authorized during 1916 will be paid for 50% by sale of serial stock; during 1917 they will be met by 75% from the budget and 25% by serial stock, and in 1918 the full cost of such improvements will be met from taxes.

The securities to be issued by the city will be dated Sept. 1, 1914, and $57,000,000 in the form of corporate stock notes will mature Sept. 1, 1915; $43,000,000 in revenue warrants will mature, $18,000,000 Sept. 1, 1916, and $25,000,000 Sept. 1, 1917. They will be delivered to the subscribing banks at once and payment will be made to the city by crediting to its account the amount of the bank's subscription. Of the $57,000,000 one-year corporate stock notes, Comptroller Prendergast stated, $35,000,000, which are for self-sustaining improvements, will be refunded by 50-year stock, and the remaining $22,000,000 refunded by the new 1- to 15-year serial stock to be retired out of taxes at their maturity. The Comptroller said the only way the city could secure any gold at this time, to pay its maturing obligations, was to get all the banks to coöperate.

Mayor Mitchel said that he took measures to find out if gold could be secured by the city from the Federal Government, but found that it was impossible to get gold from that quarter. The Comptroller said this confirmed his earlier experience in the same matter. The Comptroller said he realized this plan will result in an increase in the tax rate and will restrict improvement work.

Henry P. Davison, of J. P. Morgan & Co., said: "I consider it a great thing that anybody should be able to raise $100,000,000 in times of stress like these. The success of the loan was due to the patriotism of the banks of the city."

A shipment of $5,000,000 in gold was made Sept. 13 by J. P. Morgan & Co., to the newly established branch of the Bank of England at Ottawa, Ont.

INTERCEPTING DRAIN, FALL RIVER, MASS.

Bids were received Sept. 4 by the Reservoir Commission for constructing a reinforced concrete intercepting drain and appurtenances from (A) Hanscom Construction Co., Boston, Mass.; (B) William H. Arthur, Stamford, Conn; (C) T. Stuart & Son Co., Newton, Mass.; (D) Bruno & Petitti, Boston, Mass.; (E) Mason, Hilton & Co., New York, N. Y.; (F) Fred T. Ley & Co., Inc., Springfield, Mass.; (G) Leo E. Kelly, Inc., Brooklyn, N. Y.; (H) The Whiting, Turner Contracting Co., Baltimore, M. D.; (I) Chauncey H. Sears, Fall River, Mass. Contracts to Be Let

Bids received until Sept. 21, 1914.

Garbage Reduction Plant

Sealed proposals for furnishing machinery and equipment for a Garbage Reduction Plant to be located near the City of Detroit, Michigan, addressed to the Department of Public Works of the City of Detroit, will be received at the office of the Commissioner, City Hall, Detroit, until 10:00 o'clock A.M. on the twenty-first day of September, 1914.

Separate proposals, in duplicate, shall be submitted for each of the following items:

- A. Boilers and Stokers
- B. Engines and Generators
- C. Boiler Feed Pumps
- D. Feed Water Heater
- E. Air Compressor
- F. Engine Room Crane
- G. Locomotive Crane
- H. Coal and Ash Handling Equipment
- I. Repair Shop Equipment
- J. Green Garbage Cranes
- K. Conveying Machinery
- L. Cooking and Pressing Equipment
- M. Grease Handling Equipment
- N. Evaporating Equipment
- O. Drying Equipment
- P. Percolating Equipment
- Q. Railroad Track Scales
- R. Railroad Garbage Cars

Bidders submitting a proposal including two or more items shall submit a proposal for each item.

Each bid shall be accompanied by a certified check in the sum of not less than ten (10) per cent. of the amount of the bid, payable on its face to the Department of Public Works of the City of Detroit, as surety for the acceptance of the contract.

The accepted bidder shall furnish two bonds each in a sum equal to the full amount of the contract.

Proposals shall be made in accordance with the specifications prepared by and on file in the office of Smith, Hinchman & Grylls, Consulting Engineers, 710 Washington Arcade, Detroit, Michigan. Copies of these specifications may be secured upon application to the Consulting Engineers.

The Commissioner reserves the right to reject any or all proposals.

GEO. H. FENKELL,
Commissioner.

Bids received until Oct. 6, 1914.

Vault Equipment

NOTICE TO CONTRACTORS

Trenton, N. J.

Sealed proposals will be received at the office of the Comptroller in the State House, Trenton, New Jersey, at twelve o'clock noon, October 6th, 1914, for furnishing [illegible] vaults in the office of the Secretary of State, in accordance with plans and specifications on file in the office of the Commissioner of Charities and Corrections, State House, Trenton, New Jersey.

Each bidder must accompany his proposal with a certified check for ten per centum of the amount of his proposal, payable to the State, properly endorsed, which will be returned to the unsuccessful bidder immediately following the award of the contract. The Commission reserves the right to reject any or all bids.

The successful bidder will be required to enter into a contract for the performance of the work with a bond of an approved security company for not less than one-half the amount of the contract price.

Proposals must be enclosed in envelopes sealed and marked "PROPOSALS FOR FURNISHING [illegible] VAULTS IN THE OFFICE OF THE SECRETARY OF STATE, TRENTON, NEW JERSEY" and addressed to the Comptroller, Hon. Edward I. Edwards, Secretary of the State House Commission.

Bids received until Sept. 28, 1914.

Construction, Structural Steel, Heating, Plumbing, etc.

NOTICE TO CONTRACTORS. Sealed proposals for construction, structural steel, heating, plumbing and electric work for the Drill Hall, Cornell University, Ithaca, N. Y., will be received by the Hon. E. L. Williams, Cornell University, Ithaca, N. Y., until Monday, Sept. 28, 1914, 4 P.M., when they will be opened and read publicly. Bids will be received for each division of the work separately and no combination of bids will be considered. Proposals shall be accompanied by certified check in the sum of five per cent. of the amount of bids, and the contractors to whom the awards are made will be required to furnish surety company bonds in the sum of fifty per centum of the amount of contract, within thirty days after official notice of award of contract, and in accordance with the terms of the specifications Nos. 1965, 1966, 1967 and 1968. The right is reserved to reject any or all bids. Drawings and specifications may be consulted and blank forms of proposals obtained at the office of the Treasurer, Cornell University, at the Department of Architecture, Capitol, Albany, N. Y., at the New York Office of the Department of Architecture, Room 1224 Woolworth Building, New York City. Plans and specifications will be ready Tuesday, Sept. 8, 1914. In applying for plans and specifications each bidder must state which part of the work, (such as construction, structural steel, heating, plumbing and electric work) he intends to bid on. Drawings and specifications may be obtained at the Department of Architecture, Capitol, Albany, N. Y., upon deposit of certified check in the sum of $15.00 for construction work or structural steel, and in the sum of $10.00 for each set of heating, plumbing or electric plans, which check will be returned if plans and specifications are sent back in good order to the State Architect, Lewis F. Pilcher, Capitol, Albany, N. Y.

Contractors

BIDS OPENED OCTOBER 6, 1914

for the construction of Section No. 1 of Route No. 43 and Section No. 1 of Route No. 26, being the diagonal connection under 42nd Street between the existing subway and the Lexington Avenue subway.

Call or write concerning contract, plans and specifications.

PUBLIC SERVICE COMMISSION FOR THE FIRST DISTRICT,
154 Nassau Street. New York City.

Bids received until Sept. 19, 1914.

Boilers

NOTICE TO CONTRACTORS. Sealed proposals for new boilers at Potsdam Normal School, Potsdam, N. Y., will be received by Dr. Thos. E. Finegan, Asst. Commissioner for Elementary Education, Education Building, Albany, N. Y., until 12 o'clock noon on Saturday, September 19, 1914, when they will be publicly opened and read. Proposals shall be enclosed in an envelope furnished by the State Architect and shall be accompanied by a certified check in the sum of five per cent. of the amount of bid and the contractor to whom the award is made will be required to furnish surety company bond in the sum of fifty per cent. of the amount of contract within thirty days after official notice of award of contract and in accordance with the terms of specification No. [illegible]. The right is reserved to reject any or all bids. Drawings and specifications may be consulted at the New York office of the Department of Architecture, Room 1224 Woolworth Building, at the office of the Department of Architecture, Capitol, Albany, N. Y., and at the Potsdam Normal School, Potsdam, N. Y. Drawings and specifications may be obtained at the Department of Architecture, Capitol, Albany, N. Y., upon reasonable notice to and in the discretion of the State Architect, Lewis F. Pilcher, Capitol, Albany, N. Y.

A New Railway in Panama

Panama Canal Zone (By Cable)—R. W. Hebard & Co., Panama, has the concession for the Chiriqui R.R. All purchases will be made by J. M. Motley, 16 Exchange Place, New York.

The Chiriqui project consists of a line from Pedregal, on the Pacific, to David. From this point there will be two branches, one 20 miles to La Concepcion, and another, 33 miles, to La Boquet. The La Boquet branch presents some unusual features, as an elevation of 4000 ft. will have to be attained in a distance of 33 miles. The funds for the construction will be furnished by the Republic of Panama. This information was obtained by a special representative of "Engineering News," who is now in South America.

From the "Canal Record," issue of Sept. 2, we extract the following:

"Grading on the new railroad in the province of Chiriqui has been completed for a distance of about seven miles, four miles between the port of Pedregal and the city of David, and three miles on the La Concepción branch of the road. This branch line, extending from David to the village of La Concepción, a distance of about 18 miles, will be the first to be completed.

"About 25,000 Oregon pine creosoted ties have been delivered to date; these cost, laid down, about $1 each. The contractors, R. W. Hebard & Co., are preparing specifications and conditions under which native ties, delivered at any point on the line, will be purchased. It is anticipated that 25,000 native hardwood ties can be obtained locally. The contractors are purchasing from the Panama Canal all the old 70-lb. rail in good condition that can be spared, in addition to a miscellaneous lot of other equipment, including two small Porter locomotives, used in the construction of the canal locks."

American Machinery for Spain—The Spanish government has entered the American market for the immediate purchase $2,000,000 of contractors' machinery and machine tools.

This report, emanating from the Foreign Trade Bureau of the Philadelphia Commercial Museum, has been verified by a representative of "Engineering News."

George C. Gibson, Asst. Chief of the Foreign Trade Bureau, placed the correspondence relative to this statement at the disposal of our representative.

Of chief interest was a letter, dated Madrid, Aug. 20, from the Sociedad General de Representaciones, agents for machinery and accessories of all classes, industrial installations, and materials for railroads and tramways. In part it was as follows: "We have contracts to furnish the Spanish government with several million dollars' worth of machinery and supplies but the war has prevented our fulfilling these contracts since most of the orders were placed with German and French firms."

"As you know, the Spanish government has given orders to start important public works, and millions will be spent for this purpose. This firm is furnishing all the factories of the War and Navy Departments with machines and tools and manufacturers of the following lines are requested to enter into communication with us for the supply of machinery, to wit: sensitive and upright drilling machines, cold metal sawing machines, gear-cutting machines, punching and shearing machines, grinding and polishing machines and machines for the manufacture of automatic revising and refilling of cartridges for Mauser guns."

In an interview with George C. Newcomb, Spanish consul at Philadelphia, Monday morning, in regard to the status of this company, he said, "This firm is one of the largest and most responsible in Spain, however, beyond that I know of no specific contracts which they may be handling for the government."

Senor C. G. Salas, Spanish Consul General, New York, when questioned Monday afternoon regarding definite plans and appropriations on the part of the government, said: "Last year in the official budget there was made an appropriation of some $10,000,000 for improvements to extend over a period of ten years, but due to the problem of unemployed labor, I understand that steps have been taken to push the work along as rapidly as possible, so as to give employment to the idle men.

"The work which the government has undertaken includes new roads, electric power installation, railway and illumination, irrigation, the dredging of Cadiz harbor together with the building of quays and breakwaters at the same port, railways in Morocco and the improvement of the port of Melilla."

RAILWAYS

✚**Virginia**—Norfolk & Western Ry.—A contract has been awarded by this company to WALTON & CO. for clearing a tunnel on the Pocahontas division, which recently caved in. The company also contemplates the construction of an extension from Suiters to Cedar Bluff, about 22 miles. J. E. Crawford, Roanoke, Va., is Ch. Engr.

Georgia—Rocky Ford & Southwestern Ry.—Plans are being considered by this company for the construction of a railroad from Rocky Ford to Portal, Ga., about 12 miles. Henry B. Griffin, Rocky Ford, Ga., is interested.

North Georgia Mineral Ry.—This company is being organized for the purpose of constructing a railroad from Atlanta north through Fulton, Cobb, Cherokee and Bartoe Counties, about 50 miles. William J. Morrison and A. C. King are interested.

The construction of a railroad from Homer, Ga., to Lula, Ga., is contemplated by Zeigler & Jones Co.

Tennessee—See item under Miscellaneous — Interlocking plant, Chattanooga, Tenn.

Tennessee—Alabama Great Southern R.R.—Plans are being made by this company to spend about $80,000 for the improvement of the Belt Ry. in Chattanooga, Tenn., in connection with the double-track work on the line from Chattanooga to Wauhatchie. C. Dougherty, Cincinnati, Ohio, is Ch. Engr.

Kentucky—Chicago, Burlington & Quincy R.R.—Plans are being made by this company to resumè work on the construction of its line from Paducah, Ky. to Metropolis, Ill. C. H. Cartlidge, Chicago, Ill., is Ch. Engr.

Illinois—Chicago, Burlington & Quincy R.R. — See item under Kentucky.

✚**Wisconsin**—Chicago & Northwestern Ry.—A contract has been awarded by this company for the construction of a logging road from Kingston, Wis. to Cleary, Wis., about five miles, to WHITE & DUFFY, Chicago, Ill.

Montana—Great Falls Western R.R.—This company has been incorporated to construct a railroad through Cascade, Lewis and Clark and Powell Counties, about 110 miles long. The incorporators include A. C. Goodnow, Evanston, Ill., J. D. MacVicar, Great Falls and James O'Grady, Great Falls.

Arkansas—According to press reports the construction of a 70-mile railroad to connect Hoxie, Smithville, Poughkeepsie, Evening Shade, Melbourne and Calico Rock, Ark., is contemplated by the Arkansas Mining & Development Co. J. A. Gay, Poughkeepsie, Ark., is interested.

Texas—Quanah, Acme & Pacific Ry.—Surveys are being made by this company for the construction of a railroad from Roaring Springs, Tex. to Roswell, N. M., about 86 miles. Robert Gray, Quanah, Tex., is eGn. Mgr.

Oklahoma—Oklahoma Central R.R.—This company has been purchased by the Atchison, Topeka & Santa Fé R.R. Announcement has been made that the new owners contemplate improving the line in order to establish efficient service to handle the coal tonnage from Lehigh, Okla.

Arizona—Mascot & Western Ry.—Contracts will soon be awarded by this company for the construction of a 17-mile railroad from the mines of the Mascot Copper Co., near Dos Cabezos, Ariz. to Wilcox, Ariz. C. R. Weston is Gen. Mgr.

Oregon—Booth Kelly Lumber Co.—The construction of a railroad in Lane County, Oregon, to its timber holdings is contemplated by this company. The main office of the company is in Portland, Ore.

✚**California**—San Diego & Arizona Ry. Co.—ROBERT SHERER & CO., Pacific Electric Bldg., Los Angeles, have been awarded the contract for grading and constructing reinforced-concrete culverts on a portion of its right-of-way in California.

California—Western Pacific Ry. Co.—Plans are being prepared by John F. Stevens, Ch. Engr. of the Gould system, for the construction of feeder lines to Fairoaks, Orangevale and Folsom, to connect with the main line near Sacramento.

California Terminal Ry. Co.—This company has filed articles of incorporation to construct a railroad from San Francisco to Sacramento, about 95 miles with branch lines to Petaluma and Napa, making a total trackage of 118 miles. The capital is placed at $200,000. The directors are C. W. Conlisk, San Francisco and C. H. Lind and W. M. Rank, Alameda, Calif.

Alaska—The government engineers are making surveys for the proposed railroad in Alaska. Lieut. Fred K. Mears of the Alaska R.R. Comn. will be ready to submit a report on the route about Nov. 1.

ELECTRIC RAILWAYS

New Haven, Conn.—Plans are being prepared by the Connecticut Co. for the reconstruction of several of its lines in New Haven. F. P. Harlan, New Haven, is Mgr..of the New Haven Division.

Southington, Conn.—Preliminary arrangements are being made by the Waterbury & Milldale Tramway Co. for the construction of three miles of new track in Southington.

Du Bois, Penn.—According to press reports, the Jefferson Coal Co. contemplates the construction of an electric railway from Coal Glen to Falls Creek, to connect with the line of the Du Bois Traction Co.

Fairmont, W. Va.—The Monongahela Valley Traction Co. has secured the right-of-way for the extension of its line from Fairmont to Riverside. James O. Watson, Fairmont, is Gen. Mgr.

Owensport, W. Va.—The West Virginia Electric Ry. Co. is being organized to construct an electric railway from Owensport to Weston, about 50 miles.

Parkersburg, W. Va.—The Charleston, Parkersburg & Northern Ry. Co. will award contracts this fall for the construction of part of its 75-mile electric railway to connect Parkersburg, Sissonville, Guthrie, Ripley and Charleston. K. B. Stephenson, Parkersburg, is Sery

Florence, Ga.—The Central Carolina Electric Ry Co is being organized for the purpose of constructing an electric railway in Florence.

Waycross, Ga.—The Waycross Street & Suburban Ry Co is making arrangements for the construction of an extension to Hebardville.

Jacksonville, Fla.—The Jacksonville Traction Co will construct additional tracks on Hogan St from Bay to Eagle and Cedar Sts. Harry Cramer, Jacksonville, is Local Mgr and Pur Agt.

Campton, Ky.—The Mountain Central Ry Co has been organized for the purpose of constructing a 12-mile electric railway from Campton to Campton Junction. Floyd Day and J C M Day are interested.

Middlesboro, Ky.—W Godfrey Hunter has secured a franchise and is making preliminary arrangements for the construction of an electric railway from Middlesboro to the coal mines along Yellow Creek. The line will be seven miles long.

Middletown, Ohio.—Michael Klaiber, Jr, Reading, Ohio, is interested in the construction of an electric railway from Middletown to Norwood. Surveys have been started.

Muskegon, Mich.—The Muskegon Traction & Light Co has applied to the City Council for a franchise for the extension of its Allen St line in Muskegon. H S Nelson, Muskegon, is Pur Agt.

Aurora, Ill.—The Aurora & Mendota Electric Ry Co is securing the right-of-way for the construction of its proposed electric railway to connect Aurora, Plano, Yorkville and Sandwich.

Joliet, Ill.—The Joliet & Eastern Traction Co has been incorporated to construct and operate an electric railway to connect Joliet, New Lennox, Frankfort, Matteson, Chicago Heights, Hammond and Chicago. The incorporators include David F Rosenthal, Leo S. Kosetcheck, Jacob Schwartz and Edmund J Claasen.

Jefferson City, Mo.—H. W Knight, Chicago, Ill, is interested in the construction of an electric railway from Jefferson City, Mo, to Keokuk, Iowa.

San Antonio, Tex.—The San Antonio, San José & Medina Valley Interurban Ry Co., which has been organized for the purpose of constructing an interurban electric railway between San Antonio and Medina Dam, about 28 miles, will sooon begin the grading work. The company will also lay out a town site at the Medina Dam terminus of the line. Noted June 18.

St. George, Utah.—Surveys have been started for the construction of an electric railway from Lund to St. George. A B Christensen, Salt Lake City, is interested.

Phoenix, Ariz.—The Salt River Valley Electric Ry Co will construct an interurban electric railway system that will connect Phoenix with Scottsdale, Tempe and Mesa. It also has a franchise to lay a track on East Monroe St, in Phoenix.

Lynden, Wash.—Preliminary arrangements are being made by the Blaine-Lynden Electric Ry. Co to start work on the construction of its proposed line from Blaine to Lynden. J J Pinckney, Blaine, is Pres. Noted June 4.

Olympia, Wash.—The Olympia Light & Power Co. is considering plans for the extension of its Fourth St line to the city limits. L. R Faulkner, Olympia, is Treas. and Mgr.

Fresno, Calif.—The Fresno Interurban R.R is preparing to extend its electric line from Fresno Ave. to the Normal School, about 1½ miles. J. R Rogers is Mgr.

Los Angeles, Calif.—The Malabar Improvement Association and the residents of Boyle Heights are interested in the proposition to construct a crosstown electric railway from First St and Evergreen Ave to Wabash Ave, in Los Angeles.

Blenheim, Ont.—A company is being organized at Blenheim for the purpose of constructing a hydro-radial railway from St Thomas to Amherstburg.

Brantford, Ont.—The city has taken over the holdings of the Brantford Street Ry Co and of the Grand Valley Ry Co. An announcement has been made by the Street Railway Commission that no extensions will be made on the lines until next spring.

LIGHT HEAT AND POWER

Newton, Mass.—Bids will be received until Sept. 30 by Walter [illegible], Comm. of Pub. Bldgs., for the installation of heating and ventilating apparatus in the Claflin School buildings on Walnut St. Alfred [illegible] Kellogg, [illegible] State St, Boston, is Engr.

Reading, Mass.—Improvements and extensions to the municipal electric-light plant to cost about $[illegible] are contemplated by the Board of [illegible]. Arthur [illegible] is Mgr and Supt. of the plant.

Georgetown, Conn.—[illegible] & [illegible], Consult. Engrs., [illegible], are preparing plans for the construction of a power house at Georgetown for the Gilbert & Bennett Mfg. Co., manufacturer of wire goods. The building will be [illegible] ft., [illegible] ft. high, of brick [illegible] concrete tile roof, steel sash.

Poughkeepsie, N. Y.—The Central Hudson Gas & Electric Co. has been granted permission by the state Public Service Commission for the construction of two extensions to its [illegible] [illegible] Wappingers Falls [illegible] [illegible] Dutchess County.

Lebanon, N. J.—The City Council is considering the [illegible] of an electric [illegible] system. It is proposed to secure the current supply from the [illegible] & Power Co. [illegible]

Philadelphia, Penn.—The [illegible] Co. has had plans prepared for the construction of a boiler house, engine and pump house at [illegible], Philadelphia. The boiler house will be [illegible] [illegible] Carl [illegible], Penn. [illegible] Bldg., is Arch.

Vardley, Penn.—The New Jersey & Pennsylvania Traction Co is enlarging and improving its local power house. The company is [illegible] with further [illegible] in the plant.

Beckley, W. Va.—The Beckley Utilities Co. contemplates the construction of an electric-light plant to cost about $100,000. The details have not yet been determined. James Bowen, Charleston, W Va, is Consult. Engr.

✦Hutchinson, W. Va.—The Monongahela Valley Traction Co. has awarded contracts for the construction of an electric plant at Hutchinson to: The NICOLA BUILDING CO., Farmers Bank Bldg., Pittsburgh, Penn., for a building 72x 230 ft.; BETHLEHEM STEEL CO., for gas engines; GENERAL ELECTRIC CO., Schenectady, N. Y., for electric generators. The total cost of the plant will be $300,000.

Wallace, N. C.—J. L. Boney contemplates the installation of an electric lighting system for the town. A dynamo and several transformers will be required.

Quitman, Ga.—The city has voted $10,000 in bonds, the proceeds of which will be used to enlarge the electric-light plant and purchase new equipment for the same. J M Curtright is Supt.

Ocala, Fla.—An election will be held Oct. 27 to submit to the voters the question of a bond issue of $57,000 to be used for extensions and improvements to the municipal electric-light system.

Bay Minette, Ala.—(Official)—See item under "Water Supply and Irrigation."

Melville, La.—The city plans the installation of a municipal electric-light plant. W. L. Thompson is Engr.-in-Charge.

Dayton, Ohio.—The City Council is considering holding a special election to vote on the question of a bond issue of $[illegible],000, to be used for the construction of a municipal electric-light plant.

Norwalk, Ohio.—Bids will be asked about Oct. 1 for the construction of a municipal electric-light plant, to cost about $120,000. A. W. Carpenter is Dir. of Pub. Ser. The H. Whitford Jones Co., Citizens' Bldg., Cleveland, is Engr.-in-Charge. Noted Feb. 5 and May 21.

✦Norwood, Ohio.—The Board of Control has awarded the contract for two Corliss engines of 460-hp. each, to the HARRISBURG FOUNDRY & MACHINE WORKS, Harrisburg, Penn., at $10,049; the contract for two 355-kw. generators was awarded to the ALLIS-CHALMERS CO., Milwaukee, Wis., at $8700. Noted July 30.

Sandusky, Ohio.—The City Council has decided to submit to the voters the question of a bond issue of $200,000, to be used for the construction of a municipal electric-light plant. H. Whitford Jones & Co., 1303 Citizens Bldg., Cleveland, will be retained to prepare the plans if the plant is established.

Goshen, Ind.—The Hawks Electric Co., Goshen, is preparing to extend its lines, at a cost of about $20,000, to Waterford and New Paris. Eventually the company expects to extend its transmission system throughout Elkhart County and a portion of Kosciusko County. Owen C. Cover is Secy. and Mgr.

Mondovi, Wis.—It is reported that the Mondovi Electric Light & Power Co. will soon construct about 20,000 ft. of new transmission lines, and will purchase alternators, switchboards, oil engines, exciters, switches and a waterwheel governor. A. D. All is Secy. and Mgr.

Oelwein, Iowa.—The plant of the Oelwein Light, Heat & Power Co. was recently totally destroyed by fire at a loss of about $50,000.

Waconia, Minn.—The town is considering the installation of an electric lighting system.

Alliance, Neb.—Preparations are being made for the installation of an electric-light plant in Alliance. A. C. Arends is interested.

Whitefish, Mont.—It is reported that bids will soon be received for the construction of a municipal electric-light plant in Whitefish.

✦Palmyra, Mo.—It is reported that the contract for new equipment and rebuilding the electric-light plant and waterworks system has been awarded to the ARROW ENGINEERING CO., St. Louis, at $[illegible]. Noted May [illegible] and July 30.

✦San Antonio, Tex.—Bartlett & Ranney, Consult. Engrs., have awarded the contracts for public utility plants in the new town of George West as follows: A. M. LOCKETT & CO., LTD., New Orleans, La., for power plant machinery and pumps; MARTIN WRIGHT, San Antonio, for the installation of electrical equipment, machinery, pole lines and street lights; J. W. MOULTRIE & SONS CONSTRUCTION CO., Austin, Tex., for water mains and fire hydrants, sewage system and disposal plant; HECK MACHINERY CO., San Antonio, for a [illegible] gal. steel water tank and tower. Noted Aug. [illegible].

Tyrone, N. M.—It is reported that Phelps, Dodge & Co. will install a power plant at its mines at this place.

Montesano, Wash.—The Northwest Electric & Water Co., Montesano, plans to enlarge its power plant, and extend its transmission lines.

Seattle, Wash.—The city authorities are investigating various power sites available to the city, with a view of building a new hydro-electric plant, in order to take care of the anticipated increase of the demand for light and power for the next five years. A development of from [illegible] to [illegible]-hp. is proposed.

Portland, Ore.—The [illegible] Gas Co. will erect a gas plant at [illegible] and [illegible]th St. [illegible] is Local Mgr.

Pasadena, Calif.—The [illegible] Hospital will construct a new boiler room and purchase some new equipment at a total cost of about $12,000. [illegible], 731 [illegible] Bank Bldg., Los Angeles, is the Arch.

Redwood City, Calif.—The [illegible] Gas & Electric Co., San Francisco, will build a gas storage plant at [illegible] and Washington St.

San Francisco, Calif.—The Contra Costa Gas Co. plans the construction of a new gas plant to cost about $115,000.

Juneau, Alaska.—The [illegible] River Power Co. has received a grant from the [illegible] government and will shortly begin the construction of a [illegible] electric power and chemical plant. The company will supply light and power to this city and adjacent territory. F. [illegible] Kennedy, Seattle, is Pres.

Hamilton, Ont.—It is reported that the United Gas & Fuel Co. will build a coke and gas plant in Hamilton, estimated to cost $1,500,000.

BRIDGES

Portland, Maine—J. R. Worcester & Co., 79 Milk St., Boston, Mass., is preparing plans for a bridge connecting Portland and South Portland. It is reported that the Commissioners of Cumberland County will advertise for bids for its construction early in October. The cost will approximate $1,000,0000, of which the Portland Street R.R. Co. will pay $100,000, the Portland Terminal Co. about $400,000, and the City of Portland and Cumberland County the remainder.

Auburn, N. Y.—The Commissioners of Cayuga County plan to construct two new bridges in the Town of Conquest. J. Charles Dayton, County Supt. of Highways, will prepare the plans.

Troy, N. Y.—The following bids were received Sept. 10, by the Troy & West Troy Bridge Co., for the construction of the Congress St. Bridge, (a) superstructure, (b) bridge complete: Pennsylvania Steel Co., (a) $204,900; Great Lakes Dredge & Dock Co., (b) $499,000; King Bridge Co., Cleveland, Ohio, (a) $239,000; Holbrook, Cabot & Rollins, Boston, Mass., (a) $249,000, (b) $409,000; Phœnix Bridge Co., Phœnixville, Penn., (a) $187,068; American Bridge Co., New York, N. Y., (a) $249,000; P. J. Carlin Co., New York, N. Y., (a) $249,000, (b) $455,000. The contract has not yet been awarded, as some of the bids were incomplete. Noted Aug. 13.

Jersey City, N. J.—The lowest bid received for the construction of a bridge on the Hudson Blvd., East Weehawken Township, over the old railroad cut, was that of Curtis & Cavanagh, Hoboken, N. J., at $11,450. Noted Sept. 3.

The Boulevard Commissioners have rejected all bids for the bridge over the railroad cut, Weehawken Township, as exceeding the appropriation of $11,000. Modified plans have been prepared, and new bids will be received until Sept. 29.

Mays Landing, N. J.—The Federal Government has approved plans prepared by the Board of Chosen Freeholders of Atlantic County for the construction of a bridge over Mullica Creek.

✚Trenton, N. J.—The Board of Chosen Freeholders of Mercer County has awarded the contract for a truss bridge over Stoney Brook, and a new wing wall for a stone arch in Hopewell Township to the GINDER CONSTRUCTION CO., Trenton, at $19,784. Noted Sept. 17.

Mercer, Penn.—Bids will be received until Oct. 6, by the Commissioners of Mercer County, for the construction of the superstructure of the Gamble Bridge, over Otto Creek, Fairview Township.

Philadelphia, Penn.—Plans have been prepared by the Survey Bureau for a reinforced-concrete bridge to be built on the line of Glenwood Ave., north of Seventh Ave., over the tracks of the Richmond Branch of the Philadelphia & Reading Ry. The estimated cost is $40,000, and bids will be asked as soon as the plans are approved by the Public Service Commission and the Art Jury. M. L. Cooke is Dir., Dept. of Pub. Wks.

✚Pittsburgh, Penn.—The Commissioners of Allegheny County have awarded the contract for repairs and a creosoted wood block floor for Bridge No. 3 over the Youghiogheny River to F. F. SCHELLENBERG & CO., Oliver Bldg., Pittsburgh, at $46,000.

✚The Commissioners have awarded the contract for the construction of two bridges over Pine Creek to the DUQUESNE CONTRACTING CO., Pittsburgh, at $14,603 for Bridge No. 14, and to A. & S. WILSON, Pittsburgh, at $15,503 for Bridge No. 16. Noted Sept. 3.

Pittsburgh, Penn.—(Official)—Bids will be received until 10 a.m., Sept. 25, by the Department of Public Works, for removing the present bridge and building the substructure of the new Sylvan Ave. Bridge; for paving the roadway and sidewalk of the North Side Point Bridge over the Allegheny River; also, for repairs to the Forbes St. Bridge, the Shadeland Ave. Bridge, the Warrington Ave. Bridge, the Fulton St. Bridge and the Edgebrook Ave. Bridge. Robert Swan is Dir. Dept. of Pub. Wks.

★Baltimore, Md.—The State Roads Committee opened the following bids Sept. 15 for the construction of a 150-ft. draw span in the Hanover St. Bridge: Penn Bridge Co., Beaver Falls, Penn., $103,800; Strobel Steel Construction Co., Chicago, Ill., $86,430; Scherzer Rolling Lift Bridge Co., Chicago (three designs), $108,250, $106,850 and $103,850; H. P. Converse Co., Boston, $126,501, alternate bid, $119,000. Noted Aug. 20.

Washington, D. C.—Press reports state that D. E. McComb, District Engr. of Bridges, is preparing plans for rebuilding the Pennsylvania Ave. Bridge over the Anacostia River at an estimated cost of $10,000.

✚Parkersburg, W. Va.—The Commissioners of Wood County have awarded the contract for the construction of a bridge over Neal Run at Lauckport to the MERYDITH CONSTRUCTION CO., Marietta, Ohio, at $24,000. The structure will be 672 ft. long, concrete piers and foundations and a steel superstructure.

Elberton, Ga.—Bids will be received, until Sept. 28, by the Commissioners of Elbert County for the construction of a county line bridge over the Broad River. The estimated cost is $4500 for the reinforced concrete substructure and $7200 for the steel superstructure. Searcy B. Slack, Athens, Ga., is Engr. of Good Roads Dept.

Newton, Miss.—(Official)—Bids will be received until noon. Oct. 5, by the Board of Supervisors of Newton County, Decatur, for the construction of 18 small bridges in District No. 4, over streams on the Newton-Lawrence and Roberts Road, the Tanglewood Extension, Lake Hazel, and Newton and Garlandville Roads. All bridges to be of A-1 creosoted timbers. C. M. Wells, Decatur, is Clk. of the Bd.

Delaware, Ohio—The lowest bid received by the Commissioners of Delaware County for the superstructure of the Home Bridge was that of the Bellefontaine Bridge & Iron Co., at $9620, while the Capital Construction Co., Columbus, at $7449, was low bidder for the superstructure of the Multzer Bridge. Noted Aug. 27.

Delaware, Ohio—The Commercial Club is interested in the construction of a concrete bridge across the Olentangy River at Winter St. It will be about 300 ft. long, and 51 ft. wide. The estimated cost is $36,000. W. A. Morrison is Chn. of the Bridge Com.

✚Portsmouth, Ohio—The Commissioners of Scioto County have awarded the contract for repairs to the substructure of the Lucasville Bridge to J. C. SHIVELY, at $9880.

Anderson, Ind.—The following bids were received by the Commissioners of Madison County for the construction of an additional span of 140 ft. to the 12th St. Bridge over the White River: Indiana Bridge Co., Muncie, $7780; Elkhart Bridge Co., Elkhart, $7750; Burke Construction Co., Newcastle, $6149.

Crown Point, Ind.—The Board of Commissioners of Lake County has made an appropriation of $75,000 for a lift bridge over the Indiana Harbor Canal at 151st St., East Chicago, and an appropriation of $16,000 for a steel bridge over Plum Creek at Dyer. The Commissioners voted against the construction of a $90,000 bascule bridge on Forsythe Ave., Hammond, and a $25,000 steel bridge over the Deep River, East Gary.

Lawrenceburg, Ind.—The County Council of Dearborn County has decided to create a fund of $35,000 for rebuilding bridges destroyed by the flood of 1913. The money will be obtained by an increase in taxes. W. S. Fagaly is County Audr.

✚Petersburg, Ind.—The Commissioners of Pike County hav eawarded the contract for the construction of 13 bridges in the county to the VINCENNES BRIDGE CO., Vincennes, at $7393. Other bidders were: International Steel & Bridge Co., $7008; George Saller, $8445; Frank English, $8269. Noted Sept. 3.

✚Salem, Ind.—(Official)—The Commissioners of Washington County have awarded the contract for the construction of three bridges to the MONTGOMERY-PARKER CO., at $7200. Noted Aug. 27.

Grand Rapids, Mich.—Press reports state that the Michigan Ry. Engineering Co., Kalamazoo, Mich., will receive bids, until Oct. 1, for the construction of an 1100-ft. bridge at Grand Rapids.

Danville, Ill.—An election will soon be held to vote on the question of a bond issue of $120,000 for the construction of bridges at Bridge, Cleveland and William Sts. W. H. Martin is City Engr.

Harmon, Ill.—(Official)—Bids will be received until 10 a.m., Sept. 28, by the Town Clerk for the construction of the Clatworthy and Kimball Bridges, Harmon Township, Lee County, at an estimated cost of $2970 and $3000 respectively. They will be of steel with reinforced concrete abutments. L. B. Neighbour, Dixon, Ill., is County Supt. of Highways.

✚Libertyville, Ill.—The Commissioners of Lake County, Waukegan, have awarded the contract for the construction of the Oak Spring Bridge, Libertyville Township, to JOHN DARROW, Waukegan, at $4790. It will be of reinforced concrete. Noted Sept. 3.

✚Carroll, Iowa—The Board of Supervisors of Carroll County has awarded the contract for the construction of 11 culverts to the MARSH ENGINEERING CO., Des Moines, at $7580; the contract for a steel bridge was awarded to the STANDARD BRIDGE CO., Omaha, Neb., at $3344. Noted Sept. 3.

✚Marble Rock, Iowa—The Supervisors of Floyd County, Charles City, have awarded the contract for the construction of a bridge over the Shell Rock River at Marble Rock, to the GOULD CONSTRUCTION CO., Davenport, at $23,150. Noted Aug. 20.

Albert Lea, Minn.—Bids will be received until 2 p.m., Oct. 1, by C. E. Brainerd, Audr. of Freeborn County, for the construction of State Bridge No. 1536, eight miles north of Oakland.

Little Falls, Minn.—Bids will be received until 2 p.m., Oct. 6, by B. Y. McNairy, Audr. of Morrison County, for State Bridge No. 1529 in the town of Darling; State Bridge No. 1531, town of Two Rivers, and State Bridge No. 1541, town of Mount Morris.

Kansas City, Kan.—The Federal Court has ordered the Commissioners of Wyandotte County to at once rebuild the Central Ave. Bridge over the Kaw River, to conform to the requirements of the Kaw Valley Drainage Board and the War Department. Frank Holcomb is County Clk.

✚Lexington, Neb.—The Commissioners of Dawson County and the State of Nebraska have awarded the contract for the construction of a bridge over the Platte River at Lexington to I. E. DOTY, David City, Neb., at $39,790; the contract for a bridge across the Platte River at Overton was awarded to the same company at $37,780. Noted June 11, July 23 and Aug. 13.

North Platte, Neb.—The State Board of Control and the Platte Valley Bridge District will soon advertise for bids for an 800-ft. bridge at North Platte. It will be of reinforced concrete, and is estimated to cost $50,000. D. D. Price, Lincoln, Neb., is State Engr.

Medora, N. D.—The Board of Commissioners of Billings County has rejected all bids received Sept. 7 for the construction of a bridge over the Little Missouri River. Noted Aug. 13.

The Max Ams Machine Co., Mt. Vernon, N. Y., is erecting an additional plant at Bridgeport, Conn., to take care of its increasing business, especially the export trade through its representatives in South Africa, Australia, India, China, Japan, South America, England and the continent. The area is approximately fifteen acres, on which a modern plant, equipped with every facility is being erected.

The main shop and adjacent saw tooth sections, will contain every modern tool and device that the progress of the industry requires. The main erecting shop will be provided with 25-ton electric cranes, and railroad sidings will run into the plant to facilitate the handling of large units.

In addition to these buildings, there will be a special administration building three stories high, for the general and private offices and drafting room. This building will be connected by means of bridges with the works. The power and heating plants will be in separate buildings.

The welfare of the employees of the company will be looked after by the erection of a special recreation building and the laying out of baseball grounds and tennis courts.

The output of the concern is largely machinery for the making of tin containers, applied more particularly to the food industry. It likewise builds an extensive line of power presses for the sheet metal working industry. The company expects to occupy its new home about February 1915.

WAYNE ST. VIADUCT, BUTLER, PENN.

Bids were received Aug. 25, by H. O. Carson, City Engr., for constructing the Wayne St. viaduct, from (A) Dravo Contracting Co., Pittsburgh; (B) Pittsburgh Construction Co., Pittsburgh; (C) Penn Bridge Co., Beaver Falls. The item bids were as follows:

	A	B	C
1260 cu.yd. concrete, including drains in abutments and pedestals	$8.00	$18.00	$9.00
120 cu.yd. concrete in pedestals	13.00	18.00	10.00
70 cu.yd. concrete including encased piles in pedestals	11.00	18.00	35.00
1690 cu.yd. earth fill between retaining wall	0.89	1.25	1.00
1920 lin.ft. concrete piles, premolded	3.40	1 75	2.50
3900 lb. anchor bolts and washers	0.45	0.0325	0.04
792 sq.yd. pavement on approaches	2.40	2.50	3.00
15 cu.yd. curbs on approaches	12.50	16.50	10.00
2160 sq.ft. sidewalk slab on approaches	0.19	0.25	0.12
1,760,000 lb. structural steel	0.03¾	0 0325	0.0345
66,906 lb. hand railing	0.05	0.045	0.05
256 c.i. hand railing posts	17.50	15.00	10.00
256 structural hand railing posts	6.90	6 00	5.00
24 lamp posts	31.00	30.00	30.00
192,000 lb. rails, ties, bonds and fastenings	0.034	0.03	0.23
134,000 lb. reinforcing metal	0 036	0.035	0 265

American Needs—Wilbur F. Wakeman, general secretary of the American Protective Tariff League, has sent out a letter to American producers requesting them to report any article or articles (raw material or finished product) of use in agriculture, mining or manufacture in the United States, for the supply of which we are dependent upon any foreign country. From the replies received the following tabulation has been made:

Agates	Molston
Alkali	Oil, recovered
Aluminum	Oil, olive
Amber	Oil, sizing
Analine dyes	Oil, finishing
Antimony	Ozocerite
Asphaltum	Potash, crude
Barytes	Potash, carbonate of
Bearings	Potash, caustic of
Bleaching powder	Potash, hydrated carbonate of
Bronze powder	Potash, nitrate of
Carbolic acid	Potash, permanganate of
Card clothing	Pumice, lumps
Chamois skins	Pumice, powdered
China clay	Potato starch
Clay, washed	Rubber blankets
Clay marbles	Salt
Cotton, Egyptian	Saltpeter
Cyanides	Scheelite, concentrates
Duplex paper	Silex lining
Egg albumen	Skins, sheep and calf
Emery paper	Shellac
Epsom salts	Silk, artificial
Ferro-manganese	Soapstone pencils and bricks
Flint pebbles	Solder
Gallic acid	Sugar
Hemp	Talc
Jute	Tin, bars, blocks, pigs
Kieserite	Tin, grain or granulated
Leather skins	Tinfoil
Linen	Transfer paper
Lime, Vienna	Tungsten
Lithographic tusch	Vanadium
Magnesia	Walrus hide
Magnesite	Watch crystals
Manganese	Windshields
Mica	Wool
Moleskins	Zinc dust

Cheney Bros., [illegible] Manchester, Conn., silk manufacturers, have had plans prepared for four buildings which will be used for the welfare of their employees. A primary school, [illegible], library and club will be erected in a quadrangle. The contract for the erection of the primary school has already been awarded to the Aberthaw Construction Co., Boston. The estimated cost of this building alone is $11[illegible]. [illegible] & Hastings, New York, are the Archs.

The New England Foundation Co., Boston, Mass., will drive [illegible] Simplex Piles for the foundation of the plant for the Standard [illegible] Co. at Long Island City, N. Y. A test of one of these piles was made for the building department of New York City. It sustained a load of 60 tons without settlement.

The same firm will use [illegible] Standard Simplex Piles for the new weave shed of the Naumkeag Steam Cotton Co., Salem, Mass.

CONCRETE STATE HIGHWAY, BRISTOL, CONN.

The following itemized bids were received by the State Highway Commissioner for the construction of a concrete state highway in Bristol, from Charles H. Terry, Bristol:

1[illegible] cu.yd. earth grading	$[illegible]
[illegible] cu.yd. borrowed embankment	0.41
Grading (sharp sand)	1.50
[illegible] sq.yd. earth grading	0.13
[illegible] cu.yd. rock excavation	2.00
[illegible] cu.yd. wet excavation	2.10
[illegible] sq.yd. telford base	0.60
[illegible] cu.yd. first class concrete	12.00
[illegible] cu.yd. second class concrete	8.00
[illegible] cu.yd. masonry	[illegible].00
[illegible] cu.yd. dry rubble masonry	[illegible].00
[illegible] cu.yd. old masonry relaid	5.00
[illegible] sq.yd. pointing old masonry	0.10
[illegible] lin.ft. corrugated iron culvert, 12-in	1.00
[illegible] lin.ft. corrugated iron culvert, 14-in	1.15
[illegible] lin.ft. corrugated iron culvert, 18-in	1.45
[illegible] lin.ft. corrugated iron culvert, 30-in	2.75
50 lin.ft. corrugated iron culvert, 36-in	3.95
470 lin.ft. relaying old pipe	0.10
11 catch basins	20.00
[illegible] sq.yd. cobble gutters	0.60
150 lin.ft. rubble drain	1.00
10 sq.yd. rip rap	1.00
[illegible] lin.ft. removing and replacing fences	0.15
[illegible] lin.ft. new stone wall fence	0.40
[illegible] lin.ft. new wire fence	0.15
[illegible] sq.yd. turf relaid	0.30
[illegible] cu.yd. sand or gravel fill	0.75
12,[illegible] sq.yd. gravel road	0.10
1[illegible] cu.yd. concrete	6.00
Extended totals	$23,3[illegible].00

SEWER, ST. LOUIS, MO.

Bids were received by the Board of Local Improvements for constructing Sections 1 and 2 of the Mill Creek sewer from (A) [illegible] A. Moreno, (B) Fruin-Colnon Construction Co. and Mason & Hanger Co., (C) CARTER CONSTRUCTION CO. (awarded both contracts), (D) Foxhall P. McCormick. The item bids are as follows:

Section 1

Pan American [illegible] Trade Association—The [illegible] in New York of Latin-American republics met at the rooms of the Pan-American [illegible] Association at the Hotel [illegible], New York, Sept. [illegible] and organized the Latin-American [illegible] Association of New York, which will [illegible] to promote trade between the United States and the countries represented.

[illegible]

Prices of Engineering Materials

THE BUSINESS OUTLOOK

Overshadowing all other considerations was the flotation of the $100,000,000 New York City loan. The price paid by the city was very high. If the City of New York has to pay 6% for short-term accommodations, what can railroads and smaller municipalities expect? It may be taken for granted that the high price demanded by the bankers was to insure the success of the loan. This will have the effect of scaring off borrowers for all kinds of public improvements. The field of new construction will be linked more closely with the financial situation than ever before, and until funds can be obtained on more reasonable terms there will be a minimum of new ventures.

Railroads are doing next to nothing. Some important bridge projects on which work had already been started have been postponed. One railroad company, which has done a great deal of construction work in and around New York, has cut its engineering force in half. The reopening of the rate case is the one real hope in the railway field at present.

The iron and steel industry is less active than at any time, save the few months following the 1907 panic, and this comes after the steel industry has been operating from 65 to 75% of capacity for nearly two years.

The export field seems to have been overworked. To have something to sell is only half the problem. Merchants in the United States must arrange to buy; they must arrange to do business on a barter basis. Undoubtedly, sales to South America will increase decidedly, but the benefits for the present will be reached by those houses who established agencies in South America many years ago, who understand the people and the customs. It is an opportune time, however, to cultivate this trade, even though it be an expense to do so for a few years.

Price changes have been unimportant. The fall in tin was nearly as spectacular as the advance. Prices are now at the old level. Copper is lower, steel products are not as firmly held, and a definite cut has been made in tin plate. Quotations now are a matter of minor interest.

The situation in cotton-raising states is particularly unprecedented, for in that wide expanse of territory, cotton is the one staple on which all business hinges, and although the crop is enormous, it cannot yet be turned into money. Agricultural returns are particularly satisfactory and farmers are securing a high price for their products. The wheat belt seems to be exceedingly gratifying.

Orders for export have been received, particularly for munitions of war. These included 6,000,000 horseshoes, 50,000,000 rounds of ammunition, 10,000 saddles, and it is probable that 100,000 horses will be purchased in the United States and Canada in the next few months. In the next two months, the war in Europe should give a decided impetus to the manufacture of automobile trucks, but there will probably be more than a corresponding falling off in the number of pleasure cars sold.

The government is showing some willingness to help business, and it may be that the policy of hitting at every kind of business is past.

Idle freight cars have decreased, and about 95% of the total railway equipment is actively employed.

Efforts are being made to permanently establish, in the United States, industries which have always been carried on in Europe. It is evident that with an assured trade of two or three years, many lines of manufacture can be so firmly fixed that they will be able to resist foreign competition.

Labor is feeling the pinch. Some of the railways are paying less than earlier in the year, and good factory help is plentiful.

Labor

The supply far exceeds the demand. An increased efficiency can be expected from all classes of workers. The Brooklyn Rapid Transit, which is doing an unusually large amount of construction and repair work this year, is reported to be paying 17c. per hour for rough laborers. On subway work in New York City, $1.50 is paid for eight hours, and in Long Island the rate is $1.60. Immigration continues to fall off, but it is evident that there will be a large surplus of unemployed this winter.

A report has just been issued by the Department of Commerce which shows that there are 2,152,433 persons 10 years of age and over in New York City engaged in gainful occupations. The principal workers are distributed as follows: Manufacturing and mechanical industries, 40.6%; transportation, 7.9%; trade, 16.8%; public service, 1.9%; professional service, 5.9%; domestic and personal service, 15.5%; clerical operations, 10.9%, the remainder being distributed in miscellaneous occupations.

CRUSHED STONE, SAND AND GRAVEL

Crushed Stone—The market is lifeless and the following quotations are nominal at 90c. to $1 for 1½-in. stone, and 95c. to $1.10 for ¾-in. stone. These quotations are for full cargo lots of 500 cu.yd. delivered alongside of dock New York or Brooklyn.

Sand and Gravel—Gravel is quoted at 90c. for 1½ in., while special gravel for subway specifications is quoted at $1.15.

Sand sells at 50c. per cu.yd.

The above quotations are for full cargo lots of 500 cu.yd. delivered alongside of dock, New York. In Boston gravel sells at 35c. per cu.yd. at quarry 25 miles out, the freight rate to Boston being 40c.

Cement, Lime and Brick

Cement—The cement trade is only holding its own. Numerous inquiries have been received for export to South America, but the instability of ocean freight rates is one thing that is preventing any great business to those countries. For example, with a rate of $4 per ton quoted in the morning, advancing to $5 in the afternoon, the steamship company finally refused to do anything better than $10 per ton, and that not more than 48 hours afterward. There is an insistent inquiry, and no doubt considerable business will be transacted. In this country, work is being finished up as rapidly as possible, and no new work started, so that it is evident that the cement mills will face a lean winter. Then, too, the jobbers in New York who frequently stock up their supplies are refusing to place any orders this fall. Prices are unchanged at $1.58 per bbl. for delivery within lighterage limits, New York. This is equivalent to $1.46, Jersey City, and 95c. per bbl. in bulk at the mill. The quotations given below do not include the allowance of 40c. made for bags returned:

Boston	$1.32	Chicago	$1.15
Cleveland	1.30	Detroit	1.19
Duluth	1.38	Jersey City	1.06
Minneapolis	1.35	New York	1.18
Pittsburgh	1.10	St. Paul	1.35

Lime—Business is quiet, but prices are unchanged at 97c. per bbl. for state common, 200 lb. net; $1.37 for 300 lb. "Star"; $1.55 for 300 lb. finishing; $1.10 for 200 lb. finishing and $1.72 for 350 lb.

Plaster Blocks—Prices are without change, and the market is fairly active, quotations being as follows:

	Weight, per sq.ft., lb.	Price, per sq.ft., cents
2-in.	7	6
3-in.	8½	6½
4-in.	11	7¼

These blocks are made 32 in. long by 13½ in. wide, containing 3 sq.ft. of surface. The 2-in. blocks are solid, but the others are hollow.

Brick—The market is the lowest in years, and even at that it is weak. Hudson River common brick sell at $5 to $5.50, New York. For desirable orders, even these low quotations could be shaded. Raritan River brick are $5.25 to $5.50. The number of brick sold this year is 20% less than those sold at the corresponding period last year, and 1913 was by no means a satisfactory year in the brick market.

IRON AND STEEL

Pig Iron—While the markets have barely held their own during the last eight weeks, there has been no great pressure to sell, and stocks are not large. This is the one redeeming feature of an otherwise most unsatisfactory market. Curtailment has taken place in so many lines, new construction has been nearly at a standstill, and the reduction to the irreducible minimum has been going on so long, that new buying is limited to positive needs. In the Cincinnati market, a sale of 200 tons is the only one mentioned in the report for the week. This is the market where transactions generally run from 1000 to 10,000 tons. Some of the New England foundries have tested the market for future shipment, but very few orders have been received for delivery in 1915. In fact, all blast furnaces are unwilling to make any quotations for such forward shipment. It is well to observe that the present pig-iron consumption is about 60% of normal.

Quotations for lots of 100 tons or over, ports named, are as follows: Cincinnati Southern Foundry No. 2, $13.25 to $13.75; Cincinnati Northern Foundry No. 2, $14.25 to $14.75; Cincinnati Northern Foundry No. 3, $14.00 to $14.25; New York Northern Foundry No. 1, $14.75 to $15; New York Northern Foundry No. 2X, $14.25 to $14.50; New York Northern Foundry No. 2 Plain, $14 to $14.25. Southern iron in the New York market is $14.25 to $14.50 for No. 2. Southern Foundry No. 2, Birmingham, $10.

Steel Rails—Business has been practically at a standstill. It is reported by a prominent official of the Carnegie Steel Co. that one of the railroads in Pittsburgh had not a single extra rail in stock. It is well known that many lines have drawn on their reserve stock to facilitate repairs, and have been taking up from sidings to be put into main tracks. The decision of the Interstate Commerce Commission to reopen the railway rate case will have a most important bearing on the future of the railways, for, unless there is some definite way by which the railways can be tided over the next year, there will be a list of railway receiverships which will be appalling. Prices for rails are nominal and unchanged, as follows.

These quotations are for lots of 500 tons and over: Standard sections of bessemer rails, $28; open-hearth rails, $30. These quotations are f.o.b. Pittsburgh: Girder rails, 30-ft. lengths, $36.40 per gross ton, and in 60-ft. lengths, $38.40, both f.o.b. New York. Other quotations, f.o.b. Pittsburgh, for large lots are as follows: Standard sections, $1.25; 25- to 45-lb. sections, $1.15; 16- and 20-lb., $1.20; 12- and 14-lb., $1.25; 8- and 10-lb., $1.30. Rerolled light rails are one to two dollars less per ton than previous quotations.

Structural Shapes—Bridge work, as far as new projects are concerned, is practically a thing of the past. Most all of the work projected is held up, due to lack of funds. In the building line, there is some work going on in all parts of the country, but it is very much smaller than anything in recent years. New York has more inquiries than any other

[illegible] of the [illegible], [illegible] for a [illegible] tons for a [illegible] building, [illegible] tons for an addition to the Grand Central Station, and a few small structures. Building materials have been shipped abroad, and it is doubtful if any large amount of structural shapes will go in the very near future. Prices show no change compared with last month, the base being $1.[illegible] to $1.[illegible] Pittsburgh, for I-beams, 3 to 15 in., [illegible] angles, 3 to 6 in., and Ts, 3 in. and over. For other sizes $1.[illegible] to $1.[illegible] is demanded. For Ts, $1.[illegible] to $1.[illegible]; channels and Ts under 3 in., $1.30 to $1.[illegible]; [illegible] Ts, $1.[illegible] to $1.[illegible]. Cutting to specified lengths is charged at the following rates: Under 3 ft. to 2 ft., inclusive, [illegible] per 100 lb.; 2 ft. to 1 ft., inclusive, [illegible] per 100 lb.; cutting to lengths under 1 ft., $1.[illegible]. No charges made for cutting to specified lengths over [illegible] ft.

Track Supplies—Standard railroad spikes are $1.50 to $1.[illegible]; track bolts, $1.[illegible] to $[illegible]; angle bars, $1.50. All these prices are per 100 lb. in large lots. Tie plates are $[illegible].50 to $[illegible] per net ton, f. o. b. mill.

	Cents
Railroad spikes	
3, 3½, 4 [illegible] and [illegible]	Extra 10
[illegible], 4 and [illegible]	Extra 20
3, 3½, 4 and [illegible]	Extra 10
[illegible]	Extra 10
2½, 3 and 3[illegible]	Extra 60

Plates—Business is more unsatisfactory in this line than almost any other. Scarcely any of the mills are running at more than 50 per cent. of capacity, and many of them a great deal less. The price seems to be fairly firm, $1.20 Pittsburgh, but this is nominal, for there is practically no new business. All the car orders that have been made in several months have been cancelled, and there seems to be little prospect of new orders until financial conditions materially improve. Quotations are unchanged at $1.20 Pittsburgh, or $1.[illegible] from mill in the Chicago district. For delivery from warehouse Chicago, $1.75 is demanded.

Pipe—The market is at a standstill. The Standard Oil Co. for a time refused to take more than one-third of the flow of certain wells, but recently signified its willingness to buy up two-thirds. This, of course, is no incentive to increase production nor to build new pipe lines. Until conditions improve so that there is a better demand for oil, the market for line pipe will be extremely quiet. Some of the pipe mills are not running at more than 30 or 10[illegible] of capacity. The smaller sizes of pipe are just as dull as any other, but [illegible] all discounts are firmly maintained. These discounts are as follows:

	Black	Galvanized
[illegible] to [illegible] steel butt welded	80	71½[illegible]
1½ to 6-in. steel lap welded	79[illegible]	70½[illegible]
7 to 12-in. steel lap welded	76[illegible]	65½[illegible]

At these discounts the net prices of pipe per foot at Pittsburgh are as follows:

Diameter	Cents Black	Cents Galvanized	Diameter	Cents Black	Cents Galvanized
[illegible]	[illegible]	[illegible]	[illegible]	31.00	[illegible] 61
1 [illegible]	[illegible]	[illegible]	6	12.[illegible]	[illegible]
1¼ [illegible]	[illegible]	[illegible]	7	[illegible]	[illegible].00
1½ [illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible].00
[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	$1.1[illegible]
[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	$1.[illegible]
[illegible]	[illegible]	[illegible]	[illegible]	$1.[illegible]	$1.[illegible]
[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	$1.[illegible]

Cast-iron Pipe—[illegible]

Piling, Steel Sheet—[illegible]

Sheets—[illegible]

Freight Rates—[illegible]

Cleveland, 10; Columbus, 12; Cincinnati, 1[illegible]; Chicago, 2[illegible]; Denver, Colo., [illegible]½; Harrisburg, 11½; Louisville, 1[illegible]; New York, 16; Norfolk, 20; Philadelphia, 1[illegible]; Rochester, 11½; Richmond, 20; Scranton, 1[illegible]; St. Louis, 23; and Washington, 11½.

Wire Rope—Revised discounts are 17 and 2½% from list for galvanized and [illegible] and 2½% for the bright. At these discounts the net price of wire rope at the mills is as follows:

Diameter in inches	Price per foot: Cast steel	Price per foot: Crucible steel	Price per foot: Plow steel
2½	$0.7[illegible]	$0.91	$1.08
2¼	0.62	0.73	0.86
2	0.5[illegible]	0.[illegible]	0.68

Chain—[illegible]

EXTRAS TO ABOVE LIST PER 100 POUNDS

	[illegible]	[illegible]
[illegible]	$[illegible]	$[illegible]
[illegible] and larger	1.[illegible]	1.75

Switch Points—The following prices are named f.o.b., mill. for switch points in lots of ten or more pairs: for 60-lb. rail, 10-ft. points, $16.25; 15-ft. points, $17.50; for 70-lb. rail, 10-ft. points, $18; 15-ft. points, $25, for 80-lb. rail, 10-ft. points, $25.50; 15-ft. points. $27.75; for 90-lb. rail, $33.50. All of the above are furnished with three rods, except the 10-ft. points for 60- or 70-lb. rail, which have only two.

Lag Screws—The price of lag screws is lower. Cone point lag screws are sold at a base discount of 80% and 5% from list. The net prices are as follows:

Length	Diameter in inches Net per 100		
	½ in.	¾ in.	1 in.
3½ in.	$1.99	$2.02	$4.18
4 in.	1.06	2.15	4.43
4½ in.	1.05	2.28	4.68
5 in.	1.19	2.35	4.92
6 in.	1.33	2.68	5.42
7 in.	1.51	2.95	5.91
8 in.	1.60	3.21	6.35
9 in.	1.74	3.48	6.90
10 in.	1.78	3.74	7.39
11 in.	2.01	4.01	7.89
12 in.	2.15	4.36	8.38

Frogs—For mill shipments of ten or more, prices are as follows: Bolted frogs, No. 7, for 60-lb. rail, $15; for 70-lb. rail, $16.50; for 80-lb. rail, $18; No. 8 frogs for 90-lb. rail, $21; for 100-lb. rail, $23. Plate frogs, No. 7, riveted to ⅝-in. plate for 60-in. rail, $18; for 70-lb. rail, $20; for 80-lb. rail, $21.50; No. 8 frogs bolted to a ¾-in. plate for 90-lb. rail are $25.50; for 100-lb. rail, $27.50.

Spiral Riveted Pipe—Prices are without change. The following quotations are f.o.b. factory, freight equalized with New York, being figured at a discount of 50, 10 and 10% from list. These are for orders amounting to approximately $250. For large orders, prices are cheaper by 12½ to 20%.

Diameter in in.	*Thickness Birmingham wire gage	Net price per 100 ft. With bolted joints complete		
		Plain	Asphalted	Galvanized
4	18	$19.76	$21.48	$30.74

30	10	324.81	399.15	430.64

*Made in both lighter and heavier gages at corresponding differences in price.

Wire—Wire business has been cheered considerably on account of the war. There is an inquiry for 5000 tons of barbed wire for shipment to Russia, and quite a little for shipment to Canada. Most of the mills are asking $1.35 to $1.40 for plain wire, $2 for galvanized barbed wire, and $1.60 for painted barbed wire, all f.o.b. Pittsburgh.

Nails—Carload lots of wire nails are quoted at $1.60 Pittsburgh. There are very few new orders.

Coke—Prices continue to decline with the falling off in the demand. The best grades of blast-furnace coke sell at $1.60@1.65 for prompt delivery and $1.75@1.85 per net ton for contracts. For 72-hr. foundry coke, $2@2.10 can be done for spot and $2.15@2.25 on contract.

METALS

Copper—Trade has not been so dull in years. Curtailment of production is now general at all of the principal mines, and will continue to be more so unless there is a decided change. It is evident that new levels for copper quotations must be established for years to come at a lower rate. For years, it was generally agreed that copper under 15c. per lb. was cheap, and many manufacturers would have been willing to see the market on a 15c. basis. Conditions have now changed. The electrical industry, which has consumed fully 50% of the copper output, has received a serious setback, and will not be as active again for years. In the meantime, the supply of copper far exceeds the demand, and of necessity the mines which produced metal at a high cost must go out of business. Future prices of copper are likely to be around 12c. There is practically no business now and no established market, but enough is known of the situation to warrant a quotation of 11⅞c. for large lots of electrolytic. Lake copper is in relatively fair demand, particularly Calumet & Hecla brands, which have been freely bought by manufacturers of cartridges in New England who have use for that metal. It is significant to note that copper in Germany is selling at about 19c. per lb. The German importations of copper have been the mainstay of the American market for years, and now that is absolutely cut off.

Tin—Large shipments of tin are being sent to this country and the supply is now far in excess of the demand. The market is more or less irregular, but frightfully dull. Less business was transacted in the last week than similar periods for years past. Quotations are more or less nominal and it seems probable that a 30c. level, to which prices seem to be drifting, will be a maximum rather than a minimum quotation.

Lead—The market is easier, lead being obtained in New York at 2.75c. and in St. Louis at 3.60c. There is no need of exporting lead to Great Britain or France, as the supply formerly went to Germany, but is now being diverted to Great Britain.

Spelter—The market has again declined and is about at the old low quotation. In New York, 5.35c. is asked, and in St. Louis 5.20c. The foreign demand is small, but has shown some improvement due to the lower quotation.

Antimony—The market is exceedingly quiet and the quotations to jobbers are more or less fictitious, but they ask 11c. for Cookson's and 10c. for Hallett's.

Miscellaneous Metals—The following quotations are per lb. for small lots, but they may be shaded for desirable orders:

Bismuth	$4.00
Brass tubes, iron-pipe sizes:	
½-in.	.17
¾- to 3-in.	.16
3½-in.	.16
4-in.	.17
Brass rods	.14⅛
Brass sheets	.14⅜
Solder, half and half guaranteed	.26
Zinc sheets	9 to 9½
Copper sheets, base	.17½
Pig tin (five-ton lots, cash)	.33

Old Metals—The following quotations are for small lots delivered at buyer's warehouse:

	Cents
Copper, heavy and crucible	11.00
Copper, heavy and wire	10.75
Copper, light and bottoms	10.00
Brass, heavy	7.50
Brass, light	5.75
Heavy machine composition	10.00
Composition turnings	9.00
Lead, heavy	3.40
Lead, tea	3.15
Zinc scrap	3.75

REINFORCING MATERIALS

Bars, Concrete Reinforcing—Prices are steady but the volume of business continues to diminish. Quotations are as follows:

Size	Cents per pound		
	Mill shipments Pittsburgh	Warehouse Pittsburgh	Delivered from warehouse New York
¾-in. and larger	1.20	1.70	2.30
⅝-in.	1.25	1.70	2.35
½-in.	1.40	2.00	2.35
⅜-in.	1.50	2.10	2.50
¼-in.	1.80	2.35	2.80

Triangle Mesh—Quotations are without change as follows:

PRICE PER 100 SQ.FT.

Style No.	Cross sec. area per ft. width	Plain material		Galvanized	
		Carload lots	Less than car lots and over 10,000 sq.ft.	Carload lots	Less than car lots and over 10,000 sq.ft.

Lubricating Oils—[illegible] New York [illegible] lots prices are as follows:

Neutral [illegible] filtered [illegible]

	Cents per gal
[illegible]	[illegible]
[illegible]	[illegible]
[illegible]	[illegible]
[illegible]	[illegible]
[illegible]	[illegible]
[illegible]	[illegible]

*Prices [illegible]

OILS AND PAINTS

Petroleum Products—[illegible]

[illegible]

Linseed Oil—[illegible]

Spirits Turpentine—[illegible]

Paints—[illegible]

Hydrex preservative paint is 75 cents per gal. in bbl lots, New York City.

Colors in oils are quoted at the following prices per lb: Lamp black, 1[illegible] to 14 cents. Chinese blue, 36 to 46 cents. Prussian blue, 32 to [illegible]6 cents. Van Dyke brown, 11 to 14 cents. Chrome green, [illegible] to 16 cents. Raw or Burnt Sienna, 1[illegible] to 15 cents. Raw or Burnt Umber, 11 to 14 cents.

LUMBER

The markets have been hard hit by the war, and prices are low. The Pacific Coast trade which has been in bad shape for years has benefited a little by the opening of the Panama Canal. Hardwoods are very dull but prices are only slightly lower. Spruce and hemlock are dull but show only slight recessions in price. There is much irregularity in quotations, for while one mill may have stock another may be obliged to buy. The same material and often variations as much as $5 per thousand are found.

MISCELLANEOUS

Lighterage Limits—The free delivery or "Lighterage Limits" in New York City are as follows: In Manhattan, from a point opposite the Fort Lee ferry, south along the Hudson River around the Battery and north along the East and Harlem Rivers to the Jerome Ave. bridge at 1[illegible]th St. In New Jersey, south from Fort Lee ferry to Bayonne City, points on the north and east shores at Staten Island, between Bridge Creek (Arlington) and Clifton, both inclusive, and including Elm Park, Erastina and Shooters Island. In Brooklyn, from 69th St., Bay Ridge, north to Pot Cove, Astoria, Long Island City.

Asbestos—Asbestos building felt and sheathing in less than ton lots is 3½c. per lb. for the light, weighing from 6 to 30 lb. per 100 sq.ft.; [illegible] per lb. is charged for the heavy, weighing from 45 to 56 lb. per sq.ft.

Millboard is made in standard sheets, 40x40 in., and 41x41 from 2 to 27 lb. per sheet. The net price in 100-lb. lots is 5c. per lb.

Asbestos wood, used for fireproofing, ventilators and smoke jacks, comes in sheets, 36x48 in., 42x48 in. and 42x96 in. The prices per sheet, f.o.b. factory, in New England, are as follows:

Thickness	Weight, pounds	Price	Thickness	Weight, pounds	Price
⅛-in.	1	$0 08	⅝-in.	5	$0 4[illegible]
3/16-in.	1½	0 12	[illegible]-in.	6	0 44
¼-in.	2	0 16	[illegible]-in.	[illegible]	[illegible]
[illegible]-in.	2½	0 2[illegible]	1-in.	8	0 [illegible]
[illegible]-in.	3	0 2[illegible]	1[illegible]-in.	1[illegible]	[illegible]
[illegible]-in.	3½	[illegible]	1½-in.	12	0 61
½-in.	4	0 32	1[illegible]-in.	16	[illegible]
[illegible]-in.	4½	0 36	2-in.	16	[illegible]

Asbestos sheathing corrugated sells at 1[illegible] per sq.ft. f.o.b. mill eastern Pennsylvania.

Telegraph Wire—The demand for telegraph wire has been fair. For lots of fair size, the wire measured in Birmingham wire gage, prices are as follows: "Extra Best," Nos. 6 to 9, 4⅜c.; Nos. 10 and 11, 4½[illegible]; No. 12, 4[illegible]c.; No. 14, 6¼c. "Best Best," Nos. 6 to 9, 3½c.; Nos. 10 and 11, 3[illegible]c.; No. 12, 3½[illegible]; No. 14, 4[illegible]. Actual freight is allowed from Trenton, N. J., where it does not exceed 25c. per 100 lb.

Explosives—Dynamite of the kind generally used by contractors is approximately 11@1[illegible] per lb., f.o.b. factory, in ton lots. Blasting powder, classified as "soda" grade, is sold at $1.20@1.40 per keg of 25 lb. in lots of 10,000 lb.

Exploders, per hundred, are sold at the following prices: 4 ft., $[illegible]60; 6 ft., $4.10; 8 ft., $4.[illegible]; 10 ft., $[illegible]; 12 ft., $[illegible]; 16 ft., $6.6[illegible]; 20 ft., $7.[illegible]; [illegible] ft., $[illegible]40; 30 ft., $[illegible]; 36 ft., $11.6[illegible].

Caps in lots of 10,000 are $[illegible] per thousand.

Blasting machines for 10 holes are $1[illegible]; [illegible] holes, $20; [illegible] holes, $40; 100 holes, $60.

Chain Belting—Prices continue unchanged. Quotations are as follows: From [illegible] hp. to [illegible] hp., [illegible] centers complete with two sprockets, $[illegible] per horsepower. From [illegible] hp. to [illegible] hp., 16-in. centers complete, $[illegible] per horsepower. For [illegible] hp. to 1[illegible] hp., [illegible]-in. centers complete, $[illegible] per horsepower. From 1[illegible] hp. to [illegible]00 hp., [illegible]-in. centers complete, $[illegible] per horsepower.

Resumption of Export Trade—The war [illegible] curtailed exports from the United States during August, but they have now been resumed on a large scale from New York. For the week ending Sept. [illegible] the exports from New York were [illegible] compared with [illegible] in the corresponding week last year. [illegible]

Old Dry Goods Firm to Move—The firm of Arnold, Constable & Co. [illegible] New York, N. Y., has [illegible] property at Fifth Ave. and [illegible]th St. [illegible]

CATALOGS WANTED

[illegible] would like to receive catalogs and other literature from manufacturers of sewer pipe, steel sheet piling, [illegible] machinery, [illegible] and supplies used in sewer construction. [illegible] to be used in the course in municipal engineering at the university.

Construction News

Items in the several departments are grouped according to states, which, in turn, are arranged geographically in the following order: Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Delaware, Maryland, District of Columbia, Virginia, West Virginia, North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Louisiana, Tennessee, Kentucky, Ohio, Indiana, Michigan, Illinois, Wisconsin, Iowa, Minnesota, Kansas, Nebraska, South Dakota, North Dakota, Wyoming, Montana, Missouri, Arkansas, Texas, Oklahoma, Colorado, New Mexico, Idaho, Utah, Nevada, Arizona, Washington, Oregon, California.

Pan American Trade—A Warning

A special news memorandum of caution and warning regarding the Latin American commercial situation has been prepared by John Barrett, Director General of the Pan American Union, the international organization maintained in Washington by all the American republics for the development of commerce, intercourse, good understanding and peace.

The widespread and unprecedented public interest in the Latin American commercial opportunity as developed by the European war is being followed by so much misconception, in many circles, of the real trade and economic conditions obtaining in certain parts of Latin America, that Director General John Barrett of the Pan American Union in Washington has found it necessary to ascertain by cable the exact business situation in Latin America, and, as a result, to sound, in justice both to the United States and Latin America, a note of caution and warning.

On August 8, immediately after the outbreak of the European war, Director Barrett addressed a memorandum to the commercial and financial interests of the United States urging them to prepare to meet the combined responsibility and opportunity presented in Latin America by the war. This statement attracted general attention and discussion, but now a new phase of the situation, as indicated by these cable reports, has developed and is requiring careful consideration.

"These advices," he states, "emphasize that what is needed at this hour in Latin America is not so much a supply of the manufactured products of the United States, although required in considerable quantities, but money, loans and advances, credits on purchases, and markets at reasonable rates for raw products which usually go to Europe. If Latin America can sell at a fair figure her accumulating raw products and buy, in turn, through receiving financial help and coöperation in the form of advances and credits from United States exporters, importers and bankers, the situation will be speedily remedied and the commercial interests of the United States and Latin America will truly enter upon a new era of Pan American commerce and comity.

"The fact that the twenty Latin American countries last year bought imports and sold exports to the vast total of \$3,000,000,000, of which \$2,000,000,000 were transactions with Europe, proves beyond quibble or doubt that the opportunity is there but subject to the conditions herein noted. That the United States already has a good start and is making encouraging progress is shown by the fact that its exchange of trade with Latin America has grown in the last seven years, or during the present administration of the Pan American Union, nearly 100 per cent. or from \$450,000,000 to \$850,000,000.

"The European war, while greatly lessening the sources of Latin American imports and the market for exports, and opening a corresponding greater opportunity to United States exports and imports, has so unavoidably crippled Latin American financial resources and commercial machinery that it must require several months or a year before conditions can readjust themselves and permit results that many United States business men expect immediately.

"Despite the efforts, not only of the Latin-American embassies, legations and consulates, but of the Pan American Union, as an international organization, and the United States Departments of State and Commerce to state the situation exactly as it exists, countless articles have been appearing in various newspapers and magazines emphasizing an alleged 'golden opportunity' without pointing out its actual and present environments of money tightness and dislocation of international commercial methods. Numerous business men and commercial agents, in consequence, are crowding the steamers bound for Latin America with the expectation that they will find the Latin Americans awaiting them with outstretched hands filled with gold and ready to buy everything and anything they have to sell. These men will presently return to the United States and unfairly condemn and criticise the markets and peoples of the countries visited.

"A great stream of letters and telegrams from both North and South America are daily pouring into the office of the Pan American Union, as the international American bureau of information, and they prove the widespread interest in the field and opportunity, but they are invariably answered not only with the statement of the actual opportunity but with an admonition that the Latin American market, while vastly potential, is at this moment embarrassed by a serious financial stringency and dislocation of commercial conditions for which it is not in itself to blame.

"The opportunity of the hour, therefore, in a word, is not so much one for immediate large sales of United States manufactured products as one for coöperation and mutual help, together with careful investigation of commercial conditions and preparation to meet future competition successfully."

RAILWAYS

North Carolina—Plans are being prepared for the construction of a railroad from Kingston to Maple Hill, N. C., about 35 miles. J. T. Deal, Kingston, N. C., is interested.

South Carolina—Savannah Western Ry.—Surveys are being made by this company for the construction of a railroad from Estil to St. Paul, S. C., about 90 miles. C. H. Milligan, Charleston, S. C., is interested. Noted Sept. 3.

Tennessee—Alabama Great Southern Ry.—According to press reports this company plans to spend about \$85,000 for the construction of a belt line in Chattanooga, Tenn. C. Dougherty, Cincinnati, Ohio, is Ch. Engr.

✚**Wisconsin**—Chicago & Lake Superior Ry.—This company has awarded a contract to MADDEN & CONNELL, for grading its proposed extension from Cambridge, Wis. to Rockdale, Wis.

✚**Minnesota**—Minnesota Central R.R.—This company has awarded the contract for the construction of its line from St. Cloud to Kimball and Fairhaven, Minn., to F. J. GLOVER & SONS, Minneapolis, Minn.

Kansas—Newton, Kansas & Nebraska R.R.—Preliminary arrangements are being made by this company for the construction of a railroad through Harvey, McPherson, Marion and Dickinson Counties. S. V. Wardall, Newton, Kan., is Ch. Engr.

✚**South Dakota**—South Dakota Central Ry.—A contract has been awarded by this company for constructing a 16-mile extension to its line north from Watertown, S. D., to P. E. SHUGART, Nevada, Iowa.

Oklahoma—Rosston, Grand Rapids & Protection R.R.—Surveys have been started by this company for the construction of its proposed 12-mile railroad to connect a point on the Wichita Falls & Northwestern Ry., near Rosston, Okla., with Doby Springs, Okla. L. A. Walton is Pres. and Gen. Mgr. Noted Sept. 10.

✚**Washington**—Bellingham & Northern Ry.—A contract has been awarded by this company for the construction of a three-mile extension to its line from Bellingham to Lake Whatcom, to HENRY McFEE, Seattle, Wash.

Arizona—J. A. Veness, Winlock, Wash., and associates are considering plans for the construction of a railroad from Wilcox to the mining district, about 20 miles.

California—Plans are being prepared for the construction of a railroad from Crescent City, Calif., to Yreka, Calif., with several branch lines. H. S. Wooley is interested.

ELECTRIC RAILWAYS

Pittsfield, Mass.—The Berkshire St. Ry. Co. has applied to the City Council for a franchise to reconstruct its line from White Terrace to St. Joseph's Church, in Pittsfield. C. Q. Richmond, Pittsfield, is Mgr.

Winchendon Springs, Mass.—The Northern Massachusetts St. Ry. Co. contemplates the extension of its line to Winchendon Springs. J. A. Taggart, Greenfield, Mass., is Gen. Supt.

Albany, N. Y.—The City Council has granted a franchise to the United Traction Co. to construct and operate an electric railway from North Pearl St., on Sheridan Ave., to Chapel St. James F. Hamilton, Albany, is Gen. Mgr.

Bayport, N. Y.—The Suffolk Traction Co. has been granted franchises and is making preliminary arrangements for the extension of its lines from Bayport to Sayville and West Sayville. J. C. Brackenridge, 95 Liberty St., New York, N. Y., is Gen. Mgr. and Ch. Engr. Noted Sept. 3.

North Tonawanda, N. Y.—The International Ry Co. has been granted franchises to construct an electric railway in North Tonawanda and Tonawanda. J. A. McKenna, Buffalo, is Secy.

Orange, N. J.—The Public Service Ry. Co. has been granted permission to extend its lines on Central Ave. R. E. Danforth, Newark, is Gen. Mgr.

Farrell, Penn.—The Valley Street Ry. Co. has been granted a franchise to construct and operate an electric railway in Farrell. R. P. Stevens, Youngstown, Ohio, is Vice-Pres.

Financiers Loyal to the Country's Welfare—John Skelton Williams, Comptroller of Currency, was recently the principal speaker before the Indiana Bankers Association. An interesting point emphasized by Mr. Williams was the fact that at the present time the United States is a Mount Ararat of a universe overwhelmed by a deluge of blood, of confusion and raging strife, and that the country stood upon the threshold of opportunity for that reason. In part, his speech was as follows:

"The Federal reserve act is not a measure which serves only banks and their customers, but it is destined, I firmly believe, to exert a powerful influence for good on the lives and fortunes of all classes of our population. It is the instrumentality through which the American people will be freed from the domination of a financial oligarchy. It restores to the channels of commerce and industry hundreds of millions of dollars of money which was drawn from the sections where it was most needed to lie idle in the vaults of the big banks in two or three cities or used by [illegible] these banks [illegible] to the stock market.

"It provides for a system to meet completely and effectively the requirements of expanding or contracting business according to the seasons and the varying conditions [illegible]

[illegible]

If we allowed the currency supply to become inadequate for our requirements, we might inflict the penalties of confiscation and ruin on the innocent many to the enrichment of the designing and remorseless few.

"If we should allow inflation of the currency away from safe and solid bases of actual and irreproachable value, we would be like a man drinking himself to frenzy and torpor while his honor and the safety of his home depended on his steadiness and strength. Therefore, we have felt and tested and studied and have striven to work and build swiftly but carefully; to act promptly, but with thoughtful provision for the situation as it is, while keeping alert eyes on the possibilities of the days and months to come.

"In this work all of us have united. It is deeply gratifying to me to be able to certify how much the country owes of its growing prospects and increasing stability to the genius, skill and generous, patient, broad patriotism of its bankers in all sections. Those of New York, Chicago and other large cities have been not only willing but zealous in coöperation and with valuable and timely service. Most of them have tendered their resources and their services to help the public interest. But the people of all grades and sections have, as a general rule, done what they could to forward a difficult and complicated labor.

"The administration has been given full cause to feel gratefully and exultingly that, when the common defense and the general welfare are involved, the free citizens of the United States have no lines of differences in politics, in sections, in social grades or the distribution of the favors of Fortune. The people, regardless of party, have given cordial and cheerful sanction to every movement and act approved by their reason as being for the good of the republic.

"The work of adjustment and of getting the machinery of business on perfect foundations and oiled and leveled is not completed; but it is well started with safe and efficient methods. We and our business machinery will be required to work not only for ourselves, but for the world. The task is enormous, but it is in conjunction necessarily. In protecting our own stability, we protect the world's finance and commerce. In conserving the interests of the other nations, we conserve our own and improve the opportunities that practically are forced upon us. Along with illimitable responsibilities, the prospect of illimitable expansion confronts us."

Trade with Brazil—In a recent issue of the "Daily Consular and Trade Reports," the following article on the present trade situation in Brazil, written by the consuls, appeared:

"As this is the dull season, about the only merchandise to be shipped consists of rubber, although it is possible that some green and sun-dried hides, which ordinarily go to Germany, will go forward, especially if arrangements can be made to fumigate the green hides, sacking them being out of the question on account of cost.

"Aside from this, the situation nere is very complicated because of the lack of sufficient money with which to handle business, the uncertainties of the exchange market, which is largely in the hands of European bankers, and the increase in freight and insurance rates. Until these matters adjust themselves, it will be very difficult for merchants to do business, and especially with the United States, as there are no American banks or shipping companies. The steamship 'Purus,' which carries this dispatch, will leave here in a few days with a fair amount of rubber, most of which is billed to order and is in a measure an experimental shipment. The continuance of shipping in this way will depend upon the result of the sales in this instance.

"Notwithstanding the complicated banking situation, local collections for foreign account continue remarkably good, but orders for new goods will be limited in amount until it can be estimated where the exchange rate will establish itself. For this same reason, no doubt, American exporters are insisting upon cash with orders or guaranties.

"Anxiety as to future coal supplies is becoming more and more apparent as efforts to charter steamers continue to fail. One firm has offered as a special inducement to prepay freight, but to date has failed to arrange for a steamer. The prices of coal, \$3.15 per ton, f.o.b. shipping port, is considered reasonable in view of the circumstances, and it is to be hoped that some means will be found to solve transportation difficulties.

"The daily papers have been most active in advising the local public of the action of American trade and commercial associations and their intentions as regards this market, and as much of our success in retaining this market depends upon the initial action of the American exporter, it is hoped that he will be able to fulfill the promises implied in the action taken by the associations.

"There is an excellent demand here at present, on account of the European war, for all staples, such as corn, flour, canned goods, smoked meats, beans, oil, prints, shoes, hats, hardware, coal, machinery, electrical supplies and drugs.

"Foodstuffs and almost everything else have already trebled in price since the beginning of the month. Coal is now selling at \$40 per ton, but it is understood that the English Government has requisitioned all of the remaining supply that the two leading dealers at Pernambuco (both of whom are English) have on hand. The tramways and gas companies have enough coal to last six weeks only.

"Consul P. Merrill Griffith, Pernambuco, is at a loss to know just what arrangements can be made at present for the payment of merchandise ordered and shipped there, as the banks are all closed by order of the Brazilian Government, and have been for the last two weeks. It is reported that they will reopen soon, but indications are that there will be such a run that they may be forced to close within a short time. With New York houses having known and established representatives here, the situation is different, inasmuch as payments for goods ordered may be deferred indefinitely.

"The best way to send supplies to Pernambuco at present is by steamers flying neutral flags. The Lloyd Brazileiro intends to reëstablish its passenger service between New York and Brazil, which for some time has been discontinued.

"Sugar and cotton are the chief exports, and as this is one of the richest and most fertile sections of Brazil, sugar and cotton are chiefly raised. Nothing is being exported now, and the natives are beginning to realize how much they are dependent upon the outside world for supplies. Thousands are unemployed and many families are already suffering. There is little money and prices are very high. The Government of Argentina will not export any more flour, and the only source of such supplies for Brazil is the United States.

"Competent representatives thoroughly conversant with the customs and language of the people of this country should be sent out immediately if at all possible. Brazilians are not prejudiced against American goods at any time, and business connections can now be formed which may endure indefinitely."

Training Dye Makers—Under the direction of Dr. Allen Rodgers of Pratt Institute Brooklyn, a miniature factory has been set up to make American dyes from American raw materials. It is also proposed to train young men to become foremen of American dye factories.

In "American Industries" the official organ of the "National Association of Manufacturers," Harold Lambert Allen has printed a lengthy article from which the following extracts have been taken.

"Prior to the beginning of the European war it was not generally realized to what extent many industries of the United States are dependent on foreign supplies. We had grown accustomed to think of this country as the source of raw materials for European factories, rather than the consumer dependent on foreign products in a large measure for the maintenance of some of our largest industries—dyes for the textile, leather and paper trades. Although during the last five years the imports of dyestuffs into the United States have remained practically stationary, owing to the enlargement of the chemical works in the United States, we are dependent on Germany for such large quantities of dyestuffs that the stoppage of imports since the beginning of the war presents a serious problem to the consumers of those commodities.

"Figures obtained from official sources show that the total average purchases from abroad of alizarin and other coal tar colors have been about \$10,000,000 annually during the past six years. In 1913 the total value of imported dye stuffs from all foreign countries was \$10,395,744, including indigo and aniline salts. Of this amount Germany furnished \$8,876,020, while during the unfinished year 1914, we have imported from that country artificial dye stuffs valued at \$7,940,061, indicating that had the war not occurred the imports for both years would have been about equal. It is reasonable to assume that, had there been any great discrepancy between the imports of 1913 and 1914, they would have been larger this year, since we have already imported \$5,965,537 worth of finished coal tar colors (not including alizarin, aniline salts or indigo) this year, in comparison with the somewhat smaller value of \$5,766,600 of the same products during 1913. At all events it is obvious that the hiatus left in the American market by the war is not an inconsiderable one, and is large enough to present a serious problem to the textile and leather trades. Figures for 1913, the last complete year, as previously given, show the imports of foreign artificial dye stuffs to have been \$10,395,744, and it is this amount that American manufacturers must now supply.

"The United States must have dyes. These must be either imported or manufactured in this country, and since the war has paralyzed the trade of Germany, from whom we obtain by far the largest supply of imported dyes, only one cargo having reached this country since the beginning of hostilities, Yankee ingenuity must come to the rescue. The solution is all American dyes for American manufactured goods. We must establish a dye manufacturing industry in the United States which will supply not only the demands of the home market, but which may compete successfully with other nations for the dye trade of the world. * * *

"In order to build up an American dye manufacturing industry that will supply all of the demands of the home market and compete succesfully with foreign manufacturers for the dye trade of the world, proper support must be given the industry by both the Government and the consumers. * * *

"The part the Government must play in upbuilding the dye industry is an important one. A sufficiently high tariff must be placed on dyes to insure American manufacturers against the destructive competition for foreign combinations when the war is over. The coal-tar color industry in the United States makes no plea for protection in the ground of fostering an infant industry, but sfiicient protection should be given to prevent this county from being made the dumping ground for the overproduction of Germany. Unless this is done German manufacturers will be in a position to destroy the American coal-tar industry when the war is over, exactly as was done in the case of the hydrochinon industry.

"It must be remembered that even with chemists able to properly compound dyes great skill is necessary to their proper manufacture. The technical processes involved are exceedingly nice and considerable experience is necessary before the proper technique is acquired. In Grmany for many years the industrial schools have been training young men to assume responsible positions in dye factories, and in this country for a time some difficulty will likely be experienced in obtaining skilled labor. Foremost among American industrial schools to perceive the trend of the times is Pratt Institute in Brooklyn, N. Y. Under the direction of Dr. Allen Rodgers that institution has taken steps to install a miniature factory to manufacture all American dyes from all American raw products and train young men to become foremen in dye factories. It must be remembered that the dye industry, if greatly enlarged at all, will be placed on a permanent basis, and the importance of this experiment cannot be overestimated."

Contracts to Be Let

Bids received until Oct. 7, 1914.

Trunk Sewer and Sewage Disposal Works

Plainfield, N. J.

Sealed proposals for constructing a trunk sewer and sewage disposal works will be received by the Joint Meeting of the Inhabitants of the City of Plainfield, the Borough of North Plainfield and the Borough of Dunellen, N. J., until eight o'clock P. M., October 7, 1914. Proposals should be delivered to C. M. Dolliver, Secretary of the Joint Meeting, 119 North Avenue, Plainfield, N. J., and may be either for the trunk sewer (Contract A) or the sewage disposal works (Contract B) or both [illegible].

Contract A comprises some 17,000 feet of 42-inch reinforced concrete sewer, [illegible] feet of inverted siphons, consisting of [illegible] cast-iron pipe lines, and about [illegible] feet of [illegible]-inch force main.

Contract B is for the construction of a sewage disposal works, comprising the following structures: preliminary settling tanks of the Imhoff type, a sludge drying bed and [illegible], 2 sprinkling filter units with a [illegible] area of stone bed of about 1½ acres with a depth of [illegible] feet of stone, and double final settling tanks similar in construction to the preliminary tanks. There are also a small laboratory and sludge pumping station. The tanks, filter walls, etc., are to be built of reinforced concrete.

Proposals must be accompanied by a certified check on a National Bank or Trust Company for Twenty-five Hundred ($2,500) Dollars for each contract bid upon.

The bidder to whom a contract is awarded will be required to execute same and furnish a surety company bond in the sum of Fifty (50%) Per Cent. of the amount of the contract within ten days (Sundays excepted) after receiving [illegible] notice of the award. The Joint Meeting reserves the right to reject any or all bids.

Plans and specifications may be obtained from George W. Fuller, Engineer, 170 Broadway, New York City, upon deposit of Twenty-five ($25) Dollars, which will be refunded if said plans and specifications are returned in good condition within [illegible] days after bids have been received and acted upon by the said Joint Meeting.

Bids should be made on the blank Form of Proposals bound with the specifications and in case it is desired to bid on both contracts each bid should be made in a separate pamphlet.

C. M. DOLLIVER,
Secretary.

Bids received until Oct. 8, 1914.

Steel Highway Bridge

THE SANITARY DISTRICT OF CHICAGO

Sealed proposals endorsed "PROPOSALS FOR ERECTION OF BACH ROAD BRIDGE" will be received by the Clerk of The Sanitary District of Chicago at the office of said District, Room 700, No. 910 South Michigan Avenue, Chicago, Illinois, until 12 M., standard time, on Thursday, October 8, 1914, and will be publicly opened by the Board of Trustees of said Sanitary District at a meeting to be held on that day or at the first meeting thereafter.

The work for which said tenders are invited consists of the ERECTION AND COMPLETION of the superstructure of the STEEL HIGHWAY BRIDGE across the Calumet-Sag Channel of The Sanitary District of Chicago on the line of BACH ROAD, situated in the Township of [illegible], County of Cook, State of Illinois. The superstructure steel for said bridge will be furnished by the said Sanitary District and weighs one hundred and ten (110) tons, more or less.

A deposit of THREE HUNDRED DOLLARS ($300.00) is required with each proposal.

All proposals must be made upon blank forms of proposal furnished by said Sanitary District and shall be made in accordance with and to conform to all the terms and conditions set forth in "Requirements for Bidding and Instructions to Bidders" attached thereto.

Form of proposal, contract, specifications and plans may be obtained upon application at the office of said Sanitary District. A deposit of Five Dollars ($5.00) will be required for each set of plans and specifications taken out. Said sum of Five Dollars ($5.00) so deposited will be refunded to said [illegible] upon the return of said plans and specifications to said Sanitary District in good condition, provided same are returned within fifteen (15) days after the date on which said proposals are opened.

The Board of Trustees of said Sanitary District reserves the right to reject any or all proposals.

THE SANITARY DISTRICT OF CHICAGO,
By THOMAS A. SMYTH,
President of its Board of Trustees.

Attest:
JOHN McGILLEN, Clerk.
Chicago, September [illegible], 1914.

Bids received until Oct. 6, 1914.

Vault Equipment

NOTICE TO CONTRACTORS

Trenton, N. J.

Sealed proposals will be received at the office of the [illegible], New Jersey, at [illegible] [illegible]

[illegible]

Bids received until Oct. 13, 1914.

Building Improvements

NOTICE TO CONTRACTORS. Sealed proposals for [illegible] [illegible] Albany, N. Y. [illegible] Capitol, Albany, N. Y.

Construction News

SHARP CURTAILMENT IN BUILDING OPERATION

In 20 cities in the 1 tern States, there was a falling off of 39%; expressed in dollars, this was from $27,000,000 last year to $16,000,000 this year. A $4,500,000 loss in Albany, N. Y., was accounted for by the change in the building laws; otherwise, losses were more or less proportionate. In New York City, building was surprising; Manhattan Borough nearly equalled last year; in Bronx, fully 100% larger than in September last year, and in Brooklyn, fully 50%. In the Bronx, building for the first nine months of the year was ahead of the corresponding period last year, and Brooklyn $10,000,000 ahead. This is partially accounted for by developments in the opening of new subways, but it is remarkable, nevertheless. In Philadelphia, there is a loss of more than 50%, which is the first important loss recorded in that city this year. For the first nine months of the year, the loss was approximately $27,000,000, most of which is accounted for in the month of September. This makes a loss of approximately 11.5% compared with the corresponding month last year.

In 16 cities in the Middle West, the loss was not as pronounced, amounting to about $5,000,000, or 23%. The most startling loss was in the City of Chicago, $2,500,000; Detroit, $500,000; Grand Rapids, $1,000,000, but September, 1913, was above the average, and Minneapolis, $600,000. It is interesting to note that in these cities for the first nine months of the year, there was a gain of approximately 4%.

In seven Southern cities, the tightness of money is most evident, decreases being general in each case and amounting to 41% for September and 15% for the first nine months of the year.

Returns from Pacific Coast States have been meager, and the five cities heard from were perhaps not enough to form any adequate basis for comparison, but the loss in September amounted to 64%, comparing with 19% for the first nine months.

RAILWAYS

Maine—Eastern Maine R.R.—Preliminary surveys are being made by this company for the construction of a railway from Houlton to Bangor, Maine. D. W. Burpee is Ch. Engr.

New York—Lehigh Valley R.R.—The Traffic Bureau of Syracuse, N. Y., has petitioned this company to extend its line from either Weedsport or Auburn to Syracuse. E. B. Ashby, New York, is Ch. Engr.

✚**North Carolina**—Southern Ry.—A contract has been awarded by this company for the second track work on its line from Alexander to Craggy, N. C., about 10 miles, to the MORROW CONSTRUCTION CO., Greensboro, N. C. Noted Sept. 3.

Georgia—According to press reports the Louisville & Nashville R.R. is interested in the construction of a railway from Atlanta to Cartersville, Ga. Preliminary surveys are being made. A company is being incorporated, to be known as the North Georgia Mineral Co., for the purpose.

✚**Alabama**—Alabama Great Southern R.R.—This company has awarded a contract to H. C. ELKINS, Baltimore, Md., for 11 miles of double-track work from Birmingham to Mobile Junction, Ala. C. Dougherty, Cincinnati, Ohio, is Ch. Engr.

Mississippi—Mobile & Ohio R.R.—At a recent meeting this company voted to issue bonds for double tracking its line from Corinth, Miss., to Jackson, Tenn., about 57 miles. B. A. Wood, Mobile, Ala., is Ch. Engr.

Louisiana—Orange & Northwestern R.R.—Preliminary arrangements are being made by this company for laying tracks on its proposed line through Vinton, La. J. S. Pyeatt, Orange, Tex., is Mgr.

Kentucky—Louisville & Nashville R.R. — This company plans to award a contract soon for the construction of a three-mile line from Raymond to Jenkins, Ky. W. H. Courtenay, Louisville, Ky., is Ch. Engr.

Texas—Kansas City, Mexico & Orient R.R.—This company has voted to issue $1,488,000 in bonds for the construction of its line from Girvin to Alpine, Tex. R. P. Parker, San Angelo, Tex., is Ch. Engr.

New Mexico—Atchison, Topeka & Santa Fé R.R.—Final surveys are being made by this company for the construction of a railway from Santa Fé to Taos, N. M. F. M. Bisbee, Amarillo, Tex., is Ch. Engr., of Western lines.

Idaho—Oregon Short Line R.R.—Plans are being prepared by this company for the construction of a second track on its main line from Pocatello, Idaho to Blackfoot, Idaho. Carl Stradley, Salt Lake City, Utah, is Ch. Engr.

Arizona—Southern Pacific Co.—This company will improve and lay new rails on its Tucson division in Arizona.

California—California Terminal Ry.—Plans are being considered by this company for the construction of a railway from San Francisco to Sacramento, with branch lines to Petaluma and Napa. The total length of the road and branches will be 118 miles.

ELECTRIC RAILWAYS

Buffalo, N. Y.—The City Council has granted a franchise to the International Ry. Co. to construct and operate an electric railway from Elmwood Ave. to Main St. in Buffalo. J. C. Sheldon, Buffalo, is Pur. Agt.

Opelika, Ala.—Preliminary arrangements are being made by the Carmack Ry. & Power Co. for the construction of an electric railway from Opelika to Auburn, about eight miles. H. A. Bedell, Opelika, is Pres.

Covington, Ky.—The South Covington & Cincinnati St. Ry. Co. is considering plans for the extension of its line from Covington to Erlanger.

Akron, Ohio—The Northern Ohio Traction & Light Co. will be compelled to construct new lines in Maple St., Wooster Ave. and Grant St. Charles Currie, Akron, is Gen. Mgr.

RAILWAYS

✚**Connecticut**—New York, New Haven & Hartford R.R.—This company has awarded a contract to HOLBROOK, CABOT & ROLLINS CORPORATION, Boston, Mass., for constructing a new main line in New London, Conn., from Hallam St. to the terminal of the new bridge over the Thames River.

North Carolina—Cliffside R.R.—Surveys have been made by this company for the extension of its line from Cliffside to the Brand River. R. R. Haynes, Cliffside, N. C., is Pres. and W. H. Terrell is Ch. Engr.

Georgia—Swift Lumber Co.—The construction of a nine mile extension from Meigs, Ga., to Coolidge and Pavo, Ga., is contemplated by this company.

Iowa—Charles City Western Ry.—Plans are being made by this company to electrify and extend its 16-mile railway in Iowa. E. R. Erusberger, Charles City, Iowa, is Gen. Mgr.

Arkansas—Joneshoro, Lake City & Eastern R.R.—Plans are being prepared by this company for the construction of two extensions into the timber lands from Jonesboro, Ark.

Texas—Altus, Roswell & El Paso R.R.—This company has been organized for the purpose of constructing a railway from Memphis, Tex., to Roswell, N. M., about 291 miles. E. C. Noble, Lubbock, Tex., is Pres. and Gen. Mgr.

Oklahoma—The Oil Belt Terminal Co., Jennings, Okla., has been purchased by C. N. Haskell, Tulsa, Okla., and associates. The new owners plan the extension of the line from Jennings to Drumright and Cushing, Okla., about 21 miles.

New Mexico—Altus Roswell & El Paso R.R.—See item under Texas.

Oregon—The citizens of Douglas County, at an election to be held soon, will vote on the proposition to issue $500,000 in bonds, the proceeds of which will be used for the construction of a railway from Roseburg, Ore., to Coos Bay tidewater.

California—Atchison, Topeka & Santa Fe R.R.—Preliminary arrangements are being made by this company for improving its tracks and roadbed from Richmond, Calif., to Stockton, Calif. F. M. Bisbee, Amarillo, Tex., is Ch. Engr. Western lines.

✚**Ontario**—Lake Huron & Northern Ontario—This company has awarded the contract for the extension of the railway, formerly the Bruce Mines & Algoma line, from Bruce Mines, Ont., north, to the ONTARIO NORTHERN CONSTRUCTION CO. H. Appleton, Bruce Mines, Ont., is Vice-Pres. and Gen. Mgr.

ELECTRIC RAILWAYS

Washburn, Maine—Plans have been completed and surveys are being made by the Quebec Extension Ry. to begin construction in 1915 of its 100-mile line between Washburn and Quebec. It will extend across the northern part of Maine to connect the existing lines at Quebec and New Brunswick, and across New Brunswick to the Quebec border.

Franklin, Mass.—The Milford, Attleboro & Woonsocket St. Ry. has applied to the City Council for a franchise to relocate its tracks in Central St.

Swampscott, Mass.—The City Council has granted permission to the Bay State St. Ry. to double track its line on Humphrey St., from the Lynn line to Commonwealth Ave.

Danbury, Conn.—Plans of the Danbury & Bethel St. Ry. for the reconstruction of its track on White St., Danbury, and the construction of a turnout at that place have been approved by the Public Utilities Commission.

Burgettstown, Penn.—Plans are being considered by the West Penn Traction Co. for the extension of its Oakdale and McDonald branch to Burgettstown. W. E. Moore, First National Bank Bldg., Pittsburgh, is Vice-Pres. and Gen. Mgr.

Marietta, Penn.—The Conestoga Traction Co. plans to extend its lines from Marietta to Maytown, a distance of three miles.

Philadelphia, Penn.—The Philadelphia Rapid Transit Co. has been requested to consider plans for extending its line on 56th St.

Washington, D. C.—The House of Representatives has passed a Senate bill authorizing the Washington Ry. & Electric Ry. to extend its tracks from the point where its present tracks intersect Portland St., S. E., thence along Portland St. in a westerly direction to Fourth St., S. W.

Owensport, W. Va.—A company is being organized under the name of the West Virginia Electric Co. for the purpose of building a 50-mile electric railway from Owensport to Weston.

Durham, N. C.—Plans are being made to organize a company for the purpose of building a 12-mile electric line between Durham and Chapel Hill. C. G. Creighton, Durham, is interested.

Lula, Ga.—The Lula-Homer Ry. Co. has been recently organized for the purpose of building a 15-mile railway from Lula to Homer. The incorporators are: S. A. Carter, W. A. Boling, B. E. Chapman, Joel Coffee and E. F. Whitworth, Lula; C. H. Chambers and E. A. Mize, Homer.

Gadsden, Ala.—Plans have been prepared and a preliminary survey has been made for the proposed electric railway from Gadsden to Centre through a section of Cherokee County. It is also planned to extend the line to East Gadsden which will require the construction of a bridge across the Coosa River.

Alexandria, La.—S. A. Guy and W. A. Sullivan, Shreveport, La., are interested in the construction of an electric railway in Alexandria.

Cleveland, Ohio—The Cleveland Ry. has been requested to consider plans for extending its Madison Ave. line from the present terminus at West 117th St. to the Rocky River in Cleveland.

Ypsilanti, Mich.—The Ypsilanti St. Ry. has requested the City Council to grant it a franchise to construct an electric belt line in Ypsilanti and to arrange to use the tracks of the Detroit, Jackson & Chicago Ry. on Michigan Ave., Washington, and West Cross Sts. Frederick H. Zeigen, Detroit, Mich., is Pres.

East Dubuque, Ill.—It is planned to organize a company for the purpose of building an electric railway to connect Platteville with Lancaster, the county seat of Grant County, the inland villages west and north, and also to connect with the Chicago, Milwaukee & St. Paul R.R. and the Chicago, Northwestern R.R. at Shullsburg, the Illinois Central R.R. at Apple River, Ill., the Chicago, Great Western R.R. at Stackton and the several lines at Freeport, where connections will be made with the Illinois Traction System, thus giving Grant County a direct route to Chicago.

Los Angeles, Calif.—The City Council has granted a franchise for a period of 21 years to the Pacific Electric Ry. Co. to construct and operate an electric railway in sections of Sixth St. and Central Ave. J. McMillan, Los Angeles, is Gen. Mgr.

Redlands, Calif.—Plans are under consideration for building an electric railway from Redlands Junction to Yucaipa via Redlands. G. S. Biggin and E. A. Warner are interested.

San Francisco, Calif.—The North Beach Promotion Association has requested the Board of Supervisors to authorize the San Francisco Ry. to extend its line down Stockton St. to the Embarcadero.

Stockton, Calif.—The City Council has been requested by the Tidewater Southern Ry. to grant it a franchise for the purpose of extending its tracks in Stockton to connect its warehouses, manufactories and other industries and enterprises within its line of railway and for the purpose of connecting its line with the tracks of other railroad companies in Stockton.

St. John, N. B.—The St. John Ry. has been requested to consider plans for extending its lines through Simonds, St. John County.

LIGHT, HEAT AND POWER

+Peabody, Mass.—The [illegible] Leather Co. has awarded the contract for the construction of a [illegible]-ft. concrete power house in the rear of its plant at Wallis and Hardy Sts. to the E. H. [illegible] Co. at about $[illegible].

Binghamton, N. Y.—Bids will be received until Oct. 19, by J. H. [illegible], Secy. State Hospital Comn., Albany, N. Y., for a new boiler, stack, etc., at the Binghamton State Hospital.

+Contracts for the installation of electrical equipment in the new high schools at [illegible] and Lestershire, Broome County, have been awarded to the [illegible]ANDING ELECTRIC SUPPLY CO., State St., Binghamton.

Pittsburgh, Penn.—As the Allegheny County Light Co. has refused to reduce the price of electric current furnished to the city schools the Board of Education is having plans and estimates prepared for installing power plants in at least five of the largest school buildings. C. L. Woolbridge is Supt. of Bldgs. for the Bd. of Education.

Frostburg, Md.—The Hagerstown & Frederick Electric Ry. Co. has recently purchased the plant of the Frostburg Illuminating Co., and plans to enlarge and improve the plant.

+Princess Anne, Md.—[illegible] has awarded the contract for the construction of a [illegible]x42-ft. brick power house to [illegible] & M[illegible], Princess Anne. The cost of the plant, including equipment, will be about $[illegible].

Westminster, S. C.—At a recent election the citizens voted in favor of a bond issue of $[illegible] to be used for the construction of a municipal electric-light plant. Plans have been prepared by the J. B. McCrary Co., Atlanta, Ga. Noted Aug. [illegible].

Leesburg, Ga.—The J. B. McCrary Co., Atlanta, Ga., has prepared plans for a municipal electric plant to cost, it is reported, about $[illegible]. Noted Jan. [illegible], 1914.

Pulaski, Tenn.—The city will build a brick power house, and will remove the electric-light plant from the City Hall. James T. W[illegible] is Mgr. and Engr. of the power station.

Butler, Ohio.—The citizens have voted $[illegible] in bonds to be used in purchasing a gas engine for the municipal electric-light plant. Other improvements to the plant are also under consideration.

Camden, Ohio.—The citizens will vote Nov. [illegible], on the question of a bond issue, the proceeds of which will be used for the construction of a light plant and water system, estimated to cost $[illegible].

+Marysville, Ohio.—The State Board, Columbus, has awarded the contract for power house equipment, wells and the installation of pumps at the State Reformatory for Women to SHELDON ENGINEERING CO., Toledo, Ohio, at $[illegible].

Spencerville, Ohio.—It is reported that bids will be asked for [illegible] the municipal electric-light plant as soon as [illegible] which was voted for the purpose [illegible]. Noted July 16.

Toledo, Ohio.—Bids will be received until Nov. 6 by the Board of Commissioners of Lucas County for the construction of a power house and equipment for the new heating, lighting and power plant at the Lucas County Children's Home. [illegible] is County Audr. [illegible]

Lansing, Mich.—The Electric Light Commissioners and the [illegible] a site for South [illegible] [illegible] pumping station [illegible] Board of Water Works.

Saginaw, Mich.—The City Council has been petitioned to [illegible] for the construction of a [illegible] plant [illegible] H. Fowle is City Engr. Noted [illegible].

Vanderbilt, Mich.—[illegible] to supply electricity to the [illegible]

Wyandotte, Mich.—It is reported that the improvements to the [illegible]

Carbondale, Ill.—[illegible]

Lockwood, Iowa.—[illegible]

Monona, Iowa.—[illegible]

Oelwein, Iowa.—[illegible]

Sergeant Bluff, Iowa.—[illegible]

Kansas City, Kan.—[illegible]

[illegible], Neb.—[illegible]

Summit, S. D.—[illegible]

Crane, Mo.—The Crane Ice & Cold Storage Co., owned by C. F. Woodson and W. E. Montgomery, contemplates the establishment of an electric-light station in connection with the 10-ton ice plant about to be built.

Smithville, Mo.—At a recent special election, the citizens voted in favor of establishing a municipal electric-light plant.

Sand Springs, Okla.—The Sand Springs Power, Light & Water Co., P. O. Box 128, Tulsa, Okla., plans to install an electric-light plant in Sand Springs.

+Moab, Utah.—J. W. Christensen, Fairview, and C. A. Hammond, Moab, who were recently granted a franchise for the establishment and operation of an electric-light plant, have awarded the contracts for equipment for the plant and distributing system to the INTER-MOUNTAIN ELECTRIC CO., East First South St., Salt Lake City.

San Francisco, Calif.—It is reported that the Board of Public Works has directed the Board of Consulting Architects to prepare plans for the construction of a power plant for the Civic Center. It will cost about $75,000. M. M. O'Shaughnessy is City Engr.

Sydney, N. S.—Bids will be received until Oct. 3 by the City Council for furnishing one 22[illegible]-volt, three-phase 60-cycle turbine pump, and an all-air priming pump. Norman [illegible] is Engr.

St. John, N. B.—Bids are being received by Francis S. Walker, Sanitary Engr., 18 Germain St., for boiler fittings for the heating plant for the new hospital.

BRIDGES

+Bellingham, Mass.—(Official)—The Board of Selectmen has awarded the contract for the construction of a bridge over the Charles River at Caryville, to JAMES A. MONROE, North Attleboro, Mass. Noted Oct. 1.

Boston, Mass.—Bids were opened Oct. 6 by the Metropolitan Park Commission for the construction of the reinforced concrete substructure of the Wellington Bridge at Somerville and Medford, to replace the one destroyed by fire last June. The three lowest bids were: Coleman Bros., Boston, $44,013; T. Stuart's Son Co., Newton, Mass., $49,9[illegible]; W. M. Bailey, Malden, Mass., $57,515. Noted June 11, July 9 and Sept. 3.

+New London, Conn.—It is reported that the New York, New Haven & Hartford R.R. has awarded the contract for constructing the westerly approaches of its proposed bridge over the Thames River to RYAN & KEON, 176 Federal St., Boston. The contract includes two concrete bridges over Winthrop Cove in addition to the embankment.

+Schuylerville, N. Y.—(Official)—Bids will be received until 1 p.m., Nov. 6, by the Town Clerk of the Town of Saratoga, in the village of Schuylerville, for the construction of the substructure and superstructure of a bridge over the west channel of the Hudson River near Schuylerville. For further information, see advertisement under "Contracts to Be Let."

New Brunswick, N. J.—(Official)—Bids will be received until [illegible] p.m., Oct. 26, by the Board of Chosen Freeholders of Middlesex County for the construction of a reinforced concrete bridge over [illegible] Creek at [illegible] St., Borough of Roosevelt. Alvin B. Fox, Perth Amboy, is County Engr. A. J. Gebhardt is Dir. Bd. of Chosen Freeholders.

South Amboy, N. J.—(Official)—The Raritan River R.R. is constructing a bridge over its tracks at Washington Ave. The work is being done by the railroad's own forces under the direction of Thomas [illegible], Engr. of M. W. and Structures. The bridge will be of reinforced concrete and will cost about $[illegible]. Noted Oct. [illegible].

Trenton, N. J.—The city contemplates the construction of [illegible] bridge over Assunpink Creek [illegible] with the river property. J. [illegible] is City [illegible].

+Allentown, Penn.—The Commissioners of Lehigh County have awarded contracts for the construction of [illegible] and the repair of two others to the ALLENTOWN CONSTRUCTION CO. at $[illegible]. [illegible] CONTRACTING CO. at $[illegible]. Noted [illegible].

+Ellwood City, Penn.—[illegible]

+Harrisburg, Penn.—[illegible]

Philadelphia, Penn.—[illegible]

Leipsic, Del.—[illegible]

Wilmington, Del.—The City Council is considering the construction of a bridge over the Brandywine at Washington St. [illegible] is City Engr.

Gadsden, Ala.—See item under "Electric Railways."

+Greenville, Miss.—(Official)—The Board of Supervisors of [illegible]

+Newton, Miss.—(Official)—The Board of Supervisors of Newton County has awarded the contract for the construction of 18 small bridges, of creosoted timber, in District No. 4, to R. E. KEITH, Decatur, Miss., at $8840. Noted Sept. 24.

Lake Charles, La.—The Police Jury of Calcasieu Parish has appointed a special committee to take charge of preliminary plans for a reinforced concrete bridge over the Calcasieu River, at Lake Charles. The estimated cost of the bridge is $175,000.

Plaquemine, La.—(Official)—The Police Jury of Iberville Parish has rejected all bids received Oct. 3 for the construction of a steel drawbridge over Bayou Grosse Tete Bay, and the work will be readvertised. W. A. Holloway is Pres. of the Police Jury. Noted Oct. 1.

Memphis, Tenn.—Bids for the construction of a reinforced-concrete culvert over the Bayou Gayoso at Mill Ave. were received as follows: F. D. Harvey, $13,675; T. A. Gavin, $14,065; Koehler Bros. & Fowler Construction Co., $13,400; William O. White, $11,277; A. M. Alexander, $11,100; B. C. Pouncy, $15,800; Larkin & Co., $13,387. J. H. Weatherford is City Engr.

+Louisa, Ky.—The Chesapeake & Ohio Ry. has awarded the contract for the construction of a bridge over the Levisa Fork of the Big Sandy River, about three miles from Louisa, to the VIRGINIA CONCRETE CO., Roanoke, Va.

Ludlow, Ky.—Plans have been prepared for a new concrete viaduct at Elm St. over the tracks of the Queen & Crescent Route. The estimated cost is $34,615, or about $16,000 more than the original estimates, owing to the difficulty in securing a solid foundation on account of the beds of quicksand. The plans have been referred to the Committee on Streets and Railroads. Noted Sept. 17.

+Cincinnati, Ohio—(Official)—The Commissioners of Hamilton County have awarded contracts for the construction of a concrete bridge over Mill Creek on Wayne Ave., Springfield Township, and for the repair of a bridge over Syracuse Creek near Perin's Place, Symmes Township, to CHARLES STAAB, Reading, Ohio, at $32,160 and $1125 respectively. Noted Sept. 17.

Delaware, Ohio—(Official)—Plans have not yet been completed for the construction of a concrete bridge over the Olentangy River, at Winter St., of which the estimated cost is $36,000. A special committee of the Commercial Club has coöperated with the Commissioners of Delaware County to promote the construction of this bridge. Bids will be received by the County Commissioners. Noted Sept. 24.

Lima, Ohio—Bids will be received until noon, Oct. 21, by the Board of Commissioners of Allen County for the construction of the superstructure of a bridge in Bath Township. H. J. Lawlor is Clk. of Comrs.

Warren, Ohio—Bids will be received until 1 p.m., Oct. 19, by W. R. Harrington, Audr. of Trumbull County, for the construction of a bridge in Idylwild Park, Brookfield Township.

+Rensselaer, Ind.—(Official)—The Commissioners of Jasper County awarded the following contracts on Oct. 6, for the construction of nine bridges in the county: B. D. McCOLTY, Rensselaer, $2191 for three bridges; F. M. WILLIAMS, Winamac, $1583 for two bridges; ELKHART BRIDGE CO., Elkhart, $695 for one bridge; ROCHESTER BRIDGE CO., Rochester, Ind., $3289 for one bridge; EAST ST. LOUIS BRIDGE CO., East St. Louis, Ill., $1380 for two bridges.

+Harmon, Ill.—(Official)—Harmon Township has awarded the contract for the construction of the Clatworthy Bridge to the CLINTON BRIDGE WORKS, Clinton, Iowa, at $2985; the contract for the Kimball Bridge was awarded to the JOLIET BRIDGE & IRON CO., Joliet, Ill., at $3047. The Decatur Bridge Co., Decatur, Ill., bid $3500 and $3600 respectively for these bridges. Noted Sept. 24.

LaSalle, Ill.—It is reported that the Shippingsport Bridge at LaSalle has been condemned as unsafe, and that the State and County Engineers will recommend the construction of a new bridge over the Illinois River at this point. The approximate cost will be $125,000. George Farnsworth, Ottawa, Ill., is County Engr. of LaSalle County.

Kansas City, Kan.—The Commissioners of Wyandotte County have instructed the County Engineer to prepare plans for the reconstruction of the Central Ave. Bridge over the Kaw River. The estimated cost of an entire new bridge is $250,000, or if one or two spans of the old bridge are used, about $60,000 may be saved. The Metropolitan Street Ry. Co. will pay a part of the cost. Frank Holcomb is County Clk. Noted Sept. 24.

+Leavenworth, Kan.—(Official)—Contracts for the construction of 19 small bridges and culverts, total cost about $15,450, have been awarded by the Commissioners of Leavenworth County to: The MISSOURI VALLEY BRIDGE CO.; FRED. TERRY & SON; TIERNEY & HAND and JEFFRIES & MARTIN. Noted Oct. 1.

Wichita, Kan.—The Commissioners of Sedgwick County have passed a resolution for the construction of a pile bridge over the Arkansas River in Riverside Township. It will be about 400 ft. long. Plans will be prepared at once by E. V. Moone, County Engr., and bids will soon be asked.

Medora, N. D.—(Official)—We are advised that bids for a bridge over the Little Missouri River will not be readvertised at present, as there is no sale for the boads to pay for its construction. List of bids received Sept. 7. Noted Oct. 1.

Billings, Mont.—Press reports state that the Commissioners of Yellowstone County have selected a site over the Yellowstone River near Duck Creek for the construction of a bridge to cost about $30,000.

Independence, Mo.—The Missouri State Utilities Commission has ordered the construction of a viaduct over the 15th St. Road crossing of the Chicago & Alton R.R., the railroad company to pay 60%, and Jackson County 40% of the cost, which is estimated at $32,490. The viaduct is to be of concrete, 478 ft. long, 30 ft. wide, with approaches of 375 ft. Plans are to be prepared by the Engineer of Jackson County, and approved by the Utilities Commission and the railroad. They must be submitted to the Commission by Nov. 20.

Jefferson City, Mo.—The Highway Engineer of Cole County has prepared plans for the construction of a bridge, about 1300 ft. long, over the Osage River at Lisletown. The estimated cost is $65,000, the expense to be divided between Cole and Osage Counties. It is reported that bonds will be voted to pay for this bridge.

Monticello, Ark.—Bids will be received until noon, Oct. 24, by W. A. Coker, County Judge of Drew County, for the construction of a steel bridge over Bayou Bartholemew, three miles west of Tillar. Noted Sept. 17.

Wynne, Ark.—It is reported that bids will soon be asked for the construction of 15 highway bridges over the canals in Drainage District No. 3, of Cross County. W. S. Newsom, Wynne, is Engr.

Dallas, Tex.—The Board of City Commissioners has rejected all bids for the construction of a concrete arch over Turtle Creek at Bowen St. as being too high. New bids will be asked. There were four bids, ranging from $14,750 to $29,349. S. B. Scott is Street Comr.

+Fort Worth, Tex.—(Official)—The Commissioners of Tarrant County have awarded the contract for the construction of a bridge on the Fort Worth and Azle Road to the TRINITY BRIDGE CO., at $4389. Other bidders were: Mahuren & Chester, $4845; Montgomery, Watt & Echols, $4888; Tarrant Construction Co., $5262; El Paso Bridge Co., $5309; E. C. Woodward, $5750. Noted Sept. 24.

Fredericksburg, Tex.—(Official)—The Commissioners of Gillespie County rejected all bids received Oct. 3 for the construction of a low-water bridge over the Pedernales River, at Austin Crossing. Herman Usener is County Clk. Noted Oct. 1.

Memphis, Tex.—The Altus, Roswell & El Paso R.R. will, it is reported, build two steel bridges and several wooden trestles on its proposed line from Memphis, Tex., to Roswell, N. M.

San Antonio, Tex.—The City Council plans the construction of two bridges over San Pedro Creek, one at North Flores St. and the other at West Laurel St. A. C. Paneoast is City Engr.

Twin Falls, Idaho—The Board of Commissioners of Twin Falls County has appropriated $10,000 for the Shoshone Falls Bridge, $9000 for the Hansen Bridge, and $4000 for the Murtaugh Bridge. The money will be available when the state, Lincoln and Minidoka Counties have appropriated similar amounts.

+Provo, Utah—(Official)—The Commissioners of Utah County have awarded the contract for the construction of a bridge over the Provo River at Pleasant View to the PROVO FOUNDRY & MACHINE CO., Provo, at $4050; the contract for a bridge over the Jordan River near Lehi was awarded to the MIDLAND BRIDGE CO., Kansas City, Mo., at $4380. List of bidders noted Sept. 24.

Buckley, Wash.—The following bids were received by the Commissioners of King County for furnishing steel for the King-Pierce County bridge over the White River at Buckley: United States Steel Co., $11,472; Minnesota Steel & Machine Co., $12,000; Illinois Steel & Bridge Co., $12,697; Omaha Structural Steel Co., $12,831; Massillon Co., $13,059; C. W. Raynor, $11,625; Milwaukee Bridge & Iron Co., $11,998; C. W. Kinnan & Co., $13,000; Central States Bridge Co., $11,620. Noted July 30, Aug. 6 and Sept. 3.

Seattle, Wash.—The City Council failed to pass the ordinance appropriating $8000 from the general fund for the completion of the piers of the Montlake Blvd. Bridge. Noted July 16 and Sept. 10.

+Seattle, Wash.—The Board of Park Commissioners has awarded the contract for the construction of a bridge across the McGaw St. Gulch to ELMER JOHNSON, 6742 Third Ave. N. W., Seattle, at about $5000.

Bonsall, Calif.—(Official)—Bids will be received until 11 a.m., Oct. 19, by the Board of Supervisors of San Diego County, San Diego, for the construction of a reinforced concrete bridge at the mouth of Gopher Cañon near Bonsall, Route 4, Div. 2, County Highway Commission Survey. B. Allen, San Diego, is Deputy Clk. of the Bd. of Supvrs.

Extended totals	$26,094	$25,168	$25,219	$43,435	$25,276	$35,251	$24,385	$30,682	$25,843	$29,877

Decrease in Immigration—Figures of the Department of Labor show that since July 1, 1914, there has been a decided decrease in the influx of foreigners to this country. There were 34,637 entering in July, compared with 87,658 of the same month in 1913. In August there has been a further reduction of about 20,000, and September arrivals will probably be even less.

The New Haven Reduces Its Board—It is the intention of the New Haven R.R. to reduce the number of its board of directors from 27 to 17. Four men, William Rockefeller, George F. Baker, Charles F. Brooker and J. S. Elton, have already resigned from the board of directors. The reason for their resignations has not been disclosed.

RAPID TRANSIT SYSTEM, NEW YORK, N. Y.

Section 1, Route 18

+Bids were received by the [illegible] Commission [illegible] Section 1, Route 18 of the [illegible] rapid transit [illegible] from (A) FREDERICK L. CRANFORD (N.) 17 [illegible] St., Brooklyn, (awarded contract); (B) [illegible] Contracting Co., [illegible] East [illegible] St., New York; (C) [illegible] & [illegible], Inc., 18 East [illegible] St., New York; (D) Holbrook, Cabot & Rollins Corporation, [illegible] Ave., New York; (E) [illegible] Co., Woolworth Bldg., New York; (F) Underpinning & Foundation Co., 290 Broadway, New York; (G) Rapid Transit Subway Construction Co., 16[illegible] Broadway, New York. Maintaining navigation (lump sum)	500 00	50 00	25 00	500 00
Maintaining traffic for vehicles (lump sum)	500 00	100 00	[illegible]	500 00
Extended totals	$44,[illegible]	$43,[illegible]	$43,472	$4[illegible],485

MUNICIPAL BOND SALES FALL OFF

Sales of municipal bonds in September aggregated $4,880,000 according to the "Financial Chronicle." This does not include resales nor short-term financiering. It compares, however, most unfavorably with bond sales in recent years, as for example, with $24,974,000 in the same month last year. The issues for the first nine months of this year aggregate $381,000,000. This is the largest ever reported for the first nine months of the year, comparing, as it does, with $2[illegible],000 the first nine months of 1913. The following table, compiled by the "Financial Chronicle" shows the output of permanent municipal bonds issued for the month of September and for the nine months in this and previous years:

	Month of September	First Nine Months of the year
1914	$4,880,400	$381,[illegible]960
1913	24,974,251	2[illegible]0,781,633
1912	25,469,643	317,91[illegible],921
1911	26,487,290	314,[illegible]3,570
1910	18,264,071	211,[illegible]1,042
1909	23,001,771	27[illegible],389,451
1908	34,531,814	243,241,117
1907	47,917,077	199,7[illegible]2,964
1906	8,950,418	153,1[illegible]2,345
1905	9,835,200	141,[illegible]1,727
1904	10,694,671	1[illegible]7,[illegible]21,657
1903	8,763,079	111,745,993
1902	9,179,654	117,6[illegible]8,455

* Awarded two contracts jointly.
† Trackage rights also to New York Municipal Railway Corporation.

+Alliance, Ohio—The contract for the construction of a two-story and basement City Hall building, 90x120 ft., has been awarded to GEORGE B. McMULLAN CO., 1749 East 55th St., Cleveland. Estimated cost, $75,000.

Cincinnati, Ohio—Harry Hake, Arch., Provident Bank Bldg., is preparing plans for the construction of a convention hall, to cost $250,000.

Lakewood, Ohio—John Warner, Arch., Marion Bldg., Cleveland, has prepared plans for the construction of a building on West 114th St., for the Highland Congregational Church. Estimated cost, $40,000.

Lakewood, Ohio—Charles W. Hopkinson, Arch., Rose Bldg., Cleveland, has prepared plans for the construction of a library to cost $50,000.

Lorain, Ohio—H. G. Ford, Arch., has prepared plans for the construction of a three-story fireproof high school. Estimated cost, $150,000.

Toledo, Ohio—Mills, Rhines, Bellman & Nordhoff, Archs., are preparing plans for the construction of a hotel at Jefferson Ave. and St. Clair St., for W. D. Stroud, Los Angeles, Calif. Estimated cost, $400,000.

Battle Creek, Mich.—Plans are being prepared by M. J. Morehouse, Arch., 343 S. Dearborn St., Chicago, Ill., for a five-story and basement hall building, 60x100 ft., for the Kellogg Toasted Corn Flake Co., Battle Creek. Estimated cost, $150,000.

Detroit, Mich.—Stahl, Kinsey & Chapman, Archs., 117 Fort St. West, are preparing plans for the construction of a two-story and basement, 75x75-ft. church for the Bethany Presbyterian congregation. Estimated cost, $75,000.

Antigo, Wis.—P. J. Hansen & Co. are contemplating the construction of a theater, 44x185 ft., at Antigo.

Horison, Wis.—Plans are being prepared by H. W. Buemming, Arch., 521 Jackson St., Milwaukee, for the construction of a three-story and basement, 52x160-ft. building for the Travelers Hotel Co.

Milwaukee, Wis.—Brust & Philipp, Archs., Free Press Bldg., are preparing plans for the construction of a three-story and basement, 82x150-ft. building, for St. Catherine's Home for Working Girls, at 1131 Sycamore St. Estimated cost, $100,000.

Racine, Wis.—Guilbert & Funston, Archs. Robinson Block, are preparing plans for the construction of a two-story, 140x240-ft. grade school, gymnasium and auditorium at West Racine. The estimated cost is $100,000.

Superior, Wis.—F. E. Johnson, Arch., is preparing plans for the construction of a two-story and basement, 59x100-ft. theater for C. D. Armstrong, Ashland.

Union Grove, Wis.—Bids will be received, about Nov. 1, by M. J. Toppins, Secy. of the Home for Feeble-Minded and Epileptics, Capitol Bldg., Madison, for the construction of buildings for the institution at Union Grove. Estimated cost, $1,000,000.

+Glen Lake [illegible] **Minn.**—The contract for [illegible] Hennepin County [illegible] has been [illegible] JAMES [illegible] Minneapolis. Estimated cost, $[illegible]. Noted Oct [illegible].

St. Paul, Minn.—[illegible], Arch., Endicott Bldg., is preparing plans for the construction of a [illegible], estimated to cost $[illegible]. Dr [illegible], [illegible] Lowry Bldg., is Chm of the Bldg Com.

Anaconda, Mont.—R [illegible] contemplates constructing a [illegible]-story reinforced-concrete hotel. Estimated cost, $[illegible].

+Carthage, Mo.—The contract for the construction of the [illegible] was awarded to [illegible] J McNERNEY. The estimated cost is $[illegible]. Noted Oct [illegible].

Jefferson City, Mo.—Bids will be received about Apr 1, 1915, for the construction of a seven-story bank building for the Jefferson Investment Co. Estimated cost, $[illegible]. Miller & Miller are the Archts. Noted Oct 1.

+Kansas City, Mo.—The contract for the construction of a three-story reinforced-concrete office building at Eighth and Wyandotte St has been awarded to HARVEY STIVER for John L Glover. Estimated cost $50,000.

+Springfield, Mo.—The Heer Andres Investment Co has awarded the contract for [illegible] tons of steel for the six-story building for the Heer Dry Goods Co to the CHRISTOPHER-SIMPSON STEEL & IRON CO, St Louis. Noted Sept 10.

Dallas, Texas.—Plans are being prepared for the construction of an office building for the Texas & Pacific R.R. Co. Estimated cost, $[illegible],000.

Tucson, Ariz.—The Federal Bldg Co., recently incorporated, contemplates the construction of an office building, to cost $[illegible]. Epes Randolph, L H Manning and Charles F Solomon are interested.

Seattle, Wash.—Bids for the Columbia Branch library will be received soon by W Marbury, Arch., 71[illegible] White Bldg. The structure will be of terra cotta, with slate roof and concrete foundations. Estimated cost, $50,000.

Portland, Ore.—N N Carpenter contemplates constructing a fireproof office building at Grand Ave and East Alder St. Estimated cost, $[illegible],000.

Berkeley, Calif.—The city contemplates the construction of five [illegible] which will cost $[illegible]0,000.

+Fresno, Calif.—The School Board has awarded the contract for the construction of a two-story school, to D A EVANS. The estimated cost is $[illegible].

Longbeach, Calif.—Homer Laughlin Jr, Los Angeles, contemplates constructing a fireproof theater to cost about $12[illegible].

+Los Angeles, Calif.—The contract for the construction of a [illegible], at 61st and Figueroa St, has been awarded to [illegible] GRANT, [illegible] West 37th St. The estimated cost is $66,7[illegible]0.

Oakland, Calif.—The Second Church of Christ, Scientist, is contemplating the construction of a building at 34th and Elm St. Estimated cost, $[illegible].

Oakland, Calif.—[illegible], Arch., [illegible] Bldg., San Francisco, is preparing plans for an addition to the California [illegible] at [illegible] and [illegible] St. Estimated cost, $[illegible].

Oakland, Calif.—Plans are being prepared by George W [illegible], Arch., [illegible], for the construction of a [illegible]-story [illegible] at [illegible] for [illegible] Meade.

San Fernando, Calif.—John C Austin, Arch., [illegible] Wright & Callender Bldg., Los Angeles, is preparing plans for the construction of a [illegible]-story reinforced-concrete administration building, and [illegible] reinforced-concrete [illegible]. Estimated cost, $[illegible].

+Santa Cruz, Calif.—[illegible]

Montreal, Que.—[illegible]

Quebec, Que.—[illegible]

+Hamilton, Ont.—[illegible]

North Bay, Ont.—[illegible]

+Toronto, Ont.—[illegible]

Toronto, Ont.—[illegible]

Toronto, Ont.—[illegible]

Windsor, Ont.—[illegible]

Edmonton, Alta.—[illegible]

+Vancouver, B. C.—[illegible]

Victoria, B. C.—[illegible]

for the entire building and $[illegible] for the work less the top story.

The Standard Scale & Supply Co., Pittsburgh, Penn., has recently completed a contract for furnishing and installing weighing equipment for the Government of Uruguay at the Port of Montevideo.

On this contract the company earned $17,000 in bonuses for finishing the work ahead of the contract time. This bonus, it is claimed, was earned through the efficiency and simplicity of the Standard Low Charging Concrete Mixers. These, it is stated, were so well attended and packed as to be practically ready for work as soon as landed.

Subway Anniversary.—The first section of New York City's subway has been in operation for ten years, having been first opened on Oct 27, 1904. Within three years after its opening the subway was carrying [illegible] passengers daily. At the present time it carries upward of 1,[illegible] passengers for each week day, and has carried over 1,[illegible] in one day.

Walter E. Buckingham, formerly manager of sales for the National Bridge Works, has organized the Buckingham Steel Co., Inc., with offices at 50 Church St., New York. In the past has also been connected with Post & McCord, Milliken Bros and the Lackawanna Steel Co. The company will carry a line of structural steel and merchant shapes and will be prepared to fabricate material for early shipment.

The National Tube Co., Frick Bldg., Pittsburgh, Penn., has recently shown a series of industrial motion pictures at the Raleigh Hotel, Washington, D. C., and the Monticello Hotel, Norfolk, Va., illustrating the manufacture of "National" pipe. The pictures showed clearly the treatment of the ore from the time it was taken from the mine until it became the finished product.

Manufacturers receive War Orders.—Orders for army supplies of every description continue to occupy the center of the stage in many lines of domestic trade. Wire manufacturers report a good demand for their products, especially barbed wire. It is learned that an independent company in the last week was offered an order for 5[illegible] tons of this commodity for export to Russia, shipments to begin immediately, but the concern could only promise 2[illegible] tons in November, and 75[illegible] tons during December, which was unsatisfactory, the order ultimately going to the American Steel & Wire Co., a subsidiary of the United States Steel Corporation, which, it is understood, took the whole of the order, calling for approximately 15,000 tons.

The Chilean R.R. contract calling for 300,000 tons of coal a year for a period of three years, which has been offered to producers in this country, is being carefully studied. Representatives of 12 different coal companies in the Pennsylvania district, advices say, have visited the offices of the Pittsburgh Foreign Trade Commission to examine the specifications. It is admitted that there are difficulties in the way of acceptance, such as the chemical difference between Pittsburgh coal and the variety to which the Chilean railroads have been accustomed, the matter of tariffs, facilities of shipment, etc., but it is believed all these will be overcome.

The placing of the contract calling for 300,000 tons of coal in the Pittsburgh district each year would mean employment for large numbers of [illegible] during what is ordinarily a dull season. [illegible]

Prices of Engineering Materials

PRICE CHANGES AND THE BUSINESS OUTLOOK

Distinct improvement in the financial situation has marked the course of the month's events. Several weak stocks, which might have led to considerable trouble, have been cleared up. This does not, by any manner of means, indicate that money or capital is cheap, but a part of the task has been accomplished successfully. The ability of London to draw gold from the United States is evidently diminishing, and it is probable that by the first of November the balance of exchange will turn in favor of the United States. This does not mean that gold will flow back to us, but it will mean an end to the heavy outflow which has been so marked.

While it is difficult to secure capital, and the price is practically prohibitive in some instances, it is well to note that New England municipalities have been able to float long-term bond issues and the short-term notes of railways and industrial companies coming due are taken care of as they mature. Capital is undoubtedly accumulating, but it is not available for new construction. Numerous instances are found where contractors have taken bonds in payment for their work in lieu of the possibility of the work's being postponed.

Railroad construction is at the lowest point since the depression of the '70's, less money being put into permanent improvements by railways at this time, in proportion to the value of their property, than ever before. This is particularly noticeable in the purchases of new equipment and new motive power. The railway rate case has been reopened, but apparently, from newspaper accounts, there is little hope of any relief being granted.

The iron and steel industry is at a lower ebb than at any time in recent history. Export orders are few; the small amount of new construction in the United States has practically stopped the buying of steel. In fact, the output of the mills now is insufficient to take care of the replacements which should be made. As an indication of the hard position of the steel companies, it is noted that the United States Steel Corporation cut the dividend rate on its common stock to one-half of one per cent. The former rate was one and one-quarter per cent. quarterly.

The export situation is much improved. The buying of machine tools by the belligerent powers has been large; likewise, ammunition, horses, and automobiles. The purchasing agents of various foreign governments have been busily engaged during the last few days in buying automobiles and it is probable that this country will have an opportunity to furnish as much war material as it can produce.

Foreign trade is rapidly assuming normal proportions. Large shipments of foodstuffs and military supplies, as well as the belated shipments of cotton now beginning, are rapidly clearing the situation, and it is probable that foreign exchange will shortly turn in favor of the United States, particularly if European holders of American securities do not sell them in this market. This is of course impossible as long as the New York Stock Exchange remains closed.

Advertisements of contracts in which it is definitely stated that the contractor will be paid in bonds of the municipality or county, are common. This is simply another way of getting around the law prohibiting the sale of stocks or bonds at less than par.

Financial relief will probably be found for the more hard-pressed cotton planters, but the cotton states have suffered a severe setback which cannot be minimized. Their ability to go into diversified farming another year may mean much continued prosperity, but it does not buy food and clothes for this winter.

Added to the long list of dividends which have been passed since the announcement of the war, comes the reduction in the quarterly disbursement of the United States Steel Corporation. This conservative policy may not be to the liking of investors, but it is thoroughly sound, and will make for better business in the future.

The inability of railways to secure funds, as well as municipalities and industrials, during the past two or three years, is now generally recognized as being due more to the preparation of European nations for a general war, than any other one thing. While it is not much consolation to ascertain this, it is some satisfaction to find out that after all, the ills to which we have been subject were not all of our own making.

Labor is anxious to work, and at comparatively any wage. Factory help is very plentiful. Rough labor is in larger supply than at any other time in the last half dozen years.

An indication of better business in mill construction is the recent award made by the Naumkeag Steam Cotton Co., Salem, Mass., to the Turner Construction Co., 11 Broadway, New York, N. Y., for the construction of a mill and storehouse. The mill will be four stories and basement, 135x722 ft., and the storehouse five stories and basement, 82x500 ft., both of reinforced concrete.

LABOR

Conditions for the worker are more unsatisfactory than they have been since the panic of 1907, and in fact, at that time there was more hope for a better employment of labor in the near future than there is at present. It is evident that even should the railways secure higher rates, and consequently have more funds, they would apply these funds to liquidating past indebtedness before making new improvements. With the cities and municipalities restricted in their borrowing power as they are, there will be less construction than in several years. The building industry during the winter, at least, will be cut down to small proportions.

CEMENT, LIME AND BRICK

Cement—Manufacturers of cement have not had as much business as they expected; that is, strictly new business. Deliveries on old contracts, however, have kept up surprisingly well, particularly in and around New York, and one of the peculiar features of the situation is the report that the sellers of Rosendale cement have disposed of more cement this year than in several years past. Moreover, the towing business on the Hudson River has been more satisfactory than ever before. There is no cutting the price of cement, and while it is likely that a good deal of the production of the Lehigh Valley District will have to be cut down, it is significant to note likewise that the towing businesss on the Hudson River has been more active than in several years. An export demand has made itself felt, but due to the inability of bankers to provide a medium of exchange and to extend credit, there has been practically no business closed. Moreover, steamship accommodations are most unsatisfactory, particularly for this kind of material, which must go at a low rate or not at all.

In the West prices are 5c. per bbl. lower:

The quotations given below do not include the allowance of 40c. made for bags returned:

Boston	$1.32	Chicago	$1.10
Cleveland	1.25	Detroit	1.14
Duluth	1.33	Jersey City	1.06
Minneapolis	1.30	New York	1.18
Pittsburgh	1.05	St. Paul	1.30

Lime—Business is quiet, but prices are unchanged at 97c. per bbl. for state common, 200 lb. net; $1.37 for 300 lb. "Star"; $1.55 for 300 lb. finishing; $1.10 for 200 lb. finishing and $1.72 for 350 lb.

Brick—Prices are even lower than a month ago. For Hudson River common brick, delivered New York, the market is $5 to $5.25, being weak at that. Raritan River bricks are $5.25 to $5.50. Stocks appear to be accumulating in all markets.

CRUSHED STONE, SAND AND GRAVEL

Crushed Stone—The market continues without change. The quotations are absolutely nominal, 1½-in. stone selling at 90c., while ¾-in. stone sells at 95c. to $1.05. These quotations are for full cargo lots of 500 cu.yd., delivered alongside of dock, New York.

Sand and Gravel—Gravel is quoted at 90c. for 1½-in., but special gravel, which will pass subway specifications, is held at $1.15. Sand sells for 50c. per cu.yd. The above quotations are for full cargo lots of 500 cu.yd., delivered alongside of dock, New York.

In Boston, gravel sells for 35c. per cu.yd. at quarry 35 miles out, the freight rate to Boston being 40c.

IRON AND STEEL

Pig Iron—The market has never been quite as dull since the depression of 1893 as it is at present. Even the financial panic of 1907, which resulted in a cutting down of production, was more drastic, perhaps, than at present, but there was some business. Now the trade seems to be at a standstill. A few foundries in New England have bought sparingly, and some cast-iron pipemakers have been in the market. But as a general rule, prices are slowly crumbling, and even at that, no buyers come into the market. It is significant that producers in the Alabama field maintain a price of $10, but stocks are accumulating in the yards in large amounts.

Quotations for lots of 100 tons or over, ports named, are as follows: Cincinnati Southern Foundry No. 2, $13 to $13.50; Cincinnati Northern Foundry No. 2, $14.25 to $14.75; Cincinnati Northern Foundry No. 3, $14 to $14.25; New York Northern Foundry No. 1, $14.50 to $14.75; New York Northern Foundry No. 2X, $14.25 to $14.50; New York Northern Foundry No. 2 Plain, $13.75 to $14. Southern iron in the New York market is $14.25 to $14.50 for No. 2. Southern Foundry No. 2, Birmingham, $10.

Steel Rails—There is practically no new business. Some of the Western lines are buying rails, but prices are nominal.

These quotations are for lots of 500 tons and over: Standard sections of bessemer rails, $28; open-hearth rails, $30. These quotations are f.o.b. Pittsburgh; Girder rails, 30-ft. lengths, $36.40 per gross ton, and in 60-ft. lengths, $38.40, both f.o.b. New York. Other quotations, f.o.b. Pittsburgh, for large lots, are as follows: Standard sections, $1.25; 25- to 45-lb. sections, $1.15; 16- and 20-lb., $1.20; 12- and 14-lb., $1.25; 8- and 10-lb., $1.30.

Structural Shapes—Business is no worse than a month ago, except some of the shops have finished the work booked earlier and there are few new jobs coming in. Railroads work is at a standstill, but new building has not fallen off as much as many feared. Prices are more or less nominal at a reduction of $1 per ton compared with last month. The base quotation is $1.15 to $1.20, Pittsburgh, for I-beams, 2 to 15 in.; channels, 2 to 1 in., angles, 2 to 6 in., and Y's, 3 in. and over. For other sizes, $1.25 to $1.30 is demanded. For T's, $1.20 to $1.25; channels and T's under 3 in., $1.25 to $1.30; handrail T's, $1.95 to $2.10. Cutting to specified lengths is charged at the following rates: Under 3 ft. to 2 ft., inclusive, 25c. per 100 lb.; 2 ft. to 1 ft., inclusive, 50c. per 100 lb. Cutting to lengths under 1 ft., $1.55. No charges made for cutting to specified lengths over 3 ft.

Track Supplies—There is little business, but some extreme-[illegible] quotations have been made for tie-plates, one order for [illegible] tons going at around $[illegible] per ton at the mill. Railroad spikes are $1.[illegible] to $1.6[illegible]; track bolts, with square nuts, $1.[illegible] to $2, and angle bars $[illegible].

The extras on railroad spikes [illegible] as follows:

Railroad spikes	Cents
[illegible] 3½, 4 4½ and [illegible]	Extra 10
[illegible], 4 and [illegible]	Extra 20
[illegible] 3½, 4 and [illegible]	Extra 30
[illegible]	Extra 40
[illegible], 3 and 3[illegible]	Extra 60

Plates—There are very few new orders, and the outlook for [illegible] betterment in that line of trade. [illegible] plates in Pittsburgh selling at $1.[illegible]. In Chicago the price is $1.[illegible] at mill and $1.75 from store.

Pipe—An inquiry is in the market for considerable line [illegible], but the slowing down of foreign demand for oil would [illegible] that very little of this kind of construction will be undertaken in the near future. The demand for smaller sizes of pipe has fallen off in about the same proportion.

Discounts applying to the standard list are as follows:

	Black	Galvanized
[illegible]- to 3-in. steel butt welded	[illegible]	71½%
1½- to 6-in. steel lap welded	79%	70½%
7- to 12-in. steel lap welded	76%	65½%

At these discounts, the net prices of pipe per foot at Pittsburgh are as follows:

Diameter	Cents Black	Cents Galvanized	Diameter	Cents Black	Cents Galvanized
[illegible]	2.3[illegible]	[illegible]	[illegible]-in.	31.00	13.60
[illegible]	3.[illegible]	[illegible]	6-in.	42.00	[illegible]6.80
[illegible]	4.6[illegible]	6.[illegible]	7-in.	57.00	[illegible]8.00
[illegible]	[illegible]	7.[illegible]	8-in.	60.00	[illegible]6.00
[illegible]	[illegible]	1[illegible]	9-in.	[illegible].50	$1.19
[illegible]	[illegible]	1[illegible]	10-in.	[illegible]9.00	$1.42
[illegible]	16.[illegible]	[illegible]	11-in.	$1.12	$1.60
[illegible]	[illegible]	[illegible]	12-in.	$1.22	$1.74

Sheets—Prices are from $1 to $2 per ton lower. The mills are operating to about [illegible] of capacity. Prices are as follows:

The following quotations are for large lots of sheets in Pittsburgh, and small lots from store New York:

	Cents per Pound, Large lots Pittsburgh, Black	Galv.	Warehouse delivery New York, Black	Galv.
No. 1[illegible]	1.6[illegible]	1.[illegible]0	2.20

[illegible]	[illegible]
[illegible]	[illegible]

Old Material—The market has seldom been in as unsatisfactory a state as at present. Prices are lower than before in years, considering the quotations for new material, and reductions of 50c. and 75c. a ton have been made below the extremely low prices ruling about the first of August. In New York, there is practically no business, and the quotations given below are largely nominal. They are as follows, per gross ton, delivered in New York:

	Per Net Ton
Heavy-melting steel scrap	$7.25 to $7.50
Pipes and flues	7.25 to 7.50
No. 1 railroad wrought	9.50 to 10.00
Stove plate	7.00 to 7.50
Malleable cast	7.25 to 7.75
No. 1 machinery cast	9.50 to 10.00
No. 1 yard wrought long	8.00 to 8.50
Wrought turnings	5.25 to 5.75

In Chicago, the market is not quite as unsatisfactory. Some sales have been made by the railways, but prices in general are so low that no effort is being made to ship scrap except where storage yards are too congested to permit of any further accumulation. It is notable that the consumers and buyers of scrap are purchasing some on a speculative basis. Quotations are as follows:

	Per Gross Ton
Heavy-melting steel scrap	$8.50 to $8.75
	Per net ton
No. 1 railroad wrought	$7.75 to $8.00
No. 2 railroad wrought	7.25 to 7.[illegible]0
No. 1 cast scrap	9.[illegible] to 9.2[illegible]
Pipes and flues	5.5[illegible] to [illegible]
Agricultural malleable	7.50 to 7.75
Railroad malleable	8.00 to 8.25

In Pittsburgh, heavy-smelting steel scrap has sold as low as $10.50. The Pennsylvania R.R. and the Baltimore & Ohio R.R. both are putting out lists indicating that they have more scrap for sale than usual at this time of year. Reductions in Pittsburgh are not as drastic as in other parts of the country. Quotations per gross ton are as follows:

Heavy-melting steel scrap	$10.50 to $10.75
Re-rolling rails	12.00 to 12.25
No. 1 foundry cast	11.50 to 11.75
Old car wheels	11.25 to 11.50
Machine shop turnings	6.75 to 7.25
Railroad malleable	10.50 to 10.75

Chain—Prices are steady and without change, as follows: These prices are per 100 lb., f.o.b., Pittsburgh:

$\frac{3}{16}$ in.	$7.50	½ and [illegible] in.	$3.[illegible]
¼ in.	4.95	⅝ and [illegible] in.	2.[illegible]
[illegible] in.	3.95	¾ and [illegible] in.	2.90
⅜ in.	3.40	⅞ and [illegible] in.	2.70
$\frac{7}{16}$ in.	3.20	1 to 1¼ in.	2.60

EXTRAS TO ABOVE LIST PER 100 POUNDS

	For BB	For BBB
$\frac{3}{16}$-in. and ¼-in.	$1.50	$2.00
$\frac{5}{16}$-in. and larger	1.25	1.75

REINFORCING MATERIALS

Bars, Concrete Reinforcing—The demand is very light and no extreme quotations have been named in New York. It is probable that some concessions would be made from the following prices which are repeated from last month:

Size	Cents per pound, Mill shipments Pittsburgh	Warehouse Pittsburgh	Delivered from warehouse New York
[illegible]-in. and larger	1.[illegible]	1.[illegible]	2.3[illegible]
⅝-in.	1.2[illegible]	1.70	2.3[illegible]
½-in.	1.[illegible]	2.[illegible]	2.35
[illegible]-in.	1.[illegible]	2.1[illegible]	2.[illegible]
¼-in.	1.[illegible]	2.3[illegible]	2.[illegible]

Triangle Mesh—Quotations are without change as follows:

PRICE PER 100 SQ. FT.

Style No.	Cross sec. area per ft. width	Plain material, Carload lots	Plain material, Less than car lots and over 1[illegible] sq.ft.	Galvanized, Carload lots	Galvanized, Less than car lots and over 1[illegible] sq.ft.

*This material is made in regular widths of 18, 22, 26, 30 [illegible] Standard lengths in rolls are [illegible] and [illegible] ft.

METALS

Copper—It is becoming more and more evident day by day that the price of copper and of products made of this metal must go to new levels. With the market almost as dull as possible, with scarcely any business of quantity, comes the announcement that the British Government has put copper on the contraband list, with a view to shutting off supplies which go to Germany by way of Holland and Denmark. This is a serious blow to the copper industry in the United States, for Germany would continue to take much metal. The dullness has had little effect on prices. Sales have been at 11¼ to 11½c., delivered in New York. The unevenness in the market is seen by quotations of 12 to 12½c. for copper wire in carload lots at the mill, 16½c. for copper sheet. In Germany, electrolytic copper sells at about 20c.

Tin—The price of tin dropped below the 30c. level early in the month, but later advanced to 31¾c., when announcement was made that a ship carrying 1000 tons of tin had been sunk. When it is realized that 1000 tons of tin is about 8% of the visible supply all over the world, the importance of such a loss can be seen. But even this had little effect in keeping the price up, for by the end of October it had again dropped below 30c. Quotations range from 29½ to 30½c. for large lots, depending on the nature of the transaction.

Lead—The market is again easier, sales in New York being made at 3.50c., and the St. Louis market quoted at 3.35 to 3.40c.

Spelter—The market has declined again, and 5.05 to 5.15c. is demanded in New York, while in St. Louis, prime Western brands of spelter can be had at 4.95c.

Aluminum—The metal is quiet and prices are easier, 18 to 19c. per lb. for No. 1 ingot in large lots.

Antimony—All the antimony used in the United States is imported. At the outbreak of the war, there were large stocks on hand in this country. At that time, prices shot up rapidly, but later declined. Antimony is now being shipped abroad. Quotations are much unsettled, ordinary brands selling at 14 to 15c., and Cookson's at 17½ to 18c.

Miscellaneous Metals—The following quotations are per lb. for small lots, but they may be shaded for desirable orders:

Bismuth	$3.75 to $4.00
Brass tubes, iron-pipe sizes:	
½-in.	.16
¾- to 3-in.	.15
3½-in.	.15
4-in.	.16
Brass rods	.13¾
Brass sheets	.14
Solder, half and half guaranteed	.21
Zinc sheets	9 to 9½
Copper sheets, base	.16½
Pig tin (five-ton lots, cash)	.30

Old Metals—The following quotations are for small lots delivered at buyer's warehouse:

	Cents
Copper, heavy and crucible	10.00
Copper, heavy and wire	9.50
Copper, light and bottoms	8.50
Brass, heavy	7.25
Brass, light	5.25
Heavy machine composition	8.75
Composition turnings	8.00
Lead, heavy	3.00
Lead, tea	2.75
Zinc scrap	3.25

MILL SUPPLIES

Belting—The market is without change. Discounts on leather belting are as follows: Extra heavy, 50@50 and 5%; heavy, 50 and 10@60%; medium, 60 and 5@65%; standard, 60 and 10@60, 10 and 10%. The discounts applying to rubber belting are as follows: Standard, 60 and 10@60, 10 and 10%; best grades, 50@50 and 10%. The net prices per foot of rubber belting given below are figured at the discount of 50 and 10%.

RUBBER BELTING, NET PRICE PER FOOT

	2-Ply	4-Ply	6-Ply	8-Ply
3	$0.10	$0.14	$0.21	....
4	.13	.19	.28	....
5	.16	.23	.35	....
6	.19	.28	.42	$0.56

56	2.32	3.28	4.91	6.55
60	2.50	3.53	5.29	7.06

Lubricating Oils—For delivery in New York in 5-bbl. lots, prices are as follows:

	Cents per gal.
*Cylinder, dark	19@23
*Cylinder, steam refined	13@19
Neutral oils, filtered:	
Stainless, white, 32 to 34 gravity	26@28
Lemon, 33 to 34 gravity	16@16
Dark, 32 gravity	14@16
Crank case oil	14@16

*Prices are according to test.

Shafting—The only consumers of importance are the automobile makers. The discount for large lots is 66% from list. At this discount, the net prices per foot of cold-drawn steel shafting in Pittsburgh are as follows:

Diameter in inches	Cents per foot	Diameter in inches	Cents per foot
¾	2.80	2	23.00
1	4.97	2¼	23.00
1¼	7.72	2½	28.36
1⅜	9.44	2¾	34.31
1½	10.20	3	41.90
1⅝	11.97	3½	61.04
1¾	13.87	4	86.70
1⅞	15.96		

CLAY PRODUCTS

Flue Lining—Discounts are unchanged at 83% from list. At this discount, the net prices per foot for New York delivery are as follows:

	Weight in lb.	Price per ft.		Weight in lb.	Price per ft.
4½x8½-in.	14	$0.06	8½x18-in.	45	$0.152
4½x13-in.	20	0.076	13x13-in.	45	0.145
7½x7½-in.	15	0.068	13x18-in.	57	0.22
8½x8½-in.	18	0.076	18x18-in.	75	0.34
8½x13-in.	28	0.11			

Sewer Pipe—In the smaller sizes, there has been a slight drop in price, 3- to 24-in. being quoted at a discount of 82%. In the larger sizes, discounts remain unchanged, as follows: 27- and 30-in., 70%; 33- and 36-in., 65%. At these discounts, the net prices per foot in New York are as follows:

Size		Size	
3-in.	$0.045	18-in.	$0.342
4-in.	0.045	20-in.	0.405
5-in.	0.072	22-in.	0.54
6-in.	0.072	24-in.	0.585
8-in.	0.099	27-in.	1.35
10-in.	0.144	30-in.	1.65
12-in.	0.18	33-in.	2.20
15-in.	0.243	36-in.	2.45

Railway Ties—Business during the month has been exceedingly dull. Standard sizes of yellow-pine cross ties are quoted as follows: 7x9 in. by 8 ft. 6 in., 76c.; 6x8 in. by 8 ft., 64c.

MISCELLANEOUS

Wood Preservatives—Special preservatives for lumber are sold at the following prices per gallon delivered to points in this country: Pentin, a flame proof preservative, 80c. per gal.: Creolin, a creosote, flame proof, 45c. per gal.; Maretin, a preservative for marine use, 60c. per gal.

Lighterage Limits—The free delivery or "Lighterage Limits" in New York City are as follows: In Manhattan, from a point opposite the Fort Lee ferry, south along the Hudson River around the Battery and north along the East and Harlem Rivers to the Jerome Ave. Bridge at 155th St. In New Jersey, south from Fort Lee ferry to Bayonne City, points on the north and east shores at Staten Island, between Bridge Creek (Arlington) and Clifton, both inclusive, and including Elm Park, Erastina and Shooters Island. In Brooklyn, from 69th St., Bay Ridge, north to Pot Cove, Astoria, Long Island City.

Asbestos—Asbestos building felt and sheathing in less than ton lots is 3½c. per lb. for the light, weighing from 6 to 30 lb. per 100 sq.ft.; 4c. per lb. is charged for the heavy, weighing from 45 to 56 lb. per sq.ft.

Millboard is made in standard sheets, 40x40 in., and 41x40 from 2 to 27 lb. per sheet. The net price in 100-lb. lots is 5c. per lb.

Asbestos wood, used for fireproofing, ventilators and smoke jacks, comes in sheets, 36x48 in., 42x48 in. and 42x96 in. The prices per sheet, f.o.b. factory, in New England, aro as follows:

Thickness	Weight, pounds	Price	Thickness	Weight, pounds	Price
⅛-in.	1	$0.08	⅝-in.	5	$0.40
3/16-in.	1½	0.12	¾-in.	6	0.44
¼-in.	2	0.16	⅞-in.	7	0.48
5/16-in.	2½	0.20	1-in.	8	0.52
⅜-in.	3	0.28	1¼-in.	10	0.56
7/16-in.	3½	0.28	1½-in.	12	0.64
½-in.	4	0.32	1¾-in.	16	0.72
9/16-in.	4½	0.36	2-in.	16	0.80

Asbestos sheathing, corrugated, sells at 15c., per sq.ft. f.o.b. mill eastern Pennsylvania.

Telegraph Wire—The demand for telegraph wire has been fair. For lots of fair size, the wire measured in Birmingham wire gage, prices are as follows: "Extra Best," Nos. 6 to 9, 4⅜c.; Nos. 10 and 11, 4½c.; No. 12, 4⅝c.; No. 14, 5⅛c.; "Best Best" Nos. 6 to 9, 3½c.; Nos. 10 and 11, 3⅜c.; No. 12, 3½c.; No. 14, 4c. Actual freight is allowed from Trenton, N. J., where it does not exceed 25c. per 100 lb.

Explosives—Dynamite of the kind generally used by contractors is approximately 11@13c. per lb., f.o.b. factory, in ton lots. Blasting powder, classified as "soda" grade, is sold at $1.20@1.40 per keg of 25 lb. in lots of 10,000 lb.

Exploders, per hundred, are sold at the following prices: 4 ft., $3.60; 6 ft., $4 10; 8 ft., $1 60; 10 ft., $5.10; 12 ft., $5.60; 16 ft., $6.60; 20 ft., $7.50; 25 ft., $9.40; 30 ft., $12; 36 ft., $14.60.

Caps in lots of 10,000 are $7@8 per thousand.

Blasting machines for 10 holes are $12; 25 holes, $20; 50 holes, $40; 100 holes, $60.

Chain Belting—Prices continue unchanged. Quotations are as follows: From 3 hp. to 10 hp., 30-in. centers complete with two sprockets, $7@8 per horsepower. From 10 hp. to 25 hp., 36-in. centers complete, $5@6 per horsepower. For 25 hp. to 100 hp., 56-in. centers complete, $1@5 per horsepower. From 100 hp. to 500 hp., 72-in. centers complete, $3@4 per horsepower.

Construction News

★ [illegible] work advertised in ENGINEERING NEWS
✦ [illegible] contract awarded. The names of bidders awarded contracts are set in CAPITALS

RAILWAYS

✦Kentucky—Louisville & Nashville R R—This company is [illegible] 2½ miles of track at Hatfield, Ky

Illinois—Quincy & Hamilton Ry—This company has been incorporated to construct a railway from Quincy, Ill., to Hamilton, Ill., about [illegible] miles. The incorporators are C S. Carsallen, C D Warren, Toronto, Ont, C H Petsche, St Paul, Minn., F D [illegible], Chicago, Ill., E W Wood and R. W [illegible], Hamilton, Ill

✦Wisconsin—Chicago & Northwestern R R—This company has awarded a contract to the CLEARY, WHITE & DUFFY CO., for the construction of the Kingston-Crandon line in Wisconsin.

Texas—Uvalde & Northern R R—This company is making arrangements to resume work on the construction of its line from Uvalde to Leahy, Tex., about 30 miles. F H Dillon, [illegible], Tex., is Ch Engr

Kansas City, Mexico & Orient Ry—According to press reports plans are being prepared by this company for the extension of its line from Fort Stockton to Del Rio, Tex. R. [illegible], San Angelo, Tex., is Ch Engr

John D Kinney, Austin, Tex., is interested in the construction of a railway from Austin to Big Springs, Tex., about 2[illegible] miles

Idaho—Oregon Short Line R R—This company contemplates the purchase of the Gilmore & Pittsburg Ry., and extending the line from Salmon, Idaho, to Grangeville, Idaho. Carl Stradley, Salt Lake City, Utah, is Ch Engr.

+Bay City, Mich.—The contract for the construction of a three-story, [illegible]-ft. Y. M. C. A. building, has been awarded to [illegible] BROS., East Jordan. Estimated cost, $[illegible]. Noted Aug. [illegible].

Detroit, Mich.—Plans are being prepared by Smith, Hinchman & Grylls, [illegible] Washington Arcade Bldg., for the construction of a six-story and basement, [illegible]-ft. court house, estimated to cost $[illegible]. George H. Fenkel, City Hall, [illegible].

Chicago, Ill.—The Chicago Nursery and Half Orphan Asylum contemplates constructing an addition at [illegible] and North Francisco Ave., to be known as the Charles A. Chapin Memorial. Estimated cost, $[illegible].

Chicago, Ill.—The directors of the John Crerar Library, recently incorporated, are contemplating the construction of a public library at East Randolph St. and Michigan Ave. Estimated cost, $1,[illegible].

Hamtramck, Mich.—Van Leyen & Schilling, Archs., 111[illegible] Union Trust Bldg., Detroit, are preparing plans for the construction of a one-story, [illegible]-ft. church, for the St. Florian Parish. Estimated cost, $[illegible].

+Chicago, Ill.—Contracts for the construction of an armory on West Washington Blvd. have been awarded as follows: [illegible], construction of the armory, $[illegible]; WHITE CITY ELECTRIC CO., electrical work, $[illegible]; HANLEY [illegible] CO., heating and ventilation, $[illegible]. Noted Oct. 1.

Springfield, Ill.—[illegible], Arch., is preparing plans for the construction of a [illegible]-story, [illegible]-ft. apartment [illegible] at [illegible] St., for Mrs. S. [illegible]. Estimated cost, $[illegible].

Milwaukee, Wis.—A. D. Koch, Arch., is preparing plans for the construction of a 10-story building on West Water St., for the [illegible] Investment Co. Estimated cost, $[illegible].

Superior, Wis.—Shurick and Solheim, Archs., Duluth, Minn., are preparing plans for the construction of a three-story brick building, to cost $40,000.

✚**Burlington, Iowa**—The contract for the construction of two schools for the Board of Education has been awarded to J. H. HUNZINGER, Iowa City. The estimated cost is $79,238.

Minneapolis, Minn.—The First M. E. Church contemplates constructing a six-story dormitory for the University of Minnesota. Estimated cost, $90,000.

Minneapolis, Minn.—W. B. Ittner, Arch., St. Louis, Mo., and Stebbins & Haxly, Archs. for the Board of Education, have prepared plans for the construction of three grade schools. Estimated cost, $200,000. Noted Dec. 25, 1913.

Eureka Lake (Ogden post office), **Kan.**—The I. O. O. F. contemplates constructing a building estimated to cost $50,000. J. E. Brooks, Sedan, is Grand Master.

Salt Lake City, Utah—The Board of Education contemplates constructing a school on Tenth St., South, at an estimated cost of $75,000.

La Grande, Wash.—Houghtaling & Dougan, Archs., Henry Bldg., Portland, Ore., are preparing plans for the construction of a parochial school. The estimated cost is $75,000.

Seattle, Wash.—P. Davis contemplates constructing a four-story department house, at Terry Ave. and Jefferson St., to cost $60,000.

West Seattle (Seattle post office), **Wash.**—The School Board of District No. 1 contemplates constructing a high school, to cost about $200,000.

Portland, Ore.—Bids will be received soon by the School Board, for the construction of the Shattuck School, on Broadway and College St. Estimated cost, $160,000.

✚**Alhambra, Calif.**—The contract for the construction of three high schools has been awarded to JOHN SIMPSON CO., Baker-Detwiler Bldg., Los Angeles. The estimated cost is $66,435. Noted Oct. 1.

Los Angeles, Calif.—Bids will be received about Nov. 15 for the construction of a church, 100x225 ft., at Adams and Figueroa St., for the St. Vincent's Parish. Estimated cost, $200,000.

Sacramento, Calif.—The city authorities propose to build a jail and police court at Sixth and H St., to cost about $225,000.

✚**San Francisco, Calif.**—The contract for the construction of the foundation of the Firemen's Fund Insurance Co. at Lansome and California St. has been awarded to the McARTHUR CONCRETE PILE & FOUNDATION CO, 11 Pine St., New York, N. Y. Lewis P. Hobart is the Arch.

Santa Monica, Calif.—The Pacific Telephone & Telegraph Co. have prepared plans for the construction of a three-story and basement central station at Fourth St. and Central Ave. The estimated cost is $50,000. Bids will be received soon by the engineering department at San Francisco.

Ventura, Calif.—Bids for the construction of the county hospital were rejected by the County Commissioners and new bids will be received about Jan. 1, 1915. Noted Sept. 24 and Oct. 1.

St. Thomas, Ont.—The Roman Catholics of St. Thomas contemplate constructing a hospital near Kettle Creek. Estimated cost, $100,000.

✚**Toronto, Ont.**—The contract for the construction of the six-story and basement, 63x83-ft. office building, on University Ave., for the Providencial Hydro-electric Commission, has been awarded to WITCHALL & SON. Noted Oct 1.

✚**New Westminister, B. C.**—The contract for the construction of the three-story addition to the court house has been awarded to the DOMINION CONSTRUCTION CO., Vancouver, B. C., at an estimated cost of $56,000. Noted July 30.

Point Grey, B. C.—Bids will be received soon by the School Board for the construction of a school, to cost about $50,000. R. W. Twizell is the Arch.

BARGE CANAL WORK, ALBANY, N. Y.

Contract No. 14-B

Bids were received, Oct. 27, by Duncan W. Peck, State Supt., Pub. Wks., for Contract No. 14-B, closing openings in dam in the Mohawk River, removing bridge and aqueduct at Crescent and repairing dam at Vischers Ferry, from (A) Drilling Contracting Co., Amsterdam, N. Y.; (B) Eastover Construction Co., Utica, N. Y.; (C) Brown & Lowe, Schenectady, N. Y.; (D) Mason Hilton Co., 17 Battery Pl., New York, N. Y.; (E) E. W. Foley Contracting Corporation, New York, N. Y.; (F) Flood & Van Wirt Co., Hudson Falls, N. Y.; (G) State Highway Construction Co., Beacon, N. Y.; (H) Larkin & Sangster; Seneca Falls, N. Y.; (I) John W. Davitt, Albany, N. Y.; (J) L. B. Cleveland, Watertown, N. Y. The item bids were as follows:

	A	B	C	D	E	F	G	H	I	J

Safeguarding United States Investments—The precipitous decline in the price of securities listed on the New York Stock Exchange during the last days of July was due to the sales by foreign holders. It is estimated that our securities held abroad have an aggregate value of $3,000,000,000 to $5,000,000,000. To pay for these in gold would be impossible, to pay for them in foodstuffs and merchandise would entail great sacrifices, to pay for them in extended credits would entail the least disturbance to business here, and would, moreover, be most satisfactory to foreign holders. In a recent article in the "Journal of Commerce," which is reprinted in part, the opinion is expressed that the latter course may be worked out.

"The attitude of the administration toward the placing of the so called credit loans is practically a reply to the representations as to the situation that have been made to it. At the outbreak of the war, the view was taken that no foreign loans ought to be placed in the United States because such action would be a violation of neutrality. This position led to the practical vetoing of a large French loan that was then being negotiated. The answer of foreigners was in substance that in that event they would simply call for the liquidation of American securities which their citizens were holding, and would use the cash proceeds in buying supplies. This proposition has practically led to a reconsideration of the problem. If foreign governments are allowed to place a sort of loan in the United States in the shape of a credit with American bankers, probably to be funded at a more convenient season into longer term securities, the consequence of such action is to obviate the necessity of placing such loans in their own territory. Citizens who would otherwise be disposed to take up the issues are not called upon to do so, and consequently the selling of American securities in order to realize funds for war operations is checked. The foreigners get American capital, but they get it on new terms as to interest and without the necessity of marking down their American issues.

"The United States uses its exports as a means of liquidating its current trade balance and of meeting such demands for the return of actually invested capital as may be made. The outcome is an adjustment of international relationships which obviates the further draining away of gold from the United States if the plan works smoothly. Assuming that it is put into effect with full success, the consequence of its operation would naturally be the readjustment of conditions and the probable early opening of the exchanges. This does not mean of course that such opening is necessarily to occur in the immediate future, although it is believed that healthier conditions would result if such opening were to occur. Even Southern cotton interests now seem to desire the reopening of the Cotton Exchange. But it does mean that the foundation of an accommodation looking in that direction will have been laid.

"The possibility of settling matters in this way was not opened until the question what should be actually regarded as contraband was tentatively settled, and such a settlement has been one of the objects most earnestly sought by the administration for a good while past. The adjustment on cotton is one of the features of the working out of the problem, and similar action in the way of determining exactly what export embargoes shall be enforced is in process of being planned. It is believed that complete revival of the export trade will be due to three conditions, as follows: (1) growing dependence of foreign nations upon the supplies of food and goods in the United States, (2) settlement of outstanding questions regarding the treatment to be accorded to cargoes shipped in neutral vessels and to vessels in general under the American flag, (3) working out of a system of loans under which all nations will be able to make their bargains for American goods and pay for them in credits, such credits of course, being charged off against obligations of the United States which would otherwise be likely to be liquidated by the sale of securities and the demand for cash in payment therefor.

"Students of international trade believe that while the present active export movement will go on and will tend to keep our domestic establishments busy manufacturing and shipping goods abroad for a good while in order to make up for the lowered productivity of the nations that are at war, and while this will result in corresponding profits, inasmuch as the prices for the goods will necessarily be high and the return to producers in proportion, there will be a perceptible check to the further extension of enterprise in this country. This will result from the fact that the profits of the business we shall be doing will be simply used in liquidating obligations due abroad or in taking up foreign obligations which call merely for payment in the future.

"There will be no foreign capital seeking investment on favorable terms in the United States. Indeed, [illegible]

[illegible]

New Haven Indictments—In the United States District Court, on Nov. 1, indictments were handed down charging 21 of the directorate with conspiracy of the Sherman anti-trust law.

At the request of the government attorney, the court ordered the issuance of bench warrants for William Rockefeller, George Macculloch Miller, Charles F. Brooker, William Skinner, D. Newton Barney, Robert W. Taft, James S. Elton, James S. Hemmingway, Lewis Cass Ledyard, Charles M. Pratt, A. Heaton Robertson, Frederick F. Brewster, Henry K. McHarg, Edward D. Robbins, formerly general counsel of the railroad, Alexander Cochrane, John L. Billard, George F. Baker, Thomas de Witt Cuyler, Theodore N. Vail, Edward Milligan and Francis T. Maxwell.

MUNICIPAL BOND SALES INCREASE

While Still below normal, municipal bond sales made a far better showing in October than in September. The sales for October aggregated $15,755,700 according to the "Financial Chronicle."

The following table, compiled by that journal shows the output of permanent municipal bond issues for the month of October and the ten months in previous years.

	Month of October	For the ten months
1914	$15,755,700	$396,794,664
1913	23,321,444	317,431,159
1912	27,659,990	343,571,920
1911	26,169,621	341,093,191
1910	27,437,207	254,975,246
1909	14,377,636	266,767,267
1908	14,575,529	257,219,946
1907	9,793,378	209,516,322
1906	14,519,277	167,971,622
1905	7,915,406	148,937,223
1904	17,299,985	208,221,642
1903	12,186,885	123,942,674
1902	8,488,424	122,167,279
1901	9,779,197	108,103,196
1900	16,421,185	112,615,626
1899	9,314,986	104,341,291
1898	4,966,667	88,877,166
1897	6,672,393	113,279,776
1896	4,699,463	65,917,679
1895	6,697,812	95,958,928
1894	6,665,617	99,147,371
1893	11,919,373	52,613,939
1892	11,766,428	73,377,284

Gain in Automobiles—Statistics compiled by "Automobile" as of Oct. 1, covering the official registration of automobiles in the several states, indicate that there were on that date not less than 1,788,253 cars of all types registered, as against 1,584,282 on July 1, a gain of 203,703 in three months. These figures, however, include a considerable proportion of duplication of registration, and, applying certain deductions, the probable total number of cars actually in use is placed at 1,735,369. These were divided by states as follows:

New York	169,475	Virginia	13,938
Illinois	126,681	Maine	13,294
Pennsylvania	123,773	South Carolina	[illegible]
Ohio	119,950	North Carolina	13,460
California	116,661	Rhode Island	12,2[illegible]
Iowa	100,183	Florida	10,661
Texas	[illegible]	New Hampshire	9,079
Michigan	74,777	Montana	8,961
Massachusetts	71,996	Alabama	7,950
Minnesota	66,974	West Virginia	[illegible]
Indiana	66,700	Vermont	[illegible]
Nebraska	62,129	Utah	[illegible]
New Jersey	[illegible]	Oklahoma	[illegible]
Wisconsin	[illegible]	Arkansas	5,415
Missouri	[illegible]	Kentucky	[illegible]
Kansas	[illegible]	Arizona	[illegible]
Washington	[illegible]	Idaho	[illegible]
Connecticut	[illegible]	New Mexico	[illegible]
Georgia	[illegible]	Delaware	[illegible]
South Dakota	[illegible]	Louisiana	[illegible]
Maryland	[illegible]	Wyoming	[illegible]
Tennessee	[illegible]	Mississippi	[illegible]
District of Columbia	[illegible]	Nevada	[illegible]
Colorado	[illegible]		
North Dakota	[illegible]	Total	1,735,369
Oregon	13,984		

Division as to gas and electric power and commercial and passenger cars is not uniformly stated by the several states, but as far as the returns show the division was as follows:

State	Total registrations	—Gasoline— Passenger	Commercial	—Electric— Passenger	Commercial
Alabama	[illegible]	[illegible]	[illegible]	150	[illegible]
Arizona	4,463	[illegible]	114	16	[illegible]
Connecticut	[illegible]	[illegible]	2,619	120	[illegible]

IMPROVEMENT IN BUILDING OPERATIONS

There has been more activity in the building trade than in several months, notably the gain of October over September. While there is a loss for the month of October over the corresponding month of last year, it is not as great as the one in September over last year. In 20 cities in the Eastern States there was a total cost of new buildings from plans filed in October of $15,780,695, compared with $17,676,641 for the month of October, 1913, or a loss of 10%, whereas the loss in the same cities for September was 39%. The estimated cost of new buildings for the first ten months of 1914 was $234,240,624, compared with $244,916,477 of last year, or a loss of 5%.

In 22 cities in the Middle West, the loss was 24% for October, or $16,820,300, compared with $22,293,612 for October of last year. This is about the same percentage of loss as in September. There is a gain of 2% for the first ten months of this year over last, expressed in dollars it is $215,503,529 for 1914 and $210,754,757 for 1913.

In nine Southern cities there is a loss of only 25% for October. This is a gain of 16% over last month, for the loss for September was 41%. The total for October is $1,776,372, compared with $2,342,976 for last year.

Only five cities in the Pacific Coast States have been heard from, but the loss is small, both in the figures for October and for the first ten months of the year; however, there is a gain over last month. On the whole, the building figures for October from the entire country show an improvement.

RAILWAYS

✚**West Virginia**—The Big Bend Coal Co. has awarded a contract to RYAN & CO., Lexington, Ky., for constructing a 2½ railway around Hatfield Curve, near Matewan, W. Va.

✚Norfolk & Western Ry.—J. J. BOXLEY & SON, Roanoke, Va., has been awarded the contract by this company for the construction of a five-mile line from the Dry Fork branch near Berwind, W. Va.

✚**Illinois**—Illinois Central R.R.—This company has awarded the contract for the construction of a 2.5 mile spur line from Oak Ridge, Ill., to Mine No. 3 of the Peabody Coal Co. in Williamson County, Ill., to W. H. WINDHAM, Centralia, Ill.

Wisconsin—Superior & Southeastern Ry.—Plans are being considered by this company for the extension of its line from New Richmond, Wis., into Bayfield County. J. E. Glover, New Richmond, is Pres.

South Dakota—Sioux Falls & Western Ry.—Preliminary arrangements are being made by this company for the construction of a line from Sioux Falls to Wheeler, S. D. George Schlosser, Sioux Falls, is interested.

✚**Arkansas**—The A. L. Clark Lumber Co. has awarded a contract to J. N. GEORGE & SON for constructing a six mile railway at Glenwood, Ark.

✚McCrory & Beedeville Southern Ry.—This company has awarded a contract to W. A. COLE, McCrory, Ark., for taking up eight miles of its railway in Arkansas.

Texas—Kansas City, Mexico & Orient R.R.—It is announced that construction will be resumed soon on the branch line of this company between San Antonio and Del Rio, Tex. The road will be about 200 miles long. R. P. Parker, San Angelo, Tex., is Ch. Engr. Noted Nov. 5.

New Mexico—Atchison, Topeka & Santa Fe Ry.—This company plans to purchase the line of the New Mexico Central R.R. and extending it from Torrance to Roswell, N. M., about 100 miles. F. M. Bisbee, Amarillo, Tex., is Ch. Engr., Western lines.

Arizona—San Diego & Arizona Ry.—See item under California.

California—San Diego & Arizona Ry.—This company will issue $25,000,000 bonds for further construction work. About $15,000,000 will be spent in finishing the line to El Centro, Calif., and $10,000,000 for constructing the line to Yuma, Ariz. George Holmes, San Diego, Calif., is Pur. Agt.

ELECTRIC RAILWAYS

Boston, Mass.—The Boston Elevated Ry. Co. is preparing plans for the extension of its line from its present terminus on Playstead Rd. to Madison St. Edward Mahler, Boston, is Pur. Agt.

New Britain, Conn.—The Connecticut Co. is preparing plans for double tracking several of its lines in New Britain. F. L. Beardsley, New Britain, is Supt.

Camden, N. J.—The Public Service Ry. Co. plans the improvement of its Haddon Heights and Clementon branch lines, to cost about $50,000. R. E. Danforth, Newark, is Gen. Mgr.

Paterson, N. J.—The Public Service Ry. Co. has submitted a detailed statement to the Board of Public Utility Commissioners estimating the cost of the proposed track elevation for its local lines over the Erie R.R. right of way, at $62,278. R. E. Danforth, Newark, is Gen. Mgr.

Point Marion, Penn.—See item under Morgantown, W. Va.

West Newton, Penn.—The West Penn Traction Co. plans to start work soon on the construction of its proposed electric railway from West Newton and Hunker Station. W. E. Moore, First National Bank Bldg., Pittsburgh, is Vice-Pres. and Gen. Mgr.

Charlottesville, Va.—Plans are being prepared by the Charlottesville Interurban Ry. Co. for the construction of an electric railway from Charlottesville to Alberne, about 15 miles. Walter Washabaugh, Charlottesville, is Ch. Engr.

✚**Morgantown, W. Va.**—The Morgantown Interurban Ry. Co. has awarded the contract for constructing its line from Morgantown, W. Va., to Point Marion, Penn., about nine miles, to JOSEPH VANDERGRIFT. Noted May 29.

Gadsden, Ala.—According to press reports preliminary surveys are being made by C. L. March, Gadsden, for the construction of an interurban electric railway from Gadsden to Center Noted Oct 15.

Huntsville, Ala.—The Huntsville & Florence [illegible] Ry. Co. is making preliminary arrangements for the construction of an electric railway from Huntsville to Florence. [illegible] W. [illegible], Huntsville, is interested. Noted Oct. 1.

Rochelle, Ill.—The Lee County Central Electric Ry. Co. has been granted permission to extend its electric railway from [illegible] to Rochelle. F. R. [illegible], [illegible], Ill., is Gen. Supt.

Bryan, Tex.—L. M. Hewett and associates are preparing to construct an interurban electric line to connect Bryan, [illegible], [illegible] and [illegible]. From [illegible] the proposed road will run north to Bryan, forming a loop of about [illegible] miles. [illegible] of the project are being [illegible] along the route.

Castroville, Tex.—The citizens of Castroville, La Coste, Rio Medina and [illegible] have raised a bonus of $[illegible],000 to aid the San Antonio, [illegible] & [illegible] Interurban Ry. Co. in constructing its line from San Antonio to the Medina dam. [illegible] Miller, [illegible] Bldg., San Antonio, is Gen. Mgr. Noted Sept. [illegible].

Dayton, Tex.—Plans are being prepared for the construction of an electric railway to connect Dayton, Houston, Beaumont and Liberty.

Mexia, Tex.—Preliminary arrangements are being made for the construction of an electric railway in Mexia. The Commercial Club is interested. Noted Oct. [illegible].

Easton, Calif.—The Easton Electric Ry. Co. will extend its line from Easton to [illegible] Hills.

Los Angeles, Calif.—The City Council will soon call for bids for a franchise to extend the electric railway on Evergreen Ave., Wabash Ave., [illegible] St. and Marengo Ave. in [illegible] Heights.

The Pacific Electric Ry. Co. has announced that construction will be started soon on the extension of the electric railway from Riverside to Corona. The cost will be about $[illegible]. J. M. Miller, Los Angeles, is Gen. Mgr.

Montreal, Que.—The Montreal & Southern Counties Ry. Co. has been granted permission by the City Council to connect its lines with the tracks of the Grand Trunk Ry. Co. and the Montreal Tramways Co. in Montreal. W. R. Powell, Montreal, is Vice-Pres. and Gen. Mgr.

Sudbury, Ont.—The Sudbury-Copper Cliff Suburban Electric Ry. Co. has completed surveys for the construction of an electric railway from Sudbury to Copper Cliff, about five miles. J. H. [illegible], Sudbury, is Pres. Noted Feb. 12.

Toronto, Ont.—The city is making arrangements with the Toronto Ry. Co. for the reconstruction of the line on College St. from [illegible] Ave. to Lansdowne Ave.

Winnipeg, Man.—Plans are being prepared by the Winnipeg Electric Ry. Co. for the construction of an electric railway in the northwestern section of Winnipeg. Wilford Phillips, Winnipeg, is Gen. Mgr. and Ch. Engr.

LIGHT, HEAT AND POWER

Framingham, Mass.—(Official)—Bids will be received until noon, Nov. [illegible], by the Massachusetts Board of Education, [illegible] Ashburton Pl., Boston, for heating and ventilation and plumbing equipment for the new dormitory and refectory building of the State Normal School, Framingham. The [illegible] Kimball Co., 6 [illegible] St., Boston, is Engr.-in-Charge. [illegible] is Commr. of Education.

Pascoag, R. I.—(Official)—Bids will be received until noon, Nov. [illegible], by the Pascoag Fire District Electric Light Board, A. [illegible], for the construction of electric lines, and [illegible] and installing substation equipment throughout the districts of Pascoag and Harrisville, R. I.

New Britain, Conn.—Plans are being prepared by Walter [illegible], [illegible] Main St., for a central heating and lighting plant for the [illegible] schools. The building will be [illegible] ft. and will contain [illegible] boilers.

Bedford Hills, N. Y.—(Official)—Bids will be received [illegible] Nov. 2[illegible] by [illegible] Wood, Pres. [illegible] of [illegible] Reformatory for Women, Bedford Hills, for boiler house equipment, [illegible] lights at the Reformatory. [illegible] on file at the office of the Department of [illegible], New York, N. Y., or with [illegible], Capitol, Albany, N. Y.

Orangeburg, N. Y.—The [illegible] Co., Orangeburg, has awarded the contract for the [illegible] of a [illegible] brick and steel power house to the FLINT BUILDING & CONSTRUCTION CO. [illegible] will be [illegible] ft.

Burlington, N. J.—[illegible]

Trenton, N. J.—It is reported that the [illegible] [illegible] Wright [illegible] Trenton.

Hastings, Penn.—[illegible]

Washington, D. C.—[illegible]

[illegible], W. Va.—[illegible]

[illegible], N. C.—[illegible] with [illegible] will be installed. Gilbert C. White, Charlotte, N. C., is Engr.-in-Charge.

Cleveland, Tenn.—The Tennessee Power Co. has secured a site along the [illegible] River in Georgia and will build the fourth and fifth of its power [illegible] on that stream. J. A. Cunningham, Cleveland, is Gen. Supt. of the Tennessee Power Co.

Louisville, Ky.—The Louisville Chemical Co., 11[illegible] South Seventh St., contemplates equipping its proposed new plant with electrically driven machinery.

Conneaut, Ohio.—The City Council is considering plans for rebuilding the municipal electric-light plant at a cost of about $[illegible],000. The matter will be held in abeyance until next spring. S. W. [illegible] is Dir. Pub. Serv.

Pemberville, Ohio.—The village has sold $[illegible] in bonds, the proceeds of which will be used for the installation of a municipal electric-light plant. Fred H. Froelich, Toledo, Ohio, is Engr.-in-Charge.

St. Henry, Ohio.—It is reported that bids will be received until Nov. 2[illegible] for the construction of a municipal electric lighting system to be operated in conjunction with the water works plant. The Council has recently authorized a bond issue to pay for the work.

Sandusky, Ohio.—(Official)—Bids will be received until noon, Nov. 30, by John J. Molter, Dir. of Pub. Ser., for furnishing and operating a complete electric lighting system for the streets, lanes, parks and public places of the city.

Mount Morris, Mich.—The Village Council is considering the question of establishing a municipal electric-light plant if bonds to pay for its construction can be sold.

Sturgis, Mich.—Robinson & Campau, [illegible] Houseman Bldg., Grand Rapids, Mich., are preparing plans for a central heating plant to be located in Sturgis. The estimated cost is $1[illegible],000.

Atwood, Ill.—The Village Board has engaged Ralph Blackwell to supervise the installation of a municipal electric-light plant for which bonds were recently authorized.

Greeley, Iowa.—Fire on Oct. 3[illegible] destroyed the municipal electric-light plant at a loss of about $[illegible]. It is reported that plans are being made for rebuilding the plant, which had been in operation a few months only.

Larchwood, Iowa.—The City Council has engaged Earle D. Jackson, Capitol Bank Bldg., St. Paul, Minn., to supervise the engineering work in connection with the construction of the proposed municipal electric light plant. The estimated cost is $10,000.

Marengo, Iowa.—The Iowa Ry. & Light Co., Cedar Rapids, has been granted permission to rebuild the electric light plant and system in Marengo. Robert S. Cook, Cedar Rapids, is Pur. Agt.

Talmage, Neb.—At a recent election, the citizens voted in favor of a bond issue of $[illegible], the proceeds of which will be used for the establishment of a municipal electric light plant.

New Haven, Mo.—See item under "Water Supply and Irrigation."

Cuero, Tex.—It is reported that the Columbus Gas Co., Milwaukee, Wis., will apply to the City Council for a franchise to build a gas manufacturing plant and lay a distributing system. The entire plant will cost about $[illegible].

Waco, Tex.—The Texas Power & Light Co. has applied to the City Council for a franchise to install and operate a natural gas distributing system in Waco.

Pryor, Okla.—The City Light & Ice Co., recently incorporated with a capital stock of $[illegible], plans to equip and operate an electric-light plant in Pryor.

Alamogordo, N. M.—W. [illegible] and associates contemplate establishing an electric-power plant at Alamogordo and will build transmission lines to [illegible] in the Alamogordo Valley to operate pumping plants for irrigation purposes.

Lahontan, Nev.—The Nevada Valleys Power Co. has awarded the contract for the construction of an [illegible]-mile transmission line from Lahontan to [illegible], Nev., to J. W. FINCH.

Phoenix, Ariz.—The City Commission is considering the establishment of a municipal electric-light and power plant. Bonds will be issued to pay the cost of construction. Fred N. [illegible] is City Engr.

El Centro, Calif.—The [illegible] Power Co. will build a substation at this place to cost about $[illegible] and will construct a [illegible] line from El Centro to [illegible] and [illegible] at a cost of about $[illegible].

Fowler, Calif.—The Fowler Gas Co. plans to extend its mains and otherwise improve its system at a cost of about $1[illegible].

St. Malo, Que.—Bids will be received until Dec. 1, by W. [illegible], Secy. of the National Transcontinental Ry., Ottawa, Ont., for [illegible] heater, steam [illegible] and wiring for the [illegible] of the National Transcontinental Ry. at St. Malo.

[illegible], Ont.—The Town Council has passed a by-law authorizing the extension of the hydro-electric system in [illegible] at a cost of about $[illegible]. W. H. [illegible] is Town Clk.

Toronto, Ont.—The Board of Education will purchase [illegible] for the new [illegible] school building at a total cost of about $[illegible]. W. C. Wilkinson is [illegible].

Walkerville, Ont.—The Town Council plans to install a new distributing system for the hydro-electric plant to cost about $[illegible].

Williamsburg, Ont.—The Town Council will build a new [illegible] to cost about $[illegible]. George Lake is Town Clk.

New Denver, B. C.—It is reported that the New Denver [illegible] Co. is [illegible] plans prepared for rebuilding its power plant which was burned last summer. The company will also extend its transmission lines [illegible].

BRIDGES

★**Portland, Maine**—The following bids were opened Nov. 2, by the Commissioners of Cumberland County for the construction of a bridge between Portland and South Portland, (Div. A) foundation work; (Div. B) steel superstructure of the middle portion, including the draw; (Div. C) concrete superstructure of the rest of the bridge. Noted Sept. 24 and Oct. 1.

+Hamilton, Ont.—The contract for constructing the foundation of the Royal Connaught Hotel, has been awarded to the RAYMOND CONCRETE PILE CO., LTD., New Birks Bldg., Montreal, Que. Stone & Webster Construction Co. is the general contractor.

+Hamilton, Ont.—Contracts for the construction of the Dundurn St. School have been awarded as follows: Masonry, MITCHELL & RIDDELL, $45,900; heating and plumbing, ADAM CLARK, $19,167; carpentry, JAMES CALVERT, $17,000. Estimated cost, $95,550.

Toronto, Ont.—Bids will soon be received by G. W. Gouinlock, Arch., Temple Bldg., for constructing the Machinery Hall, at the Exhibition Grounds. The structure will be reinforced concrete and brick and will cost about $145,000.

Moncton, N. B.—Plans are being prepared for the construction of a hotel near the Union Depot, Moncton.

The Stephens-Adamson Manufacturing Co., Aurora, Ill., is changing the electrical equipment throughout its shops, using individual motors and group drives. Tests have been made on all machines, and the results assure a considerable saving in power cost. Plans are also being prepared for another structural steel shop; construction of the same to be begun immediately after the first of the year. This will be the eighth building of the company's plant. This company reports a very satisfactory increase in its business during the present year and a most encouraging outlook.

SEWER, CINCINNATI, OHIO

+Bids were received by the Director of Public Service, for constructing a sewer in Duck Creek Rd. from, (A) Engineer's estimate; (B) D. P. FOLEY, Cincinnati (awarded Contract No. 1); (C) John Dempsey, Cincinnati; (D) Connelly Construction Co., Cincinnati; (E) Thurber & Co., Cincinnati; (F) R. E. Cash, Cincinnati; (G) Welling & Franz, Cincinnati; (H) James Duff Construction Co.; (I) Thomas Maloney, Cincinnati; (J) John B. McLane & Co., Newport, Ky.; (K) Thomas P. Strack, Cincinnati; (L) M. J. McCarthy, Cincinnati; (M) Henkel & Sullivan, Cincinnati; (N) CANNELL-AMES CONSTRUCTION CO., Columbus (awarded Contract No. 2); (O) Evan Evans, Cincinnati. The item bids were as follows:

The General Railway Signal Co., Rochester, N. Y., in a notice issued by W. W. Salmon, Pres. and Gen. Mgr., announces the following changes in organization: M. Wuerpel has been appointed Assistant to the President. S. G. Johnson, Vice-Pres., will be in full charge of the Sales Department, which includes all branch and foreign offices, commercial engineering, commercial inspection and contract installation, reporting to the President and General Manager, and with headquarters at Rochester. A Department of Publicity and Education has been created and H. M. Sperry will assume duties as manager of this department, reporting to the President and General Manager, and coöperating closely with all departments. This department will take over the advertising and catalog work and will undertake an educational campaign in regard to the signaling of steam and electric railways.

The Lidgerwood Manufacturing Co., 96 Liberty St., New York, N. Y., has built during the years it has been in business over 37,000 steam and electric hoists. This is probably the greatest record of hoisting engine production made by any one concern.

Contracts to Be Let

Bids received until Dec. 1, 1914.

New County Building

FOR NEW CASTLE COUNTY AND NEW MUNICIPAL BUILDING FOR THE CITY OF WILMINGTON

Sealed proposals will be received by the New Castle County Building Commission and the Wilmington Building Commission at the office of the Commission in the Church Building, at the corner of Market and Tenth Sts., in the City of Wilmington, Delaware, up to 11 o'clock A.M. (Eastern time) on the first day of December, 1914, for the Interior Marble, for the Interior Cut Stone, for the Bronze Work, for the Miscellaneous and Ornamental Iron, for the Painting and Finishing, for the Hollow Metal Doors, for the Finished Hardware, for the Brick Paving, for the Sidewalks, and for the Revolving Doors, entering into the construction and completion of the new County Building for New Castle County and of the new Municipal Building for the City of Wilmington, situated between King Street and French Street and between Tenth Street and Eleventh Street, in the City of Wilmington, Delaware, and will be opened publicly and declared by the Commissions in their offices. A separate proposal is required for each of the buildings for each department or class of work above listed.

Each proposal for Interior Marble shall be accompanied by a certified check or cash deposit in the amount of Four Hundred Dollars ($[illegible]).

Each proposal for Interior Cut Stone shall be accompanied by a certified check or cash deposit in the amount of Three Hundred Dollars ($[illegible]).

Each proposal for Bronze Work shall be accompanied by a certified check or cash deposit in the amount of Six Hundred Dollars ($[illegible]).

Each proposal for Misc. and Ornamental Iron shall be accompanied by a certified check or cash deposit in the amount of Five Hundred Dollars ($500).

Each proposal for Painting and Finishing shall be accompanied by a certified check or cash deposit in the amount of Three Hundred Dollars ($[illegible]).

Each proposal for Hollow Metal Doors shall be accompanied by a certified check or cash deposit in the amount of Eight Hundred Dollars ($[illegible]).

Each proposal for Finished Hardware shall be accompanied by a certified check or cash deposit in the amount of Two Hundred Dollars ($[illegible]).

[illegible] of Two Hundred Dollars ($[illegible]).

Union School Building

Lockport, N. Y.

SEALED PROPOSALS will be received by the Board of Education, City of Lockport, New York, at its office in the Union School Building, up to eight o'clock p.m., November 17th, for the material and labor as shown on plans and included in specifications prepared by Wm. Nell Smith, Architect, 101 Park Avenue, New York City, and the heating and ventilation plans and specifications prepared by Douglas Sprague, Engineering Architect, 39 Cortlandt Street, New York City, for the enlargement and improvement of the Union School Building, which plans and specifications have been approved by the State Education Department.

Said plans and specifications may be seen at the office of said Board of Education, or at the offices of said architects. Copies thereof may be obtained by prospective proposers upon request to said Board and payment of five dollars per set of plans and specifications—said amount to be returned to the proposer upon return of plans and specifications to the Board, in good condition.

Separate proposals may be made by contractors for the labor and material included in the separate Masonry, Carpentry, Plumbing, Electrical, and Heating and Ventilation specifications, and proposals for the entire work, separately itemized, may be submitted. All proposals must be accompanied by a certified check or a proposal bond for two per cent. of the amount of the proposal, as guarantee that proposer will enter into contract for the full performance of the work upon which proposal is submitted, if the proposal is accepted.

The Board of Education hereby reserves the right to accept or reject any or all of the proposals that may be received. By order of the Board of Education, Lockport, N. Y., October 19th, 1914.

EMMET BELKNAP,
Clerk of the Board.

Bids received until Dec. 7, 1914.

Sewage Collecting System

Dunellen, New Jersey.

Sealed proposals for constructing a sewage collecting system will be received by the Council of the Borough of Dunellen until 8 P.M., December 7th, 1914. Proposals should be delivered to William P. Deering, Clerk of the Borough, at the Borough Hall, North Avenue, Dunellen, New Jersey.

The work comprises a system of vitrified pipe sewers with [illegible] joints. There are about 14 miles of street sewer, ranging from [illegible] to [illegible] inches in diameter, two small sewage pumping stations and about [illegible] feet of 6-inch cast iron force main.

Proposals must be accompanied by a certified check on a national bank or trust company for Two Thousand ($[illegible]) Dollars. The bidder to whom the contract is awarded will be required to execute a contract and furnish a surety bond [illegible] of the amount of the contract within ten days [illegible] after receiving [illegible] notice of the award. The bond shall be satisfactory to the Borough both [illegible]

[illegible]

The plans and specifications may be obtained from [illegible], New York City, upon [illegible] Dollars ($[illegible]), which will be refunded [illegible] plans and specifications are returned in good condition [illegible]

[illegible]

[illegible]

BY ORDER OF THE MAYOR AND BOROUGH COUNCIL OF THE BOROUGH OF DUNELLEN.
WILLIAM P. DEERING,
Borough Clerk.

Construction News

Demand that Aliens Quit New York Subway

Stoppage of work on New York's entire rapid transit system, thereby throwing 18,000 men out of work, is threatened by the action of the Bricklayers' Union in resurrecting a long forgotten clause of the labor law, which states that only citizens of the United States may be employed on municipal work.

The following is a letter which John Gill, business agent of the Bricklayers and Masons Union, has sent to all subway contractors:

"I beg to notify you that your company and all subcontractors doing work are openly and wantonly violating the labor law of this state with regard to employing men on your work who are not citizens of the United States, and with regard to paying laborers and tradesmen wages less than the prevailing rate; also, with regard to complying with the labor law, which requires that the contractor shall keep the name of each workman, and if a naturalized citizen, the date of citizenship and the court out of which his papers were issued.

"I hereby demand that you make a thorough investigation among your employees, with the advantages at your disposal, to ascertain the above facts. I desire to further notify you that these violations are open and notorious and conducted by you to such an extent as to be a matter of common knowledge.

"In the event that you fail to comply with the law forthwith, I shall take whatever steps, as a citizen and as a representative of organized labor, to prosecute you for such violations, as I deem necessary."

The Public Service Commission has made a statement which says, in part:

"The penalties prescribed for violations of the law include not merely the forfeiture of the contract, but also the punishment of offenders for misdemeanor. It is also said that if the Public Service Commission should countenance such violation its members would be liable to prosecution for malfeasance."

In an interview, Chairman McCall, of the Public Service Commission, said: "The commission is obliged to enforce the law. As to whether or not it is unconstitutional, I can only say that we have no authority to interpret the law ourselves. We would not be justified in paying vouchers if we were aware of violations, and I doubt if the comptroller would recognize them if we did issue them. We are considering steps to test the law as quickly as possible."

That 90% of the pick and shovel men are aliens is admitted by the contractors. They say they can't get native Americans to do this work. Even among skilled laborers the percentage of aliens is large. Some contractors have laid off a part of their forces pending legal advice.

Opening the Federal Reserve Bank—Important at any time, but doubly so now, since the financial centers of Europe have been shaken to their foundations and foreign credit severely dislodged, was the opening of the Federal Reserve Bank on Nov. 16. The credit and financial interchange of the country for more than a generation has been carried on through a loose organization of more than 7500 national banks, many state banks, and trust companies. The national banking system, which was purely a measure put forward at the time of the Civil War, to facilitate the sale of government bonds, has been antiquated for more than a score of years. Great hopes are held that the new system of credit interchange, with proper Federal control and supervision of business men, will free the country from the yearly financial stringency during the period, August to December, incident to the gathering of the crops. The United States having the largest store of gold in the world, has made little scientific use of this vast hoard for the promotion of credit. The new system, which began last Monday, comprises twelve reserve banks located in Boston, New York, Philadelphia, Cleveland, Richmond, Atlanta, Chicago, St. Louis, Minneapolis, Kansas City, Dallas and San Francisco. The bank in New York, which like all other Federal Reserve Banks, does business only with other banks, received over $100,000,000 the first day. The first receipt given out was for $21,000,000.

The Government to Aid Manufacturers—On July 15, Congress appropriated $100,000 for commercial attaches, to be appointed by the Secretary of Commerce, to investigate and determine whereby the sale of manufactured goods and raw materials from the United States, might be extended in foreign lands, such commercial attaches to report directly to the Secretary of Commerce. This plan was promoted prior to the beginning of hostilities in Europe, and also before there was any knowledge that foreign markets would be open to the United States as the result of war. While the war has of necessity changed the time for sending these attaches to the various countries, they will be more valuable as trade scouts now than was before thought possible. According to the bill in Congress, the number was limited to ten, and of these nine have already been appointed and assigned as follows:

A. H. Baldwin, to London, England; Erwin W. Thompson, to Berlin, Germany; Dr. Albert Hale, Buenos Ayres, Argentina; C. W. A. Veditz, to Paris, France; Julean H. Arnold, to Pekin, China; Prof. Lincoln Hutchinson, to Rio de Janeiro, Brazil; A. L. Harrington, to Lima, Peru; Verne L. R. Havens, to Santiago, Chile; and Henry D. Baker, to Petrograd, Russia.

The Platinum Output of the United States in 1913 was about 1034 oz., according to the U. S. Geological Survey. About 650 oz. was recovered from gold and copper bullion was made. The production of the country from imported sands was 39,154 ounces.

Orders for War Materials Placed in the United States

Manufacturers in the United States have secured much business from the belligerent nations for war materials. A large steel company has orders enough to tax its facilities for a year, and there are many smaller orders, as follows:

The Baldwin Locomotive Works, Philadelphia, Penn., has begun work on the recent order from the Russian Government for 30 locomotives.

An order for 25,000 steel barrels for export has beeen placed in Cleveland, while an export house in New York states that it has been figuring on an inquiry for 50,000 steel barrels for Russia. High freights have been a stumbling block, deterring the quick closing of orders.

The Firth-Sterling Steel Co., Demmler, Penn., has received an order for 20,000 three-inch, 10,000 six-inch and 5000 eight-inch shells, while the Economy Cartridge & Fuse Co., of Pittsburgh, has an order for 5,000,000 rounds of Mauser rifle ammunition. A New England manufacturer of ammunition early in the war received an order for 50,000,000 rounds of ammunition.

The Pittsburgh Gage & Supply Co. has received an order for $50,000 worth of wire rope, chains and fittings, while the Maccomber & White Rope Co., Chicago, has received a similar order amounting to $47,000. These materials will be used by the Studebaker Wagon Co., South Bend, Ind., in connection with a $6,500,000 order from the English and French governments for wagons and harness.

Important Electrification Contract

Announcement has been made that the Chicago, Milwaukee & St. Paul R.R. will start active work on the electrification of 450 miles of main line in the spring. A contract involving $2,000,000 has already been entered into with the General Electric Co. While the work involves a substitution of motive power on 450 miles of line (see "Engineering News," Jan. 16, 1913), only 117 miles are involved in this contract. The work will include the mountain district between Avery, Idaho, and Harlowton, Mont. This work is under the supervision of C. A. Gooodnow, Asst. to A. J. Earling, Pres.

Rapid Transit Line Held Up—The Public Service Commission for the First District announced during the week that it had failed to legalize the Flushing route, known as Route No. 52, by the filing of the necessary number of property owners' consents. This route is an extension of the Corona, Queens Borough, route from Albertis Ave. through Flushing to Bayside. The Long Island R.R. Co. owns sufficient property along a portion of the route to control the majority of consents, which must represent a majority in value, in this particular vicinity. The railroad company refuses to sign the necessary consent. The Commission now has under consideration the adoption of one of the following ways of getting around the difficulty: It may go to the Appellate Division, which may give its consent to the building of the line in lieu of the property owners' consents; or it may adopt two new routes, which, taken together, would be identical with the present route, and the first route, which is for immediate construction, would extend from Alburtis Ave. to Main St., Flushing, and the other the rest of the distance. The Commission considers it probable that it will secure sufficient consents for the building of the Flushing line.

The National City Bank of New York has been granted permission by the Government of Argentina to establish a branch at Buenos Aires. This will be the first branch of an American bank to be opened on foreign soil. The bank will be managed by John H. Allen, former manager of the Bank of Hayti. A. V. Edwards, of the credit department of the National City Bank, is expected to arrive in Buenos Ayres within the next week, to have charge of the formation of a credit bureau to be organized in connection with the branch for the purpose of furnishing credit information to exporters and importers.

Iron Ore in the Philippines—The Philippine "Journal of Science" reports that H. F. Cameron, department engineer for Mindanao and Sulu, has discovered a deposit of iron ore in Surigao province on the island of Mindanao, which appears to be of large extent, probably covering an area of 40 square miles. The ore is a clayey red limonite, carrying 55 to 60% metallic iron; no sulphur or phosphorus, but traces of chromium. The area over which the deposit extends has been reserved from mineral location, by order of the government, until further information can be obtained as to the extent and value of the deposit, through surveys to be made by the Bureau of Science.

READERS' WANTS

The Department of Public Works, Detroit, Mich., George H. Fenkell, Commissioner, would like to receive information from firms manufacturing receptacles suitable for the storage of garbage, refuse and ashes. The department contemplates the enforcement of ordinances relative to the storage of such materials, preparatory to their being removed by the Department. The Commissioner would also like to receive cuts, specifications and prices.

Placing 60-inch gate valve and cast iron pipe	
1:2:4 Concrete in vault walls and around pipe	325 cu yds
Furnishing & Placing 3" dia. vault drain	24 lin ft
Furnishing & Placing reinforcing steel channel ladders	3387 lbs
Gunite lining in bends straight and tapered pipe	1703 sq ft
(Alternate) Bitumastic Enamel Lining	17[illegible]3 sq ft
Furnishing & Placing 1" pipe for sub-drain	1[illegible]0 lin ft
Furnishing & Placing $1\frac{1}{2}$" pipe for sub-drain	30 lin ft
Furnishing & Placing 3" pipe for sub-drain	100 lin ft
Furnishing & Placing 4" pipe for sub-drain	[illegible]0 lin ft
Furnishing & Placing 6" pipe for sub-drain	50 lin ft
Excavating for furnishing & placing [illegible]" sub-drain	3[illegible]0 lin ft
Excavating for furnishing & placing [illegible]" sub-drain	[illegible]20 lin ft
Excavating for furnishing & placing 10" sub-drain	1[illegible]0 lin ft
Excavating for furnishing & placing 12" sub-drain	390 lin ft
Excavating for furnishing & placing 16" sub-drain	[illegible]20 lin ft
Furnishing & Placing [illegible] to 4" C.I. Tees for sub-drains	
Furnishing & Placing 1[illegible]"x1[illegible]"x4" to 6" C.I. Tees for sub-drains	
Furnishing & Placing 1[illegible]"x12"x4" to 6" C.I. Tees for sub-drains	
Furnishing & Placing 16"x16"x4" to 6" C.I. Tees for sub-drains	
Furnishing & Placing [illegible] Gate Valve	
Alternate—Furnishing & [illegible] System	17[illegible]0 lin ft
[illegible]	[illegible]
[illegible]	[illegible]
Alternate—Reinforced Concrete [illegible]	[illegible]
[illegible]	[illegible]

The successful bidder will be required to give bond [illegible] with the City Charter [illegible].

The Board of Awards reserves the right to reject any or all bids.

Approved November 11, 1914.

[illegible]

Acting [illegible], Board of Awards.

[illegible] CHAMBITT,

Acting Water Engineer.

[illegible] R. WHITMAN,

[illegible] Engineer.

[illegible] OFFICE, ARLINGTON MEMORIAL AMPHITHEATER COMMISSION, [illegible] New York Avenue, Washington, D. C., November [illegible], 1914—Sealed proposals for the erection of a memorial amphitheatre and chapel in the Arlington National Cemetery, Va., will be received here until 11 o'clock [illegible], [illegible], 1914, and then publicly opened. [illegible] upon application. WM. W. HARTS, Colonel [illegible], Executive Officer.

Construction News

Testing the Alien Labor Law in Court.

Numerous conferences have been held by those interested in building New York's new Rapid Transit system with the view to finding a way out. The law is simple, clear and mandatory in its provision that "Citizens of the United States shall be employed." The only discretionary power is that "Citizens of the State of New York shall be given preference."

The unions are by no means a unit as to the advisability of pressing the matter, for it is evident if the excavating is delayed, and most of the aliens are employed at that work, that it will throw out of work a great number of skilled citizens during the winter. Three contractors, the Cranford Co., the Dock Contracting Co. and Oscar Daniels, have discharged their alien laborers and thus far are meeting with little or no success in obtaining citizen pick and shovel workers.

The contention that American workmen can be obtained at $2.50 to $3 per day is probably as correct as it is economically unsound. There is no likelihood of any great amount of excavating being done at such wages. That wages are the crux of the matter is seen in the following statement of Antonio Sangimbene, organizer of the Excavators' Union.

"The objections of the other unions to our alien members are largely based on the fact that the alien laborers have worked for small wages. But we are making preparations to demand higher wages for them, and in this we are being assisted by the 1400 members of the Rockmen's Union, 600 of whom are citizens. As there are aliens in nearly all of the unions whose members are engaged in subway work, it seems as if there was too much jealousy on the part of the other unions."

Contractors, although troubled, are pleased that the matter should have been brought up at this time, for there is a chance of repealing the law, and there is more likelihood of securing citizen laborers than at any time in the last four years.

An attempt will be made to test the constitutionality of the law. Such a case will be given preference in the Court of Appeals.

Viewed from another angle it might be advantageous to postpone further work, since progress has been far more rapid than was anticipated, until legislative relief is obtained.

Improved Demand for Bonds—Sales of municipal bonds in October amounted to $13,141,429, according to the "Financial Chronicle;" this is the largest output since the war began, but is still far below previous years. In the three months of August, September and October, the sales have amounted to $33,041,024, compared with $85,546,251 in the corresponding month last year. In fact, the sales for the three months mentioned have not fallen below $60,000,000 in any year since 1911. In spite of the relatively poor showing in the last three months the sales of municipal bonds for the first ten months of the year surpass those of any previous full calendar year.

National and State Debts

Coming as they do at a time when there is widespread inquiry whether state and city governments can continue increasing their indebtedness for public improvements, recent figures published by the Census Bureau throw a new light on the subject.

As is always the case, figures furnished by the government are not brought down to date, still the comparison with former years gives the trend of events. The sums involved are so enormous that for many purposes it is far more convenient and satisfactory to give figures indicating the per capita debt. It is sufficient to show that the national debt amounted to $1,028,000,000 in 1913 and the aggregate debt of the 48 states was $345,000,000. These figures do not include the indebtedness of smaller geographical units such as counties, cities and townships.

Comparison of Debts

The accompanying table shows the debts of the nation and states year by year from 1901 to 1913, inclusive. Under the headings "Amount" six figures are omitted in each case.

	*Indebtedness					
	Total		National		48 States	
Fiscal Year	Amount	Per Capita	Amount	Per Capita	Amount	Per Capita
1913.....	$1,374	$14.15	$1,028	$10.59	$345	$3.57
1912.....	1,327	13.89	1,027	10.75	299	3.15
1911.....	1,291	13.75	1,015	10.81	275	2.95
1910.....	1,302	14.11	1,046	11.34	256	2.78
1909.....	1,265	13.95	1,023	11.29	241	2.67
1908.....	1,177	13.22	938	10.53	239	2.70
1907.....	1,113	12.74	878	10.05	235	2.70
1906.....	1,202	14.01	964	11.24	238	2.79
1905.....	1,228	14.59	989	11.75	238	2.85
1904.....	1,202	14.56	967	11.71	235	2.86
1903.....	1,157	14.29	925	11.42	232	2.88
1902.....	1,208	15.23	969	12.22	239	3.03
1901.....	1,273	16.38	1,044	13.44	228	2.95

*Less sinking fund assets or fund available for payment of debt.

From this it is clear that the national indebtedness, as far as the burden of each individual is concerned, is being reduced in spite of the Panama Canal expenditures, while the States are increasing their indebtedness; especially during the last two years.

Nearly half the indebtedness of all the states is incurred by New York and Massachusetts while the credit of these two states stands perhaps higher than any other in the Union.

While deductions drawn from few figures are apt to be misleading it is worthy of notice that the states of Massachusetts and New York make up more than half the total debt, yet it is well known that these two states can market their bonds at as low a rate of interest, if not lower, than any other states. This might indicate that the market for state bonds is wider than may be indicated.

The accompanying compilation shows the total and per capita debt of the several states.

	Debt, Less Sinking Fund Assets	
State	Amount	Per Capita
Alabama	$13,132,375	$5.95
Arizona	3,064,818	13.28
Arkansas	1,236,066	0.76
California	10,222,744	3.83
Colorado	3,173,949	3.70
Connecticut	7,110,451	6.12
Delaware	763,122	3.70
District of Columbia	....	....
Florida	619,199	0.77
Georgia	6,934,202	2.57
Idaho	2,143,314	5.92
Illinois	2,272,620	0.39
Indiana	1,350,305	0.49
Iowa	356,670	0.16
Kansas	243,121	0.14
Kentucky	4,441,867	1.90
Louisiana	13,546,150	7.89

Port Elgin, Ont.—Simon Buschlen contemplates constructing a basket-making factory at Port Elgin.

Sarnia, Ont.—R. W. Soper, Arch., has prepared plans for the construction of a factory for the Sarnia Sheet Metal Products Co. Estimated cost, $40,000.

Stratford, Ont.—Plans are being prepared for the Colonial Player Piano Co. for the construction of a factory at South Stratford.

FEDERAL GOVERNMENT WORK

Bridge—Washington, D. C.—Bids were received, as follows, by the Commissioners of the District, for the construction of reinforced-concrete bridge, consisting of a single multiple rib arch of 200 ft. actual span, the abutments of which will be founded in solid rock, over Rock Creek, within the lines of Pennsylvania Ave. It will have a width of 70 ft. between balustrades, consisting of a 50-ft. roadway and two 10-ft. sidewalks. It will consist of a deck system carried by columns and walls on one 12-ft. arch rib and four 6-ft. arch ribs. In Design A, the bridge will be faced with facing mortar, will have a showing span of 155 ft., and a total overall length of 271 ft. In Design B, the bridge will be faced with stone, will have a showing span of 164 ft. and a total overall length of 276 ft. Bid a provides for construction of bridge according to Design A. Bids b-1, b-2 and b-3 provide for the construction of the bridge according to Design B. Bid b-1 provides for facing stone to be buff Indiana limestone; b-2, facing stone to be sandstone similar to "Kingwood"; b-3, facing stone to be granite. Item 1 calls for excavation of 160 cu.yd. of earth; item 2, excavation of 200 cu.yd. of rock; item 3, 400 cu.yd. of masonry excavation.

Bidders are as follows:

(A) Hardaway Contracting Co., Columbus, Ga.; (B) A. L. Guidone & Co., New York, N. Y.; (C) Barzaghi-Vought Co., New York, N. Y.; (D) L. B. Cleveland, Watertown, N. Y.; (E) McArthur Bros. Co., New York, N. Y.; (F) Conners Bros. Co., New York, N. Y.; (G) Interstate Construction Co., New York, N. Y.; (H) Thomas Sheahan, Hagerstown, Md.; (I) O. P. Allen Construction Co., Washington, D. C.; (J) Snare & Triest, New York, N. Y.; (K) Ward & Tully, Inc., New York, N. Y.; (L) Merrill-Ruckgaber Co., New York, N. Y.; (M) Cranford Construction Co., Washington, D. C.; (N) O'Brien Construction Co., New York, N. Y.; (O) L. Hankins, Richmond, Va.; (P) Whiting-Turner Construction Co., Baltimore, Md.; (Q) C. Faith & Co., Philadelphia, Penn.; (R) Willard Boggs & Co., Spartansburg, S. C.; (S) Penn Bridge Co., Washington, D. C.; (T) Davis Construction Co., Washington, D. C.; (U) W. H. H. Allen Construction Co., Washington, D. C.; (V) M. F. Comer & Co., Washington, D. C.; (W) C. B. Clark & Co., Baltimore, Md..

TWIN PEAKS TUNNEL, SAN FRANCISCO, CALIF.

✦Bids for the construction of Twin Peaks Tunnel were received by the Board of Public Works, San Francisco, Oct. [illegible]. This was the third time that proposals were invited. On the first occasion, due to the size of the bond required by the city, there were no bidders. The contract was readvertised, Sept. [illegible] being the date set for receiving proposals. The only one submitted was that of Hans Pederson, who offered to do the work for $3,[illegible]. In his bid, however, Mr. Pederson did not comply with the terms of the city charter, which provides that there can be no alterations or interlineations in the "Form of Proposal" furnished to bidders with the specifications. The proposal was therefore rejected and Oct. 28 set as the date for opening new bids. Bids were received from (A) ROBERT C. STORRIE & CO. (awarded contract), (B) McArthur Bros., (C) Hans Pederson, (D) Twohy Bros. Co. The item bids were as follows:

Unfilled Tonnage—From the monthly unfilled tonnage report of the United States Steel Corporation it shows a total of unfilled orders on the company's books as of Oct. 31, aggregating 3,461,097 tons. This represents a decrease of 326,570 tons for the month.

The following tables gives the unfilled tonnage of the United States Steel Corporation by the months since June 30, 1910, together with tonnage at close of each quarter from June 30, 1902:

Oct. 31, '14	3,461,097	Mar. 31, '11	3,447,301

Idle Equipment—From the most recent report of the American Railway Association it shows that there was a net surplus of 170,096 freight cars on the railroads of the United States and Canada on Nov. 1, 1914, compared with 151,982 Oct. 1, 1914.

The following table shows the comparative conditions of freight traffic on the railroads at various periods within the past year:

1914—	Surplus	Shortage	Net Surp.
Nov. 1	172,325	2,229	170,096
Oct. 15	154,342	2,360	151,982
Oct. 1	133,382	2,355	131,027
Sept. 15	138,108	2,059	136,049
Sept. 1	165,244	1,918	163,326
Aug. 15	174,260	2,115	172,145
Aug. 1	198,998	2,333	196,665
July 15	228,384	1,843	226,541
July 1	220,875	1,333	219,545
June 15	232,994	660	232,334
May 31	242,572	770	241,802
May 15	239,406	764	238,642
May 1	230,533	1,654	228,879

Jan 1	190,521	1,671	188,850
1913—			
Dec. 15	107,513	5,698	101,545
Dec. 1	67,446	10,212	57,234
Nov. 15	46,059	23,407	22,652
Nov. 1	38,276	40,118	*1,842
Oct. 15	37,198	41,994	*6,048
Oct. 1	41,994	31,620	10,374

*Net shortage.

The fact that there is a comparative shrinkage in the demand for freight capacity on Nov. 1 this year of over 170,000 cars compared with the net shortage of 1842 cars at the same part of last year speaks for itself in viewing relative conditions of business in domestic lines.

Steel Company to Expand—The Wickwire Steel Co., Tonawanda, N. Y., proposes to extend its manufacturing by building a new billet mill and mills for rolling rods and wire. The company will also join with the Cement-Solvay Co., Syracuse, N. Y., in the construction of by-product coke ovens. The Wickwire Steel Co. has just filed a mortgage for $2,500,000 to provide funds for this work. It is expected that construction work will start next spring on the steel plant and coking ovens. An expenditure of $1,500,000 is being made at this time.

The Firth-Sterling Steel Co., Pittsburgh, Penn., has recently received an order from the allied forces of Europe for 20,000 three-inch, 10,000 six-inch and 5000 eight-inch shells. This is one of the largest orders booked since the beginning of the war. It is reported that some larger projectiles have been ordered from the same company.

The MacArthur Concrete Pile & Foundation Co. has appointed Douglas-Milligan Co. as its Sales Agents for Eastern Canada, with main office in the New Birks Bldg., Montreal and branch office at 95 King St., East, Toronto. The company is also equipped to construct foundations for all sorts of structures where unfavorable soil conditions are encountered. It has already done a large amount of this work both in Canada and the United States.

The MacArthur Concrete Pile & Foundation Co. has sold the patent rights to drive the Pedestal Pile in Japan to the Oriental Compressol Co., Tokio, Japan. The reputation of this important form of concrete piling is recognized by progressive Japanese engineers and contractors and this purchase emphasizes anew the spirit of enterprise and advancement of the Japanese people.

Packing Goods for Export—Probably no subject has been reiterated more by government officials and the press than that of proper packing for export. It would seem as though American manufacturers had grasped the situation by this time but evidently they have not. The following letter from Mr. Hood, the representative of "Engineering News" in South America, written from Callao, Peru, again brings this subject to the attention of manufacturers:

"I previously called attention to the carelessness of American shippers in the matter of packing. I want to reiterate that American shippers send their goods here in **crates** while foreign shippers enclose them in **boxes**.

"Americans use 1-in. and 1¼-in. material while foreigners use 2-in. and 2½-in. lumber and their boxes are reënforced by heavy cross-braces, screwed in, and the whole protected by bands of sheet iron on exposed edges.

"It will be useless for us to create a market here if shippers do not pack their goods as described. The reason for this is that there are few harbors here and unloading is effected by transferring to lighters in heavy seas.

"The fault lies with the big shipper as well as small, and it is a wonder we have any trade here at all. Here are two instances in Quito, vouched for by Mr. Chas. S. Hartman, the American Minister to Ecuador.

"1st. The Quito Electric Light & Power Co. bought seven motors from one of the largest, if not the largest, manufacturers in the United States. These motors arrived in Quito absolutely bare of any crate or other protecting material.

2d. Senor Monje ordered laundry machines from the United States and they arrived in Quito, in flimsy crates, broken in 9 places. As the broken parts cannot be made in this country, the machines are absolutely useless. Senor Monje emphatically declared that under no circumstances will he buy anything further from the United States."

Contracts to Be Let

Bids received until Dec. 21, 1914

Construction of a Bridge on the Rosedale Section of the Bloor Street Viaduct

Toronto, Ontario.

Tenders will be received by registered post only, addressed to the [illegible] of the Board of Control, City Hall, Toronto, Canada, up to noon on Monday, December 21st, 1914, for constructing across the Rosedale Valley a Bridge 86 feet wide, consisting of [illegible] steel [illegible] spans with piers and [illegible], the length being approximately five hundred and eighty feet, and a retaining wall approximately one hundred and seventy feet long extending [illegible] from the bridge. Bidders [illegible] specifications including [illegible] and form of tender, [illegible] to the Commissioner of Works, Toronto, after paying to the Commissioner of Works twenty-five dollars for each set, this sum to be refunded upon return of plans. The Engineer's [illegible] will also be sent on request. [illegible] may be seen at the offices of the Commissioner of Works, Toronto, the Commercial Intelligence Department of the Board of Trade, London, England; The Engineering News, New York; Engineering and Contracting, Chicago; and [illegible], London, England.

Those desiring to submit tenders on reinforced concrete construction [illegible] without any expense whatsoever to the city, their own plans and specifications based on the loading given in the specifications for steel construction, and [illegible] on the steel. These tenders will be received up to noon on Monday, December 21st, 1914.

[illegible]

A deposit [illegible] of a certified cheque [illegible] of the amount of the tender [illegible] the City Treasurer [illegible]

[illegible]

The lowest or any tender not necessarily accepted.

[illegible]
Chairman Board of Control.
City Hall, Toronto, Nov. [illegible], 1914.

Bids received until Dec. 8, 1914.

Sewage Collecting System and Outfall Sewer

North Plainfield, N. J.

Sealed proposals for constructing a sewage collecting system and outfall sewer will be received by The Borough of North Plainfield, N. J., until 8 o'clock P. M., December the 8th, 1914. Proposals should be delivered to C. M. Dolliver, Borough Clerk, at the Borough Hall, Somerset St., North Plainfield, N. J., and may be either for Sewage Collecting System and Outfall Sewer, Contract No. 1, or Sewage Collecting System, Contract No. 2, or both separately.

Contract No. 1 comprises:

(a) About 11 miles of vitrified pipe sewers with bituminous joints, ranging from 8 to 24 inches in diameter.

(b) A small sewage pumping station.

(c) A 6-inch cast-iron force main about 1,600 feet long.

(d) A 24-inch outfall sewer approximately 1.1 miles in length, consisting partly of vitrified pipe and partly of concrete pipe.

Contract No. 2 comprises about 10.1 miles of vitrified pipe sewers with bituminous joints, ranging from 8 to 18 inches in diameter.

Proposals must be accompanied by a certified check on a National Bank or trust company for Twenty-five Hundred ($2,500.00) Dollars, for each contract bid upon.

The bidder to whom the contract is awarded will be required to execute same and furnish a surety bond in the sum of [illegible] per cent of the amount of the contract within ten days (Sundays excepted) after receiving official notice of the award. The bond shall be satisfactory to the Borough both as to form and surety. The Borough reserves the right to reject any or all bids.

Plans and specifications may be obtained from George W. Fuller, Engineer, 170 Broadway, New York, N. Y., upon depositing $[illegible], which will be refunded if said plans and specifications are returned in good condition within thirty days after bids have been received and acted upon by the said Borough.

Bids should be made on the Blank Form of Proposal bound with the specifications, and in case it is desired to bid on both contracts each bid should be made in a separate proposal.

C. M. DOLLIVER, Borough Clerk.

Bids received until Dec. 10, 1914.

Highway Work

[illegible] of the State Commission of Highways

Albany, New York, Nov. [illegible], 1914.

[illegible]

JOHN N. CARLISLE, Commissioner.
[illegible], Secretary.

Bids received until Dec. 9, 1914.

Somers Point - Longport Boulevard

Atlantic City, N. J.

[illegible]

The [illegible] is reserved to reject any or all bids.

[illegible] JEFFRIES
[illegible] Longport Road Committee.

Construction News

THE ALIEN LABOR CASE IN COURT

The Bricklayers & Masons Union has withdrawn its complaint filed with the Public Service Commission for the First District against the Dock Contractor Co., for alleged violation of the Labor Law.

John Gill, Business Agent of the union, had complained that this company, which has the contract for the new subway in Broadway between Bleecker St. and Union Sq., had been employing workmen who were not citizens of the United States, this being a violation of the Labor Law which states that only citizens may be employed on municipal work.

Upon the affidavit of W. V. McMenimen, Vice-Pres. and Gen. Mgr., of the Dock Contractor Co., that the company has not employed anyone but citizens since Nov. 7, Gill withdrew his complaint; but immediately filed another against the Underpinning & Foundation Co., a sub-contractor on the section of the Dock Contractor Co. The allegation against this company is the same as that previously made against the Dock Contractor Co.

William E. Heim, 1 Madison Ave., a taxpayer and employee of one of the subway contractors was granted an injunction by Judge Davis, restraining the Public Service Commission from holding up the vouchers of subway contractors pending a ruling by the courts.

THE NEW UNION STATION AT KANSAS CITY, MO.

The new union station at Kansas City, Mo., which was opened to traffic on Nov. 1, is shown in the accompanying cut.* The building is of Bedford stone, with trimming of gray granite and cast concrete blocks. The large central portion contains the main hall, 240x103 ft., 92 ft. high, with a semicircular ticket office having 24 windows. Around this hall are the various station facilities, and approaches to the restaurant and dining rooms in the right wing and to the baggage room in the left wing. Railway offices occupy the upper floors.

New Union Station, Kansas City

The waiting room, 350x78 ft., occupies a building behind the headhouse and extending across the tracks. Along each side of this is a broad corridor with stairways to the train platforms below, and the waiting room has a door at each stairway. Outgoing passengers pass through these doors, while incoming passengers pass along the corridors to the main hall. The top of the trainshed is about level with the street, as shown. A brief description of the new station and terminal was given in our issue of Oct. 29.

The building cost about $6,000,000, and the land, tracks, etc., about $6,000,000 more, while the total cost of the station, approaches, new belt line, etc., which are included in the new terminal works, represent over $40,000,000. The George H. Fuller Co. had the contract for the station. Jarvis Hunt was the Architect, and John V. Hanna is Chief Engineer of the Kansas City Terminal Ry.

Pointers on South American Trade—People who sell in South America should post themselves on the commercial law of the country with which they are dealing.

At a recent conference of manufacturers in Boston, the story was told of a representative of one of the leading makers of typewriters, who opened an office in the Argentine with a view to selling machines on long credit by means of the installment-lease system so much used in this country. He sold one machine on which he received several payments, but then got nothing for some months, despite his urgent correspondence. One day the machine in question was sent in for repairs. Very naturally it was held and the purchaser notified that it would not be returned until some arrangement was made respecting the balance due.

The next day the agent of the typewriter company found himself in jail. There he stayed until the efforts of the American consul and a promise never to do it again secured his release. It seems that in that country a sale is a sale; the property changes hands "for keeps," and no string can be tied to it.

Another fact of importance was brought out, that is, European transportation lines have a system of rebates calculated to make it difficult for Americans to break in. A contract is entered into by a merchant in South America by which he agrees to have all his imports come by a certain line, in consideration for which he is to have a 10% ocean-freight rebate, payable six months later. This is enough to make it advantageous for him to have goods from this country sent to Europe and reshipped by the transportation company with which he has the contract, instead of shipping direct from here.

Business Results of the War—Evidences are multiplying that the cutting off of supplies from Europe is stimulating the creation of new industries in this country. As a result of the stoppage of potash shipments from Germany, the Pittsburgh Industrial Development Commission has organized and incorporated a company, to be known as the Farmers' Fertilizer Co., having $1,000,000 capital. Seven acres of land have been purchased and the company will employ 100 men in manufacturing commercial potash under a patented process. It will make use of the slag from the Pittsburgh mills, which heretofore has been a waste material, by mixing it with Tennessee phosphate. Orders have come from the nations at war for supplies, such as clothing, ammunition and guns.

A Vermont manufacturer of ammunition has recently received an order for $2,500,000 worth of rifle cartridges for one of the belligerent powers. In order to handle this contract, rush orders for $250,000 worth of machinery have been placed.

Robert Pluym, representing Pluym-Ochs, Ltd., Petrograd, in an interview at the offices of the American Express Co., 65 Broadway, New York, said that his firm was in the market for agricultural machinery, machine tools, and miscellaneous supplies. Russia, he said, had been spending yearly $500,000,000 for German goods, and that now the United States inevitably must get the bulk of this trade.

Municipal Bond Sales—A sharp falling off in municipal bond sales in November was reported by the "Financial Chronicle." They amounted to $12,779,800, compared with $30,708,700 in the corresponding month last year. The total sales this year aggregate $427,803,300, which is far larger than any previous year.

Plan of the Schenley High School, Pittsburgh

Prices of Engineering Materials

PRICE CHANGES AND THE BUSINESS OUTLOOK

Sentiment, the incentive which starts the mainspring of business, has decidedly improved. From all parts of the country come reports of a better feeling among manufacturers, distributors, and men conversant with the business situation. In many localities, improvement in business has already been seen, but this is by no means general, and in some cases the reverse is true. But there is a feeling that businss conditions will improve from now on, and in spite of the terrible happenings in Europe, this country can and must go on. Many new avenues of business have been looked into, but as yet only a little work has been done toward their development.

Of primary importance, so far as construction work is concerned, is the announcement that the Chicago, Milwaukee & St. Paul will immediately start on the electrification of 107 miles of its Mountain Division. This is the first important railway contract that has been let since the war, and emphasizes the advantage of working when material and labor are low.

Orders for munitions of war and supplies for the armies in Europe have been exceedingly large. Various estimates are given as to the total amount of these orders, but because of duplication and the impossibility of securing any real information until shipments are being made, it is out of the question to form any exact estimate as to their value. They undoubtedly will run into the hundreds of millions of dollars, and it would seem as though the stream of goods to Europe had only started.

Numerous factories have been built as a result of the war, chiefly by makers of munitions of war, but other manufacturers are making preparations to do an increased business. More attention is being paid to the manufacture of alloy steel and electrical steels than ever before, and laboratory experiments have been started on the manufacture of dye stuffs. There is no doubt that these materials can be made in the United States just as satisfactorily as abroad, if we only have to do it.

An announcement by the President of the United States that hereafter there will be more coöperation between the Government at Washington and the railroads, was received with delight. That the people are getting tired of a lot of regulations aimed at the railroads, is perhaps seen in the referendum vote repealing the Missouri Full Crew Law. During the last week in November, the Interstate Commerce Commission handed down a decision allowing rate increases in the West and in the South.

The iron and steel industry of the country is working at perhaps 30% of capacity. New orders are being received at about that rate. Stocks are not accumulating, and it is evident that prices are near bottom. Some exceedingly low quotations have been made for the delivery of fabricated material for use by the Isthmian Canal Commission, and cast-iron pipe is lower, perhaps, than before in a great many years. It is reported that the Pennsylvania R.R. bought cast-iron pipe for $17, delivered to lines of railway. The city of Boston recently purchased pipe at $19.70. Similar low quotations have been current in other branches of the trade.

It would seem as though this were a good time for municipalities to make improvements. Recently a small water works job was let, a job which would ordinarily cost $60,000 to $65,000, and there were 42 contractors who put in bids for the work. On a government job, more than one hundred sets of plans were requested. Contractors all over the country are anxious to do some kind of work, and perhaps too anxious for their own advantage. It would be better for some of them to stop work for a year or so rather than take contracts at figures where there can be no hope of a profit.

Contractors on the New York subway have been greatly disturbed by contemplated action under a 17-year-old law which had never been enforced. This alien labor clause, reference to which is made in another column, will not tie up the building of subways in the city, but may delay them somewhat for the next two or three months. It will be possible to secure enough laborers who have naturalization papers, even if the law is not declared unconstitutional. It must be pointed out that this is an especially good time to test such a law.

Building operations continue to fall off. In October they were about 70 per cent. of the corresponding month last year. In November they will be somewhat less. New building is restricted more by title companies' and the banks' refusals to lend, than anything else. At least two corporations have been organized in New York to buy up any real bargains in real estate.

Interest in shipbuilding is reviving. An announcement has been made that a $2,500,000 drydock will be built on the Pacific Coast, the Fore River shipbuilding plant at Quincy, Mass., will be enlarged, and there are inquiries in the steel market for about 20,000 tons of plates and shapes which will be required for coastwise vessels and vessels using the Panama Canal. More than three-quarters of a million tons' register of foreign vessels has been transferred to the American flag as a result of recent legislation.

Trading was resumed on the New York Stock Exchange on November 28 This applies to trading in bonds only, and these above a prescribed minimum limit. The Stock Exchange had been closed since July 30. It is interesting to note that about 78 stocks are now selling through the New York Stock Exchange Clearing House at prices above those recorded on July 30.

LABOR

Probably more men are unemployed in the City of New York than ever before in the history of the city, and those conversant with the situation fear there will be more unemployed this winter than ever before. This seems rather improbable. It is evident that business conditions are improving and will shortly take up in a large measure the great horde of unemployed. But this has no effect on labor unions, who continue to make demands for shorter hours and higher wages. A long forgotten law in New York prohibits the employment of any but citizens of the United States on public works. This, unless it is found unconstitutional, will throw out of employment a great number of excavators and other rough laborers, but the unions constantly say that there are 25,000 men in this city, who can do this work, but will be unwilling to work with a pick and shovel, or anything else for that matter, for less than $3 per day. Immigration is at about one-third of the normal rate. In September the number of aliens who entered this country was less than 30,000. During the first nine months of the year only 610,000 came to the United States, while in the fiscal year ending June 30, 1909, only 751,000 aliens came to the country. It is evident that there will be a thorough revamping of the immigration law aimed to keep out of this country Europeans who might come as a result of the great war. Wages are practically unchanged at $1.60 per day.

CEMENT, LIME AND BRICK

Cement—More than the usual cutting has been going on by the small manufacturers of cement, who are endeavoring to dispose of surplus stocks in the markets of New York and vicinity. These cuts range from 5 to 7½ cents, but no trustworthy evidence is forthcoming that the larger manufacturers have departed from their regular quotation of $1.58 New York. Production is being curtailed, and manufacturers are seeking to avoid the accumulation of any more stocks, during the winter months, than are necessary. There is a general note of optimism, however, and many feel that with the advent of spring conditions will show a material improvement. Prices in the West are unchanged from last month.

The quotations given below do not include the charge of 40 cents made for bags, but are for barrels of cement delivered at the points named, in cloth sacks less their charge:

Boston	$1.32	Chicago	$1.10
Cleveland	1.25	Detroit	1.14
Duluth	1.33	Jersey City	1.06
Minneapolis	1.30	New York	1.18
Pittsburgh	1.05	St. Paul	1.30

Lime—Business continues quiet and prices are unchanged; 97c. per barrel for state common, 200 lb. net; $1.37 for 300 lb. barrel; $1.55 for 300 lb. finishing; $1.10 for 200 lb. finishing; and $1.72 for 350 lb.

Brick—Prices are about the same as last month, shipments on the river much restricted. Prices are not so low as would be expected under the circumstances, as $5.25 is quoted for Hudson River Common.

IRON AND STEEL

Little change is shown in the iron market, compared with last month. While sentiment is more cheerful, actual business booked has not been much larger, and from the coke production, pig-iron output, and the operation at the mills, it can be seen that the steel industry is working at about 30% of its maximum capacity. The orders received by manufacturers in the last month include approximately that figure. It is well to point out at this time, while the orders from foreign nations for munitions of war have been large in point of dollars, they have not affected the steel industry greatly in point of tonnage. Interest is still centered in the outcome of the railway rate case, and it is believed on practically all sides that a new era is dawning, and one in which the blind antagonism to railways and big business will be at an end. Should the railways be in a position to release orders for immediate improvements, the iron trade would be greatly stimulated.

Pig-Iron—Toward the end of the month the pig-iron market brightened considerably, and sales of foundry grades from Buffalo furnaces aggregated fully 200,000 tons. Most of this business was taken by small foundries in New England and on the Atlantic Seaboard, but one concern, the American Radiator Co., purchased well over 100,000 tons. The price was attractive, and buying resulted in quotations of 25c. more per ton. Most of the furnaces in that district are now well sold up for the first quarter of 1915, and some of them have considerable business in the second quarter. In the Southern field prices are maintained at $10 per ton for No. 2 in Birmingham. The Steel Corporation has recently sold some foundry iron for delivery in Cincinnati, which includes several attractive lots. Southern foundry interests are somewhat busier. Some machine tool builders have been exceedingly active. The attractive prices at which pig-iron has been offered have stimulated activity in more than one line.

Quotations for pig-iron in lots of 100 tons or over at the points named are as follows: Cincinnati: Southern Foundry No. 2, $13.00 to $13.50; Northern Foundry No. 2, $14.25 to $14.75; Northern Foundry No. 3, $14.00 to $14.25.

In New York, iron is quoted as follows: No. 2-X Northern Foundry, $13.75 to $14.25; No. 2 plain Northern Foundry, $13.75; No. 2 Southern Foundry, delivered tidewater, N. Y., $14.25 to $14.50.

In Birmingham, Southern Foundry No. 2 is $10 to $10.25. Several sales have been made at the latter figure. In Chicago, Northern Foundry No. 2 is $12.50 to $13. In Pittsburgh, bessemer iron is $14.70 and basic $13.35 to $13.45. This includes the 95-cent freight rate from the Valley to the Pittsburgh District.

Steel Rails—Some business has developed, and the New York Central has put in an order for 25,000 tons, which went to the Lackawanna Steel Co. This is only about 20% of the normal requirement of the road mentioned, but so far no other roads have placed any orders of importance. An inquiry is in the market for 30,000 tons of rails for Norway, but the hopes of getting this order are not great. Quotations for lots of 500 tons or over are unchanged. Standard sections of bessemer are $28, and basic $30. These quotations are per net ton f.o.b. Pittsburgh. Girder rails in 30-ft. lengths are $36.40 per gross ton, and in 60-ft. lengths $38.40, both f.o.b. New York. Other quotations f.o.b. Pittsburgh for large lots are as follows: Standard sections, $1.25; 25- to 45-lb. sections, $1.15; 16- to 20-lb., $1.20; 12- to 14-lb., $1.25; 8- to 12-lb., $1.30. All of these quotations are per 100 lb. Relaying rails in New York are cheaper at $19 to $19.50 per ton.

Structural Shapes—Reports of the Bridge Builders' Society indicate that fabricating shops of the country are operating to about 35% of normal. Railroads are doing practically nothing and there is less building in prospect than a month ago. The mills are operating to about 30% of maximum capacity. Prices are $1 to $2 per ton lower than last month, and for large lots at the mill Pittsburgh are as follows:

I-beams 3 to 15 in., channels 3 to 15 in., angles 3 to 6 in., and tees 3 in. and over, 1.10c. Other quotations are as follows: I-beams over 18 in., H-beams over 18 in., channels over 16 in., and angles over 6 in., 1.20c.; tees, 1.15c.; deck beams and bulb angles, 1.40c.; hand-rail tees, 1.85c. Cutting to specified lengths is charged for at the following rates: Under 3 ft. to 2 ft., inclusive, 25c. per 100 lb.; 2 ft. to 1 ft., inclusive, 50c.; less than 1 ft., $1.55. No charge is made for cutting to specified lengths over 3 ft.

In Chicago the base price is 1.25@1.34c. In New York, 1.26@1.31c. In San Francisco, 2@2.05c.

Plates—Improvement is evident in the demand for plates. It is probable that several boats will shortly be laid down. These will be used in the coastwise trade and also through the Panama Canal. The base price is 1.05c., Pittsburgh. This is for gages ¼ in. and over; for gages under ¼ in., to and including 3/16 in., 1.15c. is demanded. In Chicago mill deliveries are 1.25@1.30c., and plates from store are 1.65@1.75c. In New York mill shipments are 1.31c.

Pipe—Inquiries for line pipe have been postponed and the mills are operating to only a small ratio of their capacity.

Discounts have been revised, making net prices lower. Revised discounts applying to standard lists are as follows:

	Black	Galvanized
¾- to 2-in. steel, butt welded	81%	72½%
2½- to 6-in. steel, lap welded	80%	72½%
7- to 12-in. steel, lap welded	77%	66½%

At these discounts, the net prices of pipe per foot, in large lots, at Pittsburgh are as follows:

Diameter	Cents: Black	Cents: Galvanized	Diameter	Cents: Black	Cents: Galvanized
¾-in.	2.20	3.15	5-in.	29.60	42.20
1-in	3.24	4.67	6-in.	38.40	54.60
1¼-in	4.38	6.30	7-in.	55.00	80.00
1½-in	5.25	7.55	8-in.	57.50	84.00
2-in.	7.05	10.15	9-in.	79.50	$1.16
2½-in.	11.70	16.70	10-in.	95.00	$1.38
3-in.	15.25	21.80	11-in.	$1.06	$1.55
4-in.	21.80	31.00	12-in.	$1.17	$1.70

Sheets—Some inquiries have been received for export, the chief one being from Italy. Prices are from $1 to $2 per ton less than last month, as follows:

The following quotations are for large lots of sheets in Pittsburgh, and small lots from store, New York.

	Cents per Pound: Large lots Pittsburgh		Ware house delivery New York	
	Black	Galv.	Black	Galv
No. 10	1.55	1.90	....	....
No. 12	1.55	2.00	....	....
No. 14	1.60	2.00	....	....
No. 16	1.65	2.15	2.35	2.75
Nos. 18 and 20	1.70	2.30	2.40	2.90
Nos. 22 and 24	1.75	2.45	2.45	3.05
No. 26	1.80	2.60	2.50	3.20
No. 27	1.85	2.75	2.55	3.35
No. 28	1.90	2.90	2.60	3.50

Cast Iron Pipe—Prices of cast-iron pipe are practically the lowest they have been in a generation, and the great competition among manufacturers of pipe has resulted in considerable buying, particularly by those water departments which are well fixed financially. A recent sale of about 4000 tons in the City of Boston brought out the price of $19.70 delivered, while a reported sale to the Pennsylvania R.R. was made on a basis of $17 delivered on the property of the company. The following quotations are per net ton at the points named:

Birmingham, Ala., 4- and 6-in., $19.50.
New York 4-in. and larger $20 to $20.50.
Chicago, 4 in., $26, 6- to 12 in., $24; Over 12-in., $23.
Cleveland, 3- to 20-in., $21.50, 24- to 28-in., $21.
Gas pipe is a dollar per ton higher in all markets.

Steel Sheet Piling—The market is quiet, but the base price in Pittsburgh is practically unchanged at $1.55 to $1.60.

Wire Rope—Revised discounts are 47 and 2½% from list for galvanized and 55 and 2½% for the bright. At these discounts the net price of wire rope at the mills is as follows:

Diameter in inches	Price per foot: Cast steel	Crucible steel	Plow steel
2½	$0.76	$0.91	$1.08
2¼	0.62	0.73	0.86
2	0.50	0.58	0.68
1¾	0.39	0.48	0.56
1½	0.29	0.35	0.40
1¼	0.20	0.24	0.28
1	0.14	0.16	0.19
¾	0.09	0.10	0.11
⅝	0.06	0.07½	0.08

Steel Shapes—Quotations from warehouse, New York, are unchanged from last month as follows:

Refined iron.	Cents Per lb.
1 to 1⅞ in., round and square	1.80
1½ to 4 in. x ⅜ to 1 in.	1.80
1½ to 4 in. x ¼ to 5/16 in.	2.00
Norway bars	3.20
Burdens bar iron	3.15
Soft steel:	
¾ to 3 in., round and square	1.80
1 to 6 in. x ⅜ to 1 in.	1.80
1 to 6 in. x ¼ and 5/16 in.	1.95
Rods—⅝ and 11/16 in.	1.90
Bands—1½ to 6x3/16 in. to No. 8	2.10
Beams and channels—3 to 15 in.	1.85
Angles:	
3 in. x ¼ in. and larger	1.85
3 in. x 3/16 in. and ⅛ in.	2.30
1½ to 2¾ in. x 3/16 in. and thicker	1.95
1½ to 2½ in. x ⅛ in.	2.05
1 to 1¼ in. x 3/16 in.	2.05
1 to 1¼ in. x ⅛ in.	2.10
1½ to 2½ x ¼ in.	2.00
1½ to 2½ x 3/16 in.	2.10
3 in. and larger	1.90

Old Material—Prices must be near bottom, for it scarcely pays to collect, sort and ship some kinds of scrap. In New York prices have declined 25 to 50c. a ton from last month. Dealers' selling prices are as follows:

	Per Net Ton
Heavy-melting steel scrap	$7.00@ 7.25
Pipes and flues	7.00@ 7.25
No. 1 railroad wrought	8.50@ 9.00
Stove plate	7.25@ 7.50
Malleable cast	6.50@ 7.00
No. 1 machinery cast	9.50@10.00
No. 1 yard wrought, long	8.00@ 8.50
Wrought turnings	5.00@ 5.50

In Chicago a better feeling is evident, and, although quotations are lower than last month, there has been a slight advance from the prices quoted early in November. Prices are as follows:

	Per Gross Ton
Heavy-melting steel scrap	$8.00@8.25
	Per Net Ton
No. 1 railroad wrought	7.50@7.75
No. 2 railroad wrought	7.00@7.25
No. 1 cast scrap	8.50@8.75
Pipes and flues	5.50@5.75
Agricultural malleable	7.25@7.50
Railroad malleable	7.75@8.00

Pittsburgh markets are exceedingly dull, but there is a better feeling among dealers than a month ago. Quotations per gross ton are as follows:

Heavy-melting steel scrap	$9.25@ 9.50
Re-rolling rails	11.50@12.00
No. 1 foundry cast	11.00@12.00
Old car wheels	9.50@10.00
Machine shop turnings	7.50@ 8.00
Railroad malleable	9.00@ 9.50

Chain—Prices are steady and without change, as follows: These prices are per 100 lb., f.o.b., Pittsburgh:

3/16 in.	$7.50	½ and 9/16 in.	$3.00
¼ in.	4.95	⅝ and 11/16 in.	2.90
5/16 in.	3.95	¾ and 13/16 in.	2.80
⅜ in.	3.40	⅞ and 15/16 in.	2.70
7/16 in.	3.20	1 to 1¼ in.	2.60

EXTRAS TO ABOVE LIST PER 100 POUNDS

	For BB	For BBB
3/16-in. and ¼-in.	$1.50	$2.00
5/16-in. and larger	1.25	1.75

Freight Rates—The freight rates on finished steel products from the Pittsburgh district, including plates, structural shapes, merchant steel and iron bar, pipe fittings, plain and galvanized wire, nails, rivets spikes, and bolts, black sheets (except planished) chains, etc., are as follows in cents per hundred pounds: Albany, 16; Buffalo, 11; Boston, 18; Baltimore, 14½; Canandaigua, 13½; Cleveland, 10; Columbus, 12; Cincinnati, 15; Chicago, 18; Denver, Colo., 85½; Harrisburg, 14½; Louisville, 18; New York, 16; Norfolk, 20; Philadelphia, 15; Rochester, 11½; Richmond, 20; Scranton, 15; St. Louis, 23; Washington, 14½.

Freight Rates via Panama—Rates of freight per 100 lb. in carload lots from the points named to Pacific coast ports are current for shapes, reinforcing bars, plates, wire and similar products:

New York, 25c.; Pittsburgh, 41c.; Youngstown, 43c.; Niles, 43c.; Wheeling, 41c.; Steubenville, 41c.; Johnstown, 39.5c.; Coatesville, 34c.; Steelton, 35c.; Bethlehem, 32.5c.; Cleveland, 44c.; Chicago, 55c.

Wire—The demand for wire has shown a distinct improvement, due to large orders coming from the nations at war. Prices are as follows: Plain wire, Pittsburgh, is $1.40 to $1.45; galvanized wire, Pittsurgh, $1.80 to $1.85; painted barbed wire, Pittsburgh, $1.60 to $1.65; galvanized barbed wire, Pittsburgh, $2 to $2.05; galvanized staples, $2, and polished staples, $1.60. All these prices are per hundred pounds for large lots in the Pittsburgh market.

Coke—Prices show a slight improvement. For prompt shipments of furnace coke $1.50 to $1.60 per net ton at oven is demanded and for forward shipments, $1.75. For 72-hr. foundry coke the price is $1.75 for delivery during the first half of 1915. The output of coke is about 40% of maximum being figured at 206,000 tons weekly in the upper and lower Connellsville Region the middle of November.

REINFORCING MATERIALS

Bars, Concrete Reinforcing—Prices of bars are fairly steady, but it is probable that an attractive quotation could be obtained for a large lot. Prices are as follows:

	Cents per pound		
Size	Mill Shipments Pittsburgh	Warehouse Pittsburgh	Delivered from Warehouse New York
¾-in. and larger......	1.15	1.60	2.20
⅝ in.	1.20	1.75	2.25
½-in.	1.35	1.90	2.30
⅜-in.	1.45	2.00	2.40
¼-in.	1.75	2.25	2.70

Triangle Mesh—Business is quiet, but prices are without change as follows:

PRICE PER 100 SQ.FT.

		Plain material		Galvanized	
Style No.	Cross sec. area per ft. width	Carload lots	Less than car lots and over 10,000 sq.ft.	Carload lots	Less than car lots and over 10,000 sq.ft.
*4	$0.102	$1.00	$1.23	$1.12	$1.34
5	0.077	0.80	0.97	0.89	1.00

*This material is made in regular widths of 18, 22, 26, 30, 34, 42, 46, 50, 54 and 58 in. Standard lengths in rolls are 150, 250, 300 and 600 ft.

METALS

Copper—Extensive buying by domestic consumers took place early in November, and for ten days or thereabouts, very brisk business resulted. Initial transactions were made at a quotation of approximately 11.20c., the lowest price reached for copper since 1908, and the market quickly advanced to 12.50c. cash New York for electrolytic. Practically all of this buying was by domestic consumers, but it cannot be said that the ultimate consumption of the metal purchased will be in the United States. It is known that a great deal was bought to fill orders for munitions of war and much of it for shipment to Europe in a partially manufactured state. Large buying has taken place of copper which will be used for locomotive fireboxes, and a great quantity of metal has been purchased for boiler tubes. There has also been considerable copper sheathing purchased. Except for export to Great Britain and neutral countries, there is little foreign business. Vessels sailing for Italian ports refuse to take copper since recent seizures, and the same is true of vessels sailing to Scandinavian and Holland ports. For metals consigned directly to neutral governments, there is practically no danger of seizure. Consumption of Lake copper is exceedingly large, and stocks are low. The price of electrolytic at the close of the month was 12.50c., and of Lake, 12.62½.

Tin—Speculative factors in the tin market are present in great numbers. The possibility of the closing of the Suez Canal by the Turks is just dangerous enough so that one dealer takes a chance on the metal getting through and another fears the canal will be closed. Shipments across the Pacific in English vessels are also attended with some risk. For this reason prices have advanced in spite of a very poor demand, and the quotation is around 34c. The arrivals during November, including the "Marquette," were figured at 2260 tons—considerably below normal consumption demand.

Lead—The market has shown fair strength, an advance of $4 per ton being announced Nov. 18. This brings the price to 3.90c. New York and 3.77½c. St. Louis. There have been heavy purchases of lead by manufacturers of ammunition. Then, too, the old prices were below the cost of production.

Spelter—Business is exceedingly quiet, but prices have advanced slightly, and in New York 5.30c. is quoted while in St. Louis 5.15c. is the price.

Antimony—The market is exceedingly irregular, and there is little buying. American manufacturers making shrapnel have use for antimony. Quotations are most irregular, at 17 to 18c. for Cookson's, 15 to 16c. for Halletts', and 13½ to 14½c. for other brands.

Aluminum—Prices have advanced slightly, and No. 1 ingots are now quoted at 19 to 19.50c. New York.

Miscellaneous Metals—Prices are higher, due to a better demand for copper and the scarcity of tin. For small lots in New York, prices are as follows:

Bismuth	$3.75 to $4.00
Brass tubes, iron-pipe sizes:	
½-in.	.16
¾- to 3-in.	.15
3½-in.	.15
4-in.	.16
Brass rods	.13¾
Brass sheets	.14
Solder, half and half guaranteed...............	.22
Zinc sheets	9 to 9½
Copper sheets, base	.17½
Pig tin (five-ton lots, cash)....................	.34

Old Metals—Somewhat better prices have been made, due to the advance in virgin metals. The following quotations represent those paid by dealers for old metals in New York:

	Cents
Copper, heavy and crucible..............................	10.50
Copper, heavy and wire..............................	10.00
Copper, light and bottoms..............................	9.00
Brass, heavy	7.75
Brass, light..............................	5.75
Heavy machine composition..............................	9.25
Composition turnings	8.25
Lead, heavy..............................	3.40
Lead, tea..............................	3.15
Zinc scrap	3.50

CLAY PRODUCTS

Flue Lining—Discounts are unchanged at 83% from list At this discount, the net prices per foot for New York delivery are as follows:

	Weight in lb.	Price per ft.		Weight in lb.	Price per ft.
4½x8½-in....	14	$0.06	8½x18-in....	45	$0.152
4½x13-in.....	20	0.076	13x13-in.....	45	0.145

MISCELLANEOUS

Wood Preservatives—Special preservatives for lumber are sold at the following prices per gallon delivered to points in this country: Pentin, a flame proof preservative, 80c. per gal.: Creolin, a creosote, flame proof, 45c. per gal.; Maretin, a preservative for marine use, 60c. per gal.

Lighterage Limits—The free delivery or "Lighterage Limits" in New York City are as follows: In Manhattan, from a point opposite the Fort Lee ferry, south along the Hudson River around the Battery and north along the East and Harlem Rivers to the Jerome Ave. Bridge at 155th St. In New Jersey, south from Fort Lee ferry to Bayonne City, points on the north and east shores at Staten Island, between Bridge Creek (Arlington) and Clifton, both inclusive, and including Elm Park, Erastina and Shooters Island. In Brooklyn, from 69th St., Bay Ridge, north to Pot Cove, Astoria, Long Island City.

Rubber—Prices of rubber show little change, and the supply seems more than sufficient for present needs. There is no embargo, and rubber is coming into the country in good quantities. Prices are as follows, per pound delivered in New York: Up River Para fine, 71 to 72c.; Up River Para coarse, 54 to 55c.; Cauchaou ball 53 to 55c. Scrap rubber is slightly lower, automobile tires being quoted at 5c., bicycle tires at 3 to 3¼c.; solid tires, at 5c ; while airbrake hose is 2½ to 3c., and inner tube 16 to 17c.

Railroad Ties—Business is at a standstill and quotations are nominal. Prices are as follows for yellow pine ties 7x9 in. by 8 ft. 6 in., 76c.; 6x8 in. by 8 ft., 64c.

Explosives—Dynamite of the kind generally used by contractors is approximately 11 to 13c. per lb., f.o.b. factory, in ton lots. Blasting powder, classified as "soda" grade, is sold at $1.20@1.40 per keg of 25 lb. in lots of 10,000 lb.

Exploders, per hundred, are sold at the following prices: 4 ft., $3.60, 6 ft., $4.10, 8 ft., $4.60, 10 ft., $5.10; 12 ft., $5.60; 16 ft., $6.60; 20 ft., $7.60, 25 ft., $9.10, 30 ft., $12, 36 ft., $14.60.

Caps in lots of 10,000 are $7.08 per thousand.

Blasting machines for 10 holes are $12: 25 holes, $20, 50 holes, $40, 100 holes, $60.

RAILWAYS

West Virginia—[illegible] & Western R R—[illegible] Charleston [illegible] Engr

Mississippi—[illegible] Plans are [illegible] for the extension of its railway [illegible] is Gen. Mgr

Kentucky—[illegible] R R—This company is [illegible] Ky, which [illegible] W H [illegible], Louisville, is Ch Engr

Illinois—[illegible] R R—Plans are being prepared by this company for the construction of a railway from Golconda to [illegible], Ill. [illegible] St Louis Mo, is Ch Engr

Iowa—[illegible] Western R R—Plans are being prepared [illegible] of its railway from [illegible] Chicago Great Western [illegible] Iowa, is Gen Mgr

✦**Montana**—[illegible] Milwaukee & St Paul R R—This company has awarded the contract to the MONTANA POWER CO., Butte, Mont, for the completion of the electrification of its line from Three Forks [illegible] Deer Lodge, Mont

Northern Pacific Ry—This company has taken over the [illegible] R R, a [illegible] line from Armstead to [illegible] the line from [illegible] Twin Bridges W L Darling St Paul. [illegible] of the Northern Pacific

Arkansas—Arkansas & Saline River R R—Plans are being prepared by this company for the extension of its railway from [illegible] Ark. J H Allen [illegible] Ark, is Pres and Gen. Mgr

Fort Smith [illegible] & Eastern R R—Surveys have been made by this company for the extension of its railway from [illegible] Ark, about 21 miles. Henry Stroup, [illegible] Ark, is Pres and Gen Mgr

Texas—San [illegible] & Rio Grande Valley R R—Plans are being [illegible] by this company for the construction of a railway from [illegible] Tex, to [illegible] Tex, about 60 miles. S. A. [illegible] Tex, is Pres

Clinton & Oklahoma Western Ry—See item under Oklahoma

Texas—Texas New Mexico & Eastern R R—This company is being organized for the purpose of constructing a railway from San Antonio [illegible] Tex, about 172 miles Thomas Moore, [illegible] is Ch Engr

Oklahoma—A company is being organized to construct a railway from [illegible] Okla, about 20 miles. J. H. Morgan, [illegible] Okla, is interested

Clinton & Oklahoma Western Ry—Extensions from Clinton, Okla, to [illegible] Tex, and to El Reno, Okla, are contemplated by this company. Guy V. McClure, Clinton, Okla, is Ch Engr

Idaho—Oregon Short Line R R—The Commercial Club of Caldwell, Idaho, is urging this company to electrify its branch line from Caldwell to Wilder, about 11 miles. Carl Stradley, Salt Lake City, Utah, is Ch Engr

✦**Arizona**—Magma Copper Co—This company has awarded a contract to McARTHUR BROS. [illegible] St, New York N Y, for constructing a railway from Superior to Webster, Ariz, about [illegible] miles. Noted [illegible]

ELECTRIC RAILWAYS

South Weymouth, Mass.—The Bay State St Ry Co is contemplating plans for the construction of an electric railway from [illegible] to South Weymouth [illegible] Boston, is Vice Pres and Gen Mgr

New York, N. Y.—[illegible] According to press reports the [illegible] & Queens Traction Corporation [illegible] the construction of an extension of its line [illegible] Long Island City, is Secy, Gen Mgr and Pur Agt

Westfield, N. Y.—The [illegible] Westfield & Northwestern [illegible] has completed [illegible] for the construction of an electric railway from Westfield to the lake shore [illegible] is Gen. Mgr and Supt

Orange, N. J.—The City [illegible] plans to extend the [illegible] trolley line from the [illegible] to connect with the [illegible] of the [illegible] in Orange

Erie, Penn.—The [illegible] & Lake Erie Traction Co is preparing [illegible] about two miles of [illegible] in Erie. [illegible] is Gen Mgr

✦**Lancaster, Penn.**—The [illegible] & Lancaster [illegible] has awarded the contract for constructing [illegible] miles of [illegible] to [illegible] New York, N. Y. The new line will [illegible] & [illegible] and the Reading and Lancaster lines. Noted [illegible]

Middletown, Penn.—The [illegible] Co contemplates the extension of its electric railway from Middletown to [illegible] Harrisburg, is Pres and Gen Mgr

Titusville, Penn.—The Titusville [illegible] Traction Co contemplates [illegible] W. [illegible] is Mgr

Jacksonville, Fla.—The Commissioners of the [illegible] making preliminary arrangements for the construction of a railway [illegible] F. W. [illegible] is Ch Engr

Covington, Ky.—The South Covington & Cincinnati St. Ry. [illegible] for the extension of [illegible] Pres [illegible] Cincinnati, Ohio, is Gen Mgr

Evansville, Ind.—The Evansville & New Harmony Traction [illegible] to start work in the spring on the construction of an electric railway from [illegible] to New Harmony

Dwight, Ill.—[illegible] has been [illegible] by the [illegible] & [illegible] for the construction of an electric railway [illegible] to Dwight [illegible] is Gen Mgr and Pur Agt

Milwaukee, Wis.—The Milwaukee Electric Ry. & Light Co., has been [illegible] to consider plans for laying double tracks on its line on [illegible] Ave from Hartford and Edgewood Ave. Peter [illegible] is Mgr

Cedar Rapids, Iowa—The Iowa Ry. & Light Co. has secured the right-of-way and will soon start work on the construction of an electric railway to connect with the lines of the Waterloo Cedar Rapids & Northern Ry. R. S. Cook, Cedar Rapids, is Pur. Agt.

St. Paul, Minn.—The extension of its Dale and Forest St line [illegible] in St. Paul is contemplated by the St. Paul St. Ry. Co.

Garden City, Kan.—The Garden City Sugar Co. is preparing plans for the construction of an electric railway from its sugar beet plant to various points in Finney County.

St. Louis, Mo.—The United Ry. Co. of St. Louis is considering plans for the construction of a system of loops in the [illegible] section of the city. Robert McCulloch, St. Louis, is Pres., Gen. Mgr. and Pur. Agt.

Searcy, Ark.—The Searcy & Kensett Transportation Co. has been granted a franchise to construct and operate an electric railway from Searcy to Kensett, about four miles. H. E. Hill, Searcy, is interested.

Beaumont, Tex.—The Beaumont Traction Co. has been petitioned to consider plans for the extension of its line from Beaumont south to the refinery of the Magnolia Petroleum Co. G. W. Kellogg, Beaumont, is Mgr.

Huntsville, Utah—Surveys are being made by the Ogden Logan & Idaho Ry. Co. for the extension of its line from Idlerwood to Huntsville.

Tucson, Ariz.—The City Council has granted a franchise to the Tucson Rapid Transit Co. to extend several of its lines in Tucson. Frank E. Russell, Tucson, is Gen. Mgr.

San Francisco, Calif.—Tentative plans are being considered by the City Council for the construction of an electric railway from Keystone to the Hetch Hetchy Valley, about [illegible]0 miles. M. M. O'Shaughnessy is City Engr.

LIGHT, HEAT AND POWER

Poughkeepsie, N. Y.—The Central Hudson Gas & Electric Co. contemplates improvements and extensions to its plant at Poughkeepsie, at an estimated cost of $1[illegible],000. The plans include an 8000-kw. turbo-generator, an electric crane, construction of new substations and extension of transmission lines. F. M. Stark, Poughkeepsie, is Pur. Agt.

✦**Syracuse, N. Y.**—The Commissioners of Onondaga County have awarded the contract for power plant, heating and ventilating system at the County Tuberculosis Hospital, to the EDWARD JOY CO., Syracuse, at $76,179.

✦The Syracuse Lighting Co. has awarded the contract for the construction of a new generating station to the TAYLOR-HORNBY CONSTRUCTION CO., at about $[illegible]. The building will be 3[illegible]x68 ft., one story, steel frame.

Holmesburg, Penn.—It is reported that plans are being prepared for the installation of a new power plant at the Home for the Indigent, Holmesburg.

Johnstown, Penn.—The Dale Light, Heat & Power Co., Johnstown, contemplates building a power plant, estimated to cost $[illegible]0, at Dale, a suburb of Johnstown. C. F. Lancaster is Supt., Mgr. and Cont. Agt.

Pittsburgh, Penn.—Press reports state that bids are being received by George W. Gerwig, Secy. of the Bd. of Education, for electrical work at the McNaugher and Latimer Schools.

Hyattsville, Md.—(Official) The Mayor and City Council have appointed a special committee to investigate the feasibility of installing an electric light plant in connection with the present municipal water works plant. Two [illegible]-kva. units, [illegible] volt, 6[illegible] cycle will be required. J. C. Hawkins is a member of the Com.

Bay Minette, Ala.—(Official) See item under "Water Supply and Irrigation."

Bristol, Tenn.—The [illegible] Electric Co. has begun the construction of a second hydro-electric plant for the development of the water power of this region. The dam in question is across the middle fork of the Holston River near [illegible], Va., [illegible] miles east of Bristol. The machinery will not be installed before next spring, and will have a minimum of [illegible] hp. with a maximum of [illegible] hp.

Dresden, Tenn.—See item under "Water Supply and Irrigation."

Paducah, Ky.—The Kentucky Southwestern Electric Ry., Light & Power Co. is considering the construction of a power house, three substations, a repair shop, car houses [illegible] in connection with a railway from Paducah to Murray, a distance of [illegible] miles. H. C. Rhodes is [illegible] of the company.

✦**Alliance, Ohio**—The Building Commission of the new City Hall has awarded the contract for the heating and plumbing [illegible] in the building to [illegible] & [illegible], Alliance, at $[illegible]; the contract for the electric lighting was awarded to the [illegible] CONSTRUCTION CO., Alliance, at $[illegible].

Cleveland, Ohio—(Official)—Bids will be received until [illegible] by the Commissioner of Purchases and Supplies, City Hall, for general service pumps and equipment for the municipal electric light plant. F. W. [illegible], [illegible] East Third St., is Comr. of Light and Heat Dept.

✦**Anderson, Ind.**—The Board of Public Works has awarded the contract for furnishing the municipal electric light and power plant with a [illegible] and other equipment to the [illegible] & [illegible] Co., Pittsburgh, Penn., at $[illegible]. The lowest bid for furnishing a turbine generator was that of the Allis-Chalmers Co., Milwaukee, at $[illegible].

Tekonsha, Mich.—The City Council has granted a franchise to the [illegible] to install and operate an electric plant in Tekonsha.

Kankakee, Ill.—Bids will be received until Dec. 14, by the Board of Administration, Capitol Bldg., Springfield, Ill., for heating, electrical work and plumbing in a contagious disease building at the Kankakee State Hospital. James B. Dibelka, 29 South La Salle St., Chicago, is State Arch.

Lewistown, Ill.—Press reports state that the Lewistown Electric Co. will build a transmission line from its plant at this point four miles east into the country for the purpose of supplying electric current to the farmers along the line. C. J. King is Secy. and Supt. of the Lewistown Electric Co.

Belgium, Wis.—It is reported that the Milwaukee Northern Ry. Co., Cedarburg, Wis., plans to install a substation in Belgium to supply energy for lamps and motors in the surrounding territory. John St. John, Cedarburg, is Gen. Mgr. and Cont. Agt. for the Milwaukee Northern Co.

+Oelwein, Iowa—The Fayette Utilities Co., Oelwein, has awarded the contract for the construction of a power plant to the SCHMIDT BROS. CONSTRUCTION CO., 105 North Park St., Chicago, Ill.

+Aurora, Minn.—The Village Council has awarded the contract for the construction of a power house to the BOWBURKE CONTRACTING CO., St. Paul, Minn., at $13,661. The plant, with equipment, will cost about $27,000. Noted Nov. 5.

Canton, Kan.—It is reported that the municipal electric light plant was recently destroyed by fire at a loss of about $5000.

Kansas City, Kan.—The city will soon purchase, for its pumping station at Quindaro, a 5000-hp. feed water heater, a 500-hp. steam turbine driven boiler feed pump, a 20,000,000-gal. motor driven centrifugal pump and three 400-kw. transformers. W. M. Barclay is City Engr.

Pawnee Rock, Kan.—T. J. Stinson, Spearville, Kan., has purchased the electric-light plant at Pawnee Rock. He will reopen the plant, which has been closed down, and will install new engines and dynamos.

Wellington, Kan.—(Official)—Bids will be received until 2 p.m., Dec. 17, by the City Commissioners for engines, pumps, boilers, heater, switchboard and miscellaneous electric apparatus for the proposed new water works system and light plant in the city and substation at the Mayfield wells. Alternate bids will be accepted on steam turbines and cross compound corliss engines. The Benham Engineering Co., American National Bank Bldg., Oklahoma City, Okla., is Engr. in Charge.

Chamberlain, S. D.—The power house of the Chamberlain Gas Light & Power Co. was recently damaged by fire. It is reported that the plant will be rebuilt at once. Guy Kelley is Secy. and Mgr.

Michigan, N. D.—Preparations are being made for the installation of a municipal electric-light plant. Bonds have been voted for this purpose.

Hale, Mo.—The Citizens Light, Water & Power Co. contemplates building a new 16x60-ft. power house, and installing two boilers and a corliss engine. Fred Helbauer is Pres., Secy. and Treas.

Corpus Christi, Tex.—Henry M. Wallace, Pres. of the Corpus Christi Gas Co., plans to lay a natural gas pipe line from the White Point field, near Corpus Christi, to San Antonio, 150 miles. Gas will be supplied to a number of towns along the route. It is estimated that the project will cost about $1,500,000.

Groesbeck, Tex.—The Driscoll Pipe Line Co. has been incorporated in Limestone County, with a capital stock of $200,000, and plans to lay a natural gas pipe line from the Mexia fields to Corsicana and intermediate towns, and a second line from the same fields to Austin, about 150 miles. The incorporators are: Timothy J. Driscoll, Indianapolis, Ind., Lewis E. Willett and Percy A. Little, Buffalo, N. Y., Cornelius T. Herring, Amarillo, Tex.

Cushing, Okla.—The Cushing Electric Light & Power Co. plans to install a 500-kw. generating unit, including generator direct-connected to a corliss engine, boilers of return tubular type and some other equipment, at a total cost of about $30,000. H. Askin is Secy. and Mgr.

Santa Fé, N. M.—James A. French, State Engr., has approved the plans of John Borradelle and associates, for the establishment of a hydro-electric plant in White Rock Cañon, 15 miles from Santa Fé. A transmission line will be constructed from the plant to Santa Fé, Albuquerque, Las Vegas and Socorro.

Seattle, Wash.—The Board of Public Works has received the following bids for furnishing distributing transformers for the municipal electric-light system: Pittsburg Transformer Co., Pittsburgh, Penn., $28,434; Maloney Electric Co., $30,086; W. R. Hendry Co., Armour Bldg., Seattle, $29,127; General Electric Co., $29,137; Duncan Electric Mfg. Co., $36,853; Kuhlman Electric Co., $30,192; Allis-Chalmers Co., $29,808; Packard Electric Co., $29,779; Westinghouse Electric & Mfg. Co., $34,443.

Newport, Ore.—The Yaquina Electric Co. has increased its capital stock from $20,000 to $40,000 for the purpose of making additions and improvements in its system. The company is developing power sites in the vicinity of Yaquina, Ore. George Blanchard, Newport, is Mgr. and Cont. Agt.

Silverton, Ore.—The City Council is considering plans for the installation of an electric lighting system for the entire city. It is reported that bids will soon be asked for furnishing and installing the equipment. Bids will also be asked for supplying energy to operate the system for a period of years.

Placerville, Calif.—It is reported that the Standard Oil Co will build a $20,000 substation at Placerville.

BRIDGES

+Portland, Maine—The Commissioners of Cumberland County have awarded contracts for the construction of the bridge between Portland and South Portland to: The HOLBROOK, CABOT & ROLLINS CORPORATION, Boston, Mass., at $352,135, for foundation work, including piling; PHOENIX BRIDGE CO., Phoenixville, Penn., at $139,650, for the steel superstructure of the middle portion, including the draw; T. STUART & SONS CO., Newton, Mass., at $250,000, for the concrete superstructure of the remainder of the bridge. Noted Sept. 24, Oct. 1, Nov. 12 and 19.

Concord, N. H.—(Official)—It is expected that bids for the Pembroke Bridge over the Merrimack River will be received about Dec. 15. The bridge will be about 470 ft. long, four spans, two pony and two high trusses. W. B. Howe is City Engr. Noted Nov. 19.

+Charlotte, N. Y.—The Monroe County Building Commission and the Board of County Supervisors, Rochester, have awarded the contract for the construction of a Strauss double leaf bascule bridge over the Genesee River at Charlotte, to the PENN BRIDGE CO., Beaver Falls, Penn., at $231,940. List of bids noted Aug. 13.

Whitehall, N. Y.—The residents of Whitehall will ask the State Legislature for an appropriation of $25,000 for the purpose of repairing the South Bay Bridge, which is considered unsafe at present.

Perth Amboy, N. J.—Bids will be received until Dec. 7, by the Board of Chosen Freeholders of Middlesex County, New Brunswick, for the construction of pile and timber emergency rest piers for the Amboy Bridge over the Raritan River. Alvin B. Fox, Perth Amboy, is County Engr. Noted Nov. 12.

Bids for furnishing and placing 40-, 60- and 80-ft. piles for the Amboy Bridge were received from: General Contracting & Engineering Co., 29 Broadway, New York, N. Y., $8242; Henry H. Holmes, Jersey City, N. J., $9426, and Rhodes & Manvel, Elizabeth, N. J., $11,074.

+Pittsburgh, Penn.—The Commissioners of Allegheny County have awarded the contract for the construction of Bridge No. 15 over Pine Creek to the PENN BRIDGE CO., Beaver Falls, Penn., at $15,980.

+Princeton, W. Va.—The Commissioners of Mercer County have awarded the contract for the construction of three reinforced concrete bridges across the Bluestone River to the FARRIS BRIDGE CO., Pittsburgh, Penn., at $12,800 for the three. Noted Nov. 19.

Folkston, Ga.—Bids will be received until Dec. 15, by the Commissioners of Charlton County, for the construction of a bridge over the St. Mary's River between Charlton County and Nassau County, Florida.

Rome, Ga.—(Official)—Applications will be received by the Commissioners of Floyd County on Dec. 8, for the position of Consulting Bridge Engineer. The county will build three bridges, two of concrete, each about 300 ft. long, and one of steel, about 250 ft. long. All three will have 40-ft. roadways, and an 8-ft. sidewalk on each side of the roadway. J. G. Pollock is Chn. of the Comrs. Kieffer Lindsey is County Engr.

+Wetumpka, Ala.—The Yellow Pine Lumber Co. has awarded the contract for bridge construction in connection with building 10 miles of railway to J. M. GILLIS & SON, Brewton, Ala.

Pittsboro, Miss.—Bids will be received until Dec. 8, by the Highway Commissioners of Supervisors' District No. 1 of Calhoun County, for the construction of several bridges on the road from Pittsboro to the eastern boundary line of the district. A. A. Bruner, W. R. Byars and R. F. Provine are Highway Comrs.

Paducah, Ky.—See item under Light, Heat and Power.

Marietta, Ohio—(Official)—Bids will be received until 1 p.m., Dec. 16, by the Commissioners of Washington County, for the construction of the east abutment of the Elk Run Bridge, Lawrence Township. W. B. Alexander is County Audr.

Covington, Ind.—Plans are being prepared for rebuilding the bridge over the Wabash River at Covington, and it is expected that the contract will be awarded at the January meeting of the Commissioners of Fountain County. The west span, which was not damaged, will be left standing, and two new spans will be built at the east end, replacing the two which were entirely burned.

Richmond, Ind.—Press reports state that plans are almost completed for a new bridge over the Whitewater River, and that bids for its construction will soon be asked. Fred R. Charles is City Engr.

+Detroit, Mich.—The Common Council has awarded the contract for the construction of a concrete bridge over Connors Creek to THOMAS E. CURRIE, 20 McGraw Bldg., Detroit, at $5400.

Marquette, Mich.—Bids will be received until 2:30 p.m., Dec. 7, by Daniel S. Donovan, City Clk., for the construction of a 60-ft. girder bridge over the Carp River at Lake St.

Taylorville, Ill.—(Official)—Bids will be received until 9 a.m., Dec. 9, by C. A. Penington, County Supt. of Highways, Christian County, for the construction of two bridges; one, between Johnson and Taylor Townships, of three 90- and one 100-ft. span, requiring about 600 cu.yd. concrete and 19,830 lb. of reinforcing steel; estimated cost, $15,350. Buildings (continued)

Chicago, Ill.—[illegible] has prepared [illegible] the [illegible] at [illegible] to be [illegible] the State Bldg. [illegible]

Danville, Ill.—The construction of a temple, to cost $1[illegible],000, is contemplated by the [illegible] Association. James P. [illegible], [illegible] of the Association.

Joliet, Ill.—The Paul Revere Lodge of the Knights of Pythias is [illegible] the construction of a [illegible] temple at Ottawa and [illegible] St. Estimated cost, $[illegible]

Kankakee, Ill.—Bids will be received until [illegible] p.m., Dec. 14, by the Board of Administration, Capitol Bldg., Springfield, for the [illegible] of a [illegible] building at the Kankakee State Hospital.

Quincy, Ill.—[illegible] and Main St., is preparing plans for the construction of the [illegible] School. The estimated cost is $[illegible] Noted Sept. 24.

Madison, Wis.—Bids will be received until 2:30 p.m., Dec. 1[illegible], by M. E. [illegible], Secy. of the University of Wisconsin, Administration Bldg., Madison, for the construction of [illegible] building at the university.

Davenport, Iowa.—The [illegible] of Davenport are contemplating the construction of a $[illegible] [illegible] at Fifth and [illegible] St.

St. Paul, Minn.—[illegible] & [illegible], Archts., 5[illegible] Shubert Bldg., are preparing plans for the [illegible] of the St. Paul [illegible] building on [illegible] and Minnesota St., for [illegible] [illegible] Estimated cost, $[illegible]

Red Lodge, Mont.—Plans are being prepared by C. M. [illegible], Archt., [illegible], for a two-story hotel, store and theater building for the Red Lodge Theater Co. The estimated cost is $[illegible]

Belleville, Mo.—Bids will soon be received by the Belleville [illegible] Board, for the construction of the Carnegie Library at [illegible] and Jackson St. Estimated cost, $15,-[illegible] Noted Oct. [illegible]

Jefferson City, Mo.—Plans have been prepared by Frank [illegible], Jefferson City, for the construction of a seven-story [illegible] building at Madison and High St., for the Central [illegible] Trust Co. Estimated cost, $1[illegible]

Logan, Utah.—Bids are being received by Cannon & Fetzer, Archts., [illegible], Salt Lake City, for the construction of a [illegible] chemistry building for the Utah Agricultural College. Estimated cost, $1[illegible]

Bisbee, Ariz.—Bids will soon be received for the construction of a [illegible] hospital. The estimated cost is $[illegible] [illegible] is City [illegible]

✦Republic, Wash.—[illegible] VAN [illegible]KEN, Coeur d'Alene, [illegible] has been awarded the contract for the construction of a [illegible] at Republic. Estimated cost, $[illegible] [illegible] Spokane, are Archts.

Portland, Ore.—Bids will be received about Jan. 15, 1915, by the [illegible] Banks [illegible] building. D. C. Lewis [illegible] [illegible] Noted July 30 and Sept. [illegible]

Bids will be received about Jan. 1, 191[illegible], by the Commissioners of Multnomah County for the construction of a [illegible] reinforced-concrete [illegible] hospital. [illegible] & Webber, [illegible] of Commerce Bldg., are Archts.

The [illegible] of [illegible] Hall recently [illegible] by fire with a loss of $[illegible], contemplates rebuilding the structure. Estimated cost, $[illegible] A. A. [illegible] is [illegible]

✦The contract for the construction of the Shattuck School has been awarded to BOYAJOHN-ARNOLD CO., Panama Bldg., Portland, at $[illegible]. The lowest bid for the heating and ventilating was that of the Alaska Plumbing Co., $[illegible]. Noted Nov. [illegible]

Fresno, Calif.—Schwartz, Hotchkin & Schwartz, Archts., are preparing plans for the construction of a two-story and basement, [illegible]-ft. building on Tulare and L St., for F. M. Fossaler [illegible] Estimated cost, $7[illegible],000.

Los Angeles, Calif.—Robert H. Orr, Archt., Van Nuys Bldg., has prepared plans for the construction of a 56x1[illegible]-ft. building on South Park Ave. and 42d St. for the South Park Christian Church.

Los Angeles, Calif.—Plans are being prepared by H. Allen Reeves, Chamber of Commerce Bldg., for the construction of a building for the Cienaga School District. Estimated cost, $6[illegible] Noted Nov. 19.

Oakland, Calif.—Plans have been prepared by J. J. Donovan, Security Bank Bldg., for the construction of a reinforced-concrete high school at Magnolia and [illegible] St. Estimated cost, $16[illegible]

✦San Bernardino, Calif.—Contracts for the construction of a group of [illegible] school buildings were awarded as follows: GEORGE C. CONDON, Citizen's National Bank Bldg., Los Angeles, to construct the administration and manual arts building, $[illegible]; CRESSMER MANUFACTURING CO., Riverside, for the [illegible], science and home economics buildings, $[illegible],991. The estimated cost of the group is $2[illegible] Norman F. Marsh, Broadway Central Bldg., Los Angeles, is Archt. Noted Oct. 1.

San Diego, Calif.—Eugene Hoffman, Archt., Spreckels Bldg., has prepared plans for the construction of an apartment hotel for the [illegible] Hotel Co., of San Diego. Estimated cost, $1[illegible] Eugene Hoffman is Pres. of the company.

✦San Francisco, Calif.—The contract for the construction of a two-story addition to the Ferry Bldg., for the Board of State Harbor Commissioners, has been awarded to the [illegible] CONSTRUCTION & ENGINEERING CO. The estimated cost is $3[illegible] Noted July 30.

Plans are being prepared for the construction of a building on the Embarcadero, between Mission and Howard St., for the Board of State Harbor Commissioners. Estimated cost, $[illegible]

Fort George, B. C.—The Fort George Hotel recently destroyed by fire will be rebuilt at an estimated cost of $1[illegible],000.

RECORD BIDDING ON CONSTRUCTION

Not within the memory of the older engineers and contractors has there been such keen bidding on all classes of construction work. In a recent piece of work at Wappingers Falls, N. Y., there were forty-two bidders for the water supply system and thirty-seven bidders for the sewers. A new storehouse is to be built at the Washington Navy Yard, and to date there have been 136 applications for plans, of which five are duplications, that is, where firms have a Washington and a New York office, each would apply for the same plan. Of the remaining 131, thirty-seven are obviously subcontractors who would not bid on the entire proposition. Sixteen sets of plans have been returned by bidders evidently not interested. For the Rock Creek bridge in Washington there were [illegible] bidders, and for the high school, 1[illegible] bidders. A new post office will be constructed at Morristown, N. J., and already over 60 applications are on file at the Treasury Department for the plans of this work.

Philadelphia Builders Fail.—Notice has been received that [illegible] & [illegible] has been unable to meet its bills. A preliminary examination reports the total liabilities of the firm as $[illegible] and the total assets $1[illegible]. One of the important buildings the company now has under construction is the [illegible] Building, 14[illegible] South Penn Square, which is being completed.

* Awarded two contracts jointly.
† Trackage rights also to New York Municipal Railway Corporation.

Favorable Balance of Trade—Enormous purchases by European interests and their inability to sell to us is resulting in a large and unusually favorable balance of trade. Figures just compiled by Secretary of Commerce Redfern estimate that there was an excess of exports in November of $63,188,000.

The value of sugar exports in October was $6,984,929, an increase of $6,872,111 over October, 1913. Wheat exports were heavily increased, and exports of oats, rye and canned beef, which in normal years are practically nothing, jumped in huge proportion. The value of wheat exports for October was $4,344,636, against $1,884,352 in the previous year. It is estimated that in the five months ended November 30 exports of wheat have been 140,000,000 bu., only 5,000,000 bu. less than the exports in the entire year previous ended June 30. Oats exported in October were valued at $1,492,876, against $8040 the previous year.

Cartridges exported from New York were valued at $1,229,117, nearly ten times the amount for the corresponding month last year. Firearms exports were more than double what they were in October, 1913.

The great demand that is being filled for Europe in this country for war munitions is illustrated in the $2,239,547 worth of automobile trucks exported, against $66,040 last year. New York is getting only a part of the exports of these materials, much going from Chicago and Detroit through Canada.

Three aëroplanes went out of New York during the month, against none last year, and 594 motorcycles were shipped, against 168 the year before. Exports of horses were 342, against 135, valued at $99,145, against $92,368 the previous year. A great part of the horse shipments are going from Gulf ports. Freight room here is reported to be scarce, a rate named yesterday being $65, against the normal $25 per horse. The value of drugs doubled, amounting to $632,588.

Some of the big increases in October exports to neutral countries close to Germany were those to Italy, the value being $5,108,214, against $3,258 643 the previous year; Denmark, $5,041,028, against $582,618; Norway, $2,526,416, against $571,717; Sweden, $2 915,119. Even Iceland figures in the export trade, taking $89,988, chiefly in wheat and oil, against $512 the previous year There were no direct exports to Germany and Austria.

That the stream is only beginning is evident from the resumption of cotton shipments, the further demands for wheat and numerous inquiries for manufactured goods. On Dec. 1 an inquiry was received for 2,000,000 yd. of cloth and an order booked for 500,000 pairs of shoes.

A New Enterprise—The old dry-goods store of Stern Bros. on West 23d St., New York, N. Y., will be remodeled and used as a public food market, to be known as the Cosmopolitan Garden. It will be on the order of the Convent Garden of London, and will contain more than 150 booths on the first and second floors, which will be leased. The estimated cost of the alterations is $300,000. Starrett & Van Vleck, New York, are the Archs.

Company Not to Retire—Rumors have been circulated to the effect that the Best Mfg. Co., Pittsburgh, Penn., intended retiring from the piping business. The company wishes to emphatically deny these rumors and assure the trade which has known the Best Mfg. Co. for over 30 years that it is now, and intends to continue, in the piping business.

Contracts to Be Let

Bids received until Dec. 22, 1914

Barge Canal Work

STATE OF NEW YORK

OFFICE OF SUPERINTENDENT OF PUBLIC WORKS.

Albany, November [illegible], 1914.

Y., until twelve o'clock noon of Tuesday, December 22d, 1914, at which place and hour they will be publicly opened and read, for improving the Cayuga and Seneca canal pursuant to the provisions of Chapter [illegible] of the Laws of [illegible] and Chapter 147 of the Laws of [illegible] and of the amendments thereto, as follows:

[illegible] CONTRACT [illegible]

Cayuga and Seneca Canal—Section [illegible]

For the removal of buildings, etc., at Seneca Falls, N. Y.

Sheet [illegible].

And for the construction of Barge Canal terminals pursuant to the provisions of Chapter 746 of the Laws of 1911, and of the acts supplementary thereto, as follows:

[illegible] TERMINAL CONTRACT NO. 18.

For constructing a [illegible] bridge and cut-off wall at [illegible].

Contract [illegible], sheets 1 to 12, inclusive.

Plans [illegible] and detailed specifications, engineer's estimate of quantities, proposal blanks, form of contract and bonds required and other information for proposers may be had at the office of the Superintendent of Public Works at Albany, N. Y., at the office of the Assistant Superintendent of Public Works for the Middle Division at Syracuse, N. Y., at the office of the Assistant Superintendent of Public Works for the Western Division at Rochester, N. Y., and at the [illegible] office, Builders' Exchange, Buffalo, N. Y.

[illegible] plans or drawings may be obtained from the State Engineer and Surveyor at Albany, N. Y., upon payment to him of the cost of preparing them.

[illegible] will be paid [illegible] of the work done at the [illegible] must be accompanied by [illegible] in the form of a draft or certified check [illegible] in the city of Albany [illegible]

[illegible]

Award, if made, will be made to the person or persons whose proposal shall be lowest in cost to the State for doing the work and which shall comply with all provisions required to render it formal. Before any award shall be made the lowest bidder will be required to satisfy the Superintendent of Public Works of his ability to provide suitable equipment and materials for the proper performance of the work.

The right is reserved to reject all proposals and readvertise and award the contract in the regular manner if, in the judgment of the undersigned the interests of the State will be promoted thereby.

DUNCAN W. PECK,
Superintendent of Public Works.

Bids received until Dec. 9, 1914.

Somers Point—Longport Boulevard

Atlantic City, N. J.

Sealed bids will be received by the Board of Chosen Freeholders of Atlantic County, N. J., at Twelve o'clock noon, December 9th, 1914, in Memorial Hall, Atlantic City, N. J., for the improvement of the Somers Point-Longport Boulevard, Atlantic County, N. J.

Said boulevard to be [illegible] miles long, graveled to the width of [illegible] feet. Contract will include furnishing in place [illegible] with concrete head walls, building small [illegible] timber pile bridges, and furnishing in place [illegible] timber bulkheads.

Plans and specifications may be seen at the office of the Engineer for Atlantic County at No. 636 Bartlett Building, Atlantic City, and copies may be had for a deposit of $[illegible] for each set of plans and specifications. Such deposit will be returned if plans and specifications are returned in good condition by noon, December [illegible], 1914.

Certified check to the amount of $[illegible] will be required of each bidder and a bond in the full amount of the contract will be required of the Contractor.

The right is reserved to reject any or all bids.

GEORGE B. JEFFRIES,
Chairman Road Committee.

A. H. [illegible],
Engineer for Atlantic County.

Bids received until Dec. 10, 1914.

Highway Work

OFFICE OF THE STATE COMMISSION OF HIGHWAYS

Albany, New York, Nov. [illegible], 1914.

Sealed proposals will be received by the undersigned at their office, No. [illegible] Lancaster Street, Albany, N. Y., at 1 o'clock p.m., Thursday, December 10th, 1914, for the improvement of highways in the following counties:

[illegible] county ([illegible]), Cayuga county ([illegible]), Columbia county ([illegible]), [illegible] ([illegible]), Jefferson ([illegible]), Madison ([illegible]), [illegible] ([illegible]), Orange ([illegible]), Oswego ([illegible]), [illegible] ([illegible]), [illegible] ([illegible]), [illegible] ([illegible]), Warren ([illegible]), Washington ([illegible]), Westchester ([illegible]).

Maps, plans, specifications and estimates may be seen and proposal forms obtained at the office of the Commission in Albany, New York, and also at the office of the [illegible] in whose division the road is to be constructed. [illegible]

[illegible]

The right is reserved to reject any or all bids.

JOHN N. CARLISLE, Commissioner.

R. K. FULLER, Secretary.

Building Operations Drastically Curtailed

Country-wide reports show a severe reduction in contemplated construction. It is more noticeable this month than any time since the war began. In Philadelphia the returns were the smallest for any November since 1907. In Detroit operations fell below $1,000,000 for the first time in several years. In New York despite the unsatisfactory operations last year—the smallest since 1903—it is probable that 1914 will make a new low record since that year. In Hoboken, N. J.—perhaps more adversely affected by the war than any other American city—the contemplated buildings only amounted to $1650, and in August, $2727. Reports from Milwaukee state that much work is postponed until spring. The loss since the war began has been progressive except where influenced by local conditions in October—for a loss of 4% was reported in the combined return of 52 cities in August; 37% in 55 cities in September; 17% in 58 cities in October, and 29% in 52 cities last month.

In 19 Eastern cities there was a falling off of 33% in November, but for the 11 months the decrease was only 1%.

Cities in the Southern States have had to contend with the lack of funds due to the inability to sell cotton. In seven cities there was a falling off of 52% for the month and 15% for the 11 months.

The Middle West shows a decrease of 15% in 21 cities, but for the period January to December there has been a small gain.

Chicago is the conspicuous example of a large city where a gain is shown. In most of the large cities the falling off has been greater in proportion than in cities of less than half a million population. A comparison with the corresponding month in 1912 would be far more unfavorable, for a slump was well under way this time last year.

On the Pacific coast conditions are not so bad, according to the reports, a loss of 14% being shown in seven cities, but in October there was a loss of more than 20%.

The following table shows the contemplated building operations from plans filed during November. A comparison is made with the corresponding month last year. Figures are also given showing operations proposed in the 11 months of the two years mentioned.

RELIEF WORK IN PITTSBURGH

The City Council, Pittsburgh, Penn., on Nov. 23, appropriated $80,000 to provide 40,000 days' work at $2 per day, work to be started immediately on two public improvements, the Woodland Avenue Extension and the River View Park Boulevard widening. All police stations in the city have been turned into relief stations, and clearing houses for the collection and distribution of foodstuffs and supplies. Pittsburgh has been more seriously hit by the present hard times than in the panic of 1907. The mills of the Steel Corporation are running about 35% of capacity, and the Jones & Laughlin Co., 24%. Car builders are practically out of work, and more than 2000 miners are unemployed and have been unemployed for several weeks. The police department, besides providing lodging for the homeless men, is furnishing hot coffee and bread at breakfast time each day. Instead of laying off men as is usual at this time of the year in the Park and Sewer Department, the city is adding to the number of employees. The County Commissioners at a meeting last week decided to continue county road work throughout the winter if possible, at least to not stop any job definitely but continue until work is made impossible by the severity of temperature.

The Koehring Machine Co., Milwaukee, Wis., has taken over the Dennis Traction Grader & Loader Co., and will proceed at once to manufacture and place the Dennis traction grader and loader on the market.

Engineering Sales Co., 114 Liberty St., New York, has recently been organized by Edwin H. Johnson and Richard B. Franken. The new company will represent a number of out of town manufacturers interested in sheet-metal work and general wrought-iron work.

RAILWAYS

Pennsylvania—New York, Pittsburgh & Chicago Air Line R.R.—[illegible] the central part of Pennsylvania. [illegible]

West Virginia—[illegible] Charleston to Pal[illegible] [illegible]

Norfolk & Western Ry.—This company [illegible] to carry [illegible] West Virginia [illegible] Fork and [illegible]

Texas—[illegible]—Press reports state that this road will be extended to [illegible] Tex.

New Brunswick—[illegible] R.R.—Surveys are [illegible] of extending its [illegible] about 65 miles.

ELECTRIC RAILWAYS

Milford, Mass.—The Milford & Uxbridge St. Ry. plans to extend its lines to [illegible]

Southbridge, Mass.—The [illegible] Consolidated Ry. Co. [illegible] plans for extending its Sand[illegible] line to Southbridge.

Lockport, N. Y.—The Niagara River & Eastern Ry. Co. has [illegible] to the Public Service Commission of New York for [illegible] an electric railroad between Niagara Falls and Lockport, where it is proposed to connect with the Buffalo, Lockport & Rochester Ry. Charles Hickey is Pres.

Philadelphia, Penn.—The Philadelphia & West Chester Traction Co. is [illegible] plans for constructing a line for East Lansdowne [illegible]. It will extend from the terminus at 69th St., then through private right-of-way to [illegible] Lane and Pembroke Ave., East Lansdowne, and then to Stewart Ave. and Lansdowne Ave., making the terminus at Lansdowne and Baltimore Ave., Lansdowne.

Frederick, Md.—The Hagerstown & Frederick Ry. plans to build an electric line to Williamsport, with the possibility of [illegible] from Williamsport and an extension across the [illegible] River into Berkeley County, W. Va.

Shreveport, La.—The Texas-Louisiana Traction Co. is having surveys made on the section of its line between Shreveport and Marshall. The contract for the construction of this line between Shreveport and Monroe has been awarded. This railway will run through Jefferson and Greenville and will connect with the [illegible] line from Dallas. Ultimately this line will connect Shreveport, La., and Jefferson and Longview, Tex., via Mansfield, Vivian, [illegible]hard, Oil City, Mooringsport, Greenville, Monroe and Marshall. A. H. Blevins, Jefferson, is Pres.

Middletown, Ky.—The Middletown & Chester Ry. plans to [illegible] its electric line between Middletown and Chester. Richard H. [illegible] and Gustaf B. [illegible] are interested. This railway will be an extension of the Shore Line Electric Ry. and a separate company has been organized to obtain the charter for this line, which will be known as the Middletown & Chester Ry.

Cleveland, Ohio—The Cleveland & Youngstown Ry. has been granted a franchise by the City Council of Cleveland to make certain grade changes.

Chicago, Ill.—The [illegible] Illinois Ry. & Power Co. will [illegible] start [illegible] its line between Herrin, West Frankfort, Johnston City and [illegible] in Illinois.

Coffeyville, Kan.—The [illegible] Traction Co. will consider [illegible] line from Coffeyville to Centralia.

Bryan, Tex.—The Bryan & Central Texas Interurban Ry. [illegible] plans to build a line from Bryan to Navasota, Tex.

Houston, Tex.—The Houston Electric Ry. Co. has been asked to consider plans for extending its [illegible] from [illegible] to [illegible]. A. T. Kurz is [illegible]

Port Arthur, Tex.—The Port Arthur Traction Co. has [illegible] the City Council for a franchise for the extension of its line from [illegible] to [illegible]

San Antonio, Tex.—The City Council [illegible] a franchise to the San Antonio Traction Co. to [illegible] West [illegible] St., from [illegible] to [illegible] St., also to [illegible]

Walla Walla, Wash.—[illegible]

Ukiah, Calif.—[illegible]

LIGHT, HEAT AND POWER

Burlington, Vt.—[illegible]

Torrington, Conn.—[illegible]

Winsted, Conn.—[illegible]

Albany, N. Y.—[illegible] Albany, for electric wiring for book stacks and reflectors for the New York State Education Building, Albany. Lewis F. Pilcher is State Arch. For further details, see advertisement under "Contracts To Be Let."

✦The Delaware & Hudson Co. has awarded the contract for the construction of a transformer station at Sheridan and Chapel St., Albany, to the HINKIN-CONKEY CONSTRUCTION CO., at approximately $16[illegible]. This new station will be used to transform the power from the Spier Falls plant for the local trolley lines.

South Orange, N. J.—The Board of Trustees has had estimates prepared by John J. Boyd, Engr., for constructing and operating a municipal electric light plant in conjunction with the water-works system. The estimates include: Power plant equipment, $1[illegible]; conduits and manholes, $[illegible]; cables and wires, $11,[illegible]; lamps, brackets, etc., $[illegible].

Freemansburg, Penn.—The Borough Council has granted a franchise to the Freemansburg Electric Light & Power Co. to supply electricity for light, heat and power in Freemansburg and vicinity. It has also awarded a contract to the company to light the streets of the borough for a period of five years. A. H. S. Cantlin is Pres. and Gen. Mgr. of the company.

Paoli, Penn.—The Pennsylvania R.R. is having plans prepared by William H. Cookman, Broad St. Station, Philadelphia, for the construction of a one-story brick and concrete power house at Paoli.

Clarksville, Va.—Bids will soon be received by J. W. Maxey, Town Clk., for the installation of a municipal power plant and lighting system. Bonds for $[illegible] have been voted for the purpose. George W. Rappleyea is Engr. Noted Aug. 27.

Huntington, W. Va.—The City Commission is considering the installation of a power station in the basement of the municipal building to furnish light for the city hall and fire station, and power for the fire-alarm and police-call systems. A. B. Maupin is City Engr.

Tarpon Springs, Fla.—It is reported that the Pinellas Electric Light & Power Co. has applied to the City Council for a franchise to furnish electric light and power.

Cleveland, Ohio—Bids will be received until noon, Dec. 1[illegible], by the Commissioner of Purchases and Supplies, Room 51[illegible], City Hall, for furnishing transformers for the electric-light department. F. W. Ballard is Comr. of Heat & Light Dept.

West Liberty, Ohio—The Public Utilities Commission has granted permission to the West Liberty Light & Power Co. to issue $10,000 in bonds, of which $7500 will be used to purchase the local electric light plant of C. A. Hartzler, and the remainder for improving and extending the system.

Jeffersonville, Ind.—The Indiana State Reformatory, Jeffersonville, is asking for an appropriation of $16,0[illegible] to be used for installing two additional boilers in the power plant of the institution. D. C. Peyton is Supt.

River Rouge, Mich.—Press reports state that the Detroit Gas Co. plans to build the first unit of a gas plant in River Rouge, to cost about $1,500,000. It is said that eventually the plant will cover about 80 acres of ground, and will represent an investment of between $7,000,000 and $8,000,000. V. L. Dewey, Detroit, is Pres. of the company.

Blackcreek, Wis.—At a recent election, the citizens voted in favor of issuing $7000 in bonds, to be used for the installation of a municipal electric light plant.

Manitowoc, Wis.—It is reported that the C. Reiss Coal Co., Manitowoc, has purchased the franchise of the West Side Electric Co., which furnishes electrical service to the west side of the city, and will establish a power plant on its docks.

Oshkosh, Wis.—The Board of Education has [illegible] Henry Auler to prepare plans for the new [illegible] plant to provide light, heat and power for the Central High School and annex, and the Beach Manual Training Institute. D. Witzel is City Clk.

Mondak, Mont.—A company has been organized for the purpose of establishing an electric light plant in Mondak. Ground has been broken for the construction of the power house.

St. Louis, Mo.—The [illegible] Gas Light Co. has taken out a permit for the construction of a power house, estimated to cost $[illegible]

✦**Tipton, Mo.**—The contract for the installation of the [illegible] to the [illegible] HEATING CO., Jefferson City, at about $[illegible]

Dallas, Tex.—The City Commission [illegible]

El Campo, Tex.—[illegible]

Yorktown, Tex.—[illegible]

Lebanon, Wash.—[illegible]

Riverside, Wash.—[illegible]

Seattle, Wash.—[illegible]

tional unit at the Cedar Falls power plant, to cost about $500,000. The plans provide for a third power water main from the new masonry dam and power plant at Cedar Falls, a new building and equipment to increase the capacity of the Cedar River system by 10,000 kw.

Helix, Ore.—A syndicate, headed by the Freuler & Dyer Engineering Co., Walla Walla, Wash., will establish an electric light plant in Helix. The initial unit will consist of a 22-hp. crude oil engine to drive a 20-hp. generator. The plant will be so constructed that additional units may be installed.

Santa Maria, Calif.—The Santa Maria Gas & Power Co. will extend its gas-distributing system from Arroyo Grande to San Luis Obispo, a distance of ten miles.

Newmarket, N. B.—An election will be held, Jan. 4, for the purpose of voting on the question of issuing $15,000 in bonds, to be used for the construction of a new substation.

Shawinigan Falls, Que.—The Shawinigan Water & Power Co., 607 Power Bldg., Montreal, Que., has had plans prepared for the construction of a transmission line extending from Shawinigan Falls to the city of Quebec. Julian C. Smith, Montreal, is Gen. Supt. and Ch. Engr.

Delaware, Ont.—The Village Council is considering the construction of a municipal electric power plant to supply energy for light, heat and power.

Dresden, Ont.—(Official)—No bids will be asked for the construction of the new municipal hydro-electric lighting system, as the work is being done by local forces. J. T. Bridgewater is Town Clk. Noted July 30 and Nov. 26.

Mount Brydges, Ont.—At an election on Nov. 23, the citizens passed a bylaw for securing electricity for general purposes from the Hydro-Electric Power Commission.

Shelburne, Ont.—The rate-payers have approved a bylaw providing for securing energy from the Hydro-Electric Power Commission of Ontario.

Toronto, Ont.—Bids will be received until Dec. 11, by the Toronto Board of Education, for power equipment for the new Central Technical School, including steam engines, generators, switchboard, steam-piping and electrical connections. The Canadian Domestic Engineering Co., Ltd., 47-51 King St., West, Toronto, is Engr. in Charge.

Regina, Sask.—It is reported that the City Council plans to purchase, early next year, a quantity of new equipment for the municipal power plant. E. W. Hull is Mgr. of the plant.

BRIDGES

Concord, N. H.—(Official)—Bids will be received until 5 p.m., Dec. 15, by W. B. Howe, City Engr., for the construction of a 470-ft. bridge over the Merrimack River. Noted Nov. 19 and Dec. 3.

Lawrence, Mass.—The Massachusetts Harbor and Lands Commission has approved the plans for the Central Bridge over the Merrimack River at Lawrence, and construction work will be started at once. The contract for this bridge was awarded last May to Ryan & Keon, Boston, at about $322,000. Noted May 7 and May 28.

Contracts to Be Let

Bids received until Dec. 22, 1914.

Barge Canal Work

STATE OF NEW YORK.

OFFICE OF SUPERINTENDENT OF PUBLIC WORKS.

Albany, November 2[illegible]th, 1914

Sealed proposals will be received by the undersigned at his office in the Capitol at Albany, N. Y., until twelve o'clock noon of Tuesday, December 22nd, 1914, at which place and hour they will be publicly opened and read, for improving the Cayuga and Seneca canal pursuant to the provisions of Chapter 391 of the Laws of 1909, and Chapter 147 of the Laws of 1912 and of the amendments thereto, as follows:

1. CONTRACT C-2.

Cayuga and Seneca Canal—Section 1

For the removal of buildings, etc., at Seneca Falls, N. Y.

Sheet 1.

And for the construction of Barge Canal terminals pursuant to the provisions of Chapter 746 of the Laws of 1911, and of the acts supplementary thereto, as follows:

2. TERMINAL CONTRACT NO. 13

For constructing a guard-lock, highway bridge and cut-off dam at [illegible].

Contract plans, sheets 1 to 12, inclusive.

Plans may be seen and detailed specifications, engineer's estimate of quantities, proposal blanks, form of contract and bonds required and other information for proposers may be had at the office of the Superintendent of Public Works at Albany, N. Y.; at the office of the Assistant Superintendent of Public Works for the Middle Division at Syracuse, N. Y.; at the office of the Assistant Superintendent of Public Works for the Western Division at Rochester, N. Y., and at the canal office, Spaulding's Exchange, Buffalo, N. Y.

Copies of detailed plans or drawings may be obtained from the State Engineer and Surveyor at Albany, N. Y., upon payment to him of the cost of producing them.

On the terminal contract monthly estimates will be paid of ninety per centum (90 per cent.) of the work done at the contract price. Every proposal for said work must be accompanied by a money deposit in the form of a draft or certified check upon some good banking institution in the city of Albany or New York issued by a national or state bank or trust company (in the case of terminal contract), in good credit within the State and payable at sight to the Superintendent of Public Works for five per centum (5 per cent.) of the amount of the proposal except in the case of Contract C-2, which such deposit shall at least amount to $[illegible].

The person whose proposal shall be accepted will be required to execute a contract and furnish bonds within ten days from the date of notice of award delivered to him or them in person or mailed to the address given in the proposal.

[illegible]

Award, if made, will be made to the person or persons whose proposal shall be lowest in cost to the State for doing the work and which shall comply with all provisions required to render it formal. Before any award shall be made the lowest bidder will be required to satisfy the Superintendent of Public Works of his ability to provide suitable equipment and materials for the proper performance of the work.

The right is reserved to reject all proposals and readvertise and award the contract in the regular manner if, in the judgment of the undersigned the interests of the State will be enhanced thereby.

DUNCAN W. PECK,
Superintendent of Public Works

Bids received until Dec. 29, 1914.

Section 17—Main Sewer

PASSAIC VALLEY SEWERAGE COMMISSIONERS

Paterson, N. J.

Notice is hereby given that the Passaic Valley Sewerage Commissioners have designated Tuesday, the twenty-ninth day of December, nineteen hundred and fourteen, at two o'clock in the afternoon, as the time when they will meet at their usual place of meeting, Essex Building, Clinton Street, Newark, New Jersey, to receive proposals, in writing, for the construction of the CENTRAL PORTION of SECTION 17 of the MAIN INTERCEPTING SEWER, in the City of Paterson, in the County of Passaic, in New Jersey.

Particulars that may enable Contractors to judge of the character of the work are given below:

APPROXIMATE QUANTITIES
Central Portion of Section 17

Item 1—Earth Excavation and Refilling, in trench, for 69-inch concrete sewer	[illegible]	linear feet
Item 2—Earth Excavation and Refilling, in trench, for 65-inch concrete sewer	[illegible]	linear feet
Item 3—Earth or Rock Excavation and Refilling, in tunnel, for 69-inch concrete sewer	390	linear feet
Item 4—Rock Excavation, in trench	11,[illegible]	cubic yards
Item 5—Concrete masonry, with Portland cement mortar, in place, in trench	[illegible]	cubic yards
Item 6—Concrete masonry, with Portland cement mortar, in place, in tunnel	[illegible]	cubic yards
Item 7—Brick masonry and appurtenant work, in manholes, with Portland cement mortar	13[illegible]	cubic yards
Item 8—Steel for Concrete Reinforcement in place	1,[illegible]	pounds
Item 9—[illegible] rap, in place	1,[illegible]	long tons

Drawings, form of contract and specifications, and blank form for proposal may be obtained at the Commissioners' office from William M. Brown, Chief Engineer.

The Commissioners reserve the right to reject any or all bids.

PASSAIC VALLEY SEWERAGE COMMISSIONERS.
JOHN [illegible], Clerk.
November 17, 1914.

Bids received until Dec. 14, 1914.

School Bond Issue

[illegible], Pa.

Sealed bids will be received by the Board of School Directors of [illegible] Township, [illegible] County, Pennsylvania, for a fully authorized school bond issue of seventeen thousand (17,000) dollars. The bonds are payable thirty years from their date, but the School District reserves the right to redeem them at the end of [illegible] years from their date. The rate of interest is [illegible]. All bids must be accompanied by a certified check drawn to the order of R. A. [illegible], School Treasurer, for [illegible] of the par value of the bonds for which bid is made. Bids will be opened in the High School at [illegible], December 14, 1914, at 7:30 p.m. Send all proposals to John M. [illegible], Secretary, [illegible], Pa. The board reserves the right to reject any or all bids.

JOHN M. [illegible], Secy.

Construction News

★Denotes work advertised in ENGINEERING NEWS.
+Denotes contract awarded. The names of bidders awarded contracts are set in CAPITALS.

RAILWAYS

+New Jersey—Pennsylvania R.R.—This company has awarded a contract for grading and track work at Camden, N. J., to the JAMES McGRAW CO., Commercial Trust Bldg., Philadelphia, Penn.

Reading, Penn.—The City Council will begin early in January to advertise for bids for lighting the city for a period of years, as the present five-year contract with the Metropolitan Electric Co. expires next April. Charles Marks is City Clk.

Baltimore, Md.—[illegible] will be received until [illegible] by the Board of Awards [illegible] for electrical equipment for the [illegible] station [illegible] Ernest [illegible] Pres. [illegible] of Awards. [illegible]

Logan, W. Va.—[illegible] The following contracts have been [illegible] in connection with the construction of the [illegible] for the [illegible] Light & Power Co.: Power-plant building [illegible] McNULTY, Huntington, W. Va.; [illegible] RIVERSIDE BRIDGE CO., Martins Ferry, Ohio; [illegible] GENERAL CONCRETE CONSTRUCTION CO., New York, N. Y.; general electrical equipment, GENERAL ELECTRIC CO., Schenectady, N. Y.; boilers and superheaters, [illegible] CO., [illegible] Del.; economizers, boiler feed and auxiliary pumps, H. R. WORTHINGTON, INC., Philadelphia, Penn.; stokers, DETROIT STOKER CO., Detroit, Mich.; coal-handling equipment, C. W. HUNT CO., New York, N. Y.; transmission wire, ALUMINUM CO. OF AMERICA, Pittsburgh, Penn. [illegible] for about 60 miles of transmission line, power-plant piping, traveling crane and miscellaneous equipment will be awarded shortly. Francis R. Weller, [illegible] Washington, D. C., is Engr.-in-Charge. Noted July 30, Sept. 17, Nov. 12 and 19.

Farmville, N. C.—The City of Farmville plans improvements to the municipal electric-light plant next year to include the installation of a new engine and generator. T. C. [illegible] is Mayor.

Florence, S. C.—The Carolina Electric Co., recently organized at Florence by D. T. McKeithen, Darlington, Pres.; J. W. [illegible], Darlington, Vice-Pres., and George E. Dargan, Secy. and Treas., has acquired and consolidated the following companies: The Florence Electric & Utility Co., Florence; the Marion Water & Electric Co., Marion, and the Darlington Water & Electric Co., Darlington. The company is capitalized at [illegible].

Westminster, S. C.—It is reported that D. R. Traxler, Greenville, S. C., will construct a hydro-electric plant about three miles from Westminster, to develop 1000 hp. for transmission to Westminster, Walhalla, nine miles away, and [illegible] 12 miles distant.

Carlisle, Ky.—It is reported that the Carlisle Electric Light & Power Co. plans to install a new lighting system and make other improvements to its property. Boon Ingles is Secy. and Mgr.

Scottsville, Ky.—The Scottsville Electric Light Plant has been taken over by J. W. Hood, who has purchased the lease, which has nine years yet to run, from Mays & Schlinker, Glasgow, Ky. No improvements of importance will be made, as the plant was newly equipped a year ago.

Sturgis, Ky.—It is reported that the West Kentucky Coal Co., whose power plant at Sturgis was recently burned at a loss of [illegible], has decided to rebuild the plant.

Bowling Green, Ohio—(Official)—See item under "Water Supply—Irrigation."

Butler, Ohio—The Hicksville Electric Light Co., Hicksville, [illegible], has purchased the municipal electric light plant of Butler for [illegible]. The new owners will operate the Butler system from the Hicksville station.

Cincinnati, Ohio—[illegible] & Co., Fifth St. and Central Av., [illegible] has leased a building at [illegible] St., which will be [illegible] for occupancy. The improvements proposed include additional [illegible] and an electric-light plant to cost about [illegible].

Columbus, Ohio—The City Council is again considering the question of issuing [illegible] in bonds for the purpose of making extensions and additions to the municipal electric lighting system. [illegible] T. Kerr is City Clk.

Kingston, Ohio—The Village Council has granted a 25-year franchise to [illegible] to construct and operate an electric light plant in Kingston.

Huntington, Ind.—The Board of Public Works has awarded the contract for [illegible] and power plant piping at the [illegible] and water-works plant to the W. A. [illegible] CO., Milwaukee, Wis., at [illegible]. Noted Nov. [illegible]

Foxlake, Wis.—The [illegible] Light & Power Co., a subsidiary of the [illegible] Light & Power Co., [illegible] is preparing to install an electric lighting system in Foxlake [illegible] year. [illegible]

[illegible], Iowa—[illegible]

Windom, Minn.—[illegible]

[illegible], Kan.—[illegible]

Thompson Falls—[illegible]

Joplin, Mo.—[illegible]

Paris, Tex.—The Texas Power & Light Co., Dallas, will build a new transmission line to [illegible] from the central power station which it is building at Paris. F. R. Slater, Dallas, is Gen. Supt. of the company.

La Junta, Colo.—The City Council is considering the establishment of a municipal electric light plant. It is said that the question of a bond issue of $7000 for this purpose will be submitted to the voters at the spring election.

Beaver, Utah—The Beaver River Power Co. contemplates the construction of an additional power plant on the Beaver River about five miles below the present plant, to supply the increased demand for electrical service by the various mining companies operating in Beaver, Millard, Sevier and Piute Counties. Several miles of transmission line will be required. A. L. Woodhouse, Richfield, Utah, is Mgr. of the company.

Elma, Wash.—L. H. Burnett, Aberdeen, Wash., has been granted a franchise to construct a gas-making plant and distributing system in Elma. It is reported that the plant will be in operation within a year.

North Yakima, Wash.—The Yakima Central Heating Co. will install an electric distributing system.

Spokane, Wash.—Plans for the construction of a hydro-electric plant on the Pend d'Oreille River, near this city, are being prepared by Hugh Lincoln Cooper, Consult. Engr., Spokane. It is reported that the plant will have a capacity of 35,000 hp. and will cost about $7,000,000.

Baker, Ore.—An election will soon be held to vote on the question of issuing $97,776 in bonds to be used for the construction of a municipal electric light plant and distribution system. If built, the plant will obtain its energy from streams in the water reserve belonging to the City of Baker. Preliminary surveys have been made by L. R. Stockman, Consult. Engr. Noted Nov. 5.

Gold Hill, Ore.—The City Council is considering the installation of an electric light plant. Bids submitted by the California-Oregon Power Co. and the Rogue River Public Service Corporation for constructing and operating the system have been taken under advisement.

Auburn, Calif.—The City Trustees are considering the construction of a municipal electric-light plant.

Los Angeles, Calif.—The City of Los Angeles has asked the State Railroad Commission to fix a price to be paid for the distribution system of the Southern California Edison Co. within the city limits of Los Angeles and certain adjoining territory. The city proposes to acquire these lines by condemnation, to be used for the distribution of the hydro-electric power to be developed in connection with its aqueduct. R. F. Del Valle is Pres. of Bd. of Pub. Ser. Comrs. E. F. Scattergood is Ch. Elec. Engr. for the city.

San Francisco, Calif.—The Board of Public Works has awarded a contract for the installation of heating equipment in the power plant at the Civic Center to DAVIS, ROGERS & CO., at $11,950, and a contract for an underground steam distributing system for the Civic Center to WHITTMAN, LYMAN & CO., at $23,964. Noted Oct. 15 and Nov. 19.

Fraserville, Que.—The City of Fraserville is receiving bids for new turbines to be installed in the municipal electric light plant. E. Talbot is Secy., Treas. and Mgr.

Quebec, Que.—It is reported that the city contemplates municipalizing the light and power service of the Dorchester Electric Co., at an approximate cost of $1,000,000.

Exeter, Ont.—T. H. Carling, Exeter, has been authorized by the Town Council to prepare plans for the installation of a new hydro-electric system for lighting and general power purposes.

BRIDGES

Fort Kent, Maine—Bids will be received until Dec. 31 by the State Highway Commission, Augusta, for the construction of a bridge over St. John's River between Fort Kent and St. Francis, N. B. The substructure, which will be of concrete on spruce piles, is estimated to cost $15,000, while the steel superstructure will cost about $11,[illegible]. Paul D. Sargent, Ch. Engr. of the State Highway Comn., is Engr. in Charge.

Hartford, Conn.—The State Highway Commission has awarded the contract for removing a bridge from [illegible] town to another in Old Lyme Township and constructing wing walls, abutments, etc., to D. F. TOOMEY, South Norfolk, at [illegible]. List of bidders noted Dec. 10.

Niagara Falls, N. Y.—Plans are being prepared by F. S. [illegible]hurst, Jr., City Engr., for a new bridge at Second and Canal St.

Jersey City, N. J.—Thomas J. Wasser, Engr. of Hudson County, has recommended to the Board of Chosen Freeholders the removal of the present Whipple truss deck bridge over the [illegible] R.R. at Summit Ave. and replacing it with a reinforced-concrete structure.

New Brunswick, N. J.—The Board of Chosen Freeholders of Middlesex County has instructed the County Engineer to prepare plans for a bridge of either lift or draw type, to be built at the [illegible] over the [illegible] River at this point.

Northfield, N. J.—(Official)—The Board of Chosen Freeholders of Atlantic County has awarded the contract for the [illegible] Creek, on the road from Northfield to [illegible] Landing, to [illegible] HALDEMAN, [illegible], N. J., at [illegible]. Other bidders were: I. W. [illegible], [illegible]; H. H. [illegible], [illegible]; [illegible], [illegible]; John F. Kable, [illegible], and [illegible] & [illegible]wood, [illegible]. Noted Nov. [illegible]

Somers Point, N. J.—(Official)—The Board of Chosen Freeholders of Atlantic County has awarded the contract for the construction of a bridge over Patcong Creek, near Somers Point, to the ATLANTIC CONSTRUCTION & SUPPLY CO., Atlantic City, at [illegible]. Other bidders were: John F. Kable, [illegible]; [illegible] Construction Co., [illegible]; Hassel, Mauer & [illegible], [illegible]; F. W. [illegible] Sr. Co., [illegible]; J. W. [illegible], [illegible]; Whitaker & [illegible]ehl, [illegible]; [illegible] & [illegible] Co., [illegible]; F. L. [illegible], [illegible]. A. H. Nelson, Atlantic City, is County Engr. Noted Nov. [illegible]

Leesport, Penn.—The citizens of Leesport have petitioned the Board of [illegible] of Berks County to build a new bridge over the Schuylkill River between the townships of

Leesport and West Leesport, replacing the present wood structure which is inadequate for the increased traffic at this point. The old bridge is 170 ft. long and 16 ft. wide. D. K. Hoch, Reading, is Controller of Berks County. Charles F. Sanders is County Engr.

Morgantown, W. Va.—(Official)—Bids will be received until 1:30 p.m., Dec. 28, by the County Court of Monongalia County, for the construction of the South Morgantown Bridge at Morgantown. It will be of reinforced concrete, 150-ft. span, 30-ft. roadway and 8-ft. walks. The estimated cost is $65,000. The Monongahela Engineering Co., Morgantown, is Engr.-in-Charge. Noted May 21.

Shelby, N. C.—The Shelby Northern Ry. Co., S. S. Royster, Pres., will build two bridges on its proposed 21-mile line from Shelby to Casar, N. C. Noted Nov. 26 under "Railways."

+Milton, Fla.—(Official)—The Board of Commissioners of Santa Rosa County has awarded the contract for the construction of two steel drawbridges, one over the Blackwater River at Milton, and the other over the Escambia River near Chumuckla Mineral Springs, to the VIRGINIA BRIDGE & IRON CO., Roanoke, Va., at $24,100. Other bidders were: Austin Bros., Dallas, Tex., $28,300; Southern Bridge Co., Birmingham, Ala., $25,995; Vincennes Bridge Co., Vincennes, Ind., $39,500. Noted Nov. 26.

Eufaula, Ala.—(Official)—Bids will be received until Dec. 29, by the Board of Revenue of Barbour County, Clayton, for the construction of a steel bridge with concrete floor and abutments, over Barbour Creek on the Clayton-Eufaula Rd. Plans on file with W. S. Keller, State Highway Engr., Montgomery, Ala. Noted Dec. 10.

Greenville, Miss.—(Official)—Bids will be received until Jan. 4, 1915, by the Board of Supervisors of Washington County for the construction of 18 steel bridges of from 32- to 70-ft. span, and for three wooden bridges. The Morgan Engineering Co., Goodwyn Institute Bldg., Memphis, Tenn., is Engr.-in-Charge. This work is a part of the development of the Bogue Phalia Drainage District. Noted Oct. 1 and 15.

+Gretna, La.—The Police Jury of Jefferson Parish has awarded the contract for repairing the bridge at East End, on Lake Ponchartrain, to C. M. HALE, Gretna.

Lake Charles, La.—(Official)—Bids will be received until 10 a.m., Jan. 5, by the Police Jury of Calcasieu Parish, for the construction of 66 reinforced-concrete bridges and culverts and a number of wooden bridges and culverts on Highways Nos. 5, 6, 7, 8, 14 and 16. E. C. House is Secy. of the Police Jury.

New Orleans, La.—Plans are being prepared for the construction of a bridge over Bayou St. John at City Park Ave. and a track loop on Metearie Ridge. The cost of these improvements will be shared by the New Orleans Ry. & Light Co., and the Orleans-Kenner Interurban Ry. M. S. Sloan is Gen. Mgr. of the New Orleans Ry. & Light Co.

Elyria, Ohio—The City Council and the Board of Commissioners of Lorain County are considering widening and repairing the East Bridge St. Bridge to accommodate the constantly increasing traffic. The county has about $16,000 available for the purpose, and if this amount is insufficient, the city and the street railway company will be required to make up the deficit. C. M. Theobald is City Engr.

South Bend, Ind.—The Board of Public Works has approved of plans submitted by the Grand Trunk Western Ry. for a new single-track railway bridge to replace the old one at South St. Peter St. William S. Moore is City Engr.

Washington, Ind.—The Commissioners of Daviess and Pike Counties have had plans prepared for the construction of a steel bridge across the White River at Harriman's ferry. The estimated cost is $17,250. Bids will be asked the first of the year, if the County Councils will make appropriations for the purpose. Lewis T. Gootee, Washington, County Surv. of Daviess County, is Engr.-in-Charge.

+Marquette, Mich.—(Official)—The City Council has awarded the contract for the construction of a 60-ft. bridge over the Carp River at Lake St. to the WORDEN-ALLEN CO., Milwaukee. Noted Dec. 3.

Lebanon, Ill.—(Official)—Bids will be received until 10 a.m., Dec. 28, at the office of C. E. Chamberlin, Lebanon, for the following bridge construction in St. Clair County: College Road No. 2 Bridge, O'Fallon Township, 70-ft. span, 16-ft. roadway, steel bridge, concrete abutments, estimated cost, $3350; White No. 2 Bridge, Shiloh Valley Township, 70-ft. span, 16-ft. roadway, steel and concrete, estimated cost, $2780; State Road No. 2 Bridge, O'Fallon Township, 70-ft. span, 18-ft. roadway, steel and concrete, estimated cost, $4075. David O. Thomas, Belleville, is Supt. of Highways for St. Clair County.

+Taylorville, Ill.—(Official)—The County Superintendent of Highways of Christian County has awarded the contract for the construction of a reinforced concrete bridge between Johnson and Taylor Townships to the EAST ST. LOUIS BRIDGE CO., East St. Louis, Ill., at $12,100; the contract for a bridge in Johnson Township was awarded to the CENTRAL STATES BRIDGE CO., Indianapolis, Ind., at $15,596. The Engineer's estimates for these two bridges were $15,350 and $17,000 respectively. Noted Dec. 3.

Columbus, Wis.—Bids will be received until Dec. 18, by the City Clerk for the construction of a 60-ft. plate-girder bridge with concrete abutment and floor.

+La Crosse, Wis.—The Board of Public Works has awarded the contract for repairing the Mississippi River Wagon Bridge, including steel girders, creosoted block pavement and construction of west approach, to the LACROSSE CONSTRUCTION CO., LaCrosse, at $13,940.

Washburn, Wis.—M. W. Torkelson, State Bridge Engr., Madison, Wis., is preparing plans for five plate-girder and I-beam bridges to be built in Bayfield County with state aid. Contracts will not be awarded before spring.

Bemidji, Minn.—See item under Miscellaneous; Metal Culverts.

Breckenridge, Minn.—(Official)—On account of changes in the plans for 10 county bridges, ranging in length from 20 to 26 ft., bids for which were received Dec. 5, the work will be readvertised at an early date P. E. Truax is County Audr. Noted Nov. 26.

Melrose, Minn.—(Official)—Bids will be received until 2 p.m., Dec. 22, by N. Thomey, Audr. of Stearns County, St. Cloud, Minn., for the construction of State Bridge No. 1605 on State Road No. 1. The bridge will be 120 ft. long with an 18-ft. roadway.

Winona, Minn.—Plans are being prepared by L. P. Wolff, Consult. Engr., Germania Life Bldg., St. Paul, Minn., for a new approach to the High Wagon Bridge over the Mississippi River. It will be about 1700 ft. long with an 18-ft. roadway and one 5-ft. sidewalk. The estimated cost is $82,000 for a steel structure, or $100,000 if of concrete.

Anthony, Kan.—Plans have been completed by Harris & Eastham, Engrs., Hutchinson, Kan., for the construction of reinforced-concrete bridges as follows: One of nine spans, 299 ft. long; one of four spans, 88 ft.; one of two spans, 45 ft., and two of one span each, 23 and 33 ft. long, respectively. D. B. Heacock, Attica, Kan., is Chn. Bd. of County Comrs.

Kansas City, Kan.—The Board of Commissioners of Wyandotte County has adopted plans for the new high-line bridge over the Kaw River at Central Ave., Kansas City, Kan. The center span will be 344 ft. long, with two end spans of 200 ft. each. Viaducts at each end will add 1500 ft. to the length of the structure. The channel piers will be of concrete. Plans will be submitted at once for the approval of the War Department and the Kaw Valley Drainage Board. R. L. McAlpine is County Engr. Noted Sept. 24 and Oct. 15.

Turner, Kan.—The Commissioners of Wyandotte County, Kansas City, Kan., have decided to repair the east approach of the Turner Bridge at a cost of about $10,000. The bridge and its west approach were rebuilt about a year ago, costing about $37,000. Noted Oct. 16 and Nov. 20, 1913.

Omaha, Neb.—The United States Supreme Court has confirmed the right of the city of Omaha to enforce the ordinance compelling the Missouri Pacific Ry. to place a viaduct over its tracks on West Dodge St. to accommodate street cars as well as other traffic. According to press reports, construction work will begin soon on a viaduct to cost about $80,000. J. R. Stephens, St. Louis, Mo., is Ch. Engr.

Billings, Mont.—Bids will be received until Dec. 28, by the Auditor of Yellowstone County for the purchase of one issue of $45,000 in bonds, and one of $32,000, the proceeds to be used for the construction of bridges over the Yellowstone River at Pompey's Pillar and across Duck Creek. H. E. Howell is Deputy County Clk. Noted Oct. 16 and 29, Nov. 19.

★Great Falls, Mont.—(Official)—See item under "Federal Government Work"—Bridge.

Kalispell, Mont.—The Commissioners of Flathead County are having plans prepared for the construction of a wood and steel bridge across the Swan River near Swan Lake, and a steel bridge over the Whitefish River about 12 miles from Kalispell. Bids will shortly be asked.

+Victoria, Tex.—The Commissioners Court of Victoria County has awarded the contract for the steel bridge over Coleto Creek to A. A. ALSBURY & CO., Houston, at about $9000. Noted Nov. 26.

Kamiah, Idaho—It is reported that the Northern Pacific Ry. will soon begin the construction of a steel railway bridge to replace the present wood structure, over the Clearwater River at this point. W. L. Darling, St. Paul, Minn., is Ch. Engr.

Ogden, Utah—See item under "Miscellaneous"; Culverts.

+Tacoma, Wash.—The Oregon-Washington R.R. & Navigation Co. has awarded the contract for the steelwork of its new bridge across the city waterway at 15th St. to GERRICK & GERRICK, Seattle, at approximately $30,000.

Chiloquin, Ore.—See item under "Federal Government Work"—Bridges.

San Francisco, Calif.—Jerome Newman, Engr. of the State Board of Harbor Commissioners, is preparing plans for a bridge across the Embarcadero for the use of pedestrians to and from the ferries. It will be of steel with an asphalt runway, 22 ft. high, 12 ft. wide, and will extend from the terminus of Market St. to the second floor of the ferry house. The estimated cost is $15,000.

Annapolis, N. S.—Bids will be received until Dec. 31, for the construction of bridges and culverts in the County of Annapolis. Plans on file at the office of the Road Commissioner, Halifax, N. S., O. S. Miller, Municipal Clk., Bridgetown, N. S., and H. R. McKay, Annapolis.

Toronto, Ont.—R. C. Harris, Comr. of Works, has been instructed to report on the feasibility of building a new bridge at St. Clair Ave. in Moore Park. H. C. Hocken is Chn. Bd. of Control.

★The Commissioner of Works and the Board of Control have recommended to the City Council the awarding of the contract for the construction of the Don Section of the Bloor St. Viaduct to Quinlan & Robertson, Montreal, Que., at $947,076. Bids were opened Oct. 5. Noted June 18 and July 30.

WATER SUPPLY—IRRIGATION

Brookline, Mass.—The citizens contemplate spending $200,000 for the improvement of the water system. A filtration plant is contemplated. Alexis H. French is City Engr.

Easthampton, Mass.—The city plans to meter all its taps, 1259, of which 659 are metered, by 1916, relay small pipe lines and connect dead ends. W. C. Tannant, Jr., is Supt. of Pub. Wks.

+Lynn, Mass.—The contract for supplying 1500 tons of c.-i. pipe for the water department has been awarded to the UNITED STATES CAST IRON PIPE & FOUNDRY CO., Philadelphia, Penn., at $19.13 per ton.

+New Bedford, Mass.—According to press reports the contract has been awarded to R. D. WOOD & CO., Philadelphia, Penn., at $23,000 for c.-i. pipe and specials.

New Britain, Conn.—(Official)—The city plans to complete the high-service system by constructing a 16-in. pipe to the stand pipe in 1915. P. J. Egan is Secy

Wallingford, Conn.—(Official)—The Water Commissioners plan to lay one mile of 6- to 8-in. pipe and construct a 4,000,000-gal. controlling reservoir in 1915 and 1916. William Allackenzie is Supt.

Binghamton, N. Y.—(Official).—The city plans to install a [illegible] system for [illegible] pressure at the water works. [illegible] of Water Wks.

Le Roy, N. Y.—Plans have been prepared by J. P. Wells, [illegible] for a [illegible] system. The estimated cost is $11,[illegible]. Noted [illegible].

✦New York, N. Y.—(Borough of Manhattan).—(Official).—The contract for laying water mains in Third, Madison and [illegible] and East [illegible] St. has been awarded to [illegible] ENGINEERING & CONSTRUCTION CO., at [illegible]. Noted Dec. 10.

[illegible] (Official).—Bids were received [illegible] W[illegible] Williams, Commr. of Water Supply, [illegible] for removing the present [illegible] and erecting a new [illegible] under the water [illegible] of No. 1 W[illegible] [illegible] expansion pumping engine at the Ridgewood North Side pumping station. For removing two boilers and their appurtenances from the M[illegible] pumping station, [illegible] and erecting one in the Woodhaven pumping station and one in the Agawam pumping station with new [illegible] and other appurtenances. Campbell & Seeley, at $[illegible], were low bidders for the work at Ridgewood North Side pumping station, and [illegible] Gersman, at $[illegible], was low bidder for work at the Woodhaven pumping station. Noted Dec. 3.

Saratoga Springs, N. Y.—At a recent election, the citizens voted against the question of issuing bonds, the proceeds of which would have been used for the installation of a filtration plant. Noted Nov. 26.

Sheridan, N. Y.—Bids are being received by the Board of Village Trustees for making additions to the water works pumping plant.

Syracuse, N. Y.—(Official).—The city plans to lay feed and distributing mains to supply a section which will be annexed Jan. 1. W. T. Wooley is City Engr.

Robbins & Myers Co., Springfield, Ohio, advises us that newspaper reports about the damage to its plant by fire were exaggerated. The electrical plant was not damaged, and there will be no interference in filling orders for motors, generators and fans. Arrangements have already been made with manufacturers in the vicinity for the use of their foundries until a new one can be built. The only delay which will be occasioned will be in transferring patterns from the present plant to the new foundries. Work was started Monday cleaning away the débris, and a modern foundry will be built. The loss was entirely covered by insurance.

BUILDINGS—Continued from page 372

Athol, Mass.—[illegible]

+Boston, Mass.—The contract for the construction of a [illegible] has been awarded to [illegible] Ave. It will [illegible]

+The contract for the construction of a Nurses' Home, [illegible] Infirmary [illegible]

Holyoke, Mass.—[illegible] Help [illegible]

Providence, R. I.—[illegible] has been [illegible]

+Providence, R. I.—The contract for [illegible] JOHN & FLYNN [illegible]

The City Council has appropriated [illegible] for the construction of [illegible] Mayor [illegible]

[illegible] will build a school on [illegible] The building will be of brick, stone and steel, five stories and basement. [illegible]

+Greenwich, Conn.—The contract for the construction of the [illegible] building has been awarded to JACOB ZIMMERMAN, [illegible] New York, N. Y. It will be [illegible]

New Haven, Conn.—Bids will be received about Feb. 1 for [illegible] to the building [illegible] Hospital Association. L. W. Robinson, [illegible] Church St., is a [illegible] Noted Dec. [illegible]

+Norwalk, Conn.—The contract for a two-story school on [illegible] Ave. has been awarded to H. W. MATHER, Norwalk. Noted Oct. 1.

Dunkirk, N. Y.—James L. Droken, Mgr. Droken Theater, [illegible] Ave. and will erect theater to cost about $[illegible]

New York, N. Y.—(Borough of Manhattan)—Plans are being drawn by Lewis F. Pilcher, State Arch., Albany, N. Y., for a three-story [illegible] hospital on Ward's Island. The New York State Hospital Commission will have charge of the work, [illegible]

+(Borough of Brooklyn)—Contract for additions and alterations to [illegible] has been awarded to FRYMIER & HANNA [illegible] Manhattan. Noted Dec. 3.

(Borough of Brooklyn)—The Maternity Hospital Society of [illegible] New York has been incorporated to secure funds and build a hospital in that section. Of the [illegible] has been subscribed. Dr. [illegible], 329 Stone Ave., East New York, is interested.

(Borough of Bronx)—Bids will be received about Jan. 15 for the four-story [illegible] hospital for the Bronx Hospital Association. Louis A. Abramson, 220 Fifth Ave., is Arch. Noted Oct. 1.

(Borough of Manhattan)—Bids were received [illegible] by the Board of Trustees of the Bellevue Hospital, for alterations to the main building of Harlem Hospital, as follows: [illegible]; Andrews Bldg. Co., $[illegible]; [illegible]; Wm. H. Egan, $[illegible]; Marble [illegible]; A. W. King, $[illegible]; Lincoln Steel, Fleming Co., $[illegible]

Rochester, N. Y.—The Knights of Pythias are considering building a $[illegible] temple. [illegible] has the matter in charge.

White Plains, N. Y.—A special committee has been appointed [illegible] Supervisors of Westchester County, to investigate [illegible] plans for a new courthouse. [illegible]

[illegible]

Belleville, N. J.—[illegible]

Camden, N. J.—The Board of Education [illegible]

Cliffside Park, [illegible] N. J.—The Board of Education [illegible]

Jersey City, N. J.—[illegible]

[illegible]

North Bergen, [illegible] N. J.—The Board of Education [illegible]

Summit, N. J.—The Board of Education is [illegible] for the construction of a new [illegible]

Carnegie, Penn.—[illegible]

Scranton, Penn.—[illegible]

Washington, D. C.—Harry Wardman, 1416 K St., has had plans prepared by F. B. White & Co., 1412 14th St., N. W., for four [illegible] to cost about $[illegible], three to be located at [illegible] and one at 18th and Swann St.

Richmond, Va.—The City has commissioned Carneal & Johnston, [illegible] Archs. for the municipal building. The plans call for a structure divided in three sections and calling for a library, auditorium, five courts, lecture rooms, etc. The cost will be over $[illegible]

Savannah, Ga.—Bids will be received by Robert M. Hicks until Dec. 12 for erecting the hotel on Congress St. Noted Sept. 17.

Clearwater, Fla.—The lowest bid submitted to the County Commissioners for erecting the court house, was that of the [illegible] Construction Co., [illegible], Fla., at $146,[illegible]

Louisville, Ky.—Four stories will be added to the Tyler Hotel and the front will have an addition of [illegible] ft. The present building is eight stories. N. Bower is Mgr. of the hotel.

Plans are being prepared by John Bacon Hutchings, [illegible], for a Y. W. C. A. building. It will cost $[illegible] and be located at Broadway and Second St.

+The contract for the Crescent Hill school has been awarded to GEORGE L. HOMMEL CO., at $[illegible]

Nashville, Tenn.—Press reports state that bids will be received about Feb. 1 for a new medical school and at Vanderbilt University. This will be known as the Carnegie Bldg., will be four stories and cost $[illegible]. Samuel Hannaford & Sons, [illegible] and Sixth St., are Archs.

+Cleveland, Ohio.—The contract for the construction of the eight-story and basement, [illegible]-ft. building for the [illegible] Co., has been awarded to METTLER-GLOYD & CO., [illegible] Ave. Estimated cost, $1[illegible],000. Noted Aug. 13 and Sept. 17.

Hammond, Ind.—Plans are being prepared by Max Turner, Arch., Citizens National Bank Bldg., Hammond, for the construction of a $[illegible] grade school on [illegible] Ave.

Detroit, Mich.—Bids will be received until 1 p.m., Jan. 4, 1915, by the Library Commission, Farmer and Gratiot St., for the excavation and foundation work for the New Main Library. Cass Gilbert, 11 East 24th St., New York, N. Y., is Arch.

Lapeer, Mich.—The Michigan Central R.R. and the Grand Trunk Ry. plan the construction of a [illegible]-ft. freight depot near the Grand Trunk passenger station.

Chicago, Ill.—Erich J. Patelski, Arch., 162 West Washington St., has prepared plans for the construction of a three-story brick store and apartment building, on [illegible] Ave., for R. Kennell, 919 North Fairfield Ave. Estimated cost, $40,000.

Superior, Wis.—Bids will be received about Jan. 1, by [illegible], Arch., 1900 Euclid Ave., Cleveland, Ohio, for the construction of an asylum for the Wisconsin [illegible]. Estimated cost, $[illegible],000. Noted July 16.

Des Moines, Iowa.—Fleming Bros., Inc., plans the construction of a twelve-story fireproof addition to the Fleming Bldg. The estimated cost is $160,000.

Duluth, Minn.—Plans are being prepared by Shutick & [illegible], Archs., for the construction of a four-story apartment at Superior St. and Tenth Ave., E., for the [illegible] Investment Co., of Philadelphia, Penn. Estimated cost, $[illegible]

Minot, N. D.—Olaf A. Olsen plans the construction of a five-story, [illegible]-ft. store and office building on [illegible] St. Estimated cost, $[illegible]

Kansas City, Mo.—The Pratt & Thompson Construction Co. will construct an eight-story building at Tenth and Wyandotte St. for Mrs. Anna M. Mason, [illegible] East Armour Blvd. Estimated cost, $[illegible]. S. R. Tarbet is Arch.

El Paso, Tex.—The County Commission of El Paso contemplates the construction of a $[illegible],000 courthouse and county building.

Prescott, Ariz.—W. H. Day, Interstate Secy., Y. M. C. A., Tucson, and G. C. [illegible], District Secy., Denver, Colo., are contemplating the construction of a $[illegible] Y. M. C. A. building at Prescott.

+Eugene, Ore.—Contracts for the construction of the [illegible] two-story and basement National Guard Armory have been awarded as follows: [illegible] VAN PATTEN, [illegible]; W. KIRK [illegible], Portland, wiring, $[illegible]; VALLEY HEATING & [illegible] CO., [illegible], heating, $[illegible]. Noted June 18.

Auburn, Calif.—[illegible]

Hawthorne, Calif.—W. C. Pennell, Arch., is preparing plans for the construction of a one-story and basement school. Estimated cost, $[illegible]

+Lindsay, Calif.—The contract for the construction of the [illegible] school has been awarded to [illegible] & JOHNSON, [illegible]. Estimated cost, $[illegible]. Noted [illegible]

+Los Angeles, Calif.—The contract for the construction of a [illegible] for the [illegible] has been awarded to the WILLIAM SIMPSON CONSTRUCTION CO. Estimated cost, $[illegible]

San Francisco, Calif.—Bids will soon be received by the [illegible] for the construction of a [illegible] Branch [illegible]

Visalia, Calif.—The [illegible] Building Association, recently [illegible] contemplates the construction of a [illegible] at Visalia.

Guelph, Ont.—The Board of Education contemplates the construction of an addition to the Collegiate Institute [illegible]. Estimated cost, $[illegible]. J. M. [illegible] is [illegible]

+Point Grey, B. C.—Contracts for the construction of the [illegible] have been awarded as follows: [illegible] KYDD [illegible], 1[illegible] Granville St. [illegible]

Railways Allowed Substantial Rate Increase

The Interstate Commerce Commission handed down the Rate Decision on Friday which allowed one hundred railway companies in the East to increase their rates on certain classes of freight. The advance, which will amount to 5% in some cases, will average 3½ to 4%, and mean an increase in the revenue of $30,000,000 to $35,000,000 per year. Decision was affirmed by a vote of 5 to 2, Commissioners Harlan and Clements dissenting.

This decision was the result of reopening the case after the war started. That the war had an influence on the decision is seen from the following extract of the opinion:

"Whatever the consequences of the war may prove to be we must recognize the fact exists; the fact that it is a calamity without precedent and the fact that by it the commerce of the world has been disarranged and thrown into confusion. Collectively they (war conditions) present a new situation."

By many it is argued that the increase in rates is not the important part of the decision, but the change in temper of the commissioners who are aiding the railways by their counsels. That the entire country has changed its opinion of the railway situation is evident from the decision and the referendum vote in Missouri repealing the "Full Crew Law."

Physical Valuation of Railways Criticized—When the valuation work was started Congress appropriated about a million and a half dollars for expenses. Beginning on an entirely new subject, it was to be expected that many mistakes would be made, but it was not contemplated that practically the whole of the first year's work would go to waste, says the "Journal of Commerce." While officials of the Commission would attempt to refute the statement that nothing tangible had been accomplished with the million and a half appropriated by Congress, here are many railroad experts who assert that the work done has proven of very little, if any, use. It is now learned that the Commission is contemplating asking Congress for an appropriation of three million dollars for the physical valuation work during the coming year. The Government, it is said, is not at present in any position to make large appropriations. The European war has reduced the customs revenues and the war revenue tax was placed upon the statute books for but one year.

A number of railroad experts question whether any direct good is to be accomplished by making a physicial valuation of the railroads of the United States. Theoretically it would be a good step inasmuch as the Interstate Commerce Commission might then have some comprehensive basis for making rates, and then it would be easy to establish the desirability of new security issues. But already the physical valuation work has raised a new crop of critics. The theory upon which the Commission is basing this work has been adversely discussed in many quarters. It was the subject of a special report and discussion by the National Association of Railway Commissioners, who convened here last month. The question was raised after obtaining the first cost value of railroad property. How is the Government to establish the present value of this property following many years of usage?

The Physical Valuation Board has provided for a "condition per cent." account, but even this has been criticized as an arbitrary matter and wholly impracticable. In the first place, it was asked, What is the meaning of "condition per cent." If the condition per cent. is fixed at 75 per cent., would it mean that one-quarter of the life of the ties had expired, or that three-quarters of them were as good as it was practicable to maintain them, or that one-quarter of them should be immediately replaced, or that the present value was 75 per cent. of the present cost of laying them, or that the average tie was about three-quarters as good as new. This same question might arise as to any class of property of the railroads.

The schedules of valuation advanced by the Commission might all be discussed just as adversely as the "condition per cent." mentioned herewith. Probably the most important of these items is that of abandoned property. The railroads might reasonably ask the Commission what is to be done with abandoned property. Even granting that it will be comparatively easy to estimate the value of abandoned property, the question still arises, What effect such property is to have on the rate basis? When the property is abandoned for the best interests of the road it appears to be reasonable to suppose that a road should not be compelled to lose on that account. If the reasonableness of rates is to be measured by the physical value of the property used in transportation, the abandoned property still on the hands of the roads should be estimated into this valuation. Furthermore, it was suggested to the Commission that "abandoned property" should be divided into two classes, namely, that property which has been abandoned and sold by the railroads and that property which is no longer used in the business of transportation, but which is still in the possession of the roads.

Higher Ocean Freight Rates

Rates for shipment on the seas have risen in a perpendicular way since the middle of October, and are now higher than before in years. As an example, foreign vessels have recently been chartered to take cotton to Scandinavian ports at a rate of $1 to $1.30 per 100 lb. The rate for grain from the Atlantic seaboard to Liverpool, which was 2¼d. last year, has risen to 7d. Flour, which was 14 cents then has advanced to 26 cents. The National City Bank has received a cable from its Buenos Aires branch, saying that ship owners can obtain very lucrative rates for sailing at that port from January to July, both for steam and sail tonnage. Those familiar with maritime matters predict that a rate of 10s. will be paid for grain shipment before the highest figures are reached. The causes are well known. For example, there are approximately 42,000,000 gross tons of shipping available by the maritime nations. This includes some coastwise trade and also more than 2,000,000 tons on the Great Lakes of the United States. There has been taken from this, since the war started, 3,500,000 gross tons of German and Austrian vessels, which has been inturned at neutral ports, in home waters, or captured. A quarter of a million tons have been lost by British ship owners to the Germans, and perhaps 350,000 tons, vessels of all nations, have been lost by mines. In addition, the British Government has commandeered 500 vessels, with a gross tonnage of 1,700,000, to transport troops from various parts of the world. This makes a total of nearly 6,000,000 tons, or approximately 15% of the world's tonnage available in ordinary times, but at present of no use as far as cargo-carrying trade is concerned. In addition to this, the element of time in making a voyage has a great deal to do with the matter. Vessels are held up for days and even works, in part owing to naval operations.

Navigation is impeded by the restricted use of the wireless, the lack of proper beacons; but more than all of this, there is the fact that a great deal more traffic has to be moved, particularly to Great Britain; where formerly ships were heavily laden on outbound voyages from London and British ports, now they go light, coming back with full cargoes. Considerable difficulty has also been experienced in securing coal at home ports and ordinary coaling stations. Then, too, the price of coal in the Southern Hemisphere and Mediterranean and Asiatic ports is very much higher than at any previous time.

The Steinway Tunnel, a tube extending from Long Island City under the East River to the Borough of Manhattan, New York, will be open for travel April 1, according to a recent statement by Theodore P. Shonts, Pres. of the Interborough, who said a temporary service will be started at that time. Trains from Jackson Ave., Long Island City, will run to a temporary station at 41st St. and Lexington Ave., Manhattan. The tunnel has been practically completed for several years, but never opened because of litigation.

The Bucyrus Co., South Milwaukee, Wis., has just received an order for a levee building machine from the United States Army Engineer's office for the Fourth District. This office is located at New Orleans. The machine cost approximately $44,000. It is reported that another machine of a similar design will be ordered for levee work in the spring.

RAILWAYS

North Carolina—[illegible] R.R.—This company [illegible] from [illegible] to Cape [illegible] N. C.

Georgia—[illegible] R.R.—This company will [illegible] Perry to Macon. [illegible] is Pres.

✚ Alabama—[illegible] & [illegible] R.R.—This company has awarded a contract to THOMAS [illegible] for the construction of a [illegible] from [illegible] Ala.

Louisiana—[illegible] R.R.—This company [illegible] to construct a line from Monroe [illegible] The capital stock is [illegible] and the company is controlled by [illegible]

Illinois—[illegible] R.R.—This company will make the following improvements [illegible] track work [illegible] Contracts have been awarded to the following: [illegible] WINSTON [illegible] WALSH CONSTRUCTION CO., Davenport, Iowa.

Chicago & Illinois [illegible] R.R.—Plans are being [illegible] of this company to connect with the Wabash R.R. [illegible] F. [illegible] 732 [illegible] Ave., Chicago, Ill., is Pres.

North Dakota—[illegible]—Surveys are being made by this company for an extension from [illegible] N. D. to [illegible] Forks [illegible]

Arkansas—[illegible] R.R.—This company [illegible] with the Rock Island R.R. [illegible] three miles north of [illegible] The estimated cost is [illegible]

Colorado—[illegible] R.R.—This company has made [illegible] the Colorado & [illegible] right-of-way [illegible]

Idaho—Oregon Short Line R.R.—The [illegible] of Caldwell, Idaho, are preparing to [illegible] the electrification of this company's [illegible] from Caldwell to [illegible] about 11 miles [illegible] is Chm. Noted Dec. 3.

California—[illegible] Los Angeles & Salt Lake R.R.—Press reports state that this company has applied to government for right-of-way through Angeles Forest Reserve for its proposed line from [illegible] to San [illegible] Surveys have been made. The line would be about [illegible] miles long and would cost about [illegible]

ELECTRIC RAILWAYS

Worcester, Mass.—The Worcester Consolidated St. Ry. Co. is considering plans for the extension of its [illegible] line to [illegible] H. C. Page, Worcester, is Gen. Mgr. Noted [illegible]

Providence, R. I.—The Rhode Island Co. has been petitioned to extend its North Main St. line to the state line in [illegible] A. E. Potter, Providence, is Pres. and Gen. Mgr.

Middletown, Conn.—The Middletown & [illegible] Ry. Co. is considering plans for the extension of its electric railway through [illegible] Higganum and Middletown. [illegible] is interested.

Torrington, Conn.—The Torrington Traction Co. is being organized to construct an electric interurban railway from Torrington to [illegible] are interested.

Batavia, N. Y.—The Batavia Traction Co. is preparing plans for a [illegible] line from Batavia to [illegible] Lake. The line will connect with the [illegible]

Depew, N. Y.—The Buffalo & Depew Ry. Co. is considering plans for the extension of its line [illegible] Depew to [illegible] about six miles. [illegible] is Pres.

Horizon, Fla.—Plans are being prepared by the [illegible] for the construction of about [illegible] miles of new track. [illegible] is Pres. and Gen. Mgr.

New Orleans, La.—The [illegible] Kenner Electric Ry. Co. will build [illegible] in New Orleans.

Somerset, Ky.—The [illegible] Co. recently [illegible] bonds for [illegible] the proceeds of which will be used for the extension of its electric railway from Somerset to [illegible] is Mgr.

Cleveland, Ohio—The [illegible] to extend its [illegible] George L. [illegible] Cleveland, is Gen. Mgr.

The [illegible] has been incorporated to construct an electric railway in Cleveland Heights. The incorporators are [illegible]

The Cleveland, [illegible] & [illegible] Ry. Co. has been incorporated to construct a [illegible] railway [illegible] from the lake front to [illegible] The incorporators are [illegible]

Adrian, Mich.—According to press reports [illegible] for the construction of an electric railway [illegible]

Detroit, Mich.—The [illegible] has been asked to consider plans for the extension of its tracks on the west [illegible] Detroit is Gen. Mgr.

Menominee, Mich.—The Menominee & Marinette Light & Traction Co. [illegible] Manager, [illegible] is Sec. and Gen. Mgr.

Muskegon, Mich.—The [illegible]-Michigan Ry. Co. has secured franchises, right-of-way and terminal properties for its proposed line between Muskegon and [illegible]

Alton, Ill.—The Alton & Eastern Electric Ry. Co. is making arrangements for the extension of the Alton St. line from Alton to the new hospital east of Alton. T. W. Gregory, East St. Louis, is Secy.

Amboy, Ill.—The Lee County Central Electric Ry. Co. [illegible] to build a [illegible]-mile line from Middleburg to Rochelle during 1915.

Cascade, Mo.—The Ozark Valley Ry. Co. has been incorporated to construct an electric railway from Cascade to Williamsville. The incorporators are [illegible] J. T. Long, Kansas City; James K. Cochran, Pana, Ill.; James H. Downes, Assumption, Ill., and G. A. Long, Kenner, Mo.

Argenta, Ark.—The City Council has granted a franchise to the Argenta Ry. to extend its line on Washington Ave. F. W. [illegible], Little Rock, is Vice-Pres. and Ch. Engr.

Calico Rock, Ark.—S. J. Johnson, Calico Rock, and associates are interested in the construction of an electric railway from Calico Rock to Hoxie.

Glendale, Calif.—The Glendale & Montrose Ry. Co. is preparing to award contracts for the construction of an electric railway from Glendale to Eagle Rock.

Los Angeles, Calif.—The City Council will offer for sale a [illegible]-year franchise to construct an electric railway on portions of Brooklyn, Wabash and Evergreen Ave.

Pasadena, Calif.—The Council has granted a franchise to the Pacific Electric Ry. Co. to double-track its line on North Lake Ave. from Colorado to Washington St. J. McMillan, Los Angeles, is Gen. Mgr.

San Francisco, Calif.—Plans are being prepared by M. M. O'Shaughnessy, City Engr., for the construction of the proposed municipal electric railway through Golden Gate Park to the Sunset District.

LIGHT, HEAT AND POWER

Buffalo, N. Y.—The lowest bids received by the Department of Public Works for the equipment of the power and lighting plant for the new Porter Ave. pumping station were those of McIntosh & Seymour, Auburn, N. Y., at [illegible] and [illegible] and McCarthy Bros. & Ford, Buffalo, [illegible] and [illegible]. Francis G. Ward is Comr. of Pub. Wks.

BUILDINGS

(Continued from page 384)

East St. Louis, Ill.—The Maher Commission Co., East St. Louis, has purchased a site at Sixth St. and Missouri Ave., for the construction of an office building. Construction will begin in the spring.

Galesburg, Ill.—Veritas Lodge No. 478 and the First Scandinavian Lodge No. 446, I. O. O. F. will construct a four-story building, estimated to cost, $70,000.

Ottawa, Ill.—Plans have been prepared by Jason F. Richardson, Jr., Arch., for the construction of three fireproof buildings. The group will be known as the Illinois Valley General Hospital. The estimated cost is $75,000.

Springfield, Ill.—The Illinois Centennial Commission will petition the next legislature to appropriate $1,000,000 for the construction of a state building. Hugh S. Magill, Jr., Springfield, is Chn. of Comn.

Madison, Wis.—Bids will be received until 2:30 p.m., Jan. 18, by M. E. McCaffrey, Secy., University of Wisconsin, Administration Bldg., for constructing the superstructure of the addition to the Soils Bldg.

St. Paul, Minn.—The St. Paul Union Depot Co., are having plans prepared for the construction of the $15,000,000 St. Paul Union Depot. E. Pennington, Minneapolis, is Pres.

The St. Paul Athletic Club is planning to construct a $500,000 club house.

+Parsons, Kan.—The contract for the construction of a three-story office building for the Missouri, Kansas & Texas Ry. has been awarded to the WIMMER CONTRACTING CO., St. Louis, Mo. Estimated cost, $50,000.

Kansas City, Mo.—Plans are being prepared for the construction of an addition, as a home for nurses for the German Hospital Association. Estimated cost, $60,000.

Oakland, Mo.—The Ursuline Sisters are planning the construction of a $125,000 seminary for young women, on a site recently purchased.

Temple, Tex.—Bids will soon be received by the Board of Directors of the Atcheson, Topeka & Santa Fé Ry. Employees Hospital, for the construction of a $50,000 addition, at Temple. Noted Aug. 6.

Denver, Colo.—The citizens of Denver are projecting a movement to raise $1,000,000 for the construction of a granite castle and development of the 640 acres of land on Mount Falcon, 15 miles west of Denver. The castle is to be the summer home for the use of the President of the United States. It will be built and presented to the nation by the citizens of the 22 states west of the Mississippi River.

Tacoma, Wash.—The Fry Bruhn Co., 1120 C. St. plans to expend $50,000 on improvements to its building.

Portland, Ore.—Bids will be received about Jan. 1, by McNaughton & Raymond, Archs., for the construction of the five-story, 100x200-ft. Blake-McFall Bldg., on East Ankeny between East Second and East Third St. Estimated cost, $90,000.

Portland, Ore.—Frye & Co., Seattle, Wash., contemplates the construction of a four-story, 50x100-ft. building on Third and Yamhill St. The estimated cost is $75,000.

Portland, Ore.—The School Board contemplates constructing the first unit of the Franklin High School at East 52d and Division St. Estimated cost, $100,000.

F. A. Naramore, Arch., is preparing plans for the construction of the $40,000 Kennedy School on Jessup St.

Salem, Ore.—The State Fair Board will petition the next legislature to agree to the expenditure of $123,638 for the construction of a 159x270-ft., livestock exhibition building.

Los Angeles, Calif.—Plans have been prepared for the construction of a 100x195-ft. building on Central Ave. and Fourth St. for Wells, Fargo & Co. Estimated cost, $100,000.

The Owensmouth Union High School District voted $100,000 in bonds for the construction of a high school.

FILTRATION PLANT, CLEVELAND, OHIO

Bids were received Dec. 8 by the city for the construction of a filtration plant at the Division Pumping Station, from (A) M. L. Bayard, Philadelphia, Penn.; (B) American Water Softener Co., Philadelphia, Penn.; (C) Roberts Filter Mfg. Co., Darby, Penn.; (D) Norwood Engineering Co., Florence, Mass.; (E) Pittsburgh Filter Mfg. Co., Pittsburgh, Penn.; (F) William A. Pope, Chicago, Ill. The item bids were as follows:

	A	B	C	D	E	F
Filter strainer systems (lump sum)	$53,000.00	$50,441.00	$56,738.00	$54,600 00	$55,639 00	$65,992 00
Filter rate controllers (lump sum)	35,000 00	36,916.00	33,084.00	34,200.00	35,295 00	39,325 00
Sample pumps and piping (lump sum)	900.00	1325.00	1229 00	1500 00	1103 00	2640.00
Sand piping and equipment (lump sum)	4000.00	3983.00	3234 00	6500 00	4018 00	6740 00

"Engineering News" Representative in South America

The high altitudes and lack of oxygen at some of the mines in South America have long been noted as being a stumbling block to American engineers. The representative of "Engineering News," Duncan [illegible], who went to South America as a trade scout in September, was overcome, notwithstanding he has had considerable experience in high altitudes. His letter, mailed from Lima, Peru, the last of October, describes his troubles, which should be read with care by those American engineers who contemplate going to that part of the world.

I arrived here Sunday morning from Cerro de Pasco. I would have written sooner, but was not in such physical condition that my brain could work right.

Before going to Cerro de Pasco I was warned to beware of "El Soroche," a sickness caused by a sudden change to high altitudes in the Andes. I took all the known precautions to avoid it, took two days to make the trip, and dieted, etc., but I got it, and I am frank to say it has all other sicknesses that I have experienced [illegible] off the boards. The only persons exempt from it are [illegible] and those who have weak lungs. Not being in that class I got an especially strong attack.

I have lived [illegible] at altitudes of [illegible] ft. above sea level, and thought I would have no trouble.

I am informed, however, that in the Andes, at similar altitudes, that the percentage of oxygen in the air is much less than in other parts of the world and [illegible] for El Soroche.

[illegible] it consists of a [illegible] cough with each full breath one takes, [illegible] "la grippe," all the nerves of the body [illegible], the pulse rises to 120 and stays there day and night. Sleep is out of the question, and one sits up in bed to lessen the [illegible]. Sudden chills and fevers chase each other in and out of your body. There is no cure for it; it either wears off or continues and then one must return immediately to a lower altitude or death results.

At the end of the fourth day, the [illegible] told me I would have to return immediately to Lima, [illegible] to be responsible for the result. [illegible] of the Cerro de Pasco [illegible] as a result of [illegible]. So I came back.

RAILWAY PROSPECTS APPEAR BRIGHTER

E. J. Spence, director of traffic, who has returned from a month's inspection trip over the Southern Pacific lines in Louisiana, Texas, New Mexico, Arizona, California and Nevada, is quoted as follows:

"In Louisiana a good rice crop has been harvested and warehouses are filled with sugar. Texas produced a large cotton crop, but the European war has so curtailed the market and reduced the price that the business of the State has been unfavorably affected. In New Mexico, Arizona and Nevada the mining industry has been crippled by the war, so that some of the mines have been closed down, while others are turning out about [illegible] of their usual output. The most serious effect of these conditions is reflected in the diminished purchases of all classes of merchandise by merchants and consumers and a remarkable decrease in railroad travel. Although California has produced bountiful crops there has been comparatively little new construction or new projects of any character and an enormous shrinkage in travel, especially local travel, which is chiefly attributable to the wave of economy throughout the country that has been inspired by the prevalent feeling of uncertainty about the future of business. The earnings of the transcontinental lines have been further affected by the competition of the Panama Canal, which, of course, has not created new business but has transferred tonnage from the railroads.

"I am of the opinion that decreases in earnings have reached the limit and that after the beginning of the New Year we shall experience a gradual improvement, but this will largely depend upon the attitude of the Government.

"There are two methods by which the railroads can be assisted. First, by being allowed to advance their rates where competitive conditions will permit them to do so; and secondly, by being permitted to make necessary rates to retain their traffic against unregulated competition of steamship lines, without being required to reduce rates on other traffic that is not subject to the same competition, so long as other rates are no more than just and reasonable.

"The Interstate Commerce Commission in finally authorizing increases in rates of the Eastern lines, has responded to an unmistakable public sentiment, but during a long period of suspension the railroads have been deprived of the revenue of which they should have enjoyed the benefit from the date their tariffs were originally filed to become effective. This emphasizes a serious injustice in the provision of existing law which authorizes the Interstate Commerce Commission, upon its own initiative, to suspend any advanced rates that may be filed by the carriers. This responsibility is met by suspending practically all advanced rates, so that even though the increased rates are justified and eventually approved the carriers are usually deprived of the revenue that should accrue to them during the period of suspension. While the President has hesitated to exercise any influence over the findings of the Commission, it is within his power to send a recommendation to Congress to repeal that provision of the law which empowers the Commission to suspend advanced rates. Under existing practice the railroads are considered guilty of extortion until they prove their innocence and may suffer starvation while awaiting the sustenance to which they are eventually found to be entitled.

"My suggestion affords adequate protection to all interests. First, it relieves the members of the Interstate Commerce Commission of the responsibility of authorizing increases in rates, which they are reluctant to assume, and, by permitting the railroads to assume the initiative in rate making, leaves the Commission unprejudiced in future hearings upon complaints of any of the rates involved. Secondly, the power of the Commission to award reparation will assure the merchants the benefit of the former rates from the date they were advanced whenever the Commission, upon complaint, finds that the increases are unreasonable and orders the former rates restored. Finally, it contemplates a simple measure of justice to the railroads in giving them the immediate benefit of the revenue accruing from advanced rates to which they are entitled, without any prejudice to the interests of the shippers."

DORCHESTER TUNNEL, BOSTON, MASS.
